A Sydney telegram states that the Premier of New Zealand is favourable to the issue of a loan of £2,000,000 to be expended in railways and irrigation. Of course he does. How possibly could New Zealand live if it did not borrow for one object or another?

a Mill restarted January 7. *b* Exclusive of yield from Concentrates bought—3,835 oz. in December, 1,396 oz. in January, and 1,320 oz. in February. *c* Loss. *d* Absorbed by Van Ryn Estate Company.

SOUTH AFRICAN CRUSHINGS.

The February crushings are a little disappointing, and for the first time since July show a falling off compared with the preceding month. Excluding outside returns the Rand output for the month was 297,975 oz. against 313,526 oz. for January. This is a reduction of 5 per cent., but February contained three days less than January, representing about 9 per cent. of the output so that the result is not so bad as it looks. Complaint is again made of shortness of native labour, the Robinson group reporting that their mines were worked with only half their necessary complement, while other company's put forward various reasons. The Transvaal Gold Mining and Estates Company had no clean up from its central cyanide works; the Balmoral Company had a delay owing to breakdown of the pump; the new Primrose Company said delay was caused by compressor breakdown; and the Enisberg Company reported delay through repairs to engine. On the other hand the New Rietfontein had its first full result since the resumption of crushing, and the Village Main Reef Company did much better. On the question of profits, however, the result was less satisfactory. The Henry Nourse Jumpers and Treasury Companies made bette profits, more in accordance with their December earnings, but the Geldenhuis Main Reef made a loss of £2,050; and there was a considerable reduction in the profits of the City and Suburban, Crown Deep, Crown Reef, Glencairn, Primrose, Nourse Deep, Rietfontein "A," Robinson, Rose Deep, Wolhuter, and Worcester Companies, besides small reductions in many other cases. In connection with the continued decrease in profits in face of reduced working expenses, it is interesting to call attention to the remarks of Mr. George Albu when presiding over the annual meeting last month of the Meyer and Charlton Company. This gentleman stated that the profit made in 1897 was £18,000 more than in 1896, although the actual yield of the mine had been less. Working expenses had been kept down to the exceptional low figure of 16s. 4d., compared with 23s. 7d. in 1896, 24s. 9d. in 1895, and 27s. 8d. in 1894. This is, we fear, a somewhat exceptional case, otherwise it would be a hard nut for President Kruger and his supporters to crack in connection with their present policy of refusing to lessen the load borne by the gold-mining industry. If other companies have been able to lower their cost of working in anything like the same proportion, it only shows up their reduced profits in a worse light.

Railway Traffic Returns.

ALGECIRAS (GIBRALTAR) RAILWAY.—Traffic for week ended March 12, Ps. 19,740; increase Ps. 2,300. Aggregate from July 1, Ps. 739,024; increase, Ps. 19,813.

BENGAL CENTRAL RAILWAY.—Traffic for week ending February 26, Rs. 25,947; increase, Rs. 9,183. Total from January 1, Rs. 167,774; increase, Rs. 21,546.

BURMA RAILWAYS.—Receipts for week ending February 19, Rs. 2,08,764; decrease, Rs. 16,376. Aggregate from January 1, Rs. 14,49,241; decrease, Rs. 2,73,461.

GREAT WESTERN OF BRAZIL RAILWAY.—Traffic for week ending February 12, $39,146; decrease, $1,265. Aggregate receipts to date $304,516; increase, $31,253.

ALCOY AND GANDIA RAILWAY AND HARBOUR COMPANY.—Traffic for week, March 19:—Ps. 9,500, decrease Ps. 500. Aggregate from January 1, Ps. 118,400, increase Ps. 10,350.

MOBILE AND BIRMINGHAM RAILROAD.—Traffic for first week of March, $7,146; increase, $10. Aggregate from July 1, $261,695; decrease, $5,068.

VILLA MARIA AND RUFINO RAILWAY.—Traffic for week ending March 19, $4,816; decrease, $644. Aggregate from January 1, $48,847, decrease $7,062.

WEST FLANDERS RAILWAY.—Gross receipts for week ending March 20, £2,029; decrease, £16. Total from January 1, £24,149; increase, £597.

WEST OF INDIA PORTUGUESE RAILWAY.—Week ending February 26, Rs. 3,741; increase, Rs. 52.

ASSAM-BENGAL RAILWAY.—Traffic for week ended February 12, Rs. 25,004; increase, Rs. 6,339. Aggregate from January 1, Rs. 1,44,811; increase, Rs. 11,302.

QUEBEC CENTRAL RAILWAY.—Receipts for first week of March $5,024; decrease $1,260. Aggregate from July 1, $51,305; decrease $9,515.

BENGAL DOOARS RAILWAY.—Traffic receipts from January 1 to February 19, Rs. 23,180; decrease, Rs. 6,828.

H. H. THE NIZAM'S GUARANTEED STATE RAILWAYS.—Traffic receipts from January 1 to February 26. Rs. 629,384; increase, Rs. 12,984.

ROHILKUND AND KUMAON RAILWAY.—Traffic receipts for week ending February 19, Rs. 5,637; decrease, Rs. 55. Aggregate from January 1, Rs. 37,161; decrease, Rs. 1,271.

SOUTHERN MAHRATTA RAILWAY.—Receipts for week ended February 26, Rs. 99,276; decrease, Rs. 39,430.

MANILA RAILWAY.—Receipts for week ending March 19, $19,793; increase, $3,175. Aggregate from January 1, $212,080; increase, $51,760.

CLEATOR AND WORKINGTON.—Gross receipts for the week ending March 12 amounted to £1,015, a decrease of £61. Total receipts from January 1, £10,086, a decrease of £698.

COCKERMOUTH AND KESWICK RAILWAY.—Receipts for week ending March 12, £798; increase, £78. Aggregate from January 1, £8,273; increase, £742.

DELHI UMBALLA KALKA RAILWAY.—Traffic receipts for week ending March 12, Rs. 27,300; decrease, Rs. 400. Total from commencement of half-year, Rs. 3,76,300; increase, Rs. 1,37,900.

ANTOFAGASTA AND BOLIVIA RAILWAY.—Traffic receipts for month of February, $353,000; decrease, $67,000. Total from January 1, $657,000; decrease, $178,000.

PUERTO CABELLO AND VALENCIA RAILWAY.—Traffic return for week ended February 11, £958; decrease, £745. Aggregate from January 1, £5,087: decrease, £2,348.

COCKERMOUTH AND KESWICK RAILWAY.—Traffic receipts for week ending March 19, £840; increase, £61. Aggregate from January 1, £8,309; increase, £804.

CLEATOR AND WORKINGTON JUNCTION RAILWAY.—Receipts for week ending March 19, £1,161; increase, £149. Aggregate from January 1, £11,247; decrease, £549.

WESTERN OF SANTA FE RAILWAY.—Traffic receipts for week ending March 19, $50,920; increase, $26,360.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

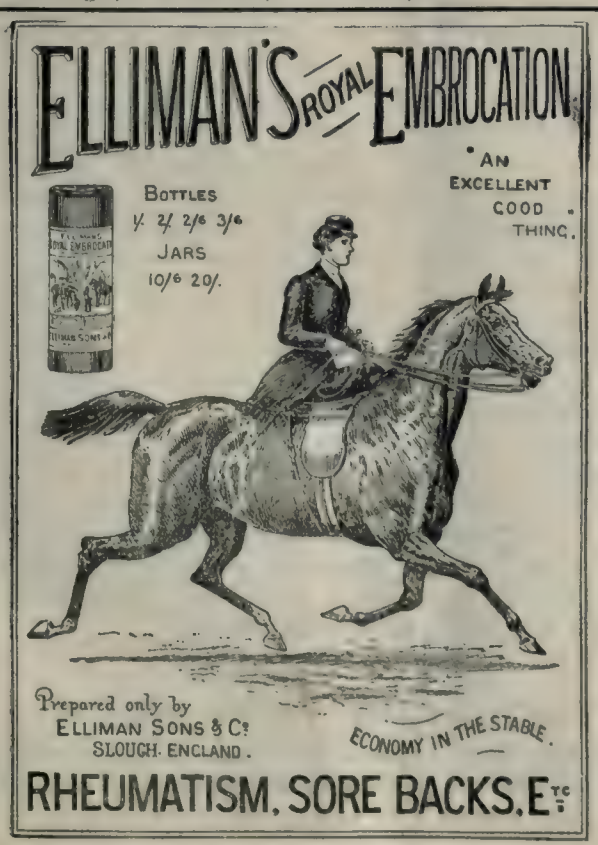
Vol. I.—No. 13. New Series. FRIDAY, APRIL 1, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

NOTICE.—Owing to the Holidays the INVESTORS' REVIEW *will next week be published on Thursday in place of Friday afternoon.*

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.



All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

The National Expenditure.

Few people realise the speed at which the resources of the country are being absorbed by the extravagant expenditure of the present government. What the exact amount disbursed in the year now closed has been cannot be accurately stated until the Budget is produced. There have been so many supplementary estimates, some of which fall only in part upon the income of the year, and there is so much money, voted a year ago, which Mr. Goschen in particular has been unable to get rid of in time, that the exact figures cannot be stated. He did, indeed, say that £1,400,000 could not be paid away within the year because the lock-out of the engineers in the last six months of 1897 had prevented contractors from delivering the materials on order. This estimate might, perhaps, be modified a little by now, as these contractors have been working under tremendous pressure since their men returned from their enforced *chômage*.

Broad facts, however, can be laid before the public and they deserve study. We find, looking back a little, that the average expenditure upon the army and navy for the five years ended yesterday, is at least £9,000,000 more per annum than for the five years ended March 31, 1887. This is a tidy addition to the burden of the people, but it is nothing like the whole truth. In all probability the total expenditure for the year on which we have now entered will be nearer £107,000,000 than £105,000,000. Take it, however, at £105,000,000 and it is £19,000,000 more than the total for 1890. We have

attained to these high figures, be it recollected, in time of peace, and there is no doubt whatever that in reaching them we are doing our utmost to provoke war. There has not been a time, within this generation at least, when the itching for war, somewhere, with some power, has been anything like so violent as it is to-day.

The attitude of a large section of the nation reminds one of a story about a magic sword which recently appeared in one of the lighter magazines. According to this, the man who grasped the handle of that sword became possessed of a passionate desire to commit murder, a desire which could only be quenched in blood; and the horror of the feeling was deepened by the sense of being fiend-driven which the man had. It seemed utterly impossible for him, once he had grasped this magic handle, to let it go again; the spirit in it, as it were, took possession of him and drove him forward to commit murders by an irresistible impulse. And we, as a nation, are getting into much this state, thanks to the constant talking of "preparation for war," and to the constant demand upon our resources for more and more money to be devoted to the providing of unprecedented accumulations of warlike furniture as a means of "preserving peace." Should this fashion go on unchecked much longer, we fear bloodthirsty passions will become irresistible, and a quarrel one day break out between us and some powerful neighbour, with results we shall doubtless live bitterly to mourn.

At present, attention should be concentrated on the ways by which the money for this excessive outlay is found. It is a subject of great interest to the taxpayer, but he has been singularly apathetic about it in recent years, and the source of his apathy lies probably in the fact that comparatively little fresh taxation has been resorted to in order to find ways and means. What has been going on has been the dissipation of immense resources which, in former years, and under guidance of a more enlightened and pacific spirit among rulers and ruled alike, were employed to lighten the burdens of taxation. Two sources have mainly furnished the additional moneys required by the present system of lavish outlay, apart from the natural growth of what we may describe as permanent sources of revenue. These have been the new Death Duties and the Income Tax; and somewhat more than half of the new money has come from the former. That is to say, the income-tax has not been raised since 1895. It was 6d. in the pound from 1889 to 1893 inclusive; in 1894 it was raised to 7d., and 1895 to 8d., where it has stood ever since. We have to go back to 1884 to find it as low as 5d. In that year it yielded £10,718,000. In the last four years it has yielded from £15,600,000 up to nearly £17,000,000. We may consequently say that an average of £6,000,000 per annum in excess of the fivepenny standard yield has been drawn from this source in recent years to assist the Government in its expenditure upon the fighting forces of the country. The sum is large, but it is principally extracted from the pockets of classes in the community which are saturated with the new Imperialism, or collected from profits made by the greatly increased numbers of joint stock companies now in existence, or, yet again, from people of large realised wealth, so that the weight of it has not excited that amount of general discontent which might have been expected. It does not touch the artisan; and thanks to exemption from income tax up to £160 per annum, the great bulk of clerks and minor functionaries in the employment of companies and private firms are either wholly or partially delivered from the impost. In fact, incomes up to £500 a year have the load lightened to them more or less, and therefore the great majority of those who pay the tax do not feel its full weight, and the small minority that do are either powerless to agitate against it, or, from their wealth, indifferent to it.

Equally safe from the efforts of the agitator to produce reform in the direction of economies are the death duties, especially as recognised by Sir William Harcourt. His duties, in fact, constitute a tax upon capital pure and simple. They have been enormously prolific beyond prevision, but they fall on the capital value of estates, and whatever suffering they may cause to inheritors of small properties they, for this very reason, have produced nothing like general discontent. And these duties also have given in the last four years £5,000,000 to £7,000,000 towards meeting the enlarged expenditure of the country, over and above the portion of them assigned to local bodies to encourage their extravagance. It follows from this that the old sources of revenue whose incidence falls upon the community at large have not been disturbed. There have been no additions to the Customs duties nor to Excise, and the yield from these has only increased in a normal way, through the increase in population, or in the well-being of the community. Customs, for example are only about £1,000,000 more now than they have been on the average any time during the last ten or twelve years, and Excise yields very little more now than it did from 1882 to 1885, and rather less than in the years 1876 to 1879. These considerations explain to a large extent the indifference of the country to the way in which the overflowing public revenue is spent, and afford ground for the belief that this indifference is destined to continue, until such time as all the excess resources of Income Tax and Death Duties have been exhausted, and the Government has to fall back upon the indirect duties levied upon the whole population. How long it will be before this critical turning point arrives we dare not prophesy; but the pace we are going at is undoubtedly fast now, and is increasing in celerity, after a fashion which may well excite apprehension in reflecting minds. For it is quite possible that already the revenue from both Income Tax and Death Duties has reached high water mark and that the next few years may see some decline in it. Should expenditure continue to expand as it has been doing, while revenue at the same time contracts a little, we shall very soon be brought to book, and obliged to consider whether a new Customs tariff shall not be set up once more, or whether we shall not quadruple, say, the duty on beer. At no distant day, we may be reasonably certain, the present system of dispersing the bounteous national income, in great prepartions for war, in doles and *largesse* here, there, and in the West Indies, in excessive subventions to this and that, this enterprise or the other, must bring the nation face to face with a revision of its fiscal system. It may do something worse than this, but we need not go further now. Enough has surely been said to set people thinking.

The Triumph of Russia in China.

In one sense it is perhaps fortunate that the minds of the people of this country have to be occupied with the affairs of Empire in so many parts of the globe at one

and the same time. Were it otherwise, and had we been able to concentrate our whole attention upon the far East, the probability is by no means small that we should have so much excited ourselves about the encroachments of Russia in that quarter as to have clamoured for war. Certainly, from some points of view, the position out there is a grave one, and the latest news seems to justify the opinion that our diplomacy has been completely over-matched by that of the Cabinet of St. Petersburg. Not only has Russia obtained Port Arthur but also the neighbouring port of Ta-lien-wan, to both of which places she is now free to build the terminal section of her Trans-Siberian railway.

Nor is this the worst of it. Until the other day Russian officials were displaying an aggressive attitude in Corea. Not so long ago this attitude was pronounced enough to threaten a rupture with Great Britain over the question of the control of Corean finances, at present in the hands of an Englishman. Now all this is suddenly changed. Russia withdraws from Corea, and, rumour has it, allows Japan to have a free hand there. Should this be the truth, and it seems at least probable, the Japanese hostility to Russian aggression in China may now be to some extent abated. Japan could hardly have allowed Russia to obtain the possession of a territory lying at her very doors, and from whose ports the sea of Japan could have been dominated. Holding Corea, therefore, Russia was bound to come into collision with the Japanese, and if war had broken out between these two powers this Spring, Russian prestige in China might have been imperilled, if not for some time destroyed, as the Japanese are splendid fighters and possessed of a more powerful navy than the Russians could send into those waters. By allowing Japan to replace her in Corea, if she likes, Russia has played a master stroke of policy, which may not only remove danger from her path but which also might tend, in time, to wean the Japanese from any desire for other European alliances.

Thus the tendency of Russian diplomacy is to isolate Great Britain in the Far East, and the question our statesmen have to solve is, what attitude we shall assume towards her under the new circumstances. We think it can, at present, be no other than a pacific and friendly attitude. It is not easy, as we have said before, to attempt to fight Russia there, and not much more easy to attempt to checkmate her in diplomacy. She will have her Manchurian railway whether we like it or not, and therefore a sensible course for us to take is to behave with the utmost friendliness to the great northern Power, so as to secure for our commerce plenty of elbow room all over China; and, if spheres of influence are going to develop, we must again repeat the advice that the portions of China which we should commercially keep hold on are the Yang-tze valley and the provinces adjacent. There lie the richest parts of China, the parts most accessible to us, the parts most densely populated also, and therefore those affording the greatest scope to the extension of our trade. We need not go to war about this, all that we have to insist upon, is the opening up of the country at every point where we desire access. Whether we should have an arsenal and fortified posts on various points near the mouths of the river, and commanding the Yellow Sea from the south, such as the principal Chusan islands, is a matter which circumstances must determine, but we are clearly bound to be vigilant in the highest degree to prevent other claimants from coming forward and setting up exclusive "rights" of any sort in the Middle Kingdom. Were France wisely guided, she would join us in demanding and maintaining this liberty. Germany, we take it, must do so.

In the circumstances it is, perhaps, well that our fleet should have been ordered to fit out and to go north; but it is not well that our Secretary of State for Foreign Affairs should be an invalid, and living in the South of France. We have great respect and sympathy for Lord Salisbury and a genuine desire to see him well again and back at the Foreign Office. Yet it is impossible not to agree with the *Times* that he cannot continue both Prime Minister and Foreign Secretary; and, least of all, that he can remain Foreign Secretary when disabled by illness. We stand at what appears to be a most critical juncture in Eastern affairs. Upon the wise, firm, and manly guidance of our policy at the present time towards China, and towards Russian aggressions in China, depend not merely the future of our home trade with that vast empire but the future of India's trade and of the trade of all our Eastern possessions. Can we trust a commission of ministers, presided over by Mr. Balfour, to supply this firmness and wisdom? We cannot, because such an arrangement destroys individual responsibility and promotes rashness, hasty advances, and precipitate retreats. We do not regard Mr. Balfour as a strong man, and he has never given proof of possessing a quarter of the industry of his uncle; yet we had much rather see Mr. Balfour at the Foreign Office, or even Mr. Curzon, than that he and the Duke of Devonshire, Sir Michael Hicks-Beach and Mr. Chamberlain should frame its decisions as a committee with Lord Salisbury as a far away referee. The Duke is easy-going and phlegmatic; both Mr. Chamberlain and Sir Michael Hicks-Beach are quick-tempered and rash in speech and deed. In any division of opinion they are but too certain to prevail over their colleagues of calmer mind, and, being irresponsible as individuals, to decide to meet aggression by agression. What is the fleet moving for if some step of the kind be not in the wind?

Assuming that we must in self-defence at some time or other "lease" a place or places of arms in China, is it expedient that this should be done now, just when the Pekin Government is humiliated in its own eyes and in the sight of the world? We have the gravest doubts about it, because to begin with it is not for our ultimate advantage that the Chinese Government should continue in a state of humiliation. Can it be doubted that were we to forcibly lay hold of any part of China now we should be really playing Russia's game instead of our own, by still further weakening the prestige of an authority it is plainly Russia's object to dominate if not to overthrow? We think not, and therefore conceive that our wisest policy is to commit no act of agression against the Chinese, but rather to lead them to look upon us as supporters of the Imperial power. They should see our strength undoubtedly, but this strength should not be used except to give weight to our requests for the opening up of those parts of the country we desire to trade in. The Chinese might be told that if they furthered British commercial interests in this way, and in allowing railways to be constructed in districts and provinces duly indicated, they would so link their own interests with ours that we

should be compelled to aid them in repelling aggression from other quarters. This is an obligation which would be ours in any case; doubly ours if we "grab" land from the Chinese without leave. We therefore assume no dangerous obligation; or, if dangerous, none which could be avoided if we are to hold the position we do in Chinese trade and keep it open to Indian trade. And for assuming this attitude we might, were it necessary, receive voluntarily the *points d'appui* we require without recourse to threats or demonstrations in arms.

Japan, it is said, means to enter into no embarrassing alliances with any European Power. She will be friendly with all, but make nowhere any sacrifice of her freedom of action. In this she is wise, and her policy is one we should imitate. It is none of our business to quarrel with any European Power or with China, but to hold vigilantly by our own interests in all friendliness to others, setting up no exclusive pretensions, but, at the same time, letting all know that we do not mean to allow our liberty to be interfered with at any point. Holding calmly and firmly to this attitude and promising to stand by the Chinese if they are further put upon, we can afford to wait events. Waiting is less costly to us than to any other power; or at least we can afford better to wait. Any rash step now might precipitate a conflict without defining the position, and we confess we fear this rashness, and that a war may break out which would wind up in a scramble to appropriate the fragments of China, a scramble infinitely disturbing to our interests there, and, in the result, sure to be unprofitable to us.

The Danger of War over Cuba.

People in this country are now beginning to understand why the United States have worked themselves up into such a heat of passion over the Cuban question. We have in great measure been without information as to what went on in the island ever since the last rebellion broke out, except such as came to us from Havanna. What the insurgents were doing, how they lived, what treatment they received when they fell into the hands of the Spaniards—of all these things and many others we have been entirely ignorant. But the people of the United States have known all along what was going on, and from the first a large body of the more humane and intelligent among them have been horrified by stories of cruelty and famine, especially while the garrisoned portions of the island were under the Draconian rule of General Weyler. This rule lasted so long, and did such mischief, that the autonomous policy to be pursued under the new Captain-General has no chance of success. Spain's remedial measures, in short, have come too late. The people of Cuba, although weakened by disease and starvation, will never again submit to Spanish rule in any form. Those of them who have been massed, "concentrated" the official term is, in cities, under the eye of Spanish troops, are dying every week in thousands of hunger and disease, and the people of the United States can no longer stand by indifferent to their miseries.

Before these miseries the *Maine* question falls into the background. Whether the ship was destroyed by a mine in the harbour as the American commission, in a very moderately worded report, have decided, or by the blowing up of one of its own magazines, is not now a matter of such supreme interest in the United States as it was at first. All other sentiments have become absorbed in the passionate determination at all costs to drive Spain out of Cuba.

When a people reaches this heat of sympathy it will go all lengths, and, therefore, we may make up our minds that, although they have long held back from any overt act of hostility, the American people will now compel Mr. McKinley's Cabinet to energetically intervene for the relief of the sufferings of Cubans cooped up in Spanish garrisoned towns, and in all probability this interference will be regarded as an act of hostility by Spain. A declaration of war may follow and the two powers come into collision. This seems inevitable in the present temper of both nations, in spite of the highly praiseworthy endeavour of Mr. McKinley and his Cabinet to reach the desired end—Cuban freedom—by pacific means. Spanish pride will not give way, even when the Spanish conscience knows that it may be doing wrong. Cuba, the last great possession of Spain beyond sea, we sadly fear will not be parted with until it has been once more fought for. There may be temporising and delay for a few days, or even weeks, but the tension is too great to be endured long, and war may break out now at any moment. It is just as well to recognise this fact. In this war, should it come, the people of the Union may, we feel sure, rely upon the sympathies of England. The more we get to know of what has gone on in Cuba during the last three years the more readily will we support the determination to put an end to a state of things which is a disgrace to the end of the nineteenth century, to any modern age.

These last two or three days the telegrams from New York have been less warlike, and we have not the slightest doubt but what the Cabinet in Washington will leave no means untried to preserve peace—no means except one. They dare not now leave Cuba alone. Intervention to mitigate the sufferings of its inhabitants must take place, and the point to be considered is—will Spain submit to this intervention without going to war? We doubt it much. Indeed, our only trust in the maintenance of peace lies in Spain's pecuniary difficulties. Were war to break out between her and the American Union, default upon her debt and the suspension of payment by the National Bank must at once ensue, and create extreme hardship throughout the Kingdom, for the Spanish people and the Bank of Spain together hold, perhaps, three-fourths of the whole country's indebtedness as well as that of Cuba. French bankers have been trying to escape from their commitments in Spain for a long time back, and with considerable success. But a bankrupt National Government would mean early defeat at sea and revolution, or bankruptcy alone might mean revolution without waiting for defeat to come, as come it surely will. Spain can no more hope to beat the United States than it can reconquer Cuba.

Possibly the knowledge of this impotence, a knowledge the Government of the Queen Regent doubtless fully possesses, might prompt Senor Sagasta to accept the United States' terms—freedom to Cuba, plus an annual tribute sufficient to guarantee at least a portion of the Cuban debt. It is assuredly prompting him to temporise with Mr McKinley. Here again, however, it appears to us that he runs great danger of inviting

rebellion at home against the Queen Regent's authority. The Carlists have been intriguing for many years against her, republicanism is by no means dead within the country, and to all political parties, and every variety of discontent, such as hard living engenders—and life has been hard in Spain for a long time, is excessively hard now—a patriotic sentiment against the surrender of Cuba, and against dictation in any shape powerfully appeals. The Spanish Government is thus between the Devil and the deep sea, and in its desperation may resort to desperate measures. Here, we imagine, far more than in the jingo outburst of the least responsible classes among the American people, lies the true risk that the present crisis may end in bloodshed. If Cuba is delivered by Mr. McKinley's intervention the present *régime* in Spain is probably doomed to be short-lived. Should it elect to fight the United States rather than to tamely await destruction from within it, may perish more gloriously, but perish it will. And we fear war.

The Money Market.

Nervousness is always to be deprecated among dealers in banking credit, and we regret to see so much of it at the present time. Prospects, we quite admit, are not so unclouded as we should like to see them ; at the same time it does not strike us that there is anything to be particularly afraid of, unless the market has commitments beyond its strength of whose existence we know nothing. Let us look at what is known. To begin with, the existing pinch, which every few days drives the discount market nearly off its head with flurry and fear, is in the main artificial. The Government holds larger balances at the Bank of England than it ever did before in the whole course of the nation's history. This is a misfortune, but the causes being well known it ought not to fright people, because some of the money thus held up must soon be released. In less than another week the dividends will be distributed, and that alone will afford considerable relief. We should say that it would release the market altogether from tension, were it not for either one of the two following considerations. One is the heavy indebtedness of the market to the Bank of England on loans and bills discounted, an indebtedness which may amount to £8,000,000, and might be considerably more ; and the other is the large unspent and, for the moment, unspendable balances, which the Government will have in hand when the dividends have been paid, and cannot distribute because the bills it is held to meet have not yet come in. The indebtedness of the market is in any case probably greater than all the money it can receive, directly or indirectly from the payment of the Home and Indian Government dividends, and these locked-up balances afford an additional reason why it will remain more or less subject to the Bank during the current quarter. It must be this because it has no spare means to begin with, and because the Government will for some time have larger balances in its possession than usual.

All this may be true enough, but why should we be alarmed at it? In a little time the position must right itself, and, apart from politics, there is nothing ahead of a very dangerous kind to upset credit. The heaviest demand to be immediately met is the new Chinese loan, which will require about £7,000,000 from us within the next month, assuming the Germans able to find all their half of the money. But surely that can be financed without difficulty and, unless India and several of our Colonies come upon us suddenly for large sums before we have digested the Chinese loan, there should be no cause to disturb ourselves. Money will be moderately dear this summer and that seems about all. Commerce is not at present exacting in its credit requirements, and we have, as is insisted on elsewhere, no large volume of speculation carried on in the Stock Exchange. Why then is the market so frightened that a little parcel of gold withdrawn from the Bank for export to New York causes it at once to talk about a 4 per cent. Bank rate, as if that meant chaos? The feeling, we imagine, comes to a large extent from the unfamiliarity of dealers in money with moderately high rates. They have been demoralised by a long course of money at 10s. to 20s. per cent. per annum, and a 4 per cent. Bank rate in prospect has therefore now quite as startling an effect upon their minds as a 6 or 7 per cent. rate would have had ten years ago. Perhaps also, as we have often pointed out, the hidden commitments of private speculators, based upon a continuance of very low rates for money, are excessive, and bankers may be apprehensive of very severe depression in securities should money go higher. We have no doubt this is the case with many of them, and because it is we have frequently insisted that these unwieldy accounts should be liquidated as much as possible while there is time.

There should be time enough gradually to do this before the autumn, and if it is done judiciously and systematically, not only private investors, but insurance companies, banks themselves, and other institutions with large funds to invest, have quite enough resources at their disposal to be able to relieve the market, and prevent anything like serious trouble when real dearness in money does arrive, as it might six months hence. We shall have that dearness without doubt, sooner or later ; everything is making in that direction. In all probability, if the Bank rate is not to be further raised now, or during the summer, through some sudden war-created demand upon the stock of gold, we shall see sensibly higher rates before next winter. Why wait until then before attempting to adjust speculative accounts? It is better to liquidate slowly and without flurry now, when the disposition to invest is still powerful with the community. For no sooner does the Bank rate reach 4 per cent. than the market will become at once haunted with visions of a 5 per cent. rate ahead, and investment business will grow more and more difficult. The wish to buy has moderated considerably already.

Short of a war-produced demand, we do not see any reason why the Bank rate should go up further during this summer. It may not go down ; indeed, we do not think it could very well go down in presence of so many dangerous complications abroad, but it need not go higher. The steady inflow of new bullion from our Colonial possessions should alone be sufficient to guarantee us against any further advance. This being so we trust the money market will calm itself down, and not work under so much nervous tension as has lately prevailed. These excitements are wearing and might become dangerous ; or else, if after a time they prove to be without grounds, they may give place to reckless indifference of consequences more alarming still. After this week the worst should be over for some time to come, and all that the Bank of England will

then be able to do is to exercise a sustaining and steadying influence upon rates, a function necessary on its part at the present time, and one we think sure to be judiciously and carefully exercised by it. The skill and discretion with which it has been managed all through the more acute stages of the present scarcity of banking credit in the open market cannot be too highly praised.

Mr. Lindsay's Patent Currency Plan for India and Administrative Futility.

There is nothing particularly new in it. It has been agitating the British community in India for some time, and has now received the imprimatur of no less a person than Mr. Ottomar Haupt, a gentleman who has boxed the compass in currency theories within the last twenty years. Worse than that, and more serious, there is a belief that the present Chancellor of the Exchequer leans towards the adoption of some such absurdity. What is this scheme? It is nothing less than to establish a gold standard for India, not only without a gold currency, which even lunatics on this question seem now to understand to be impossible, but without a gold coinage of any sort. A patent regulator, to be called a "sterling conversion fund," is, it seems, to be located in London. How this fund is to be raised we do not know, not having seen Mr. Lindsay's pamphlet but only discussions upon it, and Mr. Haupt's letter in Tuesday's *Financial Times*. The only way we can think of in which the money could be found here is by raising a loan of, say, twenty-five millions sterling, with the help of which it might be quite easy to keep up the Indian Exchange to 1s 4d. by simply drawing on the fund to meet Indian indebtedness here until it was exhausted. Then the process could be repeated. This is simplicity itself, but we really do not see how it could help India, nor do we even think anybody else can see it, if in full possession of their seven senses.

Why cannot these nostrum mongers recognise the initial fact that India is overburdened with debt to England and that she has no means to meet it? You cannot establish a suitable currency on a basis of the inability of a nation to fairly and squarely meet its current obligations. Of course, when any discussion arises about this matter in connection with India the bimetallists are to the fore, and Sir William Houldsworth must intervene in the present one with a letter to the *Times*. His effusion is more comic this time than the average, and he confesses himself anxious to fix a minimum point below which the exchange could not go. He should study the evidence taken before the Usury Committee, because he would find there some slight clue to the difficulty of accomplishing this ardent desire of his. When a debtor is hopelessly insolvent he is not in a position to dictate terms to his creditors. It is just thus with India. The people of India have to find about twice as much as they are able to do, one year with another, out of their surplus resources. The bills drawn upon them for this intolerable amount of money are consequently in redundant supply upon the market, and they fall in price accordingly. Vary the simile, and the position is just the same. Would Sir William Houldsworth fix a minimum price for wheat no matter what the harvest was? If he could not, how is he going to fix a minimum price for any other commodity, such as the Council drafts upon India, when the amount of these drafts, which would have to be sold to meet all requirements, often exceeds the entire excess value of India's exports over her imports? Clearly there is a continuous over-supply of paper here, and that state of things could never be remedied by any currency device imaginable by man. Only you never can get a bimetallist or an Indian official to look at this part of the subject. The latter demands 1s. 4d. for his rupee as a minimum, and does not apparently care a hang, so long as he gets it, whether India should go bankrupt or not.

Just look at the hopelessness of securing any statesmanlike handling of this, the most momentous aspect of the subject. Not one single speech delivered in the House of Commons on Tuesday night dwelt upon the real difficulty of India. Mr. Vicary Gibbs became very eloquent in regard to the colossal blunder of closing the Mints in 1893. Lord George Hamilton confessed himself a bimetallist of a quarter of a century's standing. Sir William Harcourt upheld the closing of the Mints, and supported the determination of the Simla Government to establish a gold standard, in defiance of the impossibility to create a gold currency of the slightest utility to the small wants of the poor Indian population; and Mr. Maclean, who knows more about India than any man who took a share in the discussion, alone to some decree lifted the debate above the level of a mere academic currency wrangle. And even Mr. Maclean did not press home the truth as it ought to be pressed, although he was quite right in his opinion that the old system of keeping the Mints open to the unlimited coinage of rupees, without fixing any ratio whatever, and leaving money to find its own level was the best. Indeed, this is the only method by which British India can hope to prolong its existence as an Empire capable in some degree of meeting the excessive burdens laid upon it.

But what hope can we have that the Departmental Committee now to be set to work to investigate and theorise over this question will throw the slightest real light upon it? No Indian official will admit that the borrow and waste policy pursued by the Simla Government, and backed by every Government at home since the Mutiny, is one which is leading India, as represented by the Imperial *Raj*, directly to national insolvency. We should be utterly sick of the whole subject were it not for the appalling consequences certain to flow from the refusal of authorities here and in India to recognise the gravity of the position. As it is, a feeling akin to despair comes over the mind as one beholds this great possession of ours being hurried forward towards a crisis which must involve the continuance of our dominion there. We know quite well that as long as India can continue to raise loans on one pretext or another at the present pace—and altogether she raised nearly £8,000,000 last year without counting what money the railways procured, the amount of which we do not yet know—bankruptcy will be staved off. But let our money market reach a position of great stringency, lasting over many months, and India will not be able to borrow. Then shall we see what all this jabber about a "gold standard," and fixing a "minimum value for the rupee," and whether the mints should be opened or closed, really comes to. One fact which the British public must have driven into its mind is the fact that, one year with another, India is not able out of its own resources to meet charges laid upon it by its extravagant alien Government. As Mr. Maclean reminded

the House, Lord Herschel's Commission pointed out that "under the old system the expansion in the revenue had largely provided for the additional calls which the falling exchange had made on the Government of India," but under the present system this must give way to stagnation and decline. Decline is seen now, and a most serious decline, in the revenue from opium; shrinkage, at least temporary, is to be seen in the land revenue; and if the policy of hoisting the price of the rupee, regardless of consequences and of economic circumstances is persisted in, this land revenue must permanently fall off. Here we have another danger threatening the stability of Indian finance, and nobody in power, nor any responsible politician out of power, seems to have the slightest inkling of the true position. "Fix the exchange value of the rupee" they one and all say, and appear to be destined to say till the trumpet of Doom summons them and their fatuities to judgment.

Electric Lighting Companies.

Further progress in the way of higher dividends is shown by the reports of the leading London companies. Excepting the House to House, all the solvent companies declared substantial dividends that were higher than any announced in preceding years, as the following table shows :—

Companies.	Works Started.	Dividends last Five Years.				
		1893.	1894.	1895.	1896.	1897.
Charing Cross and Strand	1891	4½	4½	5	6	7
Chelsea	1889	5	5	5	5	6
City of London ...	1891	—	2½	5	7	10
House to House ...	1889	—	—	—	—	4
Kensington and Knightsbridge...	1887	5	5	5	7	10
Metropolitan ...	1888	2½	3	4	5	6
Notting Hill ...	1891	—	1	2	4	6
St. James and Pall Mall ...	1889	4½	6½	7¼*	10½*	14½*
Westminster ...	1891	4	5	7	9*	12

* In addition, there were dividends on Founders' shares.

Prior to 1893 few of the companies paid dividends, and those distributed were seldom important. The House to House Electric has not only commenced paying dividends on the ordinary shares, but, having received £11,926 from premiums upon new shares, it has, by its aid and sums from revenue, wiped out the £15,642 of unsatisfactory assets shown in the balance-sheet under the head of Preliminary Expenses and Construction Business Account. It is now in a position to dispose of its profits in the future as it wishes. The County of London and Brush certainly shows a substantial profit for the past year, but it is so mixed up with the realisation of an important holding in a provincial company that we do not treat the money as an ordinary profit. The London Electric Supply Corporation still remains in a comatose condition as a corporation, but we believe that an effort will be made this summer to put its affairs in order. The Westminster Company in the year abolished its founders' shares in a most satisfactory manner, and the St. James' and Pall Mall has just carried through the same operation. Its arrangement is very similar to that of the Westminster, the founders subscribing for £60,000 of ordinary shares as a set off against the extinction of their rights. If profits only keep up to their present level the ordinary shareholders ought to benefit by the arrangement.

Reasons for the satisfactory statements of the companies are abundantly plain when their revenue accounts are examined. In every case a substantial advance is shown in the income, and clearly the companies are reaping benefits from the outlays of previous years. Their record in this respect for the last two years is shown in the following table :—

Companies.	1896.			1897.		
	Total Revenue.	Profit.	Sums put to Depreciation or Reserve out of Revenue.	Total Revenue.	Profit.	Sums put to Depreciation or Reserve out of Revenue.
	£	£	£	£	£	£
Charing Cross and Strand ...	39,118	15,288	5,476	48,914	18,907	5,247
Chelsea	21,355	8,361	2,000	27,382	12,554	2,000
City of London	148,510	64,567	2,612	186,836	88,151	6,529
House to House	17,442	6,431	4,704	20,810	9,033	4,391
Kensington and Knightsbridge	36,332	12,937	7,127	43,910	14,639	8,061
Metropolitan ...	116,459	34,191	13,000	138,267	43,721	15,000
Notting Hill.....	8,552	3,736	1,080	11,625	5,804	1,050
St. James' and Pall Mall	55,939	25,339	10,125	68,269	30,534	9,270
Westminster ...	86,632	40,431	16,100	107,366	49,585	15,371

While the increase in gross revenue is good that in net is better, notwithstanding the fact that there is usually a diminution in the amount received for energy. At the same time the deductions out of revenue on account of depreciation, reserve, &c., have not as a rule grown in proportion, and, indeed, in one or two cases they are even less. This is usually due to the fact that the deduction of amounts requisite to clear off doubtfu assets, such as preliminary expenses, &c., have been finished. Now that this has been accomplished, we should like to see a little more inclination to accumulate reserves. The Westminster is the only one that sets aside an amount each year for sinking fund, and yet all these companies are leasehold undertakings. When the time comes to settle with the local authorities, it is better to have some accumulations to lean upon, than to meet the crisis empty-handed, as the tramway companies did some years back. To establish a fund of this kind at the present time would only entail a small annual allocation, which could be treated as reserve, and would be a handy nest-egg at the end. The report of the City of London claims that £21,866 has been put to depreciation and reserve out of revenue, but as £15,437 of the working expenses were provided either out of capital or premium reserves, we have only credited it with the net amount after deducting this sum. Needless to say the substantial sums put to depreciation each year have had a most favourable effect upon the balance sheets of the companies, which show in most cases more spent upon the undertaking than has been raised in capital, in addition to investments outside the business and a steadily growing balance of debts owing for energy from consumers.

The growing profits of the companies may have aroused anxieties as to the likelihood of pressure being brought to bear from outside which may lead to reductions in dividend. The local authorities certainly have the power, after a company has been seven years at work, to appeal to the Board of Trade for a reduction in the price of energy, but of course in such a case a grievance arising from a monopoly would have to be demonstrated. At present such a grievance cannot be said to exist in regard to electric lighting, for the companies have first to fight the gas companies, and

then to fight each other, since it is almost the rule that more than one company supplies a district. The consequence of such competition is seen in charges that are much below those laid down by statute, and in the following we set this matter out more clearly :—

Companies.	Board of Trade Units sold.		Statutory price per unit.	Actual charge per unit.		Lamps connected, 8 c.p.
Charing Cross	1896.	1897.		1896.	1897.	
and Strand...	1,944,402	2,615,508	8d.	4·70d.	4·40d.	107,542
Chelsea	813,764	1,061,970	10d.	5·88d.	5·77d.	96,638
City of London	5,488,500	6,634,486*	8d.	6·50d.	6·50d.*	296,012
House to House	643,693	811,255	8d.	6·05d.	5·74d.	66,364
Kensington and Knightsbridge	1,514,729	1,898,362	8d.	5·45d.	5·27d.	137,953
London Electric	2,000,000	2,500,000	6d.	—	—	—
Metropolitan ...	4,075,000	5,282,784*	8d.	6·35d.	6·35d.*	360,000
Notting Hill ...	230,787	354,969	8d.	7·65d.	6·91d.	33,000
St. James' and Pall Mall.....	2,404,431	3,028,242	8d.	5·39d.	5·26d.	126,827
Westminster ...	3,503,054	4,355,781	8d.	5·56d.	5·55d.	290,561
	22,608,360	28,543,354				

* Estimated.

We include the London Electric Supply in the foregoing table in order to give the total amount of energy supplied by the companies in London, and we believe its charges are very similar to those of the St. James' and Westminster companies. From the table it will be seen that excepting the City of London and Notting Hill companies, which we believe are in the position of monopolists, the actual charge is well below 6d. per Board of Trade unit, save in the case of the Metropolitan Electric Company. Why the latter should keep to its present antiquated charge is a mystery, for it must invite encroachments upon its area such as it suffered a short time back, and, of course, the Notting Hill openly invites such procedure by its oppressive rate. The City of London is relieved from such vulgar considerations by the protecting shield thrown over its operations by the action of the City Corporation and of Parliament. It has, however, announced a reduction of 1d. per unit in its price, making the nominal figure 7d., but we believe this reduction will not apply to all customers. The majority, however, of the companies can look with indifference to any possible action on the part of local authorities under present conditions, but in their own interest a further reduction may be advisable. The Charing Cross and Strand is the pioneer in this matter, and although it has to meet keener competition than any other company of the group, its sale increased proportionately the most last year. Therefore, reduced prices point to increased consumption, and consequently the companies have a considerable reserve in this direction. We had intended to deal in detail with the operations of the newer companies such as the South London and County of London and Brush, but space will not permit of this in the present article.

Economic and Financial Notes and Correspondence.

The Duke of Fife and Earl Grey on the "Chartered" Company.

Both these noblemen delivered interesting speeches at the annual dinner of the Royal Colonial Institute last Wednesday. The Duke made the confession that he thought the days of Chartered Companies were over—that he thought them an anachronism, in fact—and one regrets that he had not reached this conclusion long ago; for if he has retained a holding in the British South Africa Company's shares, he stands to lose money by them, which would be a pity indeed. But he had parted with a substantial bundle of his once large number of shares in the good "booming" days, and after all he may be able to express his matured convictions in comfort and serenity of mind. Being no longer a director, he naturally had nothing to tell us about the company's finances, over which complete darkness has brooded since April, 1895. But Earl Grey, who was lately Administrator of Rhodesia, and is still an ardent believer in the company and an expansionist of the most enthusiastic kind, by company or otherwise, supplied the omission at one point. He spoke in glowing words about the company's lavishness in developing its territories. "The Chartered Company," said he, "has found £10,000,000 and upwards for developing Rhodesia and making it into what the noble Duke had described from the report."

This is news indeed, and must mean a tremendous bill to be presented by the directors in their forthcoming report. For, as all men know, there has only been £3,500,000 nominal of share capital so far issued, and about £2,000,000 of this went straight into the pockets of the promoters or their associates. They, not the company, or the territory of Rhodesia, grew fat and flourishing on the magical premiums to which these shares went up in response to the buying of imperial enthusiasts. The other million and a half of £1 shares were, true enough, sold at various prices, which brought the company, in the aggregate, £3,750,000, but out of this £750,000 of 6 per cent. debentures were paid off at a first-class "bonus" to such subscribers as had held on to them, or to those who bought them when the market was flat. Another £1,250,000 in debentures was subsequently created and issued at 97½ per cent. and this is all the money we know of that Rhodesia can have had from its company. That is to say, the entire sum available after allowing for the debentures paid off, and for the discounts and premiums on such debenture issues repayment, cannot have much exceeded £4,500,000. Revenue, as we know, down to March 31, 1893, had given nothing for development or any other capitalised purposes in the early years of the company's life, and cannot have done so since, with Matabele rebellions and what not to pay for. Consequently the company must now be in want of about £6,000,000 to pay its accumulated debts, and to go on with, if Lord Grey's figures are correct.

The Dangerous Position of Mauritius.

It is not alone India which suffers from the wonderful currency experiments of the Government. Mauritius has apparently been brought to the verge of universal bankruptcy by it, owing to the disorganisation of business in India, to the dearness of cereals, the low prices for sugar, and the scarcity of money. The banks in the island lately raised their rate of interest to 15 per cent., and their rate for advances on dock warrants to 12 per cent. Not only so, but the oldest and most respected bank the island possesses, namely, the Commercial Bank, established sixty years ago and

always the friend of planters and traders, was obliged to petition the Government for an advance of a million of rupees in order to enable it to tide over a temporary difficulty. The bank was not insolvent; on the contrary it possessed 400,000 rupees in excess of the one-third value of the notes as stipulated by law, and it had large sums of money due to it in Bombay, which it could not get home. Nevertheless it was driven to ask assistance. Apparently, also, one of its neighbours, instead of helping it, did the best it could to throw trouble in its way by collecting its notes and sending them in for payment, locking up the proceeds so as to restrict circulation. Apart from all this, however, the island is unquestionably in a very depressed condition, and its sugar planters are looking anxiously forward to the time when the abolition of bounties by European beet sugar producers may once more give it a chance to live. We are inclined to think that if a more intelligent currency policy prevailed in India, Mauritius might have outlets for her produce in that direction sufficient to enable her to live even were European countries to cling still to their errors. But who can hope for enlightenment in the Indian Government, red taped and routined as it is out of all individuality, a mere slave of the latest word-juggle of which it becomes the captive.

The Greek Loan and Near East Troubles.

Of course the House of Commons made no difficulty about sanctioning the resolution authorising the Government to join with France and Russia in guaranteeing the raising of a new Greek loan. If Greece was to continue in existence at all, this guarantee was essential; but now that it has been granted, the trouble is, not about getting the money—that will be an easy matter—but whether the Turk, when the money is offered him, will agree to begin the evacuation of Thessaly within the time stipulated by the treaty with Greece. We may take it for granted that he will only move on compulsion. He is, no doubt, in a very impecunious condition, has already mortgaged a considerable portion of the war indemnity, and must be anxious to have the whole sum as soon as possible. But Thessaly is to him an exceptionally tempting morsel. It is a fertile territory and was once his own. It will certainly need all the "persuasion" of all the Powers to induce him to leave. The Sultan is fertile in excuses and slippery in action. He may baffle the Concert as he has done before; and, looking to the extraordinary mess the Powers have made of affairs in Crete, there can be no great confidence in their ability to prevent a serious muddle in connection with Thessaly. Sir Michael Hicks-Beach told the House of Commons that the Powers were aware of the risk, and were at one in their determination to compel the Turks to depart. But how long will this harmony and determination last? There's the rub.

Meantime, the muddle in Crete is neither ended, nor are the Powers apparently giving themselves any trouble about it. Germany and Austria have both withdrawn their ships from the island. Whether they have withdrawn from further interference in Cretan affairs seems uncertain. They make no sign. There is even a doubt if the Concert still exists, though Mr. Curzon says it does. The Sultan is using all his arts to induce the Powers to agree to appoint a Turkish subject as Governor. He has suggested several, but so far they have all been rejected, and up to the present Prince George of Greece holds the field—as candidate. Neither Austria nor Germany seems to raise any further objections to his appointment, yet he is not appointed. Perhaps the Powers are too interested in developments in the Far East to care about the miseries of Crete in the Near East; but disturbance in the Near East would be a very troublesome business, and a serious additional complication in a very complicated situation.

And complications may arise elsewhere than in Crete. There is seething unrest in the Balkans. Prince Ferdinand has returned to Bulgaria after a sojourn of three weeks in Vienna. He has seen the Emperor Francis Joseph and has made his peace with him, and no doubt his Majesty has used all his influence to induce the Prince to follow a policy of peace. In some measure evidently he succeeded. No sooner had he returned to Sofia than Prince Ferdinand took means to assure the Sultan that nothing was further from his wish or intention than any disturbance of the peace. The Sultan immediately reciprocated the Prince's good wishes, adding that he, too, was passionately desirous of the continuance of peace. True, he had sent some troops into Macedonia, but that was merely for defensive purposes, to cope with the insurgent bands that so persistently make their appearance in Macedonia during the spring. This pleasing exchange of compliments and assurances is pretty, but it does not change the aspect of affairs in the Balkans. Neither Sultan nor Prince has the decision of war or peace there in his hands. That depends upon their big neighbours, and more particularly Russia. It is quite conceivable that it may also depend in some measure on the course of events in the Far East. What is certain, however, is that there is not a single province in the Balkans that is not eager to spring to arms on receiving the hint "from above."

Indian Viceroy on his Defence.

Lord Elgin seems to have felt the necessity of making some defence of the policy he has recently been carrying out in India. It was but natural. That policy has been so strongly assailed that we can quite understand even an Indian Viceroy feeling it to be incumbent upon him to notice, in some way, the comments of his critics. Yet Lord Elgin really takes us no further than we were before. He regards the forward policy as the only possible one. He denies that the late expedition was a failure. On the contrary, it has thoroughly cowed the tribes, who have, he says, confessed their defeat, and paid every rupee, and every rifle, demanded of them. About the paying up there is probably no mistake. The tribes have been beaten for the present. They could not help themselves. But that the hillmen have ceased to look forward to a possibility of revenge we do not believe. As will be seen from the subjoined extract Lord Elgin hardly believes it himself:—

> The task of the Government is not easy in the near future. However cautious and sympathetic our policy, outbreaks must be expected from time to time, and they must be promptly and vigorously suppressed and punished. But I think that in this policy lies the best hope of peace, because it is founded on reason and justice, inasmuch as, on the one hand, while abstaining

from arrogant assertion of authority, it does not shut out from hopes of improvement and progress men whose chief fault is that they have never come under civilising influences which established peace and order bring with them, and, on the other hand, it recognises that it is one of the first duties of the Government to adapt the measures it undertakes to the resources of the country.

Just so. Lord Elgin admits that there must be trouble in the future. The tribes did not ask for our interference; they resented it, and fought in defence of their independence. We have advanced our frontier far over the hills—made it almost conterminous with Afghanistan. We shall have to keep numerous strongly guarded military posts for the observation of the Afridis. There will be constant skirmishes; there may even be complications with the Ameer of Afghanistan, who cannot be expected to relish our breaking down the barriers which have hitherto separated us from his dominions. All this has been done by the Imperial Government in the name of India; but the only result for her is the accumulation of taxes and debts which she can never pay. Nor is even that the worst; for her trade and industry are embarrassed and crippled in every direction by these mad expeditions in search of a "scientific frontier" which can be defended only at a cost which would mean ruin to the country.

The Mines Contract Company.

We regret that by an inadvertence in our last week's comments on the case of Kays *v.* Hess we included the name of the Mines Contract Company in the list of companies promoted to take over the Khana Concession. The real fact of the case was that this concession was offered to the Mines Contract Company, but owing to the title the directors refused to have anything to do with it. This company has been in existence since 1888, and stands in an entirely different category from the others included in the list, into which, by mistake its name had crept.

"Another Irish Muddle."

The subjoined corrects a blunder which should not have escaped us last week:—

arch 29, 1898.

Sir,—In a letter of mine in your issue of the 25th inst. by an error of the printer, or of mine, I am made to say that the local taxation is from 1s. 3d. to 1s. 2d. of the rental. It should have been from one third to one half of the rental. There are places where the local taxation on agricultural holdings is from six to over twenty shillings per statute acre. Local taxation has been steadily increasing in Ireland, while in England it appears that rural rates have been continually decreasing.—Your obedient servant,

An Irishman.

Uruguayan Debt and Trade.

It is not perhaps a bad sign for Uruguay that even now in the first flush of his great success Senor Cuestas finds the number of his critics—captious and otherwise—increasing rather than diminishing. It is also to his credit that, virtual dictator though he be, he seems in no way to interfere with the freedom of these critics. They are allowed to speak openly, and they seem to avail themselves of this liberty with the utmost frankness, to say the least. If, however, the statements made by his friends as to the condition of the Republic be anything like correct, he and his council do quite right in devoting their energies to the promotion of economy in the public service, while disregarding the accusations levelled at them of having been actuated by selfish ambition, and so forth. There is ample scope for the exercise of their zeal in economic savings; and they must have already enormously diminished the current public expenditure by the reduction of extravagant salaries and the dismissal of officials whose only duty seems to have been to draw their handsome pay monthly. But there are extravagances which cannot be removed or mitigated so easily. There is the public debt, for example, the official statement of which up to December 31, 1897, has been issued. At that date the total debt was $120,765,097, or close upon £25,000,000 sterling. Taking the population of the Republic at 843,000 odd—though that is only an estimate, officials having had no time or inclination in recent years for the taking of a census—this gives us a public debt of about $143, or almost £31 per head of the population, an amount that gives Uruguay a very respectable position indeed among debt-loving Governments.

Then it must be remembered that this debt has all been accumulated in about 40 years—the larger portion of it within the last 24 years. In 1860 it amounted to the modest sum of $2,726,000; in 1874 it had grown to the very respectable total of $42,000,000 odd, leaving $79,400,000 as the accumulation of the last 24 years, the time during which what is called the "Collectivist" faction was in power. Now, judging by the trade returns, this enormous increase in the public debt was not induced by any falling off in business. Last year the exports exceeded the imports by about $10,000,000. During the previous eight or ten years, at least, the "balance of trade" was favourable to the Republic and from 1891 to 1897 is said to have amounted to about $56,000,000. Yet all this time the powers that were went on steadily adding to the public debt until it has reached the dimensions we have stated. The task before Senor Cuestas and his Council of State is a very onerous one. Their particular Augean stable is peculiarly dirty, and until they have made their progress in cleansing operations sufficiently manifest the credit of Uruguay cannot be looked upon as safe or secure.

British and German Trade.

A careful comparison of the foreign commerce of Great Britain and Germany could not fail to be both interesting and instructive. In most things the Germans have become our most notable rivals, though in some articles, especially certain sorts of machinery, steel rails, and pig-iron, America is cutting in upon both. It is, therefore, most desirable to know with some approach to accuracy how far Germany is making up to us in the commercial struggle. The task has been essayed by Mr. H. Gastrell, our Commercial Attaché at Berlin, in a recent report to the Foreign Office; but, unfortunately, Mr. Gastrell has to confess at the outset that an exact comparison is impossible, in consequence of a somewhat arbitrary division of its foreign trade introduced by Germany, so that its exports of domestic produce and imports for home consumption—that is, what has been known as "special" trade—might be presented distinct and separate. But the official record of Germany's trade for 1897, showing these variations, has not yet been completed. Mr. Gastrell has had, therefore, to estimate what is "special" or distinct from the re-export or "improvement" trade—the trade in dutiable raw materials and partly finished

articles worked up into the finished shape, and sent out of the country again without payment of duty.

As we have said, however, Mr. Gastrell admits that this change of method in arraying their statistics has made an accurate comparison of values practically impossible. Some broad results, however, are deduced with a sufficient approach to accuracy to be useful. For one thing, it seems to be shown that generally, as we have before seen exemplified in reports on particular countries, British trade has been diminishing, while German trade has been advancing. The diminution is not to be called serious, or such as to excite alarm, nor can it be yet regarded as a permanent feature in our trade comparison with Germany. But last year our exports decreased about 2·4 per cent., while those of Germany increased rather over 1.3 per cent. The total value of British domestic exports is still nearly one-third greater than those of Germany. The net difference in value of these exports has always been largely in favour of Great Britain, but this preponderance would appear to be diminishing, though not with what may be called decisive movement. In 1895 the difference was £59,995,016; in 1896 it went up to £63,889,051; but by 1897 it had fallen to £55,702,553.

Although the comparison may not yet be quite exact, there seems no reason to doubt that German traders are advancing upon us. There is still a considerable gap between the two rivals; but so far, it has been diminishing. Whether this diminution will continue at the same rate it is impossible to say. We think it doubtful. It may be that it will yet take a turn the other way. The matter is, of course, in the hands of our traders and manufacturers. We do not see that they need be beaten in the contest—a friendly one, let us always remember, and likely to continue so. If the German chemical and linen trades flourish exceedingly, our iron and steel trade is still far superior to theirs, while our exports of cottons and cotton yarns certainly have not lost their old lead. We have the immense advantage of perfect freedom of trade, though we may now begin to hope that Germany's commercial experience is sufficiently extensive to teach her the folly of protective tariffs; and that we may yet see the fruits of this chastened experience embodied in the new commercial treaty now being negotiated between the two countries.

Brazilian Railways.

We have on several occasions drawn attention to the miserable condition of the finances of most of the Brazilian guaranteed railways. Started originally on a bad basis, the depreciation in the currency has so affected their revenues that the position of most of these is now piteous in the extreme. Three fairly important companies of this class issued their reports during the week, and in the following table we roughly analyse the results :—

	Bahia & San Francisco.	Natal & Nova Cruz.	Recife & São Francisco.
	£	£	£
Revenue	132,105	5,046	201,573
Working expenses	168,932	12,427	191,451
Debit balance	36,827	7,381	*10,122
Guarantee	126,000	43,281	83,305
Debenture interest	—	11,651	5,437
Debenture redemption	—	13,175	14,000
Dividend	90,000	10,874	60,000
Rate per cent.	5 p. c.	4½ p. c.	5 p. c.

* Credit Balance.

Thus only one of the trio was able to meet even its working expenses without dipping into the Government guarantee, and any dividend would have been out of the question if this resource had not been at hand. The Natal and Nova Cruz, in fact, would have been bankrupt without this assistance, for after meeting the debit balance on working and debenture interest little more than half the guarantee was left. The position is all the worse when it is borne in mind that the Bahia and San Francisco and the Recife and Sao Francisco have both raised their tariffs in order to meet the fall in exchange. The right to do this had long been looked for as a means of relief from the strain imposed by a falling currency, but apparently it has not sufficed to bring about an improvement, for the Recife enjoyed the higher tariff for the whole of the year, and the Bahia and San Francisco for nine months. The question naturally arises, What will become of these unhappy lines if the Brazilian Government breaks down in its guarantee? It is going to break down somewhere ere long we may be sure.

The Chartered Bank of India.

It is quite an achievement for this bank to be able to distribute 9 per cent. in dividend for the past year, as its board does not follow the easy-going course adopted by most London banks of paying what they can out of profits and building up the reserve out of premiums upon new issues. The policy adopted, of late years at least—for the history of the bank runs back to 1853—has been to raise the dividend by 1 per cent. when the reserve has been increased by £100,000. Thus in 1880 the reserve rose to £200,000, and the dividend was increased from 6 to 7 per cent. after the lower rate had been paid for five years. By 1889 the reserve had been further raised to £300,000, and accordingly 8 per cent. was distributed for two years, only to drop back to 7 per cent. again for three years, as the reserve had to be dipped into to meet exceptional losses. The sums then taken were replaced, and 8 per cent. was paid for 1894, 1895, and 1896.

The placing of £75,000 to reserve now will raise that fund to £450,000, and so the higher distribution of 9 per cent. is made, with the knowledge that half the distance to another advance is covered. The statement is exceptionally favourable, as last half-year must have been peculiarly trying to Eastern banks, and the Chartered had the additional misfortune of losing the services of its manager, Mr. Forrest, for some part of the time, owing to ill-health. The policy of building up the reserve out of profits has been deliberately adopted, for the bank has the power to issue more capital, despite the fact that it is constituted by Charter.

Our Copper Supplies.

Messrs. Henry R. Merton & Co. send us an admirable table showing the principal sources of our copper supply, with the quantities delivered every year from 1881 to 1897. The figures are in many ways interesting. In 1888, the year of the great boom in copper, when the average price of G.M.B.'s mounted up from £42 3s. in 1887 to £76, the total quantity imported was 258,026 tons, as compared with 223,798 tons in 1887. From 1888 the quantities imported steadily increased. In 1892, for example, it had reached 310,472 tons, and

though there was a drop in the following year to 303,530 tons, in 1894 it again bounded up to 324,505 tons. In 1895 it went on to 334,565 tons; in 1896 to 373,863 tons; and last year it reached the formidable total of 396,728 tons. It is equally interesting to note the sources of our supply; and perhaps one of the most noteworthy in the lot is Japan, which, in 1881, sent us only 3,000 tons, and went on almost uninterruptedly increasing its output until, in 1897, it sent us 23,000 tons. Australia also is becoming a rising competitor in the copper field. In 1881, it sent us 10,000 tons, and after, in the succeeding three years, going up to 14,000 tons, it dwindled year by year until, in 1892, its supply fell as low as 6,500 tons. But then the turn came, and the imports gradually increased until, in 1897, they reached the respectable total of 17,000 tons. But the most remarkable of all is the increase in the supply from the United States. In 1881 they sent us 30,882 tons; but this has been improved upon every year, until, in 1897 it had reached the magnificent total of 216,108 tons. There have been great fluctuations in the average price of G.M.B.'s. From the extreme price of £76 in 1888, it fell in 1889 to £49 10s. 6d.; rose to £54 1s. in 1890; fell to £51 3s. in 1891; to £45 9s. 6d. in 1892; to £43 6s. 9d. in 1893, and reached £40 2s. 6d. in 1894. In the following year it improved to £42 17s. 6d.; went to £47 4s. 8d. in 1896; and last year it reached an average of £49 10s.

In Praise of the Canadian North-West.

A correspondent sends us the following letter in reply to our remarks of last week in reference to the position of the Canadian North-West Land Company. His glorious anticipations will, we trust, be realised, but we should not advise people to "lock up" more than spare cash :—

To the Editor.

Sir,—A few weeks ago an eminent financial contemporary in an interesting article described Canada as the next promising field for investment. Canada certainly has made rapid strides during the past twelve months, politically, commercially, and agriculturally. Politically she has set the mother country a good example in denouncing those absurd German and Belgian treaties, and has shown her independent thought and Imperial aspirations in granting preferential rates to Great Britain.

Commercially she is progressing, as the returns of her banks show, and her agricultural progress is evidenced by the prosperous condition of her farmers.

It is in regard to the last-named part of the subject that I wish to make a few remarks. The English public like a lock-up security, one that, though remaining unproductive for a brief period, is likely soon to double in value.

Such a security, I think, is to be found in the shares of the landed companies of Canada, notably the Hudson's Bay, and the Canada North-West Land Company. The former has a virtual monopoly of the fur trade, has an excellent business (very well managed) as stone dealers, paying a fair dividend from these sources alone. But the great future value of its shares lies in its landed estate, comprising over seven millions of acres, mainly situated in the great fertile belt of the North-West Territories of Canada. The company is pursuing a Conservative policy in regard to its lands, and does not seek to force sales unduly, while every year that passes is adding to their value.

The Canada North-West Land Company possesses about two millions of acres of specially selected land in the most fertile part of Manitoba and Assiniboia, well placed for railway communication with Winnipeg and Montreal on the one hand, and the great grain centres of St. Paul and Minneapolis on the other.

Now it is well known that Uncle Sam has parted with his vast domain, and has not now practically speaking a single homestead of good land fit for settlement. It is true some of the railroads have portions of their land grants still to sell, but two or three years' emigration such as we have seen would swallow up these lands as well, and then there remains only the wheat lands of the Canadian North West for farming emigrants to settle upon.

Already the tide of emigration, which has so long been intercepted by the United States, is now overflowing into Manitoba and neighbouring provinces, with the result that land is now selling at fair prices, where, a few years ago, buyers could not be had at almost any price.

The Canadian North-West Land Company's sales have been doubling themselves in a geometrical ratio for the last three or four years, and it only needs this to be continued for a similar further period for the whole of its lands to be disposed of. Every acre sold increases the value of those unsold; and as the Government homesteads are nearly all taken up, and the railway lands largely sold in the districts where the company's estate lies, the company has almost a monopoly of the good lands in that favoured part of the fertile belt, the South West of Manitoba and Assiniboia. And yet the company's shares sell only about half price. Surely the public has overlooked the great future value—I should say the great immediate future value—of these shares.

The Canadian Land Company is a case in point. It paid much higher prices for its lands, and for many years paid no dividends, but when its lands did come into demand it soon repaid to its shareholders all their capital, with the exception of £1, and for years that £1 share was selling in the market at £90 and over; and even now, when most of the company's estate has been realised, it is quoted at £25 to £27. Why may not history repeat itself—if not fully, yet approximately? *Verbum sap.*

Yours, &c., A—— C——.

THE YEAR'S REVENUE.

Another record broken. The final Revenue accounts for the year ended yesterday show a net increase in receipts by the Exchequer of £2,664,119. During the first quarter the increase was £944,413, the second gave £195,100, the third £260,535, and the last £1,264,071. Truly, these are wonderful results, when we remember that in his last Budget Sir Michael Hicks-Beach estimated that there would be a decrease of £906,000 in the year's revenues. Customs, he considered, would produce an increase of £246,000 and Excise £290,000. The actual receipts give him increases of £544,000 and £840,000 respectively. Stamps are up £300,000 instead of down £350,000. Post-Office receipts give £310,000 more, and Telegraphs £100,000, in place of estimated increases of £34,000 and £50,000. Property and income tax show £600,000 additional, or £350,000 over the Chancellor's estimates. This item gives the large total of £17,250,000 for the year. The most remarkable difference is, however, in the estimate of Estate Duties. A decrease of £1,130,000 was expected, but the receipts give an increase of £270,000. Under this head the total receipts were £15,327,882, of which £11,100,000 went into the Exchequer, and the balance to Local Taxation account.

In short, a grand total of £106,614,004 has been gathered into the Exchequer, and in addition, £9,402,310 have been handed over to local bodies. For the year the nation's income has been £116,016,344, or a total net increase of £3,817,767.

What consolation is there for the taxpayer in all this array of figures? Precious little, we fear. Judging from the estimates of expenditure for the coming year the Chancellor will be able to promise nothing in the way of reduction in taxation. Our Army and Navy want about £43,000,000, other services about £37,000,000, and Debt Charges £26,000,000. Items such as the promised grant to Ireland will make a total estimated expenditure of about £107,000,000. With such a sum to be extracted from the taxpayers, how can any relief be given them? They must be content with visions of glory, and congratulate themselves that they help in producing the largest revenue account in the world.

Minerva Works, Tunbridge, Huddersfield, with four houses adjoining, were sold on Tuesday by Messrs. Eddison, Taylor & Booth, for £13,000. The property is held for a term of 999 years, at a ground rent of £59 2s. 6d. per annum.

The plague has broken out at Jeddah, and several deaths are already reported. There seems little doubt that the epidemic will get to Mecca as pilgrims arrive, and no doubt whatever that some of the returning pilgrims will bring it with them to Europe. Cairo is greatly alarmed at the prospect.

SOUTH AFRICAN MINING NOTES.

Rand Mines.

The annual meeting of this deep level Trust Company has been held in Johannesburg, but it has apparently not supplied the tonic to the Kaffir market which some people expected. A profit of £350,000, equal to 100 per cent., is not so very grand after all on shares standing at 2,800 per cent. premium, and especially when nearly the whole of that profit has had to be reinvested either to assist in financing the subsidiary mines or to support the market by purchases of shares. How this sum has been earned, the cable reports received leave us somewhat in doubt; but from the fact that 68,000 shares in different mines have been disposed of, it must be assumed that the greater portion of the profit is the result of share realisations. And even this is probably not the full extent to which the share holdings have been sacrificed, for it must be remembered that during the past year the company has had to subscribe for its proportion of new capital issued by several of its "baby" concerns, and had not large sales been effected the holdings of shares would have shown large increases from this cause. Take one case as an example. In July 1897, the Crown Deep offered for subscription a certain number of its reserve shares which were allotted to the shareholders at the rate of one share for five. The Rand Mines Corporation possessed, according to its 1896 report, 194,050 Crown Deeps, and would, therefore, by right of these have to take up 38,810 additional shares. But as the holding in this mine, presuming the *Standard and Diggers' News*' cabled report of the meeting is correct, has only increased by 22,800 shares, it is obvious that the balance of 16,010 shares has been sold. No blame, of course, attaches to the directors for unloading portions of their share assets as favourable opportunities occur; but it is plain that the assumption frequently put forward in this journal that the "deep level" market is manipulated to enable these sales to be made, is an accurate one. And as a dividend of 100 per cent. is promised during the present year, it is evident that this process of liquidation must continue, and if anything at even a greater speed than before.

In face of all this it is amusing to find the chairman posing as an injured martyr, and trying to convince the shareholders that the directors "aim at making the corporation a producing one, and not a mere speculation." How do they expect to pay sufficiently large dividends to justify the present quotation for the shares, unless the subsidiary shares are sold at big figures? Certainly the profits earned by the mines will not enable them to do so. Another point which should not be lost sight of is the method by which the profits are arrived at. These South African Mining Trusts are very fond of asserting that all the profits they declare are "realised profits." In a way, no doubt, this is partly true; but these self-same concerns have a convenient knack of valuing their assets at cost, no matter how much they may depreciate on the market.

We are aware that the majority of the Rand Mines' share and claim assets are worth more than they stand in the balance-sheet at; still there are exceptions. Towards the end of last year, if we are not mistaken, the Corporation subscribed for 50,000 or 60,000 Nourse Deep shares, part of a new issue, at the price of £6 10s. These shares are now quoted about £2 per share lower, so that there is a loss of £100,000 on this transaction alone. Has this been taken into consideration in declaring the profit of £350,000? Again a very large loss must have been incurred in connection with the Paarl Central property, a mine which is now working at a loss, and is, we believe, recognised to be unpayable. How has this been dealt with? Reviewing the progress of the actual mining work accomplished by the Corporation in the past year, the directors and managers are entitled to considerable praise. Five of the mines are now producing gold, while several others are nearing the same stage, and the enterprise which has effected this is to be commended. All the greater pity then, that with such excellent properties at command, the directors cannot think more of the mines and less of the market.

The Debts of Deep Levels.

Some time ago, in referring to the financial positions of the deep level mines, we commented upon the very heavy debts which the majority of these concerns have contracted. It may, perhaps, be advisable to now give a few further details. Of the mines now crushing and announcing monthly profits the Geldenhuis Deep has a debenture charge of £150,000; the Rose Deep is mortgaged to the tune of £150,000; the Jumpers Deep is pawned in a similar manner for £350,000; and the Crown Deep owes £80,000. The Simmer & Jack East carries £500,000 debentures; the Robinson Deep, £300,000; the Durban Deep, Vogelstruis Deep, and Witwatersrand Deep, each £200,000; while Rand Mines have £1,000,000 debentures issued with power to create a further £250,000. The Rose Deep has been crushing for five or six months, and the Crown Deep for seven or eight months, and both mines have regularly declared large profits. How comes it then, that they are still so heavily in debt? The profits announced each month by several South African Mining Companies, as we have already pointed out, are more or less illusory, because, instead of the revenue being debited with all expenditure, much of it is being carried to "capital account." This explains why these mines have not yet been able to place themselves in a sound financial condition.

Critical Index to New Investments.

JARRAH TIMBER AND WOOD PAVING CORPORATION, LIMITED.

The Corporation buys various mills in Western Australia, timber yards in the city of Perth, and the West Australian timber business of Palfreman, Foster & Co., of New Broad-street, London, who have carried out contracts for street paving with sundry corporations and vestries in London and the provinces. Various statements—satisfactory and otherwise—are made about profits, but the main idea seems to be that the net profit realisable from an output of 600 loads per week works out at £40,500 per annum, though whether this will be obtainable for any length of time with all these Jarrah wood companies in the field the future alone can tell us. The capital is £250,000 in £1 shares, 150,000 being ordinary and the remainder 7 per cent. cumulative preference, and excepting £35,000 for working capital, the whole of this goes in payment for the property. We see nothing whatever to justify such a price. The board is a weak one, the chairman being connected with four cycle undertakings, including the Automatic Cycle Rack Company, while three other directors are on the board of the Zoroastrian Mining Company. When little is known about a new company it is always as well to study the names on the board. But apart from this our impression of the affair is not favourable.

NEW SCHULTZE GUNPOWDER COMPANY, LIMITED.

This is a conversion of an old company, which is quite the fashionable thing to do nowadays. The original company dates from 1868, and was re-registered in 1892, the capital being £100,000 in £10 shares, of which £60,000 has been issued and paid up; but half of this was only issued last year and paid for out of the reserve fund. Dividends for seven years ended 1888 were 5 per cent.; for 1889, 7½ per cent., for 1890, 15 per cent., and for the last six years 20 per cent. This successful little company is now to expand itself into an undertaking with a capital of £325,000 in £5 shares, in equal parts of ordinary and 5 per cent. cumulative preference shares; and Robert Austen, the vendor, acting between the two companies, has fixed the purchase price at £317,000—all but £100,000 to be cash. Profits for six years are clearly stated, those for 1892 being only £7,380, while for 1895 they were £13,859; for 1896, £19,409, and for 1897, £28,921. Such a sharp increase naturally suggests something very exceptional in the demand and possibly doubts about its continuing have prompted a sale before they run back. Investors can learn from the prospectus what notable triumphs have been obtained by using the powder in that manly sport of pigeon shooting, but they cannot learn anything about the valuation of the properties for which this immense purchase price is to be given; nor, indeed, do we find any reference to assets. However small they may be, they ought to have been given. An increase in the paid-up capital from £60,000 to £325,000 is a little pyrotechnic display not unworthy of the powder.

THOMAS PHILLIPS & CO., LIMITED.

Thomas Phillips, it appears, buys the Diamond Brewery, Dover and the Park Brewery, Camberwell, on what terms is not stated and sells them with his own brewery, known as the Abbey Brewery West Malling, Kent, with seventy licensed properties, of which eighteen are freehold, for £210,000 including £70,000 in ordinary shares. The valuation furnished by Bromley, Son, & Kelday is £215,105, but it is given in one lump sum, and is therefore unsatisfactory, while the same firm report that the net average annual profits for the past two years have amounted to upwards of £12,730, which is no use at all as indicating progress, or otherwise, made by the business. Thomas Phillips appoints himself managing director for three years, and the company has to pay him

for stock-in-trade, loans, and book debts, in addition to the purchase price. The share capital is £160,000 in 16,000 5½ per cent. cumulative preference shares of £5 each, and 80,000 ordinary shares of £1 each. There is also an issue of £100,000 first mortgage debenture stock offered at par, and redeemable on six months' notice after June, 1908, at 105. Sir Edward Sullivan is chairman of the company, which seems to be brought out to benefit Thomas Phillips very much first.

ELECTRIC SUPPLY COMPANY OF WESTERN AUSTRALIA, LIMITED.

This company is formed to take over an established undertaking, already earning profits. The undertaking is no less important than the Westralian Electric Lighting and Supply Company, which works the town of Coolgardie, claiming a population of 20,000 people, of whom very few, we should say, could afford to pay for electric lighting. As to the earning of profits, Chalmers, Wade, & Co., chartered accountants, find that the gross receipts derived from July 10 to December 31, 1897, from the supply of current were at the rate of £6,790 per annum. Allowing 50 per cent. for expenses we get the substantial net profit of £3,395, and this remunerative concern is to be acquired for £70,000 in cash, out of a total capital of £100,000 in £1 shares. The prospectus contains many references in the usual laudatory style adopted when speaking of Coolgardie, and we can only express our disappointment that the gold there is not sufficiently brilliant to light up the town without using electricity.

DR. TIBBLES' VI-COCOA (1898), LIMITED.

This concern is brought out to buy up Dr. Tibbles' Vi-Cocoa, Limited, for £300,000 including £100,000 in cash. It seems to buy nothing very tangible, but it gets leasehold premises, plant and machinery, fixtures, fittings, stock-in-trade, book debts, trade marks, formulæ, and all other assets, including goodwill and £21,801 of liabilities. In the first year, ended November, 1896, the vending company seems to have made a loss of £6,832, but from December 1, 1896, to November 25, 1897, one firm of accountants certifies that the net profits were £72,832, and that for the three months ended February 28, 1898 (the best quarter of the year for this business) they exceeded £25,000, in which certificate another firm of accountants, like the parrot, concurs. Now the original syndicate of two years back had a paid-up capital of £10,000, while the capital of the new creation is £400,000 in £1 shares, half ordinary and half 6 per cent. cumulative preference Such a swelling out almost requires a Harness' Electric Belt to keep it from bursting.

CHADBURN'S (SHIP) TELEGRAPH COMPANY, LIMITED.

The businesses offered for sale are said to have been established over half a century. A Liverpool valuer certifies the total valuation for building, machinery, and stock belonging to Chadburn & Son, Limited, and Thomas Bassnett, Limited, at £33,000, and a statement of profits is produced which has to our thinking an unsatisfactory look about it. The capital is £120,000 in £1 shares, half ordinary and half 6 per cent. cumulative preference, and the purchase price is £105,000, including £20,000 in shares; but the company does not buy direct but through the Victoria Syndicate, Limited. The company apparently starts well, as the contracts now on hand include orders for a complete installation of Chadburn's telegraphs upon thirty-two of her Majesty's ships. But after that—and how much longer have the patents to run ?

TRANTOM'S, LIMITED.

This shade of Lipton's is a Liverpool affair, and is formed to buy the business of food preparer, fruit preserver, tea-dealer, and grocer and provision merchant, carried on by Joseph Trantom, together with the business recently acquired by him of W. E. Harper, carried on under the style of Harper's Stores. Share capital £50,000 in £1 shares, 32,500 being 6 per cent. cumulative preference and the remainder ordinary. The latter, with £15,000 in cash, is the purchase price. Only 17,500 preference shares are offered now, while the profits for the three years ended February, 1898, were £2,816, £2,975, and £2,917. If the shares are worth having, Liverpool would, no doubt, take them without overstraining itself.

MUTUAL TELEPHONE COMPANY, LIMITED.

Capital, £250,000 in £5 shares of which 30,000 are ordinary and 20,000 5 per cent. cumulative preference. Board is very numerous, consisting of 13 members—all Manchester and Salford men, who think Manchester and district might be supplied with an improved system at less rates. There can be little doubt about this, but is this company going to do it? The National Telephone Company has issued a circular pointing out that a company under the same name was formed eight years ago, which in 1894 went into liquidation, and the working capital of £60,870 was therefore lost. But this company may stand a better chance, though, under the circumstances, the shares might be left to Manchester capitalists. Any competitor to the National Company is deserving of support, for the system constituting its monopoly is a burden grievous to be borne.

HUGGINS & CO., LIMITED.

This brewery company was formed in 1894, and has a share capital of £200,000, all but £60,000 of preference being held by the directors and their families. There is also £360,000 of 4½ per cent. debenture stock. The purchase price in 1894 was £340,000, including £217,000 in cash. A new company is now brought out to acquire the old company, and the purchase price is now put at £1,100,000, of which £329,900 is to be cash. The entire capital of the new company is £1,400,000, in 35,000 ordinary and 50,000 4½ per cent. cumulative preference shares of £10 each, and £550,000 in 3½ per cent. first mortgage irredeemable debenture stock, but only a portion of each class is offered, the price being par. On September 30, 1893, brewery premises, properties, and other assets were valued at £310,606, and on September 30 last the corresponding items stood at £812,801, of which £490,844 was loans to customers on mortgage, while during the four years ended September last net profits have steadily mounted from £27,761 to £65,532. It is stated that the business has very largely increased, and it is essential further capital should be raised for the purchase of new properties, for which purpose £300,000 will be reserved out of the present issue on which it is estimated an additional profit of £20,000 per annum will be earned. As debenture stock, interest, and preference share dividend will require only £41,750, there is still a good margin of profit left, so, in spite of the heavy increase in capital, the shares and debenture stock still seem a good brewery investment.

LLOYD & YORATH, LIMITED.

This Monmouthshire company offers an issue of £70,000 4½ per cent. first mortgage debenture stock, and £50,000 5 per cent "A" debenture stock at par. Former is redeemable after 1906, at 110, and the latter, at 110, by means of a sinking fund, within 54 years. This will make the debenture capital £220,000 against a share capital of only £150,000. The money is wanted to pay for the recently acquired business of Searle & Herring, Limited, of Newport, Mon., costing £137,145, and for the acquisition of further properties. So the old game of absorption goes on. Profits of Lloyd & Yorath for year ended November 30, 1897, are certified at £11,140, and of Searle & Herring for year ended March 31, 1897, at £7,558, and for nine months, to end of last year, at £6,036, while increased profits are expected from the consolidation. Against the £18,698 of profits, debenture interest and sinking fund will require £10,400. So the stocks now offered may be considered moderately good second-class investments.

PACIFIC BORAX AND REDWOOD'S CHEMICAL WORKS LIMITED.

The share capital amounts to £545,000, and there is also issued £97,500 first mortgage 5 per cent. debentures. The company now offers through the Indian and General Investment Trust an issue of £150,000 second mortgage 5 per cent. debentures at 102 per cent. redeemable, at three months' notice, at 104. Money is wanted to pay for additional property. Net profits for year ended March 31, 1897, were £57,235, while the interest on the two issues, sinking fund, &c., will require £15,690 per annum. This is an American enterprise, and when issued, all the £310,000 of ordinary shares were taken by the vendors, so its second debentures are not an investment we should care to risk much in, notwithstanding the large surplus shown by profits over interest charge.

SHELTON IRON, STEEL, AND COAL COMPANY, LIMITED.

Issue of £100,000 6 per cent. second mortgage debentures at par. They are redeemable at par by sinking fund of 2 per cent. per cent. per annum, commencing in 1903, and will rank after the first charge 5 per cent. debentures, of which there are outstanding £83,600. Share capital amounts to £500,000. Company was formed in 1889 to take over properties at Stoke-on-Trent. Money is wanted to take advantage of new lease of minerals, and to meet

certain expenditure on the steel works. As the profits for 1896 were £23,040, and for 1897, £30,636, the debentures seem a fair second-rate investment, especially looking at the 6 per cent. interest.

BRITISH & FOREIGN DU BOIS COMPANY, LIMITED.

The capital of this reconstructed concern is £150,000 in £1 shares, of which 90,000 are 7 per cent. preference and the remainder ordinary. This company has been brought out to acquire the British Du Bois Manufacturing Company, Limited, which was only formed last year to take over the English business of the parent company, with a capital of £100,000, and to amalgamate with it a similar business now being carried on in Germany. Business consists chiefly of manufacturing and selling a lead trap and other appliances for sanitary purposes. There is a full statement of the English company's profits which have grown from £7,107 in 1892 to £11,110 in 1897, but although the German business has been established 12 years, all we are told is that its net profit for 1897 amounted to £3,002. There is no statement about the valuation of any assets, but £140,000 is asked for the business, payable £60,000 in ordinary shares and £80,000 in cash. Whatever strength the English company had, we should say, will be considerably diminished by tacking on to it the German business, which, after twelve years' working, can show only £3,000 profit. This continued shuffling of the cards benefits others than the shareholders.

"HOLBROOK'S WORCESTERSHIRE SAUCE," LIMITED.

Object is to buy trading rights in the sale of the sauce in the United States and Canada from the Birmingham Vinegar Brewery Company. For twenty years the sauce is claimed to have been "a staple article of food," the sales of which are now at the rate of upwards of 5,500,000 bottles annually, no size mentioned. The capital is £100,000, in £1 shares, half ordinary and half 6 per cent. preference, all of which are now issued. The Vinegar Company is to manufacture the sauce and supply it to this company upon terms which are not disclosed, and £60,000 is to be paid as purchase price to a middleman, which altogether seems a saucy arrangement.

BENGAL DOOARS RAILWAY COMPANY, LIMITED.

The National Bank of India, Limited, is receiving subscriptions for £250,000 in £10 shares of this company, at a premium of 10s. per share. The total share capital of the company is £400,000, and £150,000 of it has already been issued and converted into stock. This completing issue will be merged into the other when fully paid up. According to the prospectus three extensions of the existing lines will be constructed, and a map is given with the prospectus, showing that they will run through excellent tea-growing districts. The Indian Government has the usual option to buy the company out at the end of 25 years, and the Government may be asked to work the lines for 40 per cent. of the gross receipts in certain contingencies, but the capital has no direct guarantee. It ought not to require one with lines placed as they are.

Company Reports and Balance-Sheets.

The Grand Trunk Railway Company of Canada.—Gross receipts for the half-year ended December 31, £2,247,151, working expenses, £1,434,804, increase in gross receipts, £135,617, decrease in working expenses, £67,986. The percentage of expenses to income was thus reduced from 69·32 in the second half of 1896 to 62·11 in the past half-year, and the net income was increased by £196,235. This is the result on the main line and its immediate dependents. On the two controlled lines, the Chicago and Grand Trunk and the Detroit, Grand Haven and Milwaukee, the recovery was also considerable. The former did not exhibit much increase in the gross receipts, only £6,045 in fact, but the working expenses were brought down £11,208, so that the profit was £38,325, or £17,253 more than in the corresponding half-year. The net revenue charges of this company payable by the Grand Trunk Company amounted to £87,792, being slightly smaller than in December, 1896. The deficiency was therefore £49,467 as against £67,417 in 1896, an improvement of £17,950. This deficiency has to be made good by the parent company, as also that of the Detroit Company. This latter also picked up considerably, its traffic receipts showing an increase of £6,102, and its expenses a decrease of £15,271, so that the net balance was £35,235 against £13,862, an improvement of £21,373, and a sum sufficient within £2,174 of that required to cover fixed charges. The year before the deficiency was £24,917. Both these lines have been a tremendous burden upon the company for many years back, and their aggregate indebtedness to the Grand Trunk now amounts to £927,680 for interest advanced by it on their behalf. Of course, it is not out of pocket altogether to this extent, because a good deal of the interest, on the Chicago line at all events, is due to itself. Still, it has had to find a great deal of money, and this is the balance-sheet position. We hope the improvement now shown is the beginning of better things in the future. Adding various small items of revenue to the net income from traffic the grand total of the net income of the company for the half-year was £920,236, an improvement of £212,629 on December 1896. Of this sum £644,972 went to meet the interest charges, rents and advances to subsidiary lines, leaving a surplus of £275,263, which wiped out the whole of the deficiency shown at the end of the June half-year leaving £10,289 to be carried forward to the current half-year. For the whole year the improvement in net income was £321,000. The Grand Trunk is thus well lifted out of the slough into which it had been allowed to tumble by lax management and, we fear, corruption. Every credit ought to be given to the present board, and above all to the present General Manager, Mr. Hays, for the immense change that has taken place. It always seemed to us that the working expenses of the company were excessive, and the savings which have been effected under the new control fully justify this view. They appear to be legitimate savings moreover, and we see no indication that the lines are being starved. Less seems to have been spent on some items, such as renewals of ties, repairs and renewals of bridges, of buildings, of fences, of passenger and freight cars, and of docks and wharves. Superintendence, again, has cost rather less, general expenses also somewhat less, and repairs to roadway rather more, and the directors state that in the half-year 514 new modern freight cars were provided from revenue. On the other hand it has to be pointed out that the capital expenditure of the company continues to be on a pretty liberal scale. It amounted to £215,149 in the six months under review, but £130,242 of this was on account of reconstruction of the Victoria Jubilee Bridge at Montreal, a work that ought not to have been necessary at the present time had it originally been properly gone about. How far the management is justified in charging £35,357 to capital account for new rolling stock and in debiting the same account with the cost of increased weight of rails and with part cost of the substitution of stone and iron bridges for wooden ones we cannot judge, but have doubts upon the point. Nevertheless, making allowance for all items of this kind, it appears to us that the company has entered upon a period of greater prosperity than it has known for many years back, and we trust that the dispute which has unfortunately broken out between it and the Canadian Pacific Company will not last long enough, or produce changes important enough, to alter the prospect for the worse.

The English Association of American Bond and Shareholders, Limited.—This little company earned £4,127 gross in 1897, and spent £2,866 in doing so. The net revenue therefore was £1,261, which, added to £1,082 brought forward, gave a balance of £2,343 to be dealt with. Out of this the maximum dividend of 7½ per cent. is paid, taking £775 and leaving £1,568 to be carried forward. During the first part of the year there was very little doing in American railroad securities here, so that the business was restricted, but the company fulfils a very useful function and might well be taken more advantage of than it is by English holders of such securities, who are often at a loss for a rallying point in times of difficulty.

Bahia and San Francisco Railway Company.—The permission to advance the tariff appears to have affected the revenue of this company favourably, for it amounted in the half-year ended December 31 last to £68,114, as compared with £48,820 in the corresponding half of 1896. Expenses were only £1,056 higher, but even then the debit balance on working the line was £19,101. The Brazilian Government came to the rescue with its guarantee of £63,000, and a net balance of £44,172 was produced, which permitted of a dividend at the usual rate of 5 per cent. per annum, with the help of a mere £827 from the reserves, which still amount to £96,358. The revolution in the state of Bahia is said to have collapsed, but apparently the company gained very largely in the half-year from the transport of Government troops and stores on that account. The Timbo branch fared more miserably than the main undertaking, for with £7,588 of receipts the debit balance on working was £5,113. After reserving the Government guarantee of £8,943, and drawing £752 from suspense account, only 3 per cent. in dividend could be paid.

Recife and Sao Francisco (Pernambuco) Railway Company.—For the second year this company has been able to charge a higher tariff to meet the fall in exchange, and the result is apparently a great decline in traffic. The number of passengers carried fell off 25 per cent., and the decrease in goods was quite as great. The revenue of the half-year now being dealt with declined £50,410 to a total of £197,292, and the working expenses only fell off £12,495 to a total of £190,443. These totals are in sterling, at the fanciful exchange of 27d., but taking currency figures the net balance was 52,578 milreis, or, roughly speaking, £1,500. For a Brazilian guaranteed railway this was affluence, and the balance was handed over to the Government, which paid its guarantee in gold. The company, therefore, received £40,141 on this account, which permitted it to redeem £7,000 of debentures and pay 5 per cent. in dividend upon the shares.

Natal and Nova Cruz (Brazilian) Railway Company.—With a gross revenue of £5,040, the expenses of this company amounted to £12,427, so that the loss on working the line was £7,381. The Brazilian Government paid over its guaranteed interest, amounting to £43,281, and this enabled debenture interest to be met, £13,175 to be placed to debenture redemption, and the payment of a dividend of 4½ per cent. upon the shares. One third of the cost of a bridge, or £483, is to be written off out of revenue.

Alliance and Dublin Consumers' Gas Company.—The revenue of this undertaking in the second half of 1897 was £797 less than in the corresponding half of 1896, the reduction being wholly due to the depreciation in the value of residuals, as gas revenue was £2,400 more. Expenditure was larger and the net revenue of £36,473 was £2,930 below that of the second half of 1896. To pay the usual dividend of 10½ per cent. per annum, and 7½ per cent. per annum upon the two classes of shares, £2,502 had to be taken from the reserve fund, which now stands at £43,514. There is also a contingency fund of £7,370, an insurance fund of £2,901, and a leasehold renewal fund of £902.

Monte Video Waterworks Company.—This is an important undertaking with £350,000 of debenture stock and £400,000 of share capital. The company must have done well in the past, for it has accumulated a reserve of £60,000, and a depreciation fund o £15,000, but this does not apply to the last six years, during which nothing has been added to the reserve, and only £2,742 to the depreciation fund. Last year was a bad one in Uruguay, so it is not surprising that the gross revenue diminished by £2,905, and the net by £3,992. Its total of £47,364 just permitted of the payment of debenture and other interest, the setting aside of £2,000 against possible bad debts, and the payment of a 5 per cent. dividend upon the ordinary shares. The position is not a satisfactory one, but, of course, allowance must be made for a bad year. Should revenue improve the amount set aside in the future for depreciation should be sufficient to make up for the lack of any addition this year.

London Southern Tramways Company.—The receipts of last year increased £2,056, and the net revenue of £5,067 was £609 larger. The sum of £2,000 was placed to the credit of Permanent Way Suspense account, and £800 to a Horse Renewal account, and out of the balance a dividend of 3s. per share, or 1½ per cent., is proposed. The same distribution was made for 1896, but in previous years the record was much worse.

Thomas Tilling, Limited.—With the large revenue of £225,224 for last year, the profit on working was £34,388. Horse renewals, and depreciation of rolling stock and harness are mentioned in the accounts, but the sums so devoted are not stated separately, and only depreciation of machinery and leaseholds is accounted for clearly. The preliminary expenses of £130 were paid off, and £11,776 went to the vendors as their share of profits previous to incorporation of the company. The balance of £20,787 permits of the payment of the preference dividend, the setting aside of £1,500 to reserve, a dividend of 10 per cent. upon the ordinary shares, and the carrying forward of £4,247. We should not have thought much of this statement if the ordinary shares had been held by the public, but they are entirely in the hands of the old partners, and only the preference and debenture capital is held outside. As the annual charge on this capital is only £11,750, the profits appear to cover it about three times, so that it ought to be thoroughly well secured, and of course the rest of the matter is purely a private concern for the ordinary shareholders.

Anglo-Argentine Tramways Company.—This company seems to be in a poor way. With an increase of £6,493 in receipts during 1897 expenses were £14,133, so that the profit of £56,833 was £7,640 below that of 1896. The sum of £5,000 is placed to reserve and dividends equal to 3 per cent. declared, as against 3½ per cent. for the previous year. The reserve fund will then amount to £23,672, but we note that the sum of £8,804 towards municipal paving was added to capital, and out of £6,028 spent upon permanent way renewals only £5,000 was paid for out of revenue. This policy has been carried on for some years past, with the result that £15,791 is credited to this very unrealisable account. Altogether, we do not like the report.

Eagle Insurance Company.—For the past year this company's income from premiums was £170,363 net, and it also received £100,220 for annuities sold on 82 lives. Life policy claims paid amounted to £255,883 and expenses of management, exclusive of that on the annuity business, which was small, came to £28,264, or about 16·3 per cent, of the premium income. It will be seen that the claims were high, probably because this company represents a considerable number of small offices, absorbed by it in past years, whose lives were "matured," and therefore fall in with greater rapidity than is usual. In these circumstances the directors have done wisely in allowing their actuary, Mr. Colenso, to value their accumulations on a 3 per cent. interest basis, notwithstanding the fact that the net rate of interest received on their investments last year averaged £4 2s. per cent. As Mr. Colenso points out in an interesting special report, this strict method of valuation has the effect of sweeping away the whole actuarial surplus which would have been available as bonuses upon the company's policies during the next five years, and this will be a disappointment, without doubt, to the holders of such policies. At the same time, as the directors also say in their report, this present disadvantage is fitly counterbalanced by the very strong and satisfactory condition in which such a valuation leaves the company. In other words the future position is strengthened, and very materially strengthened, at the expense of a little present privation; for, had the valuation been made 3½ per cent, the amount available for the policy holders would only have been £87,000. The ratio of expenses to income is, as will be noted, somewhat high, but not sufficiently so to sensibly weaken the company's position, and we have no doubt that efforts will be made to reduce it. As it is the company's accumulated funds now amount to £2,594,867, the greater part of which is invested at home, and, as far as we can judge, very well invested.

Frederick Leyland & Co., Limited.—The report of this company for the past year appears to be quite satisfactory. The gross profit came to £203,604, and 9 per cent. has been paid on the ordinary shares for the year, after writing off £42,000 for depreciation, transferring £75,000 to the reserve fund for equalisation of dividends, making it £125,000, adding £15,000 to the insurance reserve fund, raising it to £65,000, and writing off the bonus on the conversion of debentures, and the cost of issue of the 4½ per cent. pre-preference shares, amounting to £9,676. During the year £150,000, in 4½ per cent. accumulative pre-preference shares was issued, leaving £50,000 still to be disposed of, and the company's bonds were converted into 4 per cent. debentures, and extended to 1921. All this is very good, but we are sorry to see the announcement that in future no profit and loss account will be issued, because the reserves for the equalisation of dividends and insurance amount together to a sum equal to the outstanding ordinary capital. It seems the Articles of Association give the directors power to take this step when this condition is fulfilled, but we do not see the wisdom of it, and deprecate secrecy of any kind in regard to a shipping company in which the public has large interests. The balance-sheet shows investments at cost to the amount of £156,453, including investments in the company's own debentures. Would it not have been expedient to state what proportion of the money lies in these debentures? In other respects the balance-sheet appears to us a clean one, but we are not sure that £42,000 was enough to write off for depreciation, especially when an unknown amount figures in the capital account for goodwill.

The Crédit Foncier of Mauritius.—In the past year the directors in this company claim to have done a very good business, and the claim seems to be justified. Certainly the company's money ought to be well secured, since it has only advanced £641,603 against properties the "reported value" of which is £1,474,037. After charging £12,300 for loss by exchange on £20,000 remitted home, the directors are able to pay a 5 per cent. dividend on the ordinary capital, to place £6,000 to general reserve, increasing it to £65,000, and £6,000 to the exchange reserve, making it a similar amount, and still to leave £1,040 to be carried forward. The debenture debt was reduced during the year by £25,320, and the profit and loss account does not indicate any interest in arrear. Altogether this company manages to do wonderfully well, whatever the condition of the island may be, and it has now weathered the ups and downs of thirty-four years.

The Ooregum Gold Mining Company of India, Limited.—In 1897 this company won 55,819 oz. of gold which was less by 9,756 oz. than the total for the preceding year, a result due to deterioration in the quality of the stone treated. Nevertheless, the net profit was £60,318 out of which dividends aggregating 2s. 6d. per share have been paid on the ordinary shares and 4s. 6d. on the preference, or 12½ and 22½ per cent. respectively, the final shilling now. Since the year closed, prospects have decidedly improved because the board has followed the wise policy of going down after the ore, and success has followed. "A large reserve of first-class ore" has been opened at various depths in the Southern extension from Taylor's shaft.

Evered & Co., Limited.—The net profit for the year 1897 was £25,147. Adding the £7,288 brought forward the available balance was £32,453, and out of this the ordinary shares get 7½ per cent. for the twelve months in two equal instalments, together with a bonus of 2½ per cent., making the entire return 10 per cent. for the year. This is very good, and equally so is the manner in which cost of goodwill, leases, patents, &c., are being written down. In all, £9,018 is thus applied and £6,361 is left still to be carried forward. The directors say that an increased amount of business was done in the past year. This year the full amount of paid-up capital ranks for dividend.

The East London Waterworks Company issues a satisfactory report, showing an increase in revenue for the past half-year of £10,912, accompanied by a reduction of £3,592 in expenses. The available balance is £88,433, of which £68,822 is absorbed in paying a dividend on the ordinary stock at the rate of 8 per cent. per annum. This compares with only 7 per cent. a year ago, and the increased balance of £19,610 is now carried forward. The company has eleven subsidiary and storage reservoirs, covering an area of 316 acres, and having a capacity of 1,215,000,000 gallons. This sounds as if the company ought to be able to prevent a recurrence of the water famine.

Bank of Australasia.—The business keeps in a somewhat stationary position. During the half-year to October 11 a net profit of £40,278 was made, which compares with £40,400 for the same period in 1896, and the dividend is again £1 per share, or at the rate of 5 per cent. per annum. According to the balance-sheet deposits are down £835,000 to £12,860,000, while bills payable are down £35,000 at £2,000,873. The feature on the assets side is a reduction of £849,000 in loans, the total of which is now only £486,000, so that in spite of the smaller deposits another £100,000 has had to be put into securities, which amount to £812,668. The expected improvement referred to in the last report was not fulfilled owing to renewal of drought, which has resulted in a reduction in shipments of wool, partly offset by improvement in the price. This is ancient history, however, as the report is nearly six months old before shareholders get it.

Mercantile Bank of India.—The operations during the past year show results very similar to those obtained in 1896. Net profits, including £10,563 brought forward, were £31,673, compared with £31,188 in the previous year, when £8,047 was brought in, so that the bank has hardly done so well. After paying the full 5 per cent. on the "A" shares and 3 per cent for the year on the "B," £11,048 is left to carry forward. Fixed deposits show a small reduction, while bills payable have increased to a greater extent. The bank has been moving its investments, the total of which is now only £232,360, compared with £314,478 last year. The holding of rupee paper has been reduced from £271,348 to £75,577, and part

of the money has been put into Indian Guaranteed Railway debentures.

The Anglo-Austrian Bank made less profit last year, £168,915 against £181,030 in 1896, and therefore the dividend is lowered from 8½ fls. or 7½ per cent. to 8 fls. or 6¾ per cent., while the balance carried forward is £3,200 less. The capital of the bank is £2,000,000, and it has a reserve of £333,473, stocks and shares held representing £257,969; Falkenau Coal mines £26,276; house property £90,140, and the Vienna office, £143,611. Compared with 1896, deposit notes in circulation have just doubled, while bills payable are up £102,000, and sundry creditors £462,000. On the other side there is an increase of £300,000 in bills receivable, £185,000 in advances against securities and warrants, and £232,000 in sundry debtors. Syndicates, on the other hand, are down £124,000 at £203,130, this being apparently an underwriting account. The bank has not done so well, and the balance sheet is hardly so strong as its predecessor.

Buenos Ayres and Rosario Railway Company.—Compared with 1896, the outcome of last year's business makes as bad a showing as any we have come across of the Argentine railway reports so far issued. Gross receipts fell off to the extent of £56,089, although 24,188 more passengers were carried, and the carriage of the company's own material yielded £7,419 more. The gross weight carried was 110,224 tons less than in 1896, but 84,074 more train miles were run, and the expenses increased by £13,481, there being, consequently, a reduction of £69,571 in net receipts, or over 19 per cent. The percentage of working expenses to receipts rose from 50·22 to 56·4 per cent., which is higher than for several years past. For 1897 the dividend on the ordinary stock is only 2 per cent., which compares with 3 per cent. for the previous year, and 2 per cent. for 1895. The reduced revenue is ascribed to the almost total failure of the cereal crops through frost and locusts, while the increase in expenses was due to extra cost of coal and minor influences. Prospects for the current year, however, are much better owing to the good wheat harvest and the appreciation of the paper currency.

THE PROPERTY MARKET.

Last week showed no slackening in the almost abnormal activity at Tokenhouse Yard. The total returns amounted to £165,987, or £63,270 over the corresponding week of last year. There was a brisk business for investment purposes in the brick and mortar class of property. The keen competition for building land in or near the metropolis, was also noticeable. Several properties with speculative building values likewise sold well. One at Wimbledon, of 4½ acres, went for about £1,380 per acre; another of 11 acres brought £1,133 per acre; while a third of 17½ acres at Muswell-hill, realised £1,020 an acre. Another notable feature of the week was the falling-off in the demand for licensed properties. This may be regarded as a reaction against the undue inflation which has been observed in this class of property during the past few years. It is coming down to something nearer to what may be called its natural value. The total sales for yesterday week amounted to £30,000 odd, mostly in freehold properties. One freehold ground rent of £300 per annum, secured on 50, Nicholas-lane, City, with reversion in 46½ years, was withdrawn at £12,000. Freehold ground rents, amounting to £48 per annum, secured on Nos. 1 to 15 (odd), Brunswick-road, Upper Holloway, reversion in 46 years, £1,435; a freehold residence, Durnford House, Balham-high-road, let on lease at £110 a year, £1,700; two blocks of freehold building land in The Crescent and The Avenue, Barnes, were disposed of by Messrs. Chesterton & Sons for £1,470 and £1,600 respectively, a price approaching £5 a foot. A freehold residence called Mascot, in Love-lane, Pinner, let at £70 per annum, realised, under the hammer of Messrs. Farebrother, Ellis & Co., £1,250. Messrs. Newbon, Edwards & Shephard sold the freehold of No. 3, Newcastle-place, Clerkenwell, comprising a dwelling house, two workshops, and yard in rear, for £1,000; a leasehold residence, No. 265, Camden-road, Holloway, held for a term of 59½ years at £13 12s. 6d. ground rent, for £2,000; two freehold houses and shops, Nos. 134 and 136, Albion-road, Stoke Newington, let at an annual rental of £130, for £2,400, and several smaller lots. Among the more important properties disposed of by Messrs. Stimson & Sons, was a freehold shop and dwelling-house, 145, Newington-butts, with six cottages in the rear, the whole producing a rental of £166 a year, which changed hands at £3,000.

This week began at the Mart on Monday with sales amounting to the respectable total of £33,465, only five of the lots offered remaining unsold. The Riviera Hotel at Maidenhead, offered by Mr. J. C. Platt, of Hammersmith, with an unexpired term of 65 years, brought, with the furniture, £6,000. Mr. Platt also disposed of two copyhold houses in Hammersmith, of an estimated rental of £85, at £1,380. A leasehold house, No. 6, Henrietta-street, Cavendish-square, having the short term of 28 years to run, was disposed of by Messrs. Elliott, Son and Boyton for £2,320. Amongst the lots placed by other firms were a parcel of freehold ground rents at Wandsworth which sold at £3,300; a freehold residential property at Theydon Bois, Essex, which brought £2,375; freehold and copyhold properties at Woodford and Chigwell, and two small freeholds in Soho. A policy of insurance for £10,000, with profits, on a life aged 67, was sold by Messrs. G. A. Wilkinson & Son for £6,860. The Crown lease of 6, St. Martin's-mews, Trafalgar-square, returned as unsold last Friday, was actually disposed of by Messrs. Hampton & Sons before leaving the Mart, at the price of £1,350. Mr. Alfred Richards announces a sale of gas and water debenture and ordinary stocks and shares at the Mart on Monday next. These include stocks and shares in the Maidstone Gas Company, Hornsey Gas Company, Romford Gas Company, Romford Gas and Coke Company, Limited, Ascot District Gas Company, Bournemouth Gas and Water Company, and Walton-on-Thames and Weybridge Gas Company.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

J. B.—I think you should send your bonds in now. The firm is, perhaps, wanting in brains, but it is largely interested on its own account. A scheme of reorganisation is expected very soon, which will be managed here by another and stronger firm. It is to be hoped the scheme will be a thorough one, as this company has a favourable position geographically, and with proper management ought to gather a profitable business.

C. H. S.—So far as I can discover there is good reason to hope that your company will be able to pull round. The unfortunate failure of the first property acquired was quite unexpected, but the directors are, I am still assured, honest and capable, and they hope to improve the company's position before long.

Next Week's Meetings.

Monday, April 4.

Anglo-Argentine Tramways	Cannon-street Hotel, noon.
Charles Baker & Co.	Inns of Courts Hotel, 4 p.m.
English Association of American Bond and Shareholders	5, Great Winchester-street, noon.
Espuela Land and Cattle	Suffolk House, 11 a.m.

The INVESTORS' REVIEW can be obtained in Paris of Messrs. BOYVEAU ET CHEVILLET, 22, Rue de la Banque.

Of all Newsagents and at all Railway Bookstalls in the United Kingdom, or remit to The PUBLISHER, Norfolk House, Norfolk-street, Strand, W.C.

BACK NUMBERS.

Less than a dozen complete sets now remain of the first four Quarterly Numbers of the "INVESTORS' REVIEW," so that the first Number of all can only be supplied in volume form, price **21s.** net. The Volume for 1893 is also composed of Quarterly Parts, and its price is the same. The seven Quarterly Parts from Number II. onwards can still be had separately, price 5s. net. For the succeeding four years down to December, 1897, the "REVIEW" is in Monthly Numbers.

All Monthly Numbers more than six months old will now be charged 1s. 6d. net, and all Half-yearly Volumes. 10s. 6d. net (by post, 2d. and 10d. extra for the Number or Volume).

Cloth Cases for binding the "REVIEW" and the "INDEX" are charged for as follows :—For Annual Volumes of the "REVIEW," 1s. 6d.; for Semi-annual Volumes, 1s. 3d.; and for Yearly Volumes of the "INDEX," also 1s. 3d. Postage, in all instances, 2d. extra.

Volume I. (July, 1895—April, 1896) and Volume II. (July, 1896—April, 1897) of the "INVESTMENT INDEX" now ready, price 9s. 6d. each, net (post free, 10s.).

The Investment Index.

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

The Investors' Review.

The Week's Money Market.

With the Stock Exchange settlement, end of the month requirements, and Treasury Bill payments in the week, the floating resources of the Money Market have been amply employed. A spice of nervousness was added by the current political uncertainties, so that rates for short loans and day to day money gradually hardened until 2¾ to 3 per cent. are quoted for both, as against 2¼ to 2¾ per cent. a week ago. Recourse had to be had to the Bank pretty freely, as is shown by the addition of £3,671,000 to the "other securities" in the Bank return. A good deal of this money, however, went to the credit of the private deposits, and will not be needed now that the end of the month is passed.

Political uneasiness was strong enough at one time to cause 3⅞ to 3¼ per cent. to be quoted for the discount of three months' choice bills, and a good deal of business was done "subject to the action of the Bank." Anxiety, of course, was principally aroused by the increased demand for gold on American account. This is looked upon entirely as arising out of political considerations. Since the opening of the year the States have received fully eight millions sterling, a sum that should quite represent any favourable trading balance that required to be liquidated in gold. To moderate the drafts upon its stock of the metal, the Bank of England raised its price for eagles on Wednesday to 76s. 8d. per ounce, which is the highest price that can be demanded, as it virtually represents bar gold at 77s. 11¾d. per ounce outside, and to advance the price by another halfpenny would cause sovereigns to be taken as the cheaper form of remittance. If, therefore, the drain does not moderate, the only protective move left will be to advance the Bank Rate; but that step was not adopted yesterday, and the directors are evidently indisposed to make the change while hope remains that the urgency of the demand will lessen. Home requirements, which have been so prominent in the past quarter, ought now to be less pressing, for next week the Government dividends and the repayment of Treasury bills will take place; and further Government disbursements must lead to the market for a time becoming less dependent upon the Bank. The Chinese Loan, however, must not be forgotten, as 50 per cent. of the loan is to be called up in April—25 per cent. on the 7th, and 25 per cent. on the 21st—and the remaining 25 per cent. will have to be provided on May 3. With the underwriters—that is, the market so largely interested in these payments—there is likely to be some pressure at these dates, unless the political horizon improves very much in the meantime. Short of this much-desired change, there does not seem to be any prospect of ease returning immediately to the market, although conditions must improve as time goes on. Meantime the discount houses quote the rate for three months' choice bills at 2 15/16 per cent., with rather more tendency to take paper.

The Stock Exchange Settlement came this time in a busy week, and so bankers were able to charge 3½ to 4 per cent. for loans to the "House," especially as a little uneasiness prevailed as to the condition of the Account. No difficulties of importance came to the surface, and the reduction of speculative commitments has made such progress that rates are bound to be easier on the next occasion, even if the Money Market itself does not fall away much in the interval.

Yesterday's Bank return showed, as we have just mentioned, an increase of £3,671,745 in the "other" securities, chiefly three-day loans, and the momentary indebtedness of the market to the Bank must be over £10,000,000. Of this money £1,810,463 went on to

the "other" deposits, raising them to £36,812,728, and £1,852,925 of it passed into the active circulation or out of the country in the shape of gold. The "public" deposits, or Government balances stand within £3,000, of where they did a week ago and, short of that amount, are still at the highest total ever seen. But the money will now begin to be dispersed and part of the increase in the note circulation will also soon return. Deducting the £316,000 net in gold exported, the increase of the active circulation in notes and gold on the week is £1,537,000, and the Banking Reserve has fallen to £21,662,363.

SILVER.

The price of the white metal has remained steady during the past seven days, and the quotation of 25 11/16d. for bars on the spot is but little different from that current a week ago. The market has become more settled, owing to the knowledge that the currency scheme of the Indian Government is to be relegated to a Departmental Committee, which will mean that some time must elapse before any action is taken in the matter. Evidently "bear" operations have not yet been unlocked, for the price "two months forward" is below that for immediate delivery, and until this divergence is removed it will be impossible to judge the real tone of the market. The India Council sold freely throughout, and in the week ended Tuesday last, disposed of about 93 lacs in bills and transfers. Since then it has sold 52 lacs or about £325,000, which will bring up the total sales of the Council in its financial year to about £9,420,000, or only £580,000 short of the amount looked for last December. It is a better record than many expected in December, but there is a great gulf betwixt the amount and the total of £16,000,000 proposed to be drawn in the year just opened. Indian exchanges have been remarkably steady, but Chinese rates have fallen to a moderate extent.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, March 30, 1898.

ISSUE DEPARTMENT.

Stock Market Notes and Comments.

We have had a very worrying week indeed upon the Stock Exchange, and the anxiety prevailing there is quite as great as that which has oppressed the money market. It is not that there is anything particularly wrong inside the Stock Exchange itself; weak accounts there are in plenty within it, but, so far as has yet been revealed, no excessive masses of speculation exist. On the contrary, the members have for some time been reducing their commitments, paying off loans, and generally refraining from entering upon business involving great risks. Outside the House, however, there are abundant sources of trouble, and the worry these cause only find their counterpart within it—the most sensitive business organisation which exists. Again and again attention has been drawn in these columns to the practice of banks in lending to private customers to excessive amounts in the aggregate on a mere margin of value, amounting to 5 per cent. or 10 per cent. more than the market price of securities pawned with them. This margin business is already being put to the test by the slight increase in the current value of loanable capital, and some banks at least have begun to try to retrieve their position by forcing their customers to realise. A great fountain of really unplaced stocks is thus being opened up, which may well cause the Stock Exchange much perturbation of mind. We see the effects of the process in the steady decline which goes on in Colonial securities and in the best secured class of our own railways.

The class of people, who may be described as quasi-investors, holding these stocks for the sake of the income they get from them over and above the interest they pay to their bankers for the money advanced, are day by day beholding the little capital they furnish to provide these margins disappearing. Also they now have to pay more for money in many instances than the investment yields to them, and these two influences together are compelling realisations. Against these the volume of new buying is comparatively small, so that the Stock Exchange stands in danger of having quantities of stock "dumped" upon it, for which there is no immediate demand. To protect itself against such a troublesome inflow of securities, for the time being unmarketable, its members naturally quote prices lower and lower even when no business of any moment is doing. These tactics, however, are only effective up to a point. Should money go higher, and loans on securities command 5 per cent., then the resulting fall in prices, induced by the jobbers to try and protect themselves, must have the effect of increasing the rush of sellers.

This is one aspect of Stock Exchange business. Another is the effect of the syndicating system, which has extended to quite unprecedented dimensions during the long years of abnormally cheap money. All round the City groups of adventurous speculators have joined in underwriting all descriptions of stocks, shares of industrial companies, and such like. No outsider can have the slightest idea of the strength of the force originating in a mere 3 per cent. bank rate, which is already driving out the individual speculative investor and pressing upon the *syndicataires* who hold shares by the ten thousand, Colonial loans by the hundred thousand, and industrial debentures in excessive amounts, the public has never had time, or means, to relieve them of. No other cause of depression appears to exist outside the Stock Exchange, or in, to account for the anxieties prevailing there, yet we do not remember a time, not even the time preceding the collapse of speculation in November 1890, when doubt, perplexity, and anxiety held greater sway over the minds of brokers and jobbers.

In such circumstances it would be unwise to counsel the public to buy with any freedom securities in any department, not even the best securities. We believe the day is not distant when prices will be still more favourable to them than they are at present. The rumours of wars, the agitation about Chinese affairs, about Cuban affairs, about West Africa, and such like—to which we shall presently have to add tremors about Thessaly, and the Turkish dominions generally—must cause frequent sharp fluctuations in prices, quite irrespective of the general pressure downwards coming from the sources just indicated; and when quotations are very low in consequence of some wave of fear there is a strong temptation to buy. Probably, too, buying would pay at such moments, because every violent fall is followed by an nearly equally violent rebound. Still, this kind of business is only for the speculator on the spot. Those at a distance ought not to enter into it; those who have other business to attend to should fly from it; and the investor, even the speculative investor, could find no sure profit in it, one account with another. We say this because the trend of prices, as we may call it, is, on the average, downwards, and the best that a man could hope for as the result of any purchases made on flat markets is a snatch profit. The risk, therefore, of securing even this much is too great to be encountered by prudent folk, because no one could be sure that upon the top of the political scare of to-day a still worse scare to-morrow may not come. To-day it is "peace" in the newspapers between Spain and the United States, to-morrow it may be war. There is no knowing from moment to moment when the next alarm will be sprung upon the market. Never in modern days did politics all over the world seeth and ferment as they are now doing. Everyone, therefore, who is in any way over-committed in public securities ought to imitate the policy of the shrewd members of the Stock Exchange, and relieve himself of whatever appears likely to cause anxiety or embarrassment while yet there is time. But, equally emphatically, we insist that this is not a time for the investment holder of good securities of any kind to sell.

Within the last day or two it will have been noted that some upward movements have taken place in South African and Western Australian mining and mine finance shares. We are glad to see this movement, and hope it will continue long enough to enable those of the public—and their number is multitude—who have been sitting upon these shares to sell at better advantage than they have lately been able to do. We can assure such that it is not through buying of individuals among the public that this advance is being brought about. It is all the product of "inside" influences, as the market phrase goes. Nobody should buy on any such "lead"; the wise policy is to sell and be done with every share of the kind whose price appears at all inflated. Holders may do this without any fear as to the ultimate result; even if they are disposed to invest again in such shares they may be quite sure that by waiting they will have opportunities of doing so far more advantageous than any they ever saw in the days of inflation.

The Week's Stock Markets.

There was no increase in activity on the Stock Exchange until the week was far advanced, little or no interest being taken by the outside public, and the bad weather and the partial interruption of telegraphic communication all tended to restrict business. The account which began on Monday was easily arranged, but it was a pleasant surprise to all concerned to find that no failures were announced, in spite of the heavy differences that had to be met. With the account out of the way and more satisfactory news from abroad, prices have rallied in a surprising manner, and the bear squeeze which has been going on for the last day or two in Wall-street has sent prices of United States shares up with a run, and this has spread to all departments.

Consols have exhibited a drooping tendency, the latest development of the Chinese question and the news that the British fleet was preparing for a move, sending the price down to 110⅞, being the lowest of the year. The weakness was also partly due to the harder tendency of the money market, and the heavy gold withdrawals for the United States. A slight recovery from the lower level has taken place just at the last, and the upward movement was helped by the moderate contango rate of 2½ to 3, which, considering the value of money just now, was not excessive. Indian and Colonial Government issues are weaker, and Home Corporation stocks mark declines in many cases.

In the Home Railway market a general decline in prices occurred during the concluding days of last week, and there was very little business, and absolutely nothing in the shape of outside support. The present week also started with a still further shrinkage, but a recovery set in when the account disclosed a scarcity of stock, and prices quickly rose in sympathy with the improvements n all other departments, and the earlier losses were soon more than wiped out. Continuation rates were light at the settlement, and eased off still more before the conclusion of the account. Great Eastern stock was again very scarce, and ⅛ to ¼ "back" was quoted; North-Western went off to "even" after being ¼ contango, and the rate on Great Western, Midland, and North-Eastern ranged from ⅛ to ¼. Brighton "A" finished about ¼ backwardation after opening at quite ⅜ contango, and the price rose sharply. Considering the bad weather last week the traffic returns were satisfactory, most of them comparing with big "takes" last year. Underground stocks have been a dull market, the miserable weather causing a heavy falling off in the Boat Race traffic last Saturday.

The market for United States Railroad shares had one short interval of firmness prior to the collapse on Saturday last, the temporary hardening up being due to the statement made by M. Hanotaux regarding the relations between France and England. Heavy sales then became the order of the day, and rumours of war were thick in the air; but there was quite a bear scare in Wall-street on Monday, followed by a rush to cover outstanding short contracts, on the report that Spain was prepared to accept President McKinley's plan of intervention as regards Cuban affairs. The big advance in Wall-street was followed on this side, and a good deal of realising on the part of home operators did not do much towards checking the upward move. The rally did not take place until after the making-up prices had been fixed, so that some tolerably heavy differences were disclosed. Money was not much wanted, and the account proved to be a very light one. Canadian Pacific shares, after a temporary decline, leave off the week with a substantial gain, although the February statement was a poor one, exhibiting only a small net increase; but it is again asserted that the rate war is all but over, and on the strength of this, the price rose several points. Grand Trunk stocks also followed more or less on the same lines, and the latest prices are the best of the week, and higher than those ruling when we last wrote.

* E.x. $7½ new Pfd. stock.

Needless to say the Foreign market has been very unsettled, the principal amount of interest again being centred in Spanish "Fours," which were at one time forced down to 48½, and dragging the whole list with

them. Alarmist reports were also industriously circulated regarding the position in the Far East, while the announcement that China had acceded to Russia's demands helped to further depress prices. Saturday witnessed a panic among holders of Spanish 4 per cent. on the Paris Bourse, a *canard* to the effect that Spain had declared war against the United States being the principal reason for the fright. A calmer feeling prevailed on all the Continental bourses on Tuesday, and prices, once on the up-grade, soon boomed away merrily, while the news that Spain was ready to meet the United States Government in the matter of Cuba caused a big jump in Spanish stock, more than sufficient to wipe out the previous loss. Chinese issues advanced on influential buying, and the new loan is now only about 1 discount. Greek bonds have maintained their recent advance, and the news that the indemnity loan convention has been signed by the ambassadors of the leading Powers has tended still more to harden the prices of the existing loans. The position of affairs between the Argentine Republic and Chile with regard to the boundary question has once more threatened to assume a serious aspect, and rumours were current that a new Argentine loan was on the *tapis*. The general improvement, however, has since extended to South American descriptions, and with the exception of Brazilian bonds, which have again been under a cloud owing to a further decline in the Rio exchange, there is a more healthy look about the whole list. Continuation rates in this market generally ruled round about 4 per cent., that being the charge on Spanish, while Uruguay 3½ per cent. were carried over at 3 per cent., and Chilian at about 5 per cent. The making-up price of Spanish 4 per cent. was 8½ lower than at the last account.

Foreign railway emissions close rather above the worst, the serious decline which took place at the beginning of the week having brought out a few buyers, who were further encouraged by the very satisfactory traffics. The proposal of the Buenos Ayres Great Southern directors to absorb the Ensenada Company was also responsible for some of the later buying of the stocks of these companies.

The Miscellaneous Market has again been invaded by dealers from the South African section, but there has not been very much business to encourage the new contingent. A sharp recovery is apparent in Welsbach Gas issues, on various glowing reports about new patents, &c. Birmingham Vinegar ordinary again marks an advance, and rises have also taken place in New Explosives, J. and P. Coats, and several electric lighting concerns. On the other side, a further decline has occurred in Tea companies, and among other industrial ventures, Pryce Jones debentures, Savoy Hotel, and Spiers & Pond shares all show losses. Southwark and Vauxhall Water "D" shares have fallen 8. At the Allsopp meeting, the proposals of the directors for increasing the capital, after being rejected by the shareholders, were declared carried by a majority of proxies, and a little selling by holders has caused a slight set-back in the ordinary stock. Cycle companies' shares have been again thrown on the market, and buyers are still few and far between. A satisfactory dividend was responsible for a rise of 1¼ in Chartered Bank of India, but P. & O. deferred fell 2 on the loss of the *China*. The premium on Lipton ordinary has slipped back to ⅞ on sales by allottees.

Markets on the whole close with rather a dull tendency, due, more than anything else, to a break in Spanish 4 per cent. on heavy selling orders from Paris. The sales, apparently, were made more on financial than political grounds, but they had the effect of depressing prices in other departments, more particularly that for United States Railroad shares. Spanish 4 per per cent. left off finally at about last week's level, but Brazilian bonds marked a serious loss. Home Railway stocks closed fairly steady, at rather below the best points of the week, but still considerably higher than last Thursday. United States Railroad shares present an unbroken list of rises, headed by Milwaukee, which is 87 up, but some heavy sales of Grand Trunk issues, just at the last, rather spoiled the look of the week's previous sharp advance. Consols closed firm, and almost at the best points, and there has also been a further recovery in Foreign Railway stocks.

Mining and Finance Companies.

The South African market has been comparatively steady, but business continues on the smallest possible scale, and Paris operators have entirely neglected "Kaffirs" of late. Prices hardened a little more on a rumour which was circulated on Wednesday that President Kruger was dead, and the latest quotations are the best of the week. Rates of continuation were just the same as last time, and the account was a very small one. In Western Australian ventures Golden Horse Shoe and Hannan's Brown Hill have met with support, and the tone on the whole has been steady to firm. Indian shares remain quiet at about last week's level, and copper securities close firm after being a rather dull market.

MINING RETURNS.

Alaska Treadwell.—March return.—Bullion shipment, $33,270. Ore milled 21,493 tons. Sulphurets treated, 348 tons. Bullion from sulphurets, $12,520.

Weld-Hercules.—Crushed 191 tons, producing 101 oz. gold; tailings, 2 dwt.

Golconda.—605 tons crushed, yielding 449 oz; tailings, 2 dwt.

Otto's Kopje.—7,968 loads washed during week ended March 24; 196 carats of diamonds won, including one stone of 11½ carats.

Highland Chief.—Crushed, 270 tons; yield of retorted gold, 88 oz. 135 ton Dorothy shaft, 62 oz.

Myall's United.—Crushed 2,000 tons for a yield of 260 oz. gold. 1,200 tons tailings treated by cyanide, yield 437 oz. gold.

Lake George.—During January 2,655 tons crude ore crushed. Production of concentrated matte was 149 tons, containing 260 oz. gold 11,366 oz. silver, and 4,843 units of copper.

Menzies Alpha Leases.—46 tons crushed, yielding 202 oz

British Broken Hill Proprietary.—Returns for fortnight ended March 24, 3,564 tons; crude ore produced 543 tons concentrates which contain 343 tons lead and 14,378 oz. silver.

Aladdin's Lamp.—Four weeks' return:—372 tons of ore crushed, yielding 450 oz., and one ton of rich crude ore has been shipped, containing 30 oz.

Australian Champion Reef.—Crushed, 180 tons, yielding 105 oz.

New Queen.—1,220 ft. formation, crushed, 335 tons, yielding 202 oz. (gold).

St. John del Rey.—Gold produce March 12 to 21, £5,812; yield per ton, 73 o' an oz. troy.

Sulphide Corporation.—Have shipped India 132 tons of bullion, containing 10 900 oz. silver; Warrigal, 110 tons, containing 9,470 oz.

Victoria (Charters Towers).—300 tons crushed, yielded 427 oz. gold.

Labuan and Borneo.—For week ended March 27.—Output.—First quality, 850 tons; second quality, 125 tons. Sold locally.—First quality, 700 tons, second quality, 25 tons.

Great Boulder Proprietary.—For fortnight ended March 28: 1472 tons crushed, yielded 3,161 oz.

Queensland Menzies.—Crushed 90 tons for 312 oz.

Queen Cross Reef.—Partial clean up of 270 tons for 704 oz. gold.

Dividends Announced.

MISCELLANEOUS.

Hauraki Gold Mining Company, Limited.—6d. per share has been declared.

J. & P. Coats, Limited.—Interim dividend at the rate of 20s. per share, being the same as that a year ago.

Zeehan-Montana Mine, Limited.—Further interim dividend of 9d. per share.

East London Waterworks Company.—Dividends at the rate of 8 per cent. per annum for the past half-year.

Dimbula Valley (Ceylon) Tea Company, Limited.—Final dividend of 3 per cent. on the preference shares for the year ending March 31.

Spiers & Pond, Limited.—4s. per share, making 12s. per share paid on account of the dividend for the year ended March 31.

New Jagersfontein Mining and Exploration, Limited.—Dividend of 6 per cent. (equal to 6s. per share) for the half-year ending March 31.

Broken Hill Proprietary, Limited.—1s. 6d. per share for the quarter ending April.

Evered & Co., Limited.—Dividend at the rate of 7½ per cent. per annum for the past half-year, making, with the interim dividend, 7½ per cent. for the year, and a bonus of 2½ per cent.

Brilliant Gold Mining Company, Limited.—6d. per share.

Mason & Barry, Limited.—4s. per share for the year ended December 31, 1897.

Callard, Stewart, & Watt, Limited.—Interim dividend at the rate of 5½ per cent. per annum on the preference shares.

Wackrill & Co.—5 per cent. per annum on the ordinary and preference shares.

Direct United States Cable Company, Limited.—Interim dividend of 3s. per share for the quarter ending March 31.

Carlisle Consolidated Gold Mines, Limited.—First quarterly dividend at the rate of 2½ per cent. per annum.

Globe Telegraph and Trust Company, Limited.—Interim dividend of 2s. 6d. per share on the ordinary shares.

Mount Morgan Gold Mining Company, Limited.—6d. a share for the month of March.

Hodgson's Kingston Brewery Company.—Interim dividend at the rate of 3s. 6d. per share, for the six months ended March 31, 1898.

Rio Tinto Company.—Dividend announced of £1 per share, making a total distribution of £2 for the year. The sum of £40,000 is placed to reserve fund, and £21,700 carried forward.

Tharsis Sulphur and Copper.—Dividend for past half-year announced at 25 per cent. (equal to 10s. per share), writing off £48,047 and carrying forward £14,165. Last year the dividend was 17½ per cent., with £38,395 written off, and £15,708 carried forward.

Columbian Hydraulic Mining Company, Limited.—Dividend of 6d. per share.

Queensland—Menzies' Gold.—Dividend of 6d per share.

Champion Reef Gold Mining Company of India.—Interim dividend of 3s. 6d. per share.

Jubilee Gold Company, Limited.—5s. per share.

Louise & Co.—Further dividend of 3½ per cent. on the ordinary shares, making, with dividend paid in September last, 7 per cent. for the year ended February 22. £1,368 carried forward.

North German Lloyd Company announce 5 per cent. for the past year.

A. & F. Pears, Limited.—Interim dividend for the six months ended December 31, on the ordinary shares at the rate of 8 per cent. per annum.

Bayliss, Thomas & Co., Limited.—Interim dividend at the rate of 10 per cent per annum for the half-year ended March 31.

BREWERIES.

Brandon's, Putney, Limited.—Dividend on the ordinary shares at the rate of 10 per cent. per annum for the six months ended December 31, making, with the interim already paid, 7½ per cent. for 1897.

RAILWAYS.

Ottoman Railway from Smyrna to Aidan.—A dividend of 22s. per share, payable on the 6th inst.

Western of France Company.—The dividend for 1897 is at the rate of £7 14s. per cent. per annum as in 1896.

Tournay to Jurbise.—Dividend for the second half of 1897 has been fixed at 9s. 7d. per share on the dividend share, 6s. per share on the preference share, and £24 19s. 11½d. per share on the Jouissance shares.

Central Argentine Railway.—The directors recommend payment of a balance dividend of 1 per cent. for the year 1897 on the paid-up capital of the company, making, with the interim dividend, a total dividend of 1¾ per cent. for the year.

BANKS.

Tarapaca and London.—Interim dividend of 2s. 6d. per share, being at the rate of 5 per cent. per annum.

Chartered of India, Australia, and China.—Dividend to be declared for the past half-year at the rate of 10 per cent. per annum, making, with the interim dividend, 9 per cent. for the year; £75,000 to be added to reserve, £5,000 to the officers' superannuation fund and £12,403 carried forward.

On and after April 1 the London Bank of Australia, Limited, 2, Old Broad-street, will pay the coupons then due of the City of Newcastle, New South Wales, five and four per cent. debentures.

Messrs. Glyn, Mills, Currie & Co. notify that they are prepared to pay the drawn bonds and coupons of the Mexican five per cent. internal redeemable debt, due April 1 next at the exchange of 22¾d. per dollar.

The Comptoir National d'Escompte de Paris, 52, Threadneedle-street, E.C., has been instructed to receive for payment coupons due April 1, 1898, on the Imperial Russian Government Three per Cent. Gold Loan, 1894 (Series 2).

Mr. Francis Villiers Hornby has been appointed secretary of the Union Bank of London, Limited, in succession to Mr. C. H. R. Wollaston, who has retired from that post and has been elected a director of the bank.

Railway Traffic Returns.

Algeciras (Gibraltar) Railway.—Traffic for week ended March 19, Ps. 19,690; increase Ps. 1,597. Aggregate from July 1, Ps. 758,714; increase, Ps. 21,410.

Bengal Central Railway.—Traffic for week ending March 5, Rs. 19,291; increase, Rs. 2,365. Total from January 1, Rs. 186,497; increase, Rs. 23,343.

Burma Railways.—Receipts for week ending February 26, Rs. 2,05,965; decrease, Rs. 20,074. Aggregate from January 1, Rs. 16,55,206; decrease, Rs. 2,93,535.

Great Western of Brazil Railway.—Traffic for week ending February 12, $39,146; decrease, $1,265. Aggregate receipts to date $304,516; increase, $31,253.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, March 26:—Ps. 4,900, decrease Ps. 7,100. Aggregate from January 1, Ps. 123,300, increase Ps. 3,250.

Villa Maria and Rufino Railway.—Traffic for week ending March 26, $6,269; increase, $2,201. Aggregate from January 1, $55,116, decrease $4,861.

West Flanders Railway.—Gross receipts for week ending March 27, £1,944; increase, £47. Total from January 1, £26,093; increase, £644.

West of India Portuguese Railway.—Week ending March 5, Rs. 5,270; increase, Rs. 1,722.

Assam-Bengal Railway.—Traffic for week ended February 19, Rs. 27,506; increase, Rs. 7,760. Aggregate from January 1, Rs. 1,72,349; increase, Rs. 19,095.

Bengal Dooars Railway.—Traffic receipts from January 1 to February 19, Rs. 23,180; decrease, Rs. 6,828.

H. H. The Nizam's Guaranteed State Railways.—Traffic receipts from January 1 to February 26. Rs. 629,384; increase, Rs. 12,984.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending February 26, Rs. 6,217; decrease, Rs. 116. Aggregate from January 1, Rs. 43,378; decrease, Rs. 1,387.

Southern Mahratta Railway.—Receipts for week ended March 5, Rs. 104,121; decrease, Rs. 16,569.

Manila Railway.—Receipts for week ending March 26, $21,009; increase, $5,292. Aggregate from January 1, $233,089; increase, $57,052.

Southern Pacific Railway.—The net earnings for the month of February, $1,470,137; increase, $622,711.

Delhi Umballa Kalka Railway.—Traffic receipts for week ending March 26, Rs. 35,800; increase, Rs. 300. Total from commencement of half-year, Rs. 4,46,600; increase, Rs. 1,43,000.

Antofagasta and Bolivia Railway.—Traffic receipts for month of February, $353,000; decrease, $67,000. Total from January 1, $657,000; decrease, $178,000.

Puerto Cabello and Valencia Railway.—Traffic return for week ended February 11, £958; decrease, £745. Aggregate from January 1, £5,087: decrease, £2,348.

Western of Santa Fe Railways.—Gross receipts for week ending March 26, $52,890; increase, $26,580.

Mobile and Birmingham Railrotd.—Traffic for second week of March, $6,706; increase, $220. Aggregate from July 1, $268,401; decrease, $4,847.

Cleator and Workington.—Gross receipts for the week ending March 26 amounted to £1,027, a decrease of £60. Total receipts from January 1, £12,274, a decrease of £609.

Cockermouth and Keswick Railway.—Receipts for the week ending March 26, £817; increase, £147. Aggregate from January 1, £9,931; increase, £952.

Quebec Central Railway.—Receipts for second week of March, $8,559; increase, $621. Aggregate from July 1, $59,865; decrease, $8,893.

Bolivar Railway.—Traffic receipts for February, £3,351; decrease £1,691. Total for eight months to date, £13,445; decrease, £7,494.

TRAMWAY AND OMNIBUS RECEIPTS.

For past week:—Belfast, −£75; Calais, +£20; Croydon, −£15; Glasgow, −£166; Lea Bridge, +£9; London & Deptford, −£43; London Southern, −£39; London General Omnibus, −£2,389; London Road Car, −£924; Metropolitan, −£1,327; North Staffordshire, +£1; South London, −£265; Woolwich & S. E. London, −£48; Provincial, −£210; Southampton, −£27; Wolverhampton, −£29; Sunderland, −£2; Swansea, −£11.

Barcelona, +£7; Bordeaux, −£82.

Anglo-Argentine, week ending February 28, £302 increase; City of Buenos Ayres, week ending February 21, £508 increase.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk. Fd. *sinking fund;* Certs., *certificates;* Debs. or Dbs., *debentures;* Db. or D.Stk., *debenture stock;* Pf., Prf., or Pref., *preference;* Prefd. or Pfd., *preferred;* Dfd., *deferred;* L. or Ltd., *limited;* Sh., *share;* Ans., *annuities;* Cu. or Cm., *cumulative;* Gu or Guar., *guaranteed;* Bds., *bonds;* S., Sr., or Ser., *series;* In., Ins., Insc., *inscribed;* Dr., Drgs., Drwgs., *drawings;* Stg., Strlg., *sterling;* Lia., *liable to;* Sp., Surp., *surplus;* Per., Perp., *perpetual;* Ln. *lien;* Lo. *loan.*

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 14. New Series. FRIDAY, APRIL 8, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

England's Latest Move in China.

Tuesday's discussion in the House of Commons contributed very little to the nation's enlightenment upon the subject of our appropriation of Wei-hai-wei. Mr. Balfour had nothing really to tell the House or the country which it did not know before through the enterprise of the *Times* correspondent in Pekin. He filled in the details of the story to some extent, and made the surprising admission that it was not until the 22nd of last month that the Marquis of Salisbury woke up to the necessity of remonstrating with Russia over her domineering attitude towards the beaten and dispirited Chinese and her absorption of Port Arthur. Sir William Harcourt naturally made great play of the apparent shilly-shallying of the Foreign Office, and other opponents of the Government had their say against the policy of counter aggression as it might be called, which the country has now plunged into, but the whole thing was rather tame and pointless. It is perfectly true that the policy of the "open door" has not been adhered to, but there ought to be no disposition to accuse the present Government of being the first to depart from it. The drifting has been inevitable, and we are very sure that the Liberal Party, had it been in power, would not have done much otherwise.

Last week the Press of this country was almost unanimous in its condemnation of Lord Salisbury and his Government for their bungling, as it was called, in China—for allowing themselves to be outwitted by

Russia. Now the clamour has died away before the news that our Ambassador in Pekin has obtained for us a "lease" of Wei-hai-wei, to endure as long as Russia's occupation of Port Arthur. The news pleased nearly everybody, barring the discontented by profession, and a few people like Sir Charles Dilke, who recognise that such a possession in China implies a new departure which may cost us dear. He thinks that twenty thousand men will be required to garrison the place unless we enter into a compact with the Japanese to do garrison duty for us, and wants to know this, that, and many things. Really we scarcely understand what these jingos would be at. They howl at the Government when it does not occupy territory and join in the policy of grab, and they grumble when it does. To us it appears that some step such as this has been inevitable ever since the Germans and Russians commenced their aggressive policy in the Chinese Empire, unless we could have made up our minds to cordially agree with Russia. It was simply impossible that we could stand still and allow our great commercial interests in the far East to be jeopardised while these powers were cowing the Chinaman, and, by their behaviour, leading him to suppose that the power of England was on the wane. All that we have contended for was that we should enter into no engagements having for object the partition of China among several Powers; but it was equally clear to us that steps would sooner or later have to be taken to put ourselves in a position to defend liberty for our commerce in China whenever that liberty should be threatened. To effectually do this a post much further north than Hong Kong was necessary, and on the whole Wei-hai-wai may do as well for the purpose in view as any other place. It lies rather too far north, perhaps, and we should have preferred Chusan if not too costly to hold; but it is at any rate a better place for the purpose of watching over the northern commerce of China than even Port Arthur itself.

What is to be feared, however, is not the consequence to our finances of this annexation, for such it is, but what may flow out from this policy to China. Evidently the "sphere of influence" policy is spreading. No sooner has one power taken a step in advance than the others are anxious to get in front of it. Initially, these difficulties may be said to have begun when we allowed Russia, Germany, and France to snatch the fruits of their victory out of the hands of the Japanese—All the rest has followed in natural sequence, through our "neutrality" as it was called at that time — Russian domination at Pekin, the German aggression in Shan-tung, and the French restlessness in the south. For the moment the *pas* is with France, not that we have much to fear from her, weak as she is and with no population to spare; still France, by making a noise, has got something down south, and the something may some day threaten our supremacy at Canton or elsewhere: then we should have to take another move. Already, indeed, many people are clamouring for a fortified post on the mainland opposite Hong Kong, and if this clamour is yielded to Germany will look about for something else, and the neck to neck race for the Chinese Empire will go on merrily, until the grabbers come into collision. Then there will be a fight. That, to cut a long story short, seems to be the ultimate consequences likely to flow from what is now going on, and it is a pity that we could not have managed to gain our ends, which are only commercial ends, in China, without entering upon this career; but the mistake which led to this is not one for which the Marquis of Salisbury should fairly be held responsible. It originated much earlier, and the step he has now taken is certainly one which has been forced upon him both by popular outcry and the moves made in the game by the other players.

Possibilities Surrounding a War between Spain and the United States.

In the City the rapid and sharp fluctuation in the prices of securities is a fit index of the agitation and doubt which have taken possession of the public mind over this question. It does not seem reasonable that every class of security, from Consols down to South African mines, should plunge downward in price when the political barometer points to war between the United States and Spain. Surely at the very worst that war could not damage our interests to any appreciable extent. It would not much interrupt our commerce with the American Union even were the Spanish fleet to blockade all its Atlantic ports. In that event, as we have already pointed out, American produce would find its way to Europe over the railways of the Canadian Dominion and Mexico. Even were privateering to be resorted to, as it may be—the United States having abstained from signing the Declaration of Paris—and that in consequence we were obliged to send a fleet to protect our merchant marine, the result should not be disastrous to us. The trade of Cuba, on the other hand, has already been so disorganised that its complete temporary extinction with ourselves and our West Indian possessions would not leave much trace on the great commerce of the United Kingdom.

And as for Spain; well, Spain undoubtedly runs the greatest risk of national bankruptcy through a war with such a power as the United States. National bankruptcy seems only a question of time in any event for Spain, and we do not suppose that the suspension of payment upon the enormous debt of that country would have any appreciable consequence here. The English public has long ceased to invest in Spanish bonds. They are dealt in on the London market because it is an international market into which Americans, Spaniards, and Frenchmen come to transact their business. Throughout the present scare American speculators have been systematic "bears" of Spanish bonds, and the impression is that they have won immense sums of money from the French speculators who have been equally systematic "bulls." Much buying and selling, the product of this antagonism, has taken place on the London Stock Exchange, but the English people have had scarcely any share in the play, and we doubt very much if a default by Spain would bring a hundred people in this country into the hands of their creditors. Nor need the trade of Spain be materially damaged unless revolution follows bankruptcy there, as is by no means improbable. Then, indeed, for a time we should see a diminution in Spanish imports from the United Kingdom, and dullness might arise in consequence in some branches of our export trade. In all this, however, there is nothing really to alarm us, and the puzzle is unsolved—why should war between powers, whose interests involve no danger for us through sharing in

the fray, cause such perturbation and excitement, paralysing business and reducing the Stock Exchange day after day to a condition of helpless suspense?

One explanation of the apparent inadequacy of the causes adduced to produce such effects is no doubt to be found in the perilously inflated condition of our markets at most points. Prices are extremely high compared with the average range of former years, and what is really feared is such a strain upon our money market as might cause a further advance in the rate of discount. Such an advance could not take place without, as we have frequently demonstrated, compelling a great number of holders of stocks upon borrowed money to sell; and it is almost certain that, should war break out between Spain and the United States, further heavy drafts upon our small stock of gold would take place. Already the mere prospect of war has caused us to lose, not much of the Bank of England's stock certainly, but the whole fresh supply of the metal coming into the market. Let war break out and the probability is that some millions of gold would be taken from the Bank of England by the States within a very short space of time—enough of the metal probably to send our Bank rate to five per cent. This contingency alone is sufficient to account for the excessive nervousness and the feeling of dread now prevalent, and to make everybody indebted to bankers for capital anxious about the future.

It would be waste of time for us to dwell much on this aspect of the present political crisis; it has been harped on to weariness already in these columns. Passing then from it, we come to another question which is even of greater general importance, and on whose answer likewise the fate of our markets for securities to no small extent depends. This question is, whether the war would be short and sharp or a long drawn out struggle? If the war should turn out to be merely an episode of a few weeks' duration, at the end of which Cuba would have secured freedom and Spain be driven out of the West Indies for ever, crushed and beaten, then the effects of conflict would very soon be obliterated, and the United States might be trusted to recover without serious strain on their public credit. Spain, no doubt, would at once be bankrupt in such an event, and probably soon plunged into the chaos of revolution. Undoubtedly the hope in the States is that war, if it does occur, will be short and sharp, but we can have no assurance upon the point, and hardly share this view. Should the eminent Spaniard, whose opinions were set forth in Tuesday's *Times* by the Paris correspondent of the paper, adequately represent the views of his nation, and we have little doubt that they do, then war may by no means be a thing of a few weeks. Let us note what he says—

> I repeat, it is not on Europe that we count, but on ourselves; on God and our right. There is still in Spain plenty of good gold and good blood. We shall spare neither. We shall send all the soldiers we can. The Americans, if they attempt it, will not vanquish 250,000 men, which is the number we shall shortly have in Cuba, and they will have to kill us one by one to the last man. We shall deal American trade more rapid and telling blows than America will ever deal us, for if we cannot [capture vessels we can wreck them.
>
> Yes, I admit that we have blundered in Cuba; but for fifty years we have not been sufficiently masters of the island to govern in peace, reform abuses, and introduce a milder form of administration. If we now succumb, we shall not be the only ones. There are other possessions in the hands of Europeans which the Americans will seize as a logical consequence of their triumph over us. The Pope, I am told, is intervening. Leo XIII. still has in his mind the ironical triumph which Bismarck secured for him in the question of the Caroline Islands. But this time he will perceive that the Americans are more mad with pride and with scorn of others than all the nations of Europe. They will not heed him more than others. The only thing which will make them hesitate is the necessity of paying for their premeditated conquest by mountains of ruins and torrents of blood. Upon this alone do I count for arresting the strong arm raised by America against what she considers weak Spain. But, where God guides and strikes, men's plans frequently miscarry, and to judge of the victory we must wait for the last battle in the criminal conflict about to be waged in the name of force and of the pride of prosperity.

Here we have the utterances of a man who has made up his mind to sacrifice everything, and life itself, for what he deems the honour of his country. It is little use to put against passionate pride of this description calculations about Spain's inability to maintain a prolonged war, for we know that no country fights more desperately, or with greater determination, than one whose very existence as a coherent State hangs in the balance. Mere bankruptcy cannot always shorten wars entered upon in this spirit. Not only so, but the statement that Spain will soon have a quarter of a million soldiers in the island warns us that the United States could not hope to liberate Cuba by a mere naval demonstration. Their people must be prepared to land a large army in the eastern or central portions of the island, now in the hands of the provincial government, to join the insurgent forces in a determined land campaign whose object it will be to drive the Spanish troops into the sea. We need not say that this looks a most formidable undertaking, which may involve the expenditure of a great many millions and the loss of tens of thousands of human lives. Not only must this campaign be undertaken, but the insurgents will have to be fed as well as the non-combatant inhabitants of the island, and the feeding will have to be paid for by the United States as well as the provisions carried between the American ports and the landing places in Cuba under protection of a powerful fleet.

No doubt, should the Spanish Navy be destroyed at an early stage of the conflict, or so crippled as to become incapable of offence, this part of the undertaking would be rendered comparatively easy of accomplishment, and such a victory could not fail to disorganise and dispirit the Spanish forces in the island. This preliminary victory, however, is not nearly so assured as the advocates of war in the United States appear to think. The Spanish Navy is probably the stronger of the two at the present time. It is said to be badly manned and officered, especially officered, but men and officers may be trusted to fight with all the old Spanish resolution. The United States Navy, on the other hand, is notoriously defective in its personnel, so far as the command of fighting sailors is concerned, and it is smaller than that of Spain. It is not, therefore, inherently improbable that the struggle at sea might be of some duration, and should it be so the United States will at once be brought face to face with very considerable financial difficulties. We must not forget that their Government would enter upon this war, not only possessed of no money in hand, but with an empty treasury. The Dingley tariff has proved disastrous to the revenue already, and the true condition of the Federal Treasury has only been obscured for a little time by the flush of business created through the deficiency of the crops in Europe last year and the

abundant one in the States. A check at the outset would stimulate the American people, whose resources are great, whose national credit is first-class, to raise whatever money might be necessary in order to provide vessels and men sufficient to overcome the Spaniards. But the debt in this way incurred could not fail to bring considerable trouble upon the nation's finances when the war was over, and to create acute difficulties in regard to the currency. Such consequences might be very far reaching indeed, not only on the commercial prosperity of the Union, but upon our trade therewith and our investment interests therein; and we see in such remote contingencies a deeper and more enduring reason for disquiet than any lying in the immediate effect of an outbreak of hostilities upon our money-market.

But will war break out? Really at the moment of writing no man can say. Passion is rising both in Spain and in the United States, and though, so far, President McKinley seems to have stood fast, calmly endeavouring to breast the swelling tide, we do not know the moment when he may be swept off his feet by the fury of those who are clamouring for strife. So far away as we are, we cannot estimate the strength of popular feeling, the combined strength of the varied nations impelling the nation towards war; but it is possible to recognise that the situation has now become almost a hopeless one from the point of view of the maintenance of peace. We have Spain determined and the Cubans equally determined—witness that remarkable letter in last Monday's *Daily Chronicle* from its correspondent, Mr. Musgrave, who succeeded in reaching the head quarters of the provisional government of Cuba before falling into the hands of the Spaniards, and by them being summarily ejected from the island. In that letter President Maso emphatically declared that the motto of the Cubans is "Independence or death." If the United States people, in their sympathy with this attitude of the Cubans, are equally determined to assist in liberating the island, then peace has become impossible, and such episodes as the offer of the Pope to mediate between the belligerents become almost pathetically laughable. Looking at all the circumstances, as far as we can get at the drift of them through the din of excited passions, we still fear that the end of the present suspense must be bloodshed, a war the ultimate fruits of which no man can foresee. Victory for the States will only bring to the front for them a new procession of troubles Victory for Spain—ah, that seems impossible. For centuries her lot has been defeat.

Two Great German Banks and Continental Banking Habits.

We have before us the reports for the year 1897 of the Deutsche Bank and the Dresdner Bank, both of which institutions have risen to a great position in international trade and bill discounting within a comparatively short number of years. The paid-up capital of the Deutsche Bank is now £7,500,000, and the reserve fund £2,263,781, showing an increase of £2,500,000 in the paid-up capital, and of £281,230 in the reserve fund within the year, the company having issued 50,000,000 marks of new capital last year to meet the expansion of its business. The Dresdner Bank has followed the same policy, and its capital fully paid-up has increased from £4,250,000 to £5,500,000 in 1897, the reserve fund being in the same time raised £400,000 by the addition to it of the premium of 36½ per cent. obtained on the new shares. No English banks, except the Bank of England, have such paid-up capitals, in proportion to their commitments, as these two great German institutions now possess. The total in the balance-sheet of the Deutsche Bank amounts to little more than £36,000,000, and that in the Dresdner Bank to less than £21,200,000, yet the capital and reserve fund in the one case amount to nearly £9,750,000, and, in the other, after the last call had been paid up, as it was on the 1st inst., to £6,875,000. We cannot help thinking that such a position as to capital places these banks on a much more satisfactory basis than that on which English banks so largely rest. Here we build up enormous liabilities on current and deposit accounts, not upon the paid up capital, but upon the illusive strength of the uncalled portion of that capital for which the shareholders remain liable. Thus we frequently find now-a-days British banks, with from £20,000,000 to £50,000,000 of liabilities to depositors, whose paid up capital rarely amounts to as much as £3,500,000, and whose capital and reserve together never equal the total even of the Dresdner Bank.

On the other hand German banking, and most Continental banking, follows lines which would be repudiated as unsafe by the banks of this country. In the United Kingdom we still cling, at all events, to the form of keeping the assets of banks in a more or less liquid condition, so as to conform to the imminent liability on deposits at call. But these two German banks enter into all sorts of commitments and engagements which are supposed to be relegated here to the finance houses, so called. They take their share in promoting companies, and place capital in other enterprises just as if they were Barings, or Rothschilds or Morgans, or even mere Hooleys. The Deutsche Bank, for instance, announces that it has placed shares of two banks of which it became owners in its balance sheet at cost price, and it has entered into more or less large commitments in the Anatolian railway, in the German Trust Company, and in the Company for Electric Elevated and Underground railways in Berlin. In like manner the Dresdner Bank directors announce that in conjunction with a firm in Berlin they have formed a Mexican Electric Works, Limited, for the purpose of lighting the City of Mexico with electricity; and they pride themselves upon the extension of their commission business, and in that for the purchase and sale of stocks. In short, while not excluding commercial affairs, these Continental institutions openly and frankly carry on the trade of loan monger and company promoter, as well as that of stock and share broker on the markets. They also, and in consequence, take a large share in the arbitrage business which goes on between Bourse and Bourse.

That there are risks of a grave description in this mixture of businesses, nominally held distinct under our banking habits, is strikingly shown by the last report of another of these conglomerate institutions, the Laenderbank of Vienna. This institution had a speculative origin, having been one of the creations of M. Bontoux, the founder of the French Union Générale of lamentable memory. It did not fail when that institution foundered, but on the contrary seems to have been

occasionally very prosperous. Had it not been so it could not possibly have withstood the strain of the tremendous losses it has now been obliged to acknowledge—losses aggregating nearly 10,000,000 florins. It has had to withdraw 6,000,000 florins from the extraordinary reserve, 2,500,000 florins from the special reserve, and to write off 1,250,000 florins from the profits of 1897, making 9,750,000 florins swept away in one year. Not necessarily, however, losses in that year, because the business is of that financial kind which causes losses to emerge slowly. The Vienna correspondent of the *Financial News* said in that paper the other day—and we give it as an example of the kind of business done—that last year, when the affairs of the Austrian Enamel Company were made public, the Laenderbank was obliged to buy back all the shares in this company, which had originally been issued by its instrumentality at a very high premium; and, in another instance, it sold the shares of a calico manufactory in Prague at a nominal price in order to avoid a call. It has suffered, in short, the usual woes inseparable from the trade of an unsuccessful company promoter, and this kind of risk falls directly upon such banks as we are dealing with, without any intermediatory finance house, or group of houses, to intercept part of the force of the blow.

Viewing the affairs of these institutions from this standpoint, we may be inclined to plume ourselves upon our more conservative banking customs. To some extent this satisfaction is well grounded, but we are not at all sure that competition has not, in recent years, been secretly drawing British banks more and more into the same channels of business which these German banks follow in the open. What some of our banks, at any rate, have been doing is to promote the promoter of companies, if we may use the phrase. They stand directly behind the adventurous fellows who manufacture companies and launch into new enterprises of all descriptions, often with excessive capitals, and lend these men their credit to an extent which would never be allowed by the shareholders were the facts suspected. This is unquestionably true at the present time, and before passing judgment upon the Continental method of business we must wait for the results of some of this hidden sustenance of financiers in the case of banks at home.

Looking at the matter without prejudice we cannot say that there is anything radically unsound in the German methods as here disclosed, at least not for the creditors of these banks on current account. What both the Deutsche and the Dresdner Banks risk is their own capital and reserves, and as long as the commitments involve them in no risks exceeding the amount of these funds, the danger to public credit arising through their promotion of dangerous or doubtful enterprises seems small. One point, however, in connection with the large development of the commercial side, or apparently commercial side, of the business done by these banks deserves careful attention here, and that is the extent to which they sustain their financial operations by means of money obtained from the discount of their acceptances on the London market. The balance sheet of the Deutsche Bank does not specifically define the amount of acceptances it has afloat, but there is an item, "bills payable," which we may take to represent acceptances, in the main if not entirely, and that stands at £6,525,590. In the same manner the Dresdner Bank shows "acceptances against credits and securities" to the amount of £5,031,283. These two together come to more than £11,500,000, and a recent estimate put the amount of the acceptances of these two banks continually afloat in the London market at about £8,000,000. Here we have at once opened up a very serious question for London dealers in credit.—How far do these acceptances represent ordinary commercial transactions, how far credit created to sustain the company-promoting enterprise and industrial finance in which these banks are engaged? We cannot answer this question, but it points to a necessity for care in the selection of the bills tendered to the market by such foreign institutions, and we are not sure that the free circulation of so much of their paper in London is a thing to be joyful about. In former days and under old-fashioned arrangements, such paper could not have been melted here without the endorsement of an English merchant-banking house of known wealth and unlimited credit. Now these bills rank with the best. What do they really represent? Is there a holder who can say?

American Life Office Investments.—2.

Turning to the investment lists proper of the Equitable and Mutual of New York offices neither of which, let us emphasise, lend on their own policies, we find that neither the one nor the other is an extensive holder of United States Government Bonds, nor does either of them appear to have any money at all invested in Great Britain. The Equitable is a considerable holder in the Northern Pacific Railway Company, in the Pittsburg, C.C. and St. Louis, the Pittsburg, McKeesport, and Youghiogheny, the St. Louis and San Francisco, the St. Louis and Iron Mountain—all bonds apparently—the Union Pacific—whether bonds or shares is not stated, the New York, Lake Erie, and Western, Prior and General Lien Bonds, and in something else of the company's, it is not stated what. The Chicago, St. Paul, Minneapolis, and Manitoba—bonds we presume—the C. C. C. and St. Louis, the Pittsburg C. C. and St. Louis, the St. Louis and Iron Mountain, the Manhattan, the Metropolitan Elevated, the Missouri Pacific, the New York Elevated, the Old Colony, the Ohio and Mississippi, and many similar, all form depositories for large amounts of the company's funds. The Western Union Telegraph, and the Mercanthe Trust Company stocks, The C. C. C. and St. Louis Preferred stock, Chicago and North-Western Common stock, Baltimore and Ohio Common stock, Western National Bank stock, and so on and so on, go to swell the list, and indicate a very mixed lot of investments indeed, to which we may add a certain amount of Prussian, Italian, Russian, German, Brazilian, Servian, Hungarian, and Cape of Good Hope and Australian government stocks, but the aggregate of these latter is small. The company has over $1,000,000 in "Wabash"— this is all the entry,—about $110,000 in "City of Woonsocket," about $1,400,000 in "Union Pacific," $2,170,000 in Albany and Susquehanna; $1,107,000 in "Central of Georgia Consolidated," about $7,760,000 in "North-West" consolidated debenture, Fremont, &c., &c.—presumably the various issues of the Chicago and North Western Railway Company. We mention these as mere samples of the medley; Toronto, Quebec, Montreal, "City of St. Lawrence," "City of Manchester"—not "Manchester, England"—City of

New York, "City of Lynn," "City of Somerville," and other municipal bonds all help to swell up the total of $109,595,489 at which the invested fund of this company stood on Dec. 31st last.

Varied, however, as the Equitable's list is, and diluted with a good many securities which we cannot think highly of, or about whose quality we can form no opinion of any sort, it appears to us to be excelled in odd miscellaneousness by that of the Mutual, although this latter concern has distributed its investments over a greater variety of securities, and is doubtless wisely guided in having so done. It has gone in very largely for small holdings in county bonds all over the United States. These small county debts may be quite good, and probably are all right in most instances; but they would, we fear, be of no use to British policyholders were any trouble to arise. The Mutual alone puts British Government consols in its investment list to the amount necessary to fulfil the stipulations of the Act of Parliament when it originally began business here. No doubt the others had made the same deposit, but it does not now figure in their investment list, so we may assume that they took the money home again as soon as they could. For the rest the Mutual is a considerable holder of Austrian and Italian rentes, Prussian consols, Canadian provincial Government bonds—New Brunswick and Nova Scotia—State of Virginia bonds, Montreal City bonds, Georgia City bonds, Toronto bonds, and so on. Among its other investments deserving of special mention we may give Erie Railway bonds, grade not stated, Sandusky and Cleveland bonds, Richmond and Danville bonds, South Carolina and Georgia bonds, Texas and New Orleans Railroad bonds, Wabash Railroad bonds ($2,042,650), Western Railroad of Alabama bonds, Brooklyn Union Gas and Brooklyn Wharf and Warehouse bonds, Philadelphia Bourse bonds, Sharon Estate Company bonds, United States Mortgage and Trust Company bonds, American Exchange National Bank stock, Central Trust stock, Guaranty Trust Company stock, National Bank of Commerce stock, National Union Bank stock, Pennsylvania Railroad stock, Title Guarantee and Trust Company stock, and United States Mortgage and Trust Company stock. All these names we have given represent individual investments of amounts exceeding $250,000, and the company holds what we should consider very large sums in some of them, presumably bought at high prices. For instance, the nominal value of the Guaranty Trust Company stock owned by it, is $1,200,181, and the market value is placed at $3,389,040. This is an unusually large increase, even in such an investment list, none of the other Trust companies securities held by the company showing anything like such a rise. It would be interesting to know at what price the Mutual Life bought, and how the market price is ascertained, seeing that it holds all but $800,000 of the company's capital. Where is the rest of the stock, this $800,000? Do the officers of the Mutual own it, and how is a market made for it so that the actual price can be proved?

Although the lists of the Equitable and the Mutual Offices are deficient in particulars, so that we are throughout very often unable to say what class of bond is held in such concerns as the Erie, the Equitable Gas Company, the Sharon and Estate Company, the Illinois Central Railroad, the Georgia Railroad and Banking Company, the Dakota Central Railroad Company, and so on, it is plain enough that a large proportion of the investments are by no means first class. This may be reasonably inferred from the return itself, and is to some extent proved by the fact that comparatively few of the securities stand much above their "book-value" to the companies, while a certain proportion of them are below it. For instance, such things as the Richmond, York River, &c., bonds—unspecified—the San Antonio and Aransas pass bonds, the Seaboard and Roanoke bonds, the South Carolina and Georgia bonds, the Indiana, Decatur &c., bonds, the Consolidated Gas stock, the Louisville and Terrehaut bonds in the Mutual list stand below cost price. In the same way the Equitable Company shows depreciation on some of its Chesapeake and Ohio, Chicago, Burlington and Quincey, Metropolitan Elevated, Michigan Central, Rome, Watertown and Ogdensburg, United States Government, and Brazilian Government bonds, and on its large holdings in St. Louis and Iron Mountain issues. Also, and this is true of all three concerns, many securities in themselves good enough, have obviously been purchased at what may be called "top of the market" figures, so that the margin between the companies and loss is both narrow and precarious.

What renders facts and inferences like these of great importance is the practice, common to all the companies, of adding the market value profits to the assets so as to swell out the totals of their resources. Thus the Equitable Company puts down $2,796,863 as "market value of stocks and bonds over book" value; the Mutual Company, $6,675,887; and the New York Life, $5,876,275. The practice appears to be universal among American life offices, and it is not a prudent one. Doubtless these unrealised, and possibly unrealisable "values" are used in the summaries prepared for European consumption, to help to show what splendid "surpluses" these life offices can attain to, their excessive and wholly indefensible extravagancies in current expenditure, notwithstanding. Surely enough has now been said to justify the warnings we have given to the British public to have nothing whatever to do with such concerns.

What we have said, furthermore, lends emphasis to the advice which we have also given, that British policy-holders in these offices should take steps to ascertain for themselves what their real position is. If these policy-holders united together they could easily, at a very minute individual cost, obtain competent men to go to America, with a mandate from them these companies dare not disregard, to thoroughly overhaul the securities the companies possess, and to examine into their methods of dealing with investments and of lending on the Stock Exchange. We have taken some trouble to try and compare the lists of 1893 with those of 1896, but owing to the vagueness with which the items are set forth there is not much to be gained by the comparison. However, we have picked out a few items, put together with what completeness was attainable, and tabulated them below to indicate how the investments vary. The table might have been made much longer, but we doubt whether it would have afforded much more light on what we regard as the speculative element entering into the investment habits of these companies. In the aggregate the three companies had upwards of £120,000,000 of money invested at the date of the latest return before us; and over their share in these investments British

policy-holders have no more control than they have over the private affairs of the Emperor of Russia.

One of the ablest and keenest of our critics has informed us that we are wrong in anticipating anything like failure from these American life offices. Unquestionably we are. They may live long after many a British office has "gone under" through foolish straightforwardness. What with the free revenue accruing from lapses and surrenders and the absence of surrender values, a business conducted in the way we have revealed possesses an incalculable "reserve vitality," which nothing but a wholesale destruction among its invested funds could overcome. But what about its effect upon life insurance business in general? Do the managers of British life offices suppose that facts such as have been disclosed in the present series of articles do not get talked about, or that, among the ignorant who hear, the same kind of tactics fail to be attributed more or less to all life insurance offices? Why cannot our offices move in their own protection to have fuller accounts published of all life business, to have the British business of American offices separately stated in the Board of Trade Returns, and to help policy-holders in American offices to secure some hold over the money they provide, now invested, or lent to speculators, in the United States under the absolute control of men in no way responsible to them? If they hold back much longer they may depend upon it that "something will happen" some day to make them bitterly regret their apathy. The figures in the following tables represent "book" values alone :—

Equitable Life of the United States.

Name.	1893.	1896.

The Prussian Budget for 1898—99.

At the first glance Prussia seems to contrive to spend nearly as much as we do; in fact the Budget for the new financial year balances at £109,376,369, which is more than we contrived last year to spend on Imperial purposes, even in our present mood of excessive extravagance, and it amounts to £7,000,000 more than the total for the year just closed. When, however, we look under the surface a very different state of things to ours is disclosed. First of all the share of taxation in producing this great revenue is only about £19,000,000,

exclusive of say £13,500,000 handed over to Prussia out of the revenues collected by the Imperial authorities of Germany. Putting that contribution at £14,000,000. and the total taxation embraced in the gross £109,000,000 odd is only £33,000,000. More than half the entire gross receipts are derivable from the railways owned by the State, and of the balance about £4,500,000 gross comes from State domains and forests, over £4,000,000 from the lottery, and nearly £7,000,000 from mines and salines. With the exception of the lottery—which is a vicious thing in any State, and a most expensive one to the Prussian nation, since the gross receipts of £4,124,000 yield less than half a million net—the great bulk of the Prussian revenue consists of earnings from State property of one kind or another, and of services rendered to the community. The railways alone are estimated to yield nearly £21,000,000 net in the current year, and after allowing £10,500,000 for the interest on railway debt, and about £1,800,000 for its amortization, there is still nearly £8,750,000 of this left for general State purposes.

We often hear complaints in this country about the manner in which German State railways are worked so as to stimulate exports of German manufactures. There is no doubt much truth in these complaints, and such figures as we have given show how easy it is for the German Imperial authority, and for Prussia, which constitutes the great bulk of the Empire, to carry goods at moderate charges. Our British railways have cost more than twice as much per mile as the Prussian lines have done. British railway companies, further, never pay off any of their debts, but continually add to them, so that the burden of capital they have to carry has reached altogether gigantic proportions. Our 21,277 miles of railway in the three kingdoms stood at the end of 1896, at a capitalised cost of nearly £1,030,000,000, of which £650,000,000 represented the debenture and preference capital. Prussia has more than 17,000 miles of railway, the capitalised cost of which at the present time amounts to about £340,000,000. The gross receipts of these Prussian railways are estimated at £60,485,826 in the present year; those of our railways in 1896, the latest year for which we have complete returns, were little over £90,000,000. It costs our companies an average of 56 per cent. of the gross receipts to work their lines, in spite of their habit of charging so many things to capital account. In Prussia the estimated cost exceeds 65 per cent., but then in the Prussian expenditure there is, apparently, included for the present year £2,000,000, to be spent out of revenue on new works, and £1,800,000 devoted to reduction of railway debt. According to law, three-quarters of 1 per cent. of the total railway debt must be paid off every year out of revenue. In this manner £29,000,000 has already been paid off, and in addition £33,000,000 has either been paid off by ordinary and extraordinary amortization or met out of yearly surpluses, so that the debt outstanding at the end of the financial year, 1896-97, was only £250,000,000. Adding the reserve of £4,000,000, set aside to meet unforeseen expenses, to increase rolling stock and such like, the total amount devoted in fifteen years to the ordinary expenditure of the State out of the proceeds of the State railways has been £56,000,000. In the Budget of the present year, after meeting interest and amortization it is calculated that £15,500,000 will be left out of the railway income for the ordinary purposes of State. No wonder that the Germans are able to reduce railway freight charges to any amount necessary to enable them to command foreign markets.

From an economic and business point of view this is the most interesting feature in the Prussian Budget, because the Government of Prussia is the largest owner of railways in the world and has pursued an enlightened and consistent policy which not only England but the United States and France have already bitter reason to regret that they did not in some respect imitate. Assuredly our system of allowing private companies to expend capital on the public highways of the country, without check of any kind, and to charge for their services almost what they please, within very liberal limits, constitutes a danger to our commercial supremacy which it would be difficult to exaggerate. By keeping the railways in its own hands and managing them economically the kingdom of Prussia, acting in harmony with the Empire of Germany, of which it is the backbone and mainstay, is not only able to accommodate the public cheaply but to reduce systematically the capital account burdens, and to develop traffic in all directions. How well this policy has answered is seen, not only in the figures we have given, but in those relating to the expansion of railway business. In 1882 the surplus derived by the State from railway administration was less than £7,000,000, in the year just closed it exceeded £25,000,000. This, of course, is before deducting the interest upon railway capital spent. For the whole period, from 1882 to 1896-97, the aggregate surplus was £223,000,000, out of which £129,000,000 went to pay debt interest. In addition £6,600,000 for the same period of time was appropriated out of the railway net receipts to meet State expenditure which would otherwise have had to be borrowed for. Even then a very large sum was left to the State. Mr. Spring Rice, who has compiled this suggestive report, puts this sum at £92,000,000 in fifteen years. Of course, we do not say that the drill sergeant method of conducting business to which the German mind has acclimatized itself, would suit here, nor can we advocate the State ownership of railways so as to transform them in this country into a huge system of indirect taxation, but we decidedly think that a great mistake was made in giving British railway companies a freehold of their property, and we are now paying to some extent for this mistake in the excessive and arbitrary charges levied upon the internal and over-sea traffic of the kingdom. In the future we shall suffer still more severely on this account unless the managers of our railways recognise that they must close their capital accounts and devote their energies to the development of traffic by means of its better organisation and reduced freights.

Economic and Financial Notes and Correspondence.

The Directorate of the Chartered Company.

Now that Mr. Cecil Rhodes has come home we may expect to have some light thrown upon the affairs of this company, but in order to deal with it effectually the report must be in our hands. Meantime the interesting question of Mr. Rhodes's re-election to a seat

upon the board has arisen. In some quarters this step is deprecated on account of his connection with the Jameson raid. We do not share the opinion that either he or Mr. Beit should be excluded from the directorate on this account. On the contrary it seems to us advisable that both these men should return to the posts from which they have been ejected. They more than any other men have made splendid fortunes out of their Chartered shares, and as the company will require a great deal of money in the near future it would be a seemly thing for them to come forward and provide it with, say, a couple of millions each, out of the many millions they have amassed. Mr. Rhodes is stated to have boasted many times of being worth ten millions, and probably Mr. Beit could even cap this splendid total. Neither then would be any the poorer in a wealth-enjoying sense were they to hand back a few of these millions to aid in the development of Rhodesia. For this reason alone we hope they will both be returned to seats on the new board, and that when they are there it will be for the shareholders to put pressure upon them to provide funds for the development of the great estate.

Suppose they were asked to find five millions as a beginning, receiving deferred shares in the company for the money, such shares to have no right to any dividend until the existing capital had been paid back 100 per cent. in dividends. That would be a perfectly reasonable arrangement, especially as all the first anticipations about the productiveness of Mashonaland and Matabeleland have been so lamentably falsified. Seeing also that Messrs. Beit and Rhodes took a leading share in instigating the Jamieson raid, out of which the Matabele rebellion arose, bringing in its train so many disasters, it would be a fitting reparation on the part of these men to hand over a considerable portion of the money they realized by the sale of the shares originally handed to them for nothing, so to say, out of the capital of the Chartered Company. They could have sold many of these shares at from £8 to £9 a piece, and doubtless did sell them for very handsome premiums in great numbers. Now, therefore, is the time for these gentlemen to exhibit themselves as genuine imperialists, making sacrifices for the good of the Empire they profess to love and ardently desire to extend. By all means put them back on the board of the Chartered Company, and let us see what their self-sacrificing capacity may be. Mr. Rhodes's patriotic words have been diluvial for so reticent a man. Now for the deeds to prove them true.

The End of the Zola Episode.

Is it really the end or only the close of the second act in a very miserable drama? We fear the latter is the case. Nothing has been settled by the judgment of the Court of Cassation, except the fact that the proceedings against M. Zola were illegal from the first. This is something to be thankful for, but the whole question raised by the arrogant assumption of dictatorial powers by the supreme Staff of the French army, with the Minister of War at their head, and the further question of the illegal condemnation of Captain Dreyfus remain where they were, except that the glaring scandals of both are now placed in higher relief. It is surely impossible for the French people to remain acquiescent in these scandals. We notice from the lists of the *Siècle* that the women of France are rallying nobly to the side of justice. Will the men of France take the same course and grapple with this military insolence, which is threatening to embroil the country once more in revolutionary outbreaks? No answer can be given to such questions until after the elections to be held next month; but in the meantime there is much cause for anxiety, because the civil government of France is plainly in the hands of weak, temporising, and timorous men—men afraid of standing by truth and justice, afraid to do anything except to bribe and pamper and create monopolies and cringe before the men of the sword. This kind of government is an evil augury for the French Republic, and we may well be anxious for its future. A peaceful and friendly France is the best neighbour that England could have at all times. With France on our side in European squabbles we should be strong beyond the power of any combination to break up. But France, as now governed, could not be the genuine friend of England, of anybody, and there is a danger in the near future that her strength may fall into the guiding hands of the Chauvinist class of men who are always England's bitterest foes, and traitors to the best interests of their native country. We must not, cannot interfere, but it is open to us to show unostentatious sympathy for all those who are striving in France at the present time to lift its politics and its Government out of the degraded condition into which they have fallen. The fight which men like MM. Clemenceau and Yves Guyot are leading in France is one in which free men and lovers of true freedom all the world over must join through sympathy, even when unable to take their share with hand and pen.

The Welsh Coal Crisis.

Just as trade, having recovered from the effects of the engineers' dispute, was beginning to advance with healthy vigour, another check has been administered to our prosperity by what seems a wantonly provoked quarrel in the South Wales coal trade. Already, it seems, 120,000 men are idle—not because they have been locked out by the employers, but because they had become impatient, and were not disposed to wait the outcome of the negotiations. It is quite probable that in the course of next week there may be a full-blown strike of 130,000 or 140,000 colliers on our hands. It is not now a case of a "tyrannical" lock-out. There is no hint of a wish on the part of the employers to "smash" the trade union, because there is, strictly speaking, no trade union in Wales. The dispute is the work of the men themselves. They refuse to listen to their leaders, most of whom have urged the men to return to work, and to abide the end of the negotiations, which are still open. The employers seem ready to receive the men back to work, appear perfectly willing to discuss the matters in dispute, and to do their utmost to arrive at a settlement.

But thus far the miners refuse to listen to their leaders or to heed their employers. The dispute centres in the sliding scale, which has been working for years in South Wales to the apparent satisfaction of all parties. Six months ago, however, the colliers gave notice to terminate the sliding scale. They denounced it as unfair to them. It was drawn up at a time when wages

were abnormally low, and the lowest rate recognised, the men urge, works prejudically for them. But as by the sliding scale wages are regulated according to a certain ratio to the price of coal, it does not seem clear how it can have any prejudicial influence on the men's wages. The real aim of the colliers, however, appears to be to establish a "minimum wage" somewhat higher than the amount fixed according to the lowest price in the scale. They also wish to obtain control of the output, so that they may stop work whenever there seems to them a danger that larger stocks may accumulate than they altogether approve of. About a month ago the employers gave notice to terminate all contracts—a merely precautionary measure whose enforcement would depend on the progress of the negotiations for a settlement. In the course of these it was discovered by the employers that the men's representatives had no authority to conclude a settlement of the dispute; and they refused to continue the negotiations, unless the men's representatives received plenary powers for this purpose. It was then arranged that a ballot should be taken; and in order that this might be done, the employers postponed the term of their notice to terminate contracts until the 9th April. The sliding sale, however, came nominally to a termination on the 1st of April, and, ignoring the arrangement made by the employers, about 40,000 of the colliers ceased work on that date. Others have followed their example, until now, as we have said, about 120,000 men are idle. The ballot resulted in a refusal, by 44,872 to 14,500 votes, to grant the plenary powers asked for, and the business has now been further complicated by the formulation of a demand for an immediate advance of 20 per cent. in wages.

At present, then, there seems no hope of averting a disastrous strike, recklessly provoked by the men themselves, the result of which it is easy to foresee. The men must certainly be worsted in the struggle, and trade will suffer seriously. Some ironworks have indeed been already closed in Wales, and doubtless this unfortunate course will be forced upon others, though perhaps not all; for Welsh steam coal is not a monopoly. It is the best of the kind, but at a push like the present Newcastle coal will do. The Tyne has, therefore, benefited immensely by the folly of the Welsh colliers. Trade in general, however, must necessarily suffer, and the loss to the community will be very great. And all because this mob of colliers, disregarding the leaders they had elected, and taking their "humours for their warrant," put forward extravagant demands that it would be impossible, and indeed foolish, for the employers to entertain.

Competition in Electric Lighting.

Complaint is made in some quarters that the Board of Trade is being appealed to for powers to enter into competition with the Metropolitan Electric Light Company throughout almost the whole of its district. That, however, is only what could have been expected, for only last week in our article on electric light companies we pointed out the danger in which the Metropolitan Company stood of encouraging such competition owing to its high charge for energy. As it is the Marylebone Vestry asks for power to establish works of its own in that parish, and the Charing Cross and Strand and County of London and Brush companies are asking for powers to enter the other districts of the company except the parish of Paddington, which will be left a little longer as a preserve to the Metropolitan Company.

Very likely these powers will be granted, for the Metropolitan had to submit to the loss of a portion of its monopoly a year or two back, as it is the settled determination of the Board of Trade to encourage competition. Then we shall see the Charing Cross and Strand competing with its charge of 4·40d. per Board of Trade unit against the 6·35d. or so levied by the Metropolitan Company. We should not be surprised if the Metropolitan Company suffers somewhat from the comparison, and if so the shareholders will only have the directors to thank. A moderate rate of about 5½d. per Board of Trade unit would have acted as a protection against invasion for some time to come, and the longer a company has unfettered possession of a district the stronger does its hold become. The board of the Notting Hill Company ought to take warning from this example for their charge of about 7d. per Board of Trade unit is still more oppressive.

The Buenos Ayres and Ensenada Absorption.

The details of the long talked of absorption by the Buenos Ayres Great Southern Railway Company of the Buenos Ayres and Ensenada Port Railway Company have now been published. Under the scheme the 4 per cent. debenture stock of the merged line will be exchanged for 4 per cent. debenture stock of the Buenos Ayres Great Southern Company, and the following are the terms of exchange for the other securities:—£92 of Southern 5 per cent. preference for every £100 of Ensenada 5 per cent. preference stock; £70 of Southern ordinary stock for every £100 of Ensenada 6 per cent. non-cumulative preference stock, and £50 of Southern ordinary stock for every £100 of Ensenada ordinary stock. Considering the different character of the two undertakings the scheme appears to be a fair one, but we are afraid that the holders of the 6 per cent. non-cumulative preference stock will grumble. Although the Buenos Ayres Great Southern is a wonderful line its ordinary stock cannot yet be considered better than a 6 per cent. stock. By receiving 70 per cent. of this the holders of the 6 per cent. preference will agree to cutting down their income to about £4 4s. per cent., with certainly a prospect of a share in improved earnings, but also with the risk of receiving less if profits fall off.

But the Buenos Ayres Great Southern could not in fairness to itself offer a better price, because this 6 per cent. preference stock represents the watering of the old Ensenada 7 per cent. preference stock. In 1895 the £600,000 of that stock was converted into £900,000 of new capital, £600,000 of which was to bear cumulative interest at 5 per cent., and £300,000 at 6 per cent., non-cumulative. By this stupid arrangement, carried through, no doubt, with stock-jobbing views, the fixed charges of the line were increased £6,000 per annum, and it should be remembered that for several years previous the old preference stock had not received full interest. The Southern Company

could not therefore treat this 6 per cent. preference stock as a real 6 per cent. stock. Meantime the price of this stock was started last year about 90 and has been up to 113 in its time. Purchasers high up may feel inclined to complain of the diminution of revenue, but then, of course, they ought not to have paid such an extravagant price for the stock. If the Southern Company had not come along and absorbed the undertaking, experience would probably have brought out the fact that the intrinsic value of the stock did not warrant such quotations.

Low Flash Point American Petroleum.

If the Select Committee of the House of Commons which for four years has been so patiently investigating the question of petroleum and its dangers, is to be guided by the Home Office evidence recently presented to it, its labour will have practically been in vain. Instead of promoting legislation it will have laid the seeds of an angry trade agitation and have postponed, perhaps made impossible, any effectual Parliamentary action. We cannot altogether comprehend Sir Vivian Majendie's objections to raising the flash point The evidence that it is the low flash point oil that has been responsible for most of the enormous number of lamp fatalities reported within the last year or two seems to have been overpowering and indisputable. Sir V. Majendie himself hardly disputes it, but if, he suggests, you raise this flash point, you will make people imagine that all danger has been removed, and so induce carelessness on their part. Therefore, he urges, leave the flash point alone ; make new regulations for the storage of oil ; look sharply after the small shopkeepers especially ; multiply trade restrictions, and all will come right. It is quite possible that more stringent regulations are required for the storage and sale of petroleum, but these are matters upon which the oil-dealers will have to be heard, and if the committee are to adopt Sir Vivian Majendie's recommendations legislation would be postponed to the Greek Kalends. But the first object of the Legislature ought to be the prevention of fatal accidents from lamp explosions. The raising of the flash point would be the immediate means of at least diminishing the number of these accidents ; why not at once attain this end by passing a simple measure forbidding the sale of oil below a certain flash point for use as an illuminant in dwelling-houses ? Why complicate the question and endanger legislation by insisting upon restrictions upon trade which would be sure to raise a storm of opposition ? Such a prohibition already exists in the United States. The coarse and dangerous rubbish which the Standard Oil Trust pours into this country cannot be sold in America ; why should we be more considerate with the Oil Trust than the Government of the United States ? Let us first insist on taking obvious and simple measures for the protection of life ; the restriction and regulation of traders may follow at a convenient season when deliberate consideration and discussion shall have satisfied us as to how far we can go in that direction.

The Telephone Failure.

The recent discussion in the House of Commons upon our wretched telephone service cannot be very pleasant reading to the National Telephone Company. Not that they are particularly sensitive to criticism ; if they were they would long ago have applied themselves with such energy as they can command to remedying the defects of the system for whose administration they are responsible. They cannot be in ignorance as to what these defects are. The public complaints have been loud and constant. Indeed, the whole system is defective ; there is hardly a sound point about it. The price to the customers, in London at all events, is all but prohibitive ; the plant is old and out of date ; and the working of the service is, as a rule, exasperating. All this the company have been told over and over again—until their customers have almost got tired of complaining. But the company gave no heed to remonstrance. They believed themselves in possession of a monopoly which they had carefully built up—to sell apparently to the State when the commercial world had become sufficiently exasperated to refuse to put up longer with what, in some sense, may be characterised as a gigantic nuisance. If, however, the corporation are careless of complaint and criticism, they will possibly be induced to give some thoughtful attention to the probable result of the inquiry to be held by the Select Committee which Mr. Hanbury, as representing the Treasury, induced the House of Commons to appoint. This Committee may make their monopoly worthless, or nearly so. The Post-office have not been able to do much in the way of competition with the monopoly. They refused to grant a licence to the Glasgow Town Council, which proposed to set up a telephone system of its own, so badly had the citizens been served by the existing system. It is doubtful whether a municipality can legally hold such a licence. Hence the inquiry by a Select Committee. It will at least set that doubt at rest ; perhaps it will discover a way out of the difficulty, and so relieve the Post-office administration from further hesitation about granting the Glasgow licence. Anyhow, these corporate telephone monopolists have been plainly told that the State will not buy their doubtful stock and antiquated plant. They are, it seems, willing to sell their business "as a going concern," for £6,000,000. Mr. Hanbury thinks the Post-office might establish a better service for two millions and a half. But this could hardly be done until 1911, when the present monopoly expires. It is to be hoped, therefore, that the Select Committee will find a way to extend and improve the telephone service while leaving the company severely alone.

Valetudinarian Traders.

A deputation of gentlemen interested in the milling industry of Austria waited the other day on the Government to give a lugubrious recital of their business woes, and to appeal against the inroads of the more pushful millers on the other side of the hedge—in Hungary to wit. These Austrian millers seem to be, in one sense, the Edie Ochiltrees, the sturdy beggars of industry ; in another, its weaklings. They beseeched the Minister to shut off Hungarian competition from them by the erection of a customs barrier wall, so that, without exertion, they might keep their Austrian customers to themselves, and charge them as they would without fear of the "millers over the way." It is not surprising. It is the bent of the protective mind. Such energy as natures of this sort exhibit is displayed in seeking shelter from the rough winds of the world. They would, if they could, introduce customs barriers

between different streets, or between different sides of the same street. The Hungarians have shown energy and shrewdness in the conduct of business generally, and the consequence is that trade in the Transleithan province has been making great advances. On the Austrian side things seem different. Traders there appear to prefer the petite culture, to trim their own little patch of industrial allotment, to charge what they like and do as they like, undisturbed by pushing intruders of a more adventurous spirit. It is, of course, very hard upon the unfortunate consumers; but with so many governments lending a willing ear to the complaints of the nerveless and lazy, what wonder if we seem relapsing into the barbarism which secludes trade, and coddles it until it becomes a permanent invalid, unable to stand except with the help of State monopolies. The consumers might help themselves if they would but revolt against this system of protective coddling at their expense; but they seem slow to discover the costly frauds which their own Governments practise upon them under the pretence of "encouraging native industry." A direful and a demoralizing system!

Three Small Ceylon Tea Companies.

The vicissitudes of plantation operations are well set forth in the return of three small Ceylon tea-growing companies. We have dealt with the results of these companies in former years, and then pointed out the necessity of greater heed to reserves in the case of the Edarapolla and Panawal companies. Only too surely have our fears been vindicated by the reports they have just issued. The one company of the three—the Kelani Valley—which has shown some caution in the past is the very one that has come out best in the record of the year's work.

All three companies had a large acreage to deal with in the year, but in every case a decrease would have been seen had not the Edarapolla included six months' crop from a new estate in its returns. The weather undoubtedly was bad in Ceylon last year for tea growing, but this fact was not accompanied by a higher price for teas as might have been expected. The return of mature acreage, total crop, and price obtained was as follows:—

	Mature Acreage.		Crop.		Price per lb.	
	1896.	1897.	1896.	1897.	1896.	1897.
			lbs.	lbs.	d.	d.
Edarapolla	471	821*	358,324	401,105	6¼	5
Kelani v.	1,013	1,200	638,145	632,023	6⅜	6½
Panawal	510	577	279,471	258,309	6¼	5⅞

* 251 acres of this only for six months.

In addition to the low price of tea, the companies had to contend with heavier working charges, owing to the rise in exchange and the higher price of rice in consequence of the famine in India. The net profits of two of them therefore shrank considerably as the following table shows:—

	Net Profits		Put to depreciation, &c.		Dividend Per cent.	
	1896.	1897.	1896.	1897.	1896.	1897.
	£	£	£	£		
Edarapolla	2,795	1,128	595	18	10	5
Kelani v.	3,017	3,178	708	721	10	10
Panawal	1,912	609	181	101*	8	2

* Taken away from balances.

The Panawal did very badly, as, after paying 2 per cent. as an interim dividend on the ordinary shares, in September, it was only able to meet the interest on the preference at the end of the year by swallowing up the whole balance forward and creating a small debit balance. With such variations in profits as set forth here, can we consider the Edarapolla and Panawal boards well advised in paying such high dividends in 1896? Of course it will be urged that they did not know the future, but they knew the past, and that should have told them that tea-growing was essentially a speculative industry subject to many variations. How the Kelina Valley produced such a good profit is rather a mystery, in view of the circumstances of the year and the reduced price obtained for the tea.

"Tape Prices."

The recent case of Rucker v. Calvert shows the amount of reliance which can be placed upon the "tape prices" of stocks and shares which appear in the daily press. The shares in question in that case appeared in several share lists as of the value of some £40 when in truth they were really worth nil. The wise action of the Stock Exchange in forbidding tape machines to be supplied to certain outside brokers becomes apparent, for, as one witness observed, there is no physical force to prevent a person sending a purely fictitious price on the tape. This being so it is clear that an easy door would be opened to all kinds of frauds which happily the committee of the Stock Exchange has promptly closed.

Another of Mr. Whitaker Wright's "Successes."

The policy of this Triton amongst the minnows of the West Australian market appears to be working towards its proper end very quickly. To over-capitalise a property seems the aim of all latter-day geniuses, but Mr. Wright may perhaps hold that his operations in regard to the Lake View Consols fell short of his best efforts. He found the predecessor of this company in the shape of the Lake View and Boulder East Company, a local company with £40,000 share capital, and no liability. This modest total he converted into £220,000 by registering a new company in May, 1896, and £30,000 more cash was to be put into the undertaking out of this, so that it was not all fluff and swelling.

To make up for this moderate addition of working capital, care was taken that, after the exchange, the shares should be started upon a higher platform altogether, as to price, in just the same manner as the same group of market engineers is endeavouring to elevate Ivanhoes. In the case of "Lake Views" the operation was probably more successful, and with talk about what "increased stamping power" would do for the company, the price was worked up to £12⅜ per £1 share, or about £70 apiece for the old shares. It was a matter of hope, for we believe no dividend was announced between May, 1896, and October, 1897, which is rather a long interval even for a mining company.

Soon after the larger number of stamps were brought into play, the returns from the mine, both in regard to quantity and quality, fell off to a shocking extent. This

has had a depressing effect upon the prices of the share, as the following table sets forth :—

Months.	Stamps at work.	Yield of gold.	Per ton from mill.	Per ton from tailings.	Price per share.
		oz.	oz.	oz.	
June	20	4,754	2·3	1·2	7⅛
July	20	6,253	2·2	1·04	8 1/16
August	20	5,742	2·3	1·15	8⅜
September	40	6,007	2·1	1·2	9 7/16
October	60	9,564	1·9	1·08	12
November	60	8,551	1·4	·79	12⅜
December	60	8,615	1·1	·88	11 5/16
January	40	7,554	·9	·75	10⅜
February	40	7,396	·9	·84	9 1/16
Present price					8½

The last two months only forty stamps were run as the old mill broke down, which is quite a mercy, or the yield per ton might have suffered still more. Certainly two dividends of 10s. per share have been declared, one in October last and the other this month, but it is extremely doubtful whether distributions can be kept up at this or any regular pace. Meantime, people will wonder where all the favourable news came from regarding the future when the shares were hoisted up to 12⅜. If it came from insiders they were woefully deceived, but no one can beat a latter-day financier for innocence and simplicity of mind.

British Trade in Havre.

Until last year it seemed as if Havre was being gradually choked by the protective legislation of 1892. The decline in its trade had been steady year after year. But 1897 saw a considerable revival in commercial activity—though reduced prices did not correspondingly swell the profits of local commercial dealers—and the Customs receipts rose to more than £3,000,000. The revival may be but temporary. Much of it was owing to the large importation of grain made necessary by the deficiency of the French harvest, and some of it by the exceptional shipments of cotton, owing to the abundant American crop, and consequent diminution in prices. Our latest Consular report shows us that we are still largely interested in Havre. British shipping tops the list there : an easy lead by 976 steamers to 360 French and 240 German. This lead is steadily increasing—even more, apparently, in the tonnage of the ships than in the number. Our Consul throws out a useful hint to shipowners that they should leave their shipmasters some latitude as to the discharge of crews at Havre. It is often difficult to procure any but a French crew there, and the regulations to be observed as to French sailors under the age of forty render their engagement troublesome, and often costly. Goods of British manufacture continue for the most part to hold their own at Havre and district. Of English hats and caps 21,851 were imported into Havre direct, while at other ports the local houses were supplied by English firms having agencies in Paris. There is a good market for Australian hides ; and bicycles and stationery have to be added to the list of British goods which are much in demand in Havre and neighbourhood.

But there are lessons in detail which our manufacturers have yet to learn, and Sheffield cutlery, though its reputation is untarnished, is being excluded from Havre because the manufacturers have not given attention to the quality of lightness enforced by the peculiarities of the French customs tariff. This tariff is based largely on the actual weight of the article imported. German manufacturers promptly appreciated the importance of this fact, and studied lightness in articles intended for the French market. Hence their ability to curtail the trade in Sheffield cutlery, not because German cutlery is better, but because it is lighter, and pays less duty than the Sheffield article. In one respect the slow-moving British manufacturer, however, has at last made an important advance. He has had his trade circulars drawn up in decent French, with prices given in local currency, and weights and measures in the decimal system. But in this respect they are far behind even the Americans, who have long had their trade circulars "done up" in French, English, and Spanish—of course also with prices in local currency and weights in the decimal system. The result has been that American machinery has largely superseded British in France. Now, however, that our manufacturers have seen the necessity of having trade circulars in French, they may condescend to adapt themselves to the languages and usages of other countries, and even try to check the invasion of trade rivals by the employment of a few energetic commercial travellers who know other tongues besides their own.

THE JAPANESE BUDGET.

The Japanese Budget Estimates for 1898–9, which have come to possess considerable interest for the western world, represent a slight decrease on the estimated totals of 1897–8. The expenditure is put at 229,000,000 yen, and the revenue at 212,000,000 yen, or a deficit of 17,000,000 yen, which is to be covered by a "financial programme." For 1897–8 the sum of ordinary and extraordinary revenue was put at 239,750,482 yen, and the sum of ordinary and extraordinary expenditure at 239,664,459 yen. The expectation of a surplus of 86,023 yen shown in these figures has not been fulfilled. Some of the new taxes have yielded considerably less than was anticipated, while some of the appropriations have proved to be inadequate, and the result is a deficit which is variously estimated at 30,000,000 yen and 45,000,000 yen, and which will bring the accumulated deficit to something like 130,000,000 yen. The diminution, slight though it is, in the revenue estimate for 1898-9 seems to show that the officials of the Japanese Finance Department are less sanguine than they were a year ago of the country's ability to stand increased taxation. Certainly some of the devices adopted for obtaining revenue were not very commendable, and we should not be surprised to hear that they have been abandoned as pettifogging, or at any rate that their burden has been lightened. The Government is about to take over the practical monopoly of tobacco ; and that, though vexatious enough to the people, should bring in considerable additional revenue. But the Finance Minister will probably find all his work cut out to keep the year's deficit from exceeding the 17,000,000 yen anticipated.

Speculation is busy as to the precise form which the "financial programme" will take. Will there be a foreign loan, or an increase of taxes ? Or, again, will the Treasury contrive to jog along for a time with the arrears of the war indemnity, of which they demand payment by May next, and which is to be provided by the forthcoming Chinese Loan ? The Finance Minister is averse to a foreign loan and the people have shown very plainly that they are averse to more taxation ; so that, in all probability, the last course will be adopted. But a considerable proportion of the money will be required to pay the bills for new warships and other similar luxuries, and will go out of the country almost as soon as it comes in ; and after the liquidation of the budget deficits of the past three years there will not be much left to ease that financial stringency which is causing so much havoc among commercial men in the land. When the gold standard law came into force we took the liberty of doubting whether the gentlemen responsible for it quite realised its bearings. It is a fact that, so far, the law has worked as much injury as benefit to Japan, and has crippled much of its trade with the silver-using countries of the East.

THE MEXICAN BUDGET.

Even the strongest republican must sometimes admit that Dictatorships do good. Certainly Don Porfirio Diaz, who has now been under the name of constitutional President, Dictator of Mexico for many years, is a ruler of whom his country may well be proud; and in nothing has the character of his administration been more conspicuously shown to be enlightened than in the management of the finances of the State. He found them in confusion, his country discredited abroad, unable to raise money for public works, and generally looked upon with suspicion as a debtor prone to break its engagements. Mexico is to-day in the enjoyment of as good repute on European money markets as any State of Spanish origin in all America. The Budget just issued in English for the year 1898-99 undertakes to show in some degree how the improvement has been brought about. It has been by the substitution of order in place of chaos. The accounts are fully and minutely given, every department of revenue and expenditure is passed under review and carefully weighed. Therefore, the Finance Minister and the Government, as well as the creditors of the State, are fairly able to estimate the position, and to put forward anticipations which have every probability of being realised. Mexico, as everyone knows, has suffered very severely from the depreciation of silver, but the Government has never made any attempt to play tricks with its currency, and has borne the increased burden imposed by the depreciated exchange out of the increased revenues which, as far as we can judge, have been carefully nursed into productiveness. There has also been, of course, a considerable increase in the debt of the country, but less on account of the Government, as far as the figures before as disclose, than on account of public enterprises undertaken with Government help and under Government sanction. Great developments, for example, have taken place in the mining industries of Mexico, and, in spite of the low price of silver, the yield of that metal from Mexican mines is well maintained.

The result of these and other improvements is that the public revenue for 1898-99 is estimated at M$.51,6559,500, which is M$.547,383 above the revenue from 1896-97, but expenses, including supplementary credits, amount to rather more than M$.52,000,000, so that there would be a deficit if the revenue could not be augmented. It is, however, apparently easy to increase the revenue, and Don José Yves Limantour, the able Finance Minister, proposes to get what money he requires to balance his Budget by means of a slight additional tax on the producers of drinks, more or less alcoholic. Should his anticipation on this head be realised, the budget for the coming year will just about balance with a mere M$.20,000 over. That a country like Mexico should be able to produce a revenue of M$.52,000,000 for its Federal Government, over and above the revenues to be found in addition for its State Governments, may seem a considerable strain upon a country whose population is so poor, and from some points of view it is so. At the same time, if the dictator lives long and keeps his power, and continues to devote his energies to the opening up of the enormous resources of his country, there ought to be no danger of anything like such defaults upon the Mexican public debts as we were familiar with in the past. The total amount of the public debt of Mexico, including a small floating debt, is nearly M$.202,290,798. This is not an excessive debt taken by itself, but the State is also under considerable obligations to the public on account of railway guarantees, and such like. Still, reckoning everything in the Budget, the presentment is a satisfactory one and affords good hope that the Government of the Republic is progressing towards better things, towards a day when it may really become a constitutional one.

Critical Index to New Investments.

THE LINOTYPE COMPANY, LIMITED.

The company is again a borrower, this time in the shape of an issue of £250,000 4 per cent. first mortgage debentures of £5 each. They form part of a total of £1,000,000, and £24,905 has been already subscribed, the balance being offered at 102. Interes quarterly from July 1. Debentures are repayable at 105 on March 31, 1923, but company reserves the right to redeem them at any time on six months' notice at 107. Company wants funds to acquire freehold land at Broadheath, near Manchester, for building new works, &c. Share capital, fully paid, is £2,000,000, and the debentures are secured by a first mortgage on freeholds and other permanent assets, and a floating charge on the whole undertaking, the assets standing in the balance-sheet at the end of last December at £2,429,952. Debenture interest will require £10,000, while the net profits for 1896 were £123,255; and for 1897 £162,882, of which £21,984 was premium on new issue of shares. There is, therefore, at present ample margin for this issue of debentures, but we hope the directors will exercise their remaining borrowing powers with great caution. The business now is good, and so far these machines hold their own, but the day might come when serious competition may have to be faced.

YOUNG & CO.'S BREWERY, LIMITED.

Company owns the Ram Brewery, Wandsworth, S.W. Business dates from 1834, and the present company took it over in 1890 owing to the death of Mr. Young, who was then sole partner. Capital, fully paid 1,500 5 per cent. preference and 2,300 ordinary shares, all of £100 each, the whole of which was subscribed by the family and by officials of brewery. Assets then amounted to £392,779 and liabilities to £62,901. Since 1890 trade has considerably increased through purchase of additional houses and by improvements, and the values of the properties stood in the books on December 31 last at £613,798, of which brewery premises represented £43,940; freehold public-houses, £244,471; leaseholds, £123,937; and loans and interest, £108,188. There are no debentures or mortgages; the only liabilities, other than share capital and £70,000 reserve invested in business, being sundry creditors, rents payable, customers' deposits, and advances to carry out recent purchases, amounting in all to £120,105. The company now offers for subscription at 103, through the London and Westminster Bank, an issue of £150,000 irredeemable 3½ per cent. mortgage debenture stock being part of an authorised issue of £300,000. Interest due January and July. As the profit rental from the several brewery properties for the year ended June 30 last was £10,221, and for the six months to December 31 last, £5,570, irrespective of trade profits, and the interest on the present issue will require only £5,250, the debenture stock appears to an excellent security, the only point to quibble at being the high price asked for it, which reduces the yield to £3 7s. 11d. per cent.

RUBBER ESTATES OF PARA, LIMITED.

Capital £350,000 in £1 shares, divided equally into ordinary and 7 per cent. cumulative preference shares. The object of this formation is to buy the rubber estates of the Visconde de S. Domingos, which are being sold owing to the advanced age of the Visconde. The estates have yielded large revenues for a number of years, the prospectus says, but no information is given of any net profits having been made. Apart from some unreliable estimates, not a figure is given about past profits, not even for one year. Yet the public are asked to pay £300,000 to the Anglo-African Gold Properties, Limited, who are the present vendors, though they do not seem to have bought the properties at first hand. In view of the heavy depreciation in the exchange, and what looks very like approaching national bankruptcy, we should imagine an investment in the shares of the Rubber Estates of Para would be attended with very considerable risk.

GEORGE INGHAM & CO., LIMITED.

Mr. George Ingham, worsted spinner, of the Prospect Mill, Greetland, near Halifax, York, has sold his business, commenced in 1863, to the Central Finance Corporation, who, as promoters, are reselling it to the company at a profit; the purchase price being £55,000, in addition to which the stock-in-trade has to be paid for. Capital, £100,000; present issue, £90,000, in £10 shares, half ordinary and half 5 per cent. cumulative preference. The purchase price is to be cash, but the directors, which include the founder of the business, have taken £23,000 of the present issue, in equal proportions of preference and ordinary shares. Freehold properties, plant, and goodwill (formed on the basis of two years average profits over the last five years) are valued by two valuers at £55,157. Statement about profits is not so full as it ought to be. For five years they are certified to have amounted to £45,747, giving an average of £9,149 per annum, but considering that in one year they were only £5,428, it is evident they are of a more fluctuating nature than we should have expected. Under these circumstances, we should leave it to Yorkshiremen, who will probably subscribe the money if the undertaking is as good as made out. And they ought to know.

G. & C. & E. NUTHALL & SONS, LIMITED.

The company buys and amalgamates two cook, confectioner wine and spirit, &c., businesses in Kingston-on-Thames. Share

capital £100,000 in £1 shares, present issue being 50,000 shares, and there is also issued at par £40,000 4 per cent. mortgage debenture stock, power being reserved to redeem the stock by annual drawings of £2,000 a year at 110. The number of honoured patrons of the businesses is, in the words of the prospectus, large, and the block of freeholds is a combination "very unique." Sudlow Herrick & Sons certify present value of freeholds and leaseholds at £42,000, but to make up this amount they have to throw in the wine and spirit licence. Profits are not given year by year, but those of G. & C. Nuthall for three years ended September last are certified to have amounted to £15,598, and those of E. Nuthall & Sons for two years ended December last to £3,714, giving an average for the year of £7,056, but this is without charging for wear and tear of plant and for management. The purchase price of £81,100, of which £51,434 is to be cash, represents about twelve years' purchase, and appears to be a good deal beyond what the businesses justify. The security for the debentures is very slender, while as to the shares, the board is to take one-third the surplus profits beyond 8 per cent. dividend, in addition to their fees. There are plenty of wealthy people in Kingston who can afford to pay for such luxuries.

Company Reports and Balance-Sheets.

London, Edinburgh, and Glasgow Assurance Company, Limited.—It is an astonishing thing that a company of this character should continue to meet with large and even with increasing patronage. Originally one of the creations of the indefatigable Jabez Spencer Balfour, at his collapse it was taken over by a few men who saw their way to work it up into some kind of position, and contrary to our expectations they seem to have in a manner succeeded. Last year the gross premium income was £309,385 of which no less than £262,661 came from what is called the "non-participating" branch of the business. This is a new name for "industrial" insurance, one of the most expensive forms for provision of burial that can be imagined, at least as conducted by this company. What it actually does cost is not told in the figures, as expenses and commission are wrapped up so that it is impossible to say, how much is attributable to each branch of the business. We learn, however, from the Life Insurance Account that the expenses and commissions of the entire business came to more than 45·4 per cent. of the net premium income, the income, that is to say, less the amount paid for re-assurance. This is pretty stiff, and the effect is seen in the smallness of the accumulative funds. The directors claim that they have paid in claims and grants up to the end of last year, from the date when the company began business, no less than £1,198,890, and the total Life Assurance funds in hand at the end of last year amount to only £173,360. As there is an "ordinary" branch, with apparently a considerable business, and a "participating premium income" branch, which also, we presume, involves some future liability, it is fair to infer that the industrial or "non-particitating" business is conducted much as fire assurance is, with such a high scale of premiums that the conductors are able to count upon the payment of all current claims out of the current year's income, with an ample margin for right royal spending. So far, however, as we can judge, even this small accumulation cannot be said to belong to the privileged class of policyholders, if the term may be used, since the company has debenture debt of £99,650 in 4½ per cent. debenture stock. Presumably these debentures form the first charge upon all the Company's assets ranking even before the policy-holders. This is not a satisfactory position, look at it how one may, and should not the interest payable upon these debentures be included in the working expenses as well as the interest on the preference capital? In our opinion it ought to be, as well as the amounts written off investments, leasehold property, furniture, and fittings, agents, balances, and the cost of the quinquennial valuation. Were these outgoings added to the charges the revenue has to bear every year the cost of conducting the affairs of the Company would amount to over 49 per cent. of the net premium income. And this takes no account of the accident insurance branch, which enjoyed an income of £12,397 in the past year, the whole of which, together with about £340 of the small fund of £5,625 at the credit of this branch twelve months before, was absorbed in payment of claims and in commission and expenses. It seems to us idle to discuss the position of this concern from any point of view afforded by the experience of ordinary life assurance business. We can only regret that so many of the working classes should be found willing to contribute to such prosperity as it appears to enjoy. Is the rate of interest payable upon the preference capital 9 per cent. per annum or what?

The Second Scottish American Trust Company, Limited.—For the year ended March 1, 1898, this company obtained a net revenue of £34,841, exclusive of £6,264, brought forward, or equal to £8 14s. 2d. on the paid-up capital of £400,000. Out of this £2,000 was added to reserve, raising it to £80,000, and £31,900 devoted to 8¼ per cent. dividend on the shares for the year, 4 per cent. of which was paid in September last. A balance of £6,037 is after all left to be carried to the new year. The value of the securities held by the company is equal to £182 10s. 4d. per £100 share. This is thoroughly satisfactory, but these Dundee Trust companies have always been carefully organised and have accordingly done well.

The Scottish Widows' Fund Life Assurance Society.—In the year ended 31st December last this life office issued 2,162 policies, insuring £1,466,733. A small amount of this was re-insured, and the result was a net addition to the premium income of £50,318, but this included £4,181 in single premiums. Claims, death and survivance, took £720,630, and the broad result for the year was an increase of £642,237 in the accumulated fund, which now amounts to £14,142,983. The average rate of interest obtained on the funds in the year was £3 18s. 9d. per cent., without deducting income-tax, and expenses of management and commission absorbed £9 16s. 3d. per cent. of the premium income, or £6 4s. 5d. per cent. of the total income, the Society having received £544,011 in interest and rents. This is altogether a satisfactory exhibit. Bonus additions on the 579 claims, amounted to an average of 54 per cent. of the amount insured and the bonuses on 48 endowment policies which became claims amounted to an average of 34 per cent. The directors of the society are about to introduce an endowment and income insurance policy of the kind already issued by several offices. According to the balance-sheet the society has £1,810,604 invested in mortgages on property out of the United Kingdom, and its investments in Indian, Colonial, and Foreign Government and Municipal securities amount to £2,226,000, besides which there is £1,814,605 placed in American railway gold mortgage bonds, making nearly £6,000,000 placed abroad altogether out of £14,352,483. The proportion is large, but there is no indication whatever that any of the revenue on these properties is in arrear, and first-class American railroad bonds at any rate ought to be as good securities as can be got.

The British Empire Mutual Life Assurance Company.—Last year this society issued 1,185 new policies, insuring £711,940. After deducting reassurance, the net premium income resulting was £24,222. The total premium income was £278,231, and the revenue from interest was £101,730, or at the rate of £3 18s. per cent., after deducting income-tax on the average funds of the year invested and uninvested. Claims took £154,312, and expenses and commission about £49,000, or nearly 17·4 per cent. of the premium income. At the end of the year the total funds amounted to £2,671,413, having been increased by £121,471 during the year. This is not a large increase considering the business done, but £27,885 was paid to members as a cash bonus out of the profits during the year and, of course, the percentage of expenses is somewhat high, although this also is set off by the fact that they include the cost of periodical valuation and distribution of bonuses in the past year. Otherwise the directors say the percentage on the premium income shows a reduction. The bulk of the Company's money is invested at home, £367,659 in mortgages on property out of the United Kingdom and £328,013 in Indian Government securities. The company absorbed the Positive Life Office a short time ago and a note to the balance sheet says that the Indian business taken over from that company is still reckoned at 2s. to the rupee on both the debit and credit sides of the account. We can hardly tell what this means without a separate statement of that business, but the system seems open to objection.

Commercial Gas Company.—Revenue from gas increased £7,633 in the second half of 1896, but residuals brought in £3,824 less. Working expenses, as a result of the larger amount of gas sold, increased £3,372, and net revenue was accordingly only £463 higher at £47,910. The balance of £1,582 brought in was £6,732 less than a year ago, and as more capital has been issued in the time, the company has to draw upon its reserve in order to pay the usual dividends at the rate of 13½ per cent. per annum upon the old stock and of 10½ per cent. per annum upon the new stock. The amount to be withdrawn is not stated, and in view of the increased capital it is difficult to say what will be required; but the sum cannot be large we should imagine. The reserve at present amounts to £44,267, and the insurance fund to £28,652.

San Jorge Nitrate Company.—Last year was undoubtedly a poor year for nitrate companies, and this concern did well in earning a net profit of £26,510 in the time. As the company had in previous years a depreciation fund of 60,000, the Board considered itself perfectly justified in paying away the whole of the sum, and a little more in dividends equal to 7½ per cent. for the year, the balance forward being £1,615 less than the sum brought in. Owing to the combination, the company had been restricted to 4½ months' work, but this wretched arrangement broke down at the end of October, and the company has resumed work under normal conditions. Of course talk is on foot about another combination, but the Board do not seem inclined to go into this except on favourable terms to the company. If profits rise again it ought not to be forgotten that no sum was placed to depreciation account on this occasion, for the £60,000 to that account is the only sinking fund against the large sum of £351,589 paid for the property. Apparently the sum has been kept pretty clear of the undertaking, quite £45,000 being in cash and investments, and only some £15,000 locked up in nitrate and iodine.

Robinson Gold Mine (W. A).—This modest West Australian mining company issues a business-like report. In the fifteen months dealt with, gold was obtained to the value of £31,981, and mining and milling cost £12,494 or £2 1s. 8d. per ton. Administrative and other charges in London and Australia appear to have been high for they came to £4,200, and after £1,698 had been written off for depreciation, the net balance of £12,058 was left. Three dividends amounting in all to 10 per cent. had already been paid requiring £7,905, and the Board determined to carry the balance of £4,153 forward in view of the expenditure incidental to the erection of the new 10 stamps, the cyanide plant and further proposed developments. The directors speak hopefully about the future, but the main shaft at the time the report was issued was only down 200ft., so that little yet can be known about the wealth or poverty of the gold bearing strata.

Bank of Scotland.—Apart from one untoward matter the report for the past year is satisfactory. After providing for bad and doubtful debts *in the general business*—the words in italics were not in the last report and are explained below—the net profits for the year ended February 28, 1897, were £175,215, or nearly £3,000 more than in 1896. The balance brought in, however, was only £15,904 compared with £33,562, so after paying the usual dividend of 12 per cent. for the year, the amount applied in reduction of the heritable property account is only £5,000 against £15,000 last year. The balance remaining is £36,120, making with the reserve fund £861,120. The figures in the balance-sheet are encouraging, there being a small increase in the note circulation, an addition of £400,000 to the deposits, the total of which is not far short of £15,000,000, and an increase of £110,000 in acceptances, the liabilities to the public being now raised to exactly 17½ millions. On the assets side the stock of cash and investments is £730,000 larger at £8,133,000, and in this connection we think Government securities might in future be separated from money in London at call. Bills discounted and advances, on the other hand, show a reduction of £520,000 to £9,383,000, but taken altogether the display is a good one and the bank has strengthened its position during the year. The only blemish is the tardy acknowledgment that £150,000 has to be set aside to provide for loss anticipated in connection with the realisation of the property of a firm having estates in the West Indies which are said to have become depreciated through the operation of the Continental Sugar bounties. Fortunately the bank has a good reserve, and £125,000 of this amount is taken from it, the balance being taken from profits in hand. The reserve is thus reduced to £700,000, and only £11,120 is carried forward to the new account. It is a pity that when losses like this occur they are not met in the first instance, for by postponing them they only increase, and in this case there could have been little or no ground to expect the account to right itself however much the management might have hoped.

Royal Sardinian Railway Company.—The result of the past year's working shows that the line is not making progress. Total receipts were 5,007 lire more under their guarantee, and 5,000 lire more than in 1896, but the company received nearly 5,000 lire more from interest on capital invested, so that the receipts from traffic showed a small falling off. Outgoings, on the other hand, were larger by 5,000 lire, but the increase in working expenses proper was as much as 37,654 lire, offset by a saving of nearly 24,000 lire through the better exchange, and a reduction of 6,400 lire in taxes. It is fair to add, however, that expenses were swollen to the extent of 40,000 lire by the writing off of this sum as a result of the decision of an arbitration in a long pending law suit. The outcome of the working is a profit of 1,625,888 lire, which, while practically the same total as for the previous year, shows to what an extent the company has to depend upon the Government guarantee of 6,749,283 lire. Fortunately for the company this guarantee goes on until 1976, the terms being that the Government pays the company an annuity of 14,800 lire per kilometre and guarantees minimum gross receipts of 7,000 lire per kilometre per annum. Of the receipts in excess of this, 7,000 lire, 46 per cent., goes to the company and 54 per cent. is applied in reduction of the amounts paid by the Government under the guarantee. The available balance for the year is 1,625,888 lire, of which the company has to carry 5 per cent. to the reserve fund, raising it to 1,402,767 lire, and the rest is used in paying a dividend of 6 per cent. on the shares and in reimbursing 175 shares drawn last December. Excepting in 1893 when 5¾ per cent. was paid this has been the regular dividend for the past seven years. Such a dividend is all right while it lasts, but the business of the line certainly shows no expansion, and what will occur to the company suppose the privilege of belonging to the Triple Alliance were to cause a breakdown of Italian credit?

Redfern, Limited.—The gross profits of this high-class tailoring company were maintained last year; the total of £96,225 comparing with £96,970 in 1896. Expenses, however, were higher, and the net profit of £28,630 was £4,196 less. The same dividend, 8 per cent., was paid on the ordinary shares as for 1896, but only £2,500 was added to reserve, as against £5,000 a year back. The amount carried forward is also slightly less. The reserve now amounts to £15,000, and as the public holds only the preference capital, the charge upon which is £6,000, the margin of security is very good. There is, moreover, a satisfactory clause in the articles of association, which prevents the ordinary shares receiving a higher dividend than 10 per cent. until the reserve amounts to £20,000. The balance-sheet does not appear to have improved, the stock being about £4,000 higher at £42,324, and "debts due to company" £16,000 higher at £88,722. In spite of the reserve these movements have necessitated a loan of £12,000 from the bankers of the company.

The Salt Union, Limited.—The committee of shareholders appointed at the annual meeting held on February 28, have lost no time in approaching the directors in a "friendly spirit," with the result that several members of the old board have given up their seats in view of the removal of the head office to Liverpool. The committee have since induced the following local gentlemen to consent to act as directors, if elected:—Mr. William Harvey Alexander (Messrs. John Rems & Co.), merchant, Liverpool; Mr. George Henry Cox, Liverpool, Vice-president of the Liverpool Chamber of Commerce; Mr. John Holt, merchant, Liverpool, chairman of John Holt & Co. (Liverpool), Limited, and chairman of the Wirral Waterworks Company, and of the West Cheshire Water Company; Mr. Archibald Roxburgh (Messrs. Cockbain, Allardice & Co.), merchant, Liverpool; and Mr. Thomas Bland Royden, J.P., shipowner, Liverpool, director of the Union Marine Insurance Company, late M.P. for Liverpool; Mr. Herman John Falk and Mr. Thomas Ward, who have been associated with the company from its commencement, will retain their seats on the board. A meeting of the company will be held at Winchester House, Old Broad-street on 28th April, when the above gentlemen will be proposed for election. The names strike us as being good and belonging to Liverpool commercial men, which looks well for the future, but the financial position needs careful attention before anything can be done to work the Union into anything like a commercial success.

Kimberley Waterworks Company.—The business of this company has improved very much of late years, and its sale of 143 millions of gallons last year compares well with 115 millions in 1896, 82¾ millions in 1895, and only 65¾ millions in 1894. Income has not grown in the same proportion, for the gross receipts last year were £52,256, as against £49,370 in the previous twelve months. Working expenses, however, were actually less, so that the net revenue was £31,108, or £5,783 more than in 1896. This is the best statement for a number of years, and after raising the dividend by 1 per cent. to 5 per cent., the board added £5,099 to contingency fund, practically the reserve, as against £2,798, transferred a year ago. Depreciation upon plant and tools was allowed for at the usual rate, but £4,642 was written off the construction and property account, as against £3,291. The contingency fund now amounts to £12,500, and its importance is shown in the redemption last year of £3,500 of 6 per cent. mortgage debentures without the investments of the company, which amount to £25,065, having to be trenched upon. The balance-sheet in fact is a very good one, and probably the company was never in better financial condition.

TRADE OF GUAYAQUIL.

Guayaquil, the principal port of the Republic of Ecuador, has suffered considerably in recent years. There were serious fires in 1896; in 1897 great damage was done by the heavy rains to the cacao and coffee crops, from 25 to 50 per cent. of which were lost, while the rice crop in the coast provinces was destroyed. Then the Government authorised a new coinage of silver by one of the banks, and some months afterwards promulgated a law compelling the banks to hold half their metallic reserve in gold, which had to be imported from abroad. The strain on exchange transactions was very severe, and in December the banks suspended nearly all discount operations. Though the country is at peace, a large army is kept up, but the revenue has been increased and trade is fairly good. British commercial travellers, so our Consul informs us, do occasionally visit the country, and, as a rule, have expressed themselves satisfied with their share of the import trade. That is pleasant to hear. But there is more. The common kinds of cutlery, previously supplied by Germany, are being competed for by English manufacturers, who are regaining the trade in some measure. The Republic gets all her candles from Belgium. About 6,000 tons of sugar were produced in the Republic, some 2,000 of which were exported.

The Furness Railway Company in the construction of their new passenger brake vans are making them 34 feet in length, which will enable the company to provide a special platform, seven inches in height at one end, for half-a-dozen bicycles. Each bicycle fits into a separate leather-padded groove on this platform, and there is another groove at the end of the van for one of the wheels to fit in. Straps are also provided from side to side of the van, which fasten round the handle of each bicycle to prevent oscillation. The machines are thus made perfectly secure, and, further, are kept quite apart from the general luggage. The public will be glad to know of any movement for the safe carriage by railway of bicycles. Credit is due for this simple and effective arrangement to Mr. W. F. Pettigrew, the company's locomotive and carriage and wagon superintendent.

Is the Portuguese Government anxious to make a "corner" in corn? It has authorised, so Reuter tells us, the importation of sixty million kilogrammes of corn from abroad. What for? The Portuguese demand for cereals cannot be great. There has been no deficiency in the country; what, then, makes the Government so anxious for the importation of so large a quantity of corn? Is it in the hope that Spain, in the event of war with the United States, may be in sore straits for corn, and thus be ready to pay good prices to whomsoever can supply her? It is a queer policy for even a Portuguese Government to adopt.

Damage to the extent of $500,000,000 has been done by earthquake in the navy yard at Maine Island, in California. Severe shocks were felt in various parts of the same state, doing serious injury to buildings, and, of course, greatly alarming the inhabitants.

France demands 500,000,000 fr. from the Porte as an indemnity for the losses sustained by religious establishments in Anatolia, at the time of the massacres. Further demands may be made later for damage to commercial interests.

Hungary is chafing greatly under the Dingley Tariff. During a recent discussion in the Diet it was strongly urged that the Austrian and Hungarian Governments should take action in the matter, even if they went the length of adopting retaliatory measures. The Minister of Commerce admitted that the Hungarian sugar export trade in particular had suffered from the American duties; but the initiative could not be taken by Hungary alone. He suggested that it might be possible for the European States affected by the American tariff to agree upon a course of united action and proceed with vigour. Probably the Minister was thinking of the assembling of the Bounty Conference at Brussels.

THE PROPERTY MARKET.

The total of last week's sales at the Mart again exceeded £200,000, as compared with £115,013 in the same week of last year. Everything indicates that the investing public have turned with something like enthusiasm to property investments. The reason for this eagerness may not be quite apparent, but it is remarkable that in the week before Easter the total should run so high. Ground rents figured conspicuously at the sales, and the demand for them was constant and keen.

Bexhill-on-Sea seems rapidly developing as a watering place, and as an indication of the rising value of land there we may note that Messrs. Moss & Jameson recently sold 15¾ acres adjoining Station-road there at £18,000, or an average of £1,145 an acre. The same firm are shortly to offer at the Mart two freehold estates at Bexhill —Wakeham's Farm, containing about 18 acres, and Popp's Farm, comprising 21 acres. Messrs. Daniel Watney & Sons have sold by private treaty the freehold ground rent of £300 per annum, with reversion in 46 years, secured on premises in Nicholas-lane, City, which was recently offered at the Mart, and then withdrawn at £12,000. Sefton Lodge, Newmarket, the residence of the late Duchess of Montrose, has been sold by private contract by Messrs. Maple & Co.

The total sales at the Mart were not so high on Monday as we have recently become accustomed to, but they still reached the respectable amount of £29,793. A large part of this was supplied by Mr. Alfred Richards, who drew £10,361 for various gas and water shares and stocks. Brewery shares and debentures were also dealt in to a considerable extent by Messrs. Alfred Thomas, Peyer and Miles. But breweries themselves did not seem to be in request. The same firm offered two which were not sold. One was the Union Brewery, Wisbech, with ninety tied houses. It was withdrawn at £67,000. The other was Perrett's Brewery at Wandsworth, with four licensed houses. It was withdrawn at £9,500. Mr. T. B. Westacott was successful in disposing of some leasehold properties at Camden Town, &c., and Messrs. Wootton & Green sold six houses in Hillfield-avenue, Hornsey. Messrs. Fuller, Moon & Fuller, had a considerable sale of freehold properties at Croydon a few days ago. The bidding was spirited, and the lots went off at good prices.

There was little doing at the Mart on Tuesday. The attendance was restricted, and several of the lots had been withdrawn, while the total of the day's sales only amounted to £17,880. Some freehold ground-rents at South Tottenham were sold by Messrs. G. Gouldsmith, Son, & Co., at fair prices. They also disposed of some leasehold ground-rents at Crouch Hill for a very good return. Messrs. Willis & Crouch sold four freehold houses in Loraine-road, Holloway, for £2,990, and Messrs. Allen & Hoar disposed of two freehold houses in Mattison-road, Harringay, at £1,030, and four plots of freehold building land at Harlesden at £956.

A number of licensed houses were offered at Mason's Hall Tavern on Tuesday, though several failed to find purchasers. Messrs. J. J. Orgill, Marks, & Orgill, disposed of the freehold with possession, of the Duke of St. Albans, Highgate-road, at £14,000. The free lease and goodwill of the Lincoln Hotel, South-street, Manchester-square, offered by Mr. N. Rolfe, went for £7,800. Among those withdrawn were the Victoria, Holloway-road, bought in at £32,000, the Prince of Wales, Bishop's-road, Paddington, and the house No. 3, Bishop's-road, withdrawn at £50,000; and the Hertford-Arms, Park-street, Hyde Park, taken back at £20,000.

Fresh trouble has arisen between Russia and Turkey as to the payment of the arrears of the war indemnity. The Porte seemed inclined to pay away portions of the Greek indemnity in increasing its armaments. Russia dislikes this notion, and requires the payment of Russia's reduced demand of £T750,000 in cash. The Porte offers to pay £T150,000 annually until the arrears have been cleared off; but Russia insists on prompt cash payment. If she persists in this demand, it will take another big slice out of the Greek war indemnity.

Since the return of Sir John Forrest to Perth, the Westralian Cabinet has been considering the relations between the alluvial diggers and the holders of gold-mining leases. It has been decided to withdraw the amendment to Regulation 103, restricting the operations of alluvial diggers on any leasehold to a depth of 10 ft. from the surface. A new regulation will be issued under the authority of the Governor in Council protecting the necessary workings of the leaseholders against the encroachments of alluvial miners.

The West Australian Government are said to be considering the offer of a French syndicate to construct a water system for Coolgardie at a cost of £2,300,000.

According to the final gold returns for Queensland for 1897, the yield for the year was 807,928 oz., of the value of £2,553,141, an increase of 167,543 oz. The value of the Charters Towers yield was £1,030,671, Mount Morgan £710,040, and Gympie £335,033.

In his opening address to the Mexican Congress, the President of the Republic reports no change of importance in the economic situation nor in the condition of the treasury.

Things are beginning to look gloomy again on the Bulgarian frontier. The peaceful assurances exchanged between the Sultan and Prince Ferdinand seem to have been only diplomatic waste of breath. The Bulgarian journals are assuming a threatening tone towards Turkey. Bulgarian armed bands are making their way into Macedonia, where uneasy agitation has been renewed, and if it goes on simmering—as it probably will—there may be serious trouble there in a short time.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Corréspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?"

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

C. H. (Surrey).—Your best plan will be to get your bankers to introduce you to a respectable firm. No such restriction as you mention is made by members of the Stock Exchange. Very few brokers will refuse to carry through small transactions provided they are bona fide.

WHIST.—Your letter has reached me just before going to press, too late to enable me to reply in this number. The company has not sent me a copy of its report, but I am endeavouring to secure one; if I am successful in doing so before the holidays I will send you a note in answer to your query.

Next Week's Meetings.

TUESDAY, APRIL 12.

Cunard Steamship	Liverpool, noon.

WEDNESDAY, APRIL 13

Crieff & Comrie Railway	Comrie, 12.30 p.m.
Edinburgh Life Assurance	Edinburgh, 2 p.m.
Great Laxey	Cannon Street Hotel, noon.
New Trinidad Lake Asphalte ...	5, Newman's Court, 1.45 p.m.

THURSDAY, APRIL 14.

Anglo Continental Gas Syndicate ...	Winchester House, 3.30 p.m.

FRIDAY, APRIL 15

Edinburgh North American Investment	Edinburgh, 3 p.m.

SATURDAY, APRIL 16.

Eastern Mortgage and Agency ...	Cannon-street Hotel, 3 p.m.

TRAMWAY AND OMNIBUS RECEIPTS.

For past week:—Croydon, + £52; Glasgow, – £222; Lea Bridge, + £9; London & Deptford, + £10; London Southern, + £106; Metropolitan, + £623; North Staffordshire—£24; South London – £44; Woolwich & S. E. London, + £4; Southampton, – £27; Wolverhampton, + £10; Swansea, – £22.

Bordeaux, – £313.

Anglo-Argentine, week ending March 28, £26 increase; City of Buenos Ayres, week ending February 21, £508 increase.

The Canadian Government has introduced a Bill for the reduction of postage on inland letters from 3c to 2c per oz. Newspapers, which are at present sent free, are henceforth to be charged ½c per lb.

It is significant to note that the Spanish floating debt has increased during the month of March by 1,254,002 pesetas.

SUN LIFE
ASSURANCE SOCIETY.

ESTABLISHED 1810.

Funds in hand exceed £3,900,000.
Total Income exceeds £600,000.

The "Perfect Protection" Policy.

LIFE OR ENDOWMENT ASSURANCES

WITH

Relief from payment of Premiums during PERMANENT or temporary illness causing inability to attend to ordinary occupation for at least two consecutive months;

Suspension of payment of Premiums to meet policy-holders' pecuniary convenience;

Immediate payment of half the sum assured on disablement by total loss of eyesight or of two limbs;

AND

Special and attractive Bonus Scheme, providing large reductions or **total extinguishment of Premiums** payable after age 60.

THE "PERFECT PROTECTION" POLICY affords the most complete and suitable Assurance ever offered to professional and business men dependent upon their own exertions.

Apply for Prospectus giving full particulars to the General Manager.

The Investors' Review.

The Week's Money Market.

The past seven days have been exceptionally busy ones for the short loan market. During the greater part of the time the India Council called in money, vigorously, and as large sums were due to be repaid to the Bank of England, rates for short loans were kept up at 2½ to 2¾ per cent. The repayment of Treasury Bills on Monday, and the distribution of the British and Indian Government dividends on Tuesday, caused rates for day-to-day loans to drop to 2 to 2½ per cent., but it is significant that on the latter day the whole of the amount due to the Bank of England for maturing loans and bills could not be provided. Since then the uncertainty about the future has caused the rate for day-to-day money to rise to 2½ per cent., and loans for a week to be quoted 2½ to 2¾ per cent. Yesterday, indeed, the market became very firm, and 2¾ per cent. was frequently paid, the large withdrawal of gold, and the fears about Cuba inducing people to look for an advance in the Bank rate to-day to 3½ per cent. This advance is much more probable now than it was before the Bank had parted with the dividend money. Yet we scarcely see ground for an advance now, apart from politics. The Bank has only lost £298,000 in gold on the week. This is not enough by itself to support even a 3½ per cent. Bank rate.

Discount rates have been even more firmly maintained than charges for loans. Last Thursday the rate for three months' choice bills was 2 15/16 per cent., and since then it has not fallen below 2¾ per cent., to which it declined just after the dividends were out. The gravity of the news from the United States has, however, caused it to advance again, and the latest quotation yesterday was 2 15/16 per cent., with some disposition to deal subject to the Bank's decision. The demand for gold on American account is so strong that the Bank rate would have been raised before this, had it not been for the large arrivals of gold from various quarters. Not only does South Africa send a considerable amount each week, but fair sums in Japanese yen come in by every steamer, and, of course, the shipments of gold from Australia to San Francisco can be reckoned as an offset to the demand upon our market. At the present juncture it is impossible to speak with any degree of certainty about this matter, but the New York exchange has fallen rather sharply in the last few days, and the demand has, therefore, increased. Let this burdensome drain be removed and the arrivals of gold would at once cause the market to weaken, in spite of the large sums due to the Bank of England. Payments on account of the Chinese Loan may cause a little pressure at times in the month, but no doubt the Hong-Kong and Shanghai Bank will re-lend in the market the instalments it receives, and so the full effect of the payments will be staved off until May 8, when the £12,000,000 has to be handed over to the Japanese Government. Even then it should not be forgotten that the large payments by the latter country in the United Kingdom must quickly free the portion of the sum provided here, and perhaps also some part of the quota contributed by Germany, the payment of which is not unlikely to bring gold from Berlin to London. The Paris Exchange has fallen back, but the Berlin rate has risen, and preparations are evidently being made there for the transfer of cash

to us. We publish too early this week to be able to give the usual analysis of the Bank returns.

SILVER.

There has been a steady demand for the metal on Indian account, and a little buying for the Continent, with the result that the price has moved up $\frac{1}{16}$d. to 26d. per ounce. At this figure producers were quite prepared to sell, and so the market may be considered in a fairly normal condition. There is certainly a difference of ¼d. between the "spot" and "forward" quotation, which implies a moderately over-sold market, but such a fact is not likely to have much influence early in the month. Indeed, the nervous symptoms so prominent a short time back have disappeared since it has transpired that the Indian currency matter has been referred to a Departmental Committee. The market feels that it may rest in peace for a while, and not until the deliberations of that committee approach an end is the ferment likely to recommence. The India Council has sold its drafts steadily during the week, and it has shown every desire to meet the market, the price not being raised for specials until 10 lakhs had been sold. The official statement for the year ended March 31st. shows that Rs.14,72,07,928 were sold, realising in sterling £9,450,165, or an average rate of 1s. 3·407d. per rupee. Indian transfers have risen $\frac{1}{16}$d., and Chinese rates have moved up in the last day or so owing to the improvement in silver.

BANK AND DISCOUNT RATES ABROAD.

	Bank Rate.	Altered.	Open Market.

Stock Market Notes and Comments.

These need be but brief this week. In one sense there are no markets. The allottees of Lipton's shares have kept a few brokers and jobbers busy in a small way, selling their five and ten share allotment letters, and there is of course the general routine of investment transactions going on. Here and there, also, speculative accounts are being closed by people who prefer to be out of the hands of dealers in credit at a time like the present. But all this kind of thing does not mean "business" in the sense of a steady inpour of new orders from people who buy £10,000 of a stock because they have money enough to pay for £1,000, or from those who

tempt fate and forswear fortune with £50,000 when they could not pay for £500. It is this sort of speculative traffic which three-fourths of the members of the Stock Exchange feel the want of now, and whose absence they proclaim by bemoaning to all and sundry that "there is nothing doing; positively not a thing doing." Had the Stock Exchange investment business alone to live by, three-fourths of its members would be driven away to other spheres for a livelihood, and the shares of the building would be knocking about somewhere near par.

For the present it is just this speculative and half-speculative business which is about dead, so far as the private or individual operators on the market go. The Arbitrageurs and groups of financial "combines" have things all their own way, and a considerable amount of money has been lost and won by them over the "war" and "no war" flying rumours about Cuba alone. This kind of speculation in brigades and squadrons, however, is not conducive to a diffusion of wealth over the Stock Exchange as a whole. A man must be "in with the group" before he can hope to touch any of its winnings. Woe betide the fellow who thinks he knows what the game is to be, and takes to imitating what he esteems to be the tactics of this "bull" or that "bear" party. It is a hundred to one he gets knocked over in the *mêlée* and relieved of his purse. The numbers so treated have been so great in the last few months—if we embrace South African clique gambling we may say the last few years—that a serious-minded individual speculator is for the time being nearly as difficult to find as the honest man sought by Diogenes, and a wail over his absence rises daily from thousands of throats on the Stock Exchange.

He will come back again, do not fear, dear jobbers and brokers. All that he is doing now is to wait till he "sees his way," or thinks he does, which is quite as good for market purposes or better. No sooner is his own mind clear upon that point that he will rush forward, and be as ready as ever to put fortunes in your way by joyfully staking his own. Let the market then go and take its Easter recess in good spirits. Lively times are coming by-and-bye, when money grows dearer, and prices have been "shaken out a bit." In view of this "shaking out" would it not be prudent, though, for every one fond of peace of mind to reduce accounts carried in borrowed money at each opportunity given by beaten "bear" or triumphant "bull"? It is the craft whose sails are spread when the storm strikes it which founders. This is not a time to have any sail out on the treacherous ocean of international stock gambling. Absolute owners of good securities can afford to keep away from markets now and wait quietly for the better days to come. Owners in name and in pawn had better beware.

The Week's Stock Markets.

Business on the Stock Exchange was on a very limited scale during the closing hours of last week, no one caring to increase their commitments in view of the unsettled aspect of foreign affairs. Saturday witnessed a considerable shake out, without much actual business, and the week closed in a very depressed style, the relations between Spain and the United States then seeming to have reached a most critical stage. The present week, however, opened brighter, markets once again recovering in a wonderful manner; but profit taking soon spoilt the look of things again, and the closing of accounts prior to the holidays, the prospects of peace between Spain and the United States being now regarded as less favourable, and the strained relations between Turkey and Bulgaria, all acted as pretty considerable dampers on markets generally.

Consols were very steady until just before the close of business on Saturday, when the price gave way sharply, since when a partial recovery has occurred, the demand on the part of Great Britain for a lease of Wei-Hai-Wei on the evacuation of that port by the Japanese being favourably received. Indian Government securities also gave way at one time, and then recovered, but Bank of Ireland stock is 2½ lower.

Home Railway stocks have been fairly well supported, and even on Saturday when all other markets were very depressed, prices did not give way to any appreciable extent. The general improvement which set in on Monday soon carried quotations up rather above last week's closing, and the prospects of good holiday traffics helped to strengthen the market, although the dispute in the South Wales coal trade has acted somewhat as a damper. This strike will, it is thought, benefit the Midland Company, as a certain amount of traffic is sure to be diverted, and a demand sprang up for Midland deferred on the strength of this theory.

United States Railroad shares have simply followed the various ups and downs of Spanish stock, although the fall on Friday and Saturday last was accentuated by the rumour that President McKinley was about to issue his promised statement on the reply of the Spanish Government. When the recovery set in and a small "bear" panic was reported from Wall-street, the advance was largely helped by buyers who considered

that the contingency of war was about discounted at the present level, and then the receipt of telegrams pointing to a probability of the Pope's mediation caused a jump amounting to something like £5 in some cases, and to a greater or less rise in the whole list. This sharp recovery was followed by the inevitable profit-taking, and a reaction was the natural result, while the news that the Wall-street market is to remain open on Good Friday, indicates that the latest turn events have taken is regarded as a very serious one by New York operators. The usual tables compiled by the *Financial Chronicle* show that the gross earnings of 78 roads for the third week in March increased by 16·46 per cent.

Canadian Pacific shares after dropping to 82¼, recovered to about last week's level, the traffic return for the last ten days of March being a very good one. Grand Trunk stocks were also helped by an excellent return, coupled with a satisfactory working statement for February. The conference, which assembled at Buffalo to try and adjust the rates of the North-Western traffic, has failed to come to any definite decision, and has adjourned for a fortnight. At the half-yearly meeting of the Grand Trunk Company Sir C. Rivers Wilson spoke hopefully of the prospects of a speedy settlement of the rate war.

The Foreign market has varied day by day, from steady to firm, and then back to the lowest depths of depression, according to the varying phases of the political outlook. Spanish 4 per cents. have, of course, been the barometer of the whole market, and, in fact, of all markets, the price going from 53 to 47⅛ and up again to 51½, and then once more slipping back. The whole list was very depressed on Saturday, but the more hopeful view taken of the political situation on Monday caused a smart rally, which has again been lost in the face of the latest intelligence from Washington and Madrid. Prices on this side have followed the lead of Paris, where the Bourse has been entirely under the influence of war rumours all the week. In spite of a vigorous effort on the part of several members of the French senate to get the Bourse reform amendment separated from the Budget, it was decided to retain the connection, and the amendment was eventually agreed to. The quashing of the sentence on M. Zola also produced an unfavourable impression, and the settlement which is in progress has caused a good deal of uneasiness, the contango on Spanish stock being considerably higher than at the previous account. Heavy sales of Russian bonds on Saturday by several of the big French houses helped still further to weaken a market which had already gone almost to pieces, but the rally on Monday was general, all the Continental bourses sending more cheerful reports, principally on the reported mediation of the Pope in the dispute between Spain and the United States. This rumour served its turn before being officially denied. Among South American descriptions, Brazilian bonds have steadily gone from bad to worse, on apprehensions of financial difficulties at Rio, and the exchange has come lower day by day. One of the causes of the present state of affairs is undoubtedly the fall of over 40 per cent. in the price of coffee. Argentine issues drooped on the news that arrangements for a new loan are now being made, but the latest prices are not the worst of the week. Uruguayan bonds keep very steady, and have been helped by the notification of a remittance for the debt service.

Among foreign railway stocks there has been a partial recovery in some of the leading Argentine descriptions, notably Buenos Ayres and Ensenada, which was firmer in connection with the sale of the line to the Great Southern Company. Cordoba Central Income stock marks a further decline, last week's traffic showing a decrease of over £20,000, and Alagoas 5 per cents. fell 7½.

The Miscellaneous market was not affected much by political scares or rumours, but business has quieted down in view of the approaching holidays. Cycle companies' shares have met with a little more support, due, no doubt, to the approach of the cycling season. A large business has been transacted in Lipton's shares without causing much change in the price. Birmingham Vinegar ordinary again marks an advance, and several electric lighting concerns have met with support. Coal and iron companies' emissions gave way owing to the strike in the Welsh coal trade; London General Omnibus stock has fallen 5; Gas Light A is lower, and a heavy fall occurred in Water stocks, Chelsea marking a decline of 10½. National Telephone issues were pressed for sale on the decision of the Government to appoint a Select Committee to consider the whole question of telephonic communication. Fairfield Shipbuilding shares and debentures are higher, but Armstrong and Bolckow Vaughan relapsed after last week's rise. Anglo-American Telegraph stocks close firm on the announcement of the full dividend on the preferred stock.

Markets closed the week in a state of suspense, and business was reduced to practically a standstill, while the rumour that £750,000 was to leave the Bank tomorrow (Thursday) for the United States, was viewed as an adverse feature. United States Railroad shares left off at nearly the lowest level, and the list presents an all round decline on the week. Home Railway stocks were dull in sympathy, although the traffic returns were very good. Among foreign stocks Spanish four per cent. were finally quoted nearly 4 lower than last Thursday, but a partial rally occurred just at the last in Brazilian bonds owing to a recovery in the Rio Exchange. Consols were slightly easier on the news of the gold withdrawal.

Mining and Finance Companies.

The South African market, after several changes of tendency, finally closes without much of a move either way. Buying orders from Paris on Monday lifted the price of De Beers and one or two of the other leading counters, and Chartered shares were firmer on the arrival of Mr. Rhodes in England. Another falling-off is looked for in the results of the past month's working, owing to the scarcity of native labour. West Australian ventures remain dull and neglected, but copper shares have been active at higher prices. The Anaconda divi-

dend was again on a 5 per cent. basis, although the rise in the price of the metal and the increase in the output during the past year, had led some operators to look for an increased distribution. Indian shares were in demand, on satisfactory crushing returns.

Notes on Books.

La Bourse Anglaise. Par Georges Boudon, Avocat de la Cour d'Appel de Paris. Paris : A. Pedone ; London : Clement Wilson.

M. Boudon has produced an interesting and suggestive book, which may be read with profit even by members of the Stock Exchange. It comes out at an opportune moment, for the probability is that the coming disruption of the open market in Paris will bring a large addition to the international business already transacted here in stocks and shares. M. Boudon prefaces his analysis of the constitution and methods of the Stock Exchange with several interesting chapters on what may be called the trade policy of England, the first of which, forming the introduction to the whole, is entitled La Suprématie Anglaise. They are indicative of painstaking research into the commercial history of the United Kingdom, and show the author to be a man not only of culture but of enlightened ideas. The conclusion he comes to is that France would do well, not exactly to imitate us, but to adopt an enlightened national policy of her own. "The day," he says, "that France, without imitating anybody, is able to substitute a national policy for its present parochial one ; when the State, instead of paralysing private initiative, will do its best to provoke it in becoming its auxiliary to draw French capital towards the development of French enterprise: on that day France will cease to have any necessity either to be jealous of, or to fear the omnipotence of England." This remark is made at the close of a survey in which the economic, colonial, and scholastic policy of England have been subjected to a brief, but on the whole careful and intelligent analysis. The description of the Stock Exchange is also well done, and wonderfully accurate, considering that it is the production of a man who is in a practical way unfamiliar with English habits of business. At the end a French translation of the rules of the Stock Exchange is printed. We can honestly commend the book to the attention of those of our readers interested in the subject. In the next edition M. Boudon would do well to have the proofs read by some Englishman. English plurals and possessives have considerably bothered him.

Some Suggestions in Regard to Life Office Accounting, including inter alia *an Arrangement of the American Card System suitable for the Requirements of British Offices.* A. D. Lindsay Turnbull.

This essay was read by Mr. Lindsay Turnbull before the Actuarial Society of Edinburgh. It is highly technical, and, therefore, quite above our criticism, but we have looked through it with interest, and can see that it is a very thoughtful production full of valuable suggestions for the improvement of book-keeping suitable to Life Offices. It must have cost a great deal of labour to prepare and should be welcome to the profession of which Mr. Turnbull is evidently a very able member.

The New Zealand Official Year Book, 1897.

Some facts from the interesting official year book for 1897, prepared under instructions from the Right Honourable R. J. Seddon, P.C., Premier, by E. J. von Dadelszen, Registrar-General, will be useful for investors at the present time. The estimated population of the Colony on December 31, 1896, was 754,016 ; of this number 714,162 was the white population, exclusive of the Maories. There seems to have been very little increase in the total during the year through arrivals from other countries. This population imported in 1896 £7,137,320, including specie, a total smaller than that of 1885, but larger than the figures for any intervening year by a trifling amount. The export trade for the same period amounted to £9,321,105, of which total £9,177,336 consisted of the produce of the Colony. In respect of this import and export trade it will thus be seen that the Colony is more favourably placed than some of its neighbours, and it would need to be, for it has a public national debt of £44,353,686, which involves an annual burden upon the community of £1,738,622. This is exclusive of the local debts, which amounted at the same date, namely, March 31, 1897, to £6,806,656, the annual burden upon which is about £440,000. The compiler of the statistics institutes a comparison between the indebtedness of New Zealand and that of the other Australasian Colonies, in virtue of which New Zealand is shown to have a burden of only £60 13s. 9d. per head as against £69 4s. 2d. for Queensland, and £65 16s. 10d. for South Australia. This comparison is vitiated by the omission of the local debts. Add these and New Zealand stands at the top of the tree. It is certainly highest in the amount of taxation per head if we exclude Western Australia, whose present position is altogether abnormal. In the financial year 1896—1897, the Colony raised £2,521,911 by what may be described as national taxation, and in addition local governing bodies of all descriptions raised £592,902 for the year 1895—1896, the latest apparently for which Mr. von Dadelszen had figures. How the unfortunate inhabitants stand up under such a burden has always been a mystery to us, and will continue to be one. In these various figures of indebtedness we do not see the guaranteed loan made to the Bank of New Zealand, but that loan, amounting to £2,000,000, is as much a burden upon the Colony as any other obligation. Its trade has to find the interest upon it, all of which comes to investors in this country. Of course there is a budget surplus ; Mr. Seddon always has that. It comes to £354,286 for the year ended March 31, 1897. In the same year the "Gross public Debt" of the Colony increased by £1,315,838. A surplus obtained at such a price is not cheap by any means, but we know New Zealand must borrow to live.

Through South Africa : By Henry M. Stanley, M.P. London : Sampson Low, Marston & Company.

We cannot quite understand why Mr. Stanley should have published this book. It will not enhance his reputation, nor can it assist the Chartered Company, with whom the author's sympathies evidently run. Mr. Stanley was a guest at the festivities in connection with the opening of the railway to Bulawayo. His impressions were hurriedly received, and equally hurriedly committed to writing for the *South Africa* newspaper.

It is not, perhaps, to be wondered at that they are sometimes crude in themselves, as well as somewhat crudely expressed. But, if so, what was the necessity for publishing them in book form. He writes enthusiastically about Bulawayo—"a city that must, if all goes well, grow to great distinction." He shows more enthusiasm about the gold mines than Mr. Rhodes himself. Mr. Stanley is convinced that gold is to be had in paying quantities; Rhodesia is the "centre of auriferous fields." But it should have a railway to Beira. Rhodesia can never rival the Transvaal, perhaps, but "it is not much inferior," and were Bulawayo nearer to the sea and nearer to the best mines, its "great distinction" might not be so very far off. We hope so; but for the present its distinction and prosperity are alike postponed. Practical men are chary in expressing their views about the auriferous fields, the development of which has been sadly delayed. Were gold to be had in paying quantities, there would not be very serious trouble about the railway to Beira. But in paying quantities gold has not yet been found, and no one who knows seems greatly impressed with the hope that it will be. As to the agricultural capabilities of Rhodesia, Mr. Stanley is also more, much more, enthusiastic than Mr. Rhodes; but on this subject he finds serious fault with the Chartered Company, which has sold all the best land to big companies that will not sell again save at a big profit. So the smaller capitalist, who would become the industrious pioneer in opening up the country, is forbidden the land. With its gold mines yet undeveloped, and the working agriculturist kept at a distance by the big grabbing companies, the prosperity of Rhodesia, if it ever comes, must be very much in the future indeed. Mr. Stanley, however, did not confine his hurried observations to Rhodesia; and though he has much to say that is uncomplimentary about the Boers, he yet admits that they are not entirely to blame for the backwardness of Cape Colony. They "cling to old-fashioned ideas somewhat more tenaciously than they ought to do," but "they do not object to private companies or individuals making irrigation works, or planting groves, which thrive so wonderfully; and as Cape Colony has been British for over ninety years, it is rather hard that the Boer should have all the blame." That is very true; and if Mr. Stanley had borne this in mind during and after his conversation with President Kruger he might have drawn his picture of that astute though primitive Boer statesman with less coarseness, less spitefulness, and a greater admixture of "sweet reasonableness."

The Law of Fixtures and Repairs, as between Landlord and Tenant: By W. de Bracy Herbert, M.A., LL.M., of the Inner Temple. London: Clement Wilson.

This is a very lucid, very concise, and very comprehensive explanation and epitome of the law as to fixtures and repairs as between landlord and tenant. It is not an argument as to what the law is, or ought to be, upon certain points raised, but a clear statement of what the law has been shown to be in cases decided in the courts. To the tenant especially, the work must be valuable, for very few seem fully to comprehend the extent of the responsibilities they undertake when renting a house or shop. We continually hear of tenants being rushed into serious costs very much to their own surprise, because they had not made themselves acquainted with the eccentricities of the law of landlord and tenant. Very few occupiers of houses, we suppose, will imagine, what it seems is the fact, that "apart from any agreement to the contrary, the tenant must continue to pay his rent, although the premises are destroyed by fire, and he cannot compel his landlord to rebuild the premises, even where he (the landlord) has received the insurance money." That does seem a very erroneous and very unfair provision of the law, and a burnt-out tenant, who had probably lost most of his furniture, and had of course been compelled to remove to another house, would probably be very indignant if presented with a bill for the rent of a building that had nothing but the blackened walls standing; but he would nevertheless have to pay if the landlord chose to take the case into court. The law indeed is rich in surprises—disagreeable, most of them—for the tenant. A careful perusal of Mr. Herbert's little book would save many an unfortunate tenant from loss in pocket and in temper. If the state of the law as between tenant and landlord were more generally known, it is not unlikely that the demand for its reform in the direction of equity would attain such volume as to be heard at Westminster, and attended to. But in this work, Mr. Herbert does not pose as a reformer; he is simply an expositor, and a very lucid expositor of the law as it is.

We have received a copy of the "Mercantile Year Book and Directory of Exporters," edited by Mr. Lindley Jones, and published at the *Mercantile Guardian's* offices in London. The list of exporters and their addresses seems very exhaustive, and the volume, a handy one, must be of great use to the vast numbers of people interested in the export trade of this country, which last year amounted to £234,550,003. It is as a Directory that the book is useful; the flights of Customs philosophy in the brief preface are not of a particularly brilliant order.

Sir A. Milner is at present on a visit to the Orange Free State. He had a cordial reception at Bloemfontein, and, in reply to an address of welcome, made the sensible remark that if there were more personal intercourse between those who worked the complicated machinery of South Africa a better understanding would prevail. Of course there would. Sir Alfred might make the same remark at Pretoria. He was subsequently present at the opening of the Free State Volksraad, where the President declared that the tension was abating, and that the relations of the colonies were more friendly. There seems no valid reason why they should not become yet more so.

Arrangements are being made for raising a new Argentine loan. It is to be a "popular loan" of 30,000,000 pesos, and is to be applied to "the completion of armaments."

It is stated that "every facility is now being offered by the Transvaal Government, the Railway Commissioner, and the Netherlands Railway towards the completion of the Pretoria-Pietersburg Railroad."

The French Senate has at last disposed of the Budget. It has been sent back to the Chamber of Deputies with only slight amendment. It is about time. The Budget has never before been so long in arrear, and it has been necessary to grant four months' votes on account.

A great part of Shawneetown, Illinois, has been destroyed by the breaking of a levee on the Ohio River about a mile above the town. The levee had shown weakness for several days; but beyond placing a guard at it to give warning of danger, no steps seem to have been taken to strengthen it. Steamers laden with provisions have been sent for the relief of the inhabitants.

Consider the promptitude of the telegraphic service and its ways. A correspondent of the *Times* tells us that one day recently he handed in a telegram at Fleet-street, at 2.2 p.m., asking a client to meet him at the Law Courts as soon as possible. The telegram was not received at the Grenville-street, W.C., post-office until 3.13, and was not delivered in a street off Brunswick-square until a good deal later. Moral: Make no appointments by telegraph unless, say, about a day ahead.

The *Times* Colombo correspondent reports that there is great alarm in Ceylon on the Indian currency question. Local business and the export interest are suffering terribly, and urgent memorials are being sent to Mr. Chamberlain.

Dividends Announced.

MISCELLANEOUS.

Aladdin's Lamp Gold Mining Company, Limited.—Interim dividend of 1s. per share.

Noakes and Company, Limited.—Interim dividend for the half-year at the rate of 10 per cent. per annum.

Cunard Steamship, Limited.—2½ per cent. for 1897.

John Bayley, White and Brothers, Limited.—Final dividend of 3 per cent. in the preference shares, making, with the interim dividend already paid, 6 per cent. for 1897, also 4 per cent. on the ordinary shares.

West Australian Joint Stock Trust and Finance Corporation, Limited.—Interim dividend at the rate of 20 per cent. per annum for the quarter ended March 31.

West Australian Loan and General Finance, Ltd.—Interim dividend at the rate of 20 per cent. per annum for the quarter ended March 31.

Crisp & Co., Ltd.—Payment recommended on the ordinary shares of a dividend at the rate of 11 per cent. per annum for the year ended February 19, less 3½ per cent. interim paid in October last; and also payment of 13s. 6d. per share on the founders' shares.

Dundee Coal and Estates.—Quarterly dividend of 2½ per cent. has been paid.

Kettner's Ltd.—Interim dividend at the rate of 5 per cent. per annum for the six months ended March 27.

Progress Cycle Company, Limited.—Dividends at the rate of 10 per cent. per annum on the ordinary shares, and 7 per cent. on the preference shares for the six months ended March 31.

Cassel Coal Company, Limited.—Interim dividend of 5 per cent. for the half year ended January 31.

Exploration and Gold Mining Association, Limited.—Dividend for 1897 at the rate of 17 per cent. on the ordinary shares, and 13⅜ per cent. on the deferred shares.

Anglo American Telegraph Company, Limited.—Interim dividend for the quarter ended March 31, of 15s. per cent. on the ordinary stock, and £1 10s. per cent. on the preferred.

Anaconda Copper Mining Company.—Dividend at the rate of 5 per cent. for the six months ended March 31, being at the rate of 10 per cent. per annum, payable May 2.

Avondale Hotel and Hatchett's Restaurant, Limited.—Interim dividend on the preference shares at the rate of 6 per cent. per annum for the period from the date of payment of the respective instalments to March 31.

J. R. Roberts' Stores.—Final dividend upon the ordinary shares of 3½ per cent. for the year ended February 13, which, with the 3½ per cent. interim already paid, makes 7 per cent. for the year.

Indo-European Telegraph Company, Limited.—Dividend for the six months ended December 31 last of 17s. 6d. per share, making, with the interim already paid, 6 per cent. and a bonus of 20s. per share, making in all 10 per cent. for the year.

Bengal Mills Company, Limited.—5 per cent. on the preference and 10 per cent. on the ordinary shares, and a balance of £10,235 carried forward.

British Assam Tea Company, Limited.—6 per cent. on the ordinary shares.

Stephen Smith & Co. (Hall's Wine).—Payment of the dividend on the 6 per cent. preference shares.

Menzies' Waterworks, Limited.—1s. per share, equal to 5 per cent. on the capital of the company.

City of Buenos Ayres Tramways Company, Limited.—For 1897 a balance dividend of 3s. 9d. upon the fully-paid shares, and of 2s. 3d. upon those of the eighth issue; £5,000 to be placed to reserve and £2,614 carried forward.

Imperial Continental Gas Association.—Directors recommend a dvidend of 5 per cent. for the half-year ended December 31 last.

Royal Mail Steam Packets.—Dividend of £1 10s. per share for the half-year ended December 31, 1897.

John Barker & Co.—Dividend upon the ordinary shares of 2s. 1d. per share, making with the interim dividend already paid, 13⅜ per cent. for the year.

San Paulo Gas Company.—Directors recommend a dividend for the year 1897, at the rate of 10 per cent. per annum.

Oriental Telephone Company.—Dividend of 8d. per share, making with the interim dividend 5 per cent. for 1897.

RAILWAYS.

Buenos Ayres Great Southern Limited.—Interim dividend on the ordinary stock for the half-year ended December 31, at the rate of 5½ per cent. per annum, £9,971 to be carried forward.

Rio Claro Sao Paulo Company, Limited.—7 per cent. for the half-year, making, with interim, 14 per cent. for the year.

Great Western of Brazil Railway.—Dividend of 2 per cent. on the share capital, making with the interim dividend, 3½ per cent. for the year ended December 31, 1897, carrying forward, £5,586.

Highland Railway Company.—Dividend for the past half-year at the rate of ½ per cent. per annum, carrying forward £1,806.

BANK

National of the South African Republic.—Dividend at the rate of 10 per cent. per annum for 1897.

BREWERY.

Dartford Company Limited.—Dividend at the rate of 5½ per cent. per annum for the six months ended March 31.

Prices of Mine and Mining Finance Companies' Shares.

MINING RETURNS.

Bayley's United.—Four weeks ended March 25: 690 tons tailings treated by cyanide, yield 738 oz. gold.

Brilliant.—3,000 tons of stone crushed for a yield of 3,200 oz. gold.

Great Eastern Collieries.—Output for March 15,500 tons.

Bellevue Proprietary.—Clean up for fortnight ended March 26: 159 tons yields 392 oz.

Great Boulder Main Reef.—830 tons crushed yielded 1,100 oz.

Victoria and Queen.—Partial clean up of 432 tons for 735 oz. gold.

Hauraki.—Crushed 230 tons, yield 556 oz.

Hannan's Oroya.—Crushed 902 tons, yield 545 oz. gold.

Burbanks' Birthday Gift.—Crushed 470 tons, yield 645 oz. free gold exclusive of tailings.

Crescent.—14 days, 350 tons, 53 oz.

Lake George.—During February 3,501·83 tons of crude ore were furnaced, giving 157·50 tons of matte and 1·12 tons of bullion containing 326 oz. of gold, 1,384 oz. of silver, and 5,817 units of copper, equal to a recovery of metals per ton of ore—1·86 dwt. gold, 3·73 oz. silver, and 1·66 per cent. copper. 125 tons of matte have been shipped per Australia.

New Options.—"Second-class ore, Monarch, total amount 300 tons, 129 oz."

Smelting Company of Australia.—From January 1 to February 17 3,506 tons of ore were treated containing 571 tons lead, 56 tons copper, 4,374 oz. gold, and 62,173 oz. silver.

Broken Hill Proprietary Co.—For four weeks ended March 31: 23,915 tons of ore treated, and output from the refinery was 1,513 oz. of gold, 331,026 oz. silver, 2,199 tons of lead, and 45 tons antimonial lead; the copper matter containing three tons of copper and 19,770 oz. silver (estimated). In the above refinery return is included the product from the treatment of purchased ores.

Dundee Coal and Estates Company.—Output for March: 17,000 tons.

Ottos Kopje.—5,008 loads washed, 125 carats of diamonds won.

Pestarena United.—Return for March: 521 tons of ore produced 593 oz.

Australia United.—Crushed 145 tons of ore, which yielded 297 oz. of gold.

Champion Reef.—7,452 tons of stone produced 9,163 oz., 2,440 tons of tailings produced 610 oz., and 4,620 tons of tailings (cyanide process) produced 1,267 oz.

Coromandel.—1,300 tons of stone produced 901 oz. of gold, and 1,200 tons of tailings (cyanide process) 110 oz.

Gold Fields of Mysore.—42 oz. of gold obtained from 700 tons sand (cyanide process), 218 oz. of gold obtained from amalgamation.

Mysore.—7,150 tons of quartz produced 11,300 oz. of gold, 2,810 tons of tailings produced 751 oz., and 1,820 tons of tailings (cyanide process) produced 217 oz.

Mysore West.—Mysore Wynaad—Result of crushings for March: 1,400 tons, 411 oz. of gold.

Nine Reefs.—1,100 tons of stone crushed yielded by amalgamation 93 oz. of gold, by cyanide process 63 oz of gold.

Norseman, Ball Mill.—Crushing return for March, 704 oz.; 803 tons of ore crushed.

Nundydroog.—3,100 tons of quartz produced 2,595 oz. of gold; 800 tons of tailings produced 90 oz. of gold; 3,248 tons of tailings (cyanide process) produced 490 oz. of gold.

Ooregum.—5,612 tons of quartz produced 3,577 oz. of gold; 4,876 tons of tailings produced 617 oz.

Regina (Canada).—Crushed 550 tons, obtained 190 oz. gold.

Tolima.—March estimated returns (75 tons), £2,086.

United Ivy Reef.—Last month's crushing yielded 530 oz.: crushed 991 tons.

Wealth of Nations.—Crushed during the last 10 days of the month 337 tons, the gross yield being 347 oz. Total return for March, 597 tons; gross yield, 487 oz.

Ivanhoe.—Clean up for two weeks 1,681 oz., from 1,126 tons crushed. Tailings assay 15 dwts. per ton.

Victory (Charters Towers).—Crushed 110 tons for 389 oz

North Boulder.—329 oz. gold from 373 tons crushed.

Premier, New Zealand.—Crushed in March 525 tons for 362 oz. gold. Tailings produced 124 oz.

Day Dawn Block and Wyndham.—Result for past fortnight:—Tons crushed, 1,250; yield of gold, 1,023 oz., including tailings.

Glynn's Lyndenburg.—Results for March:—From mill—crushed, 1,270 tons; obtained, 543 oz. of fine gold. From cyanide works—treated, 924 tons; yield, 345 oz.—total, 888 oz.

Mount Usher.—Clean up from 170 tons gave 56 oz. of gold.

Mysore Reefs (Kangundy).—March return:—1,000 tons of ore crushed have yielded 381 oz. of gold.

New Kleinfontein Company.—Crushing for last month:—Tons crushed, 11,339 ounces recovered 3,524. Tons treated by cyanide, 7,702: oz. recovered, 1,111.

Paddington Consl.—Crushed during March, 1,200 tons, yielding 665 oz. of gold.

Burma Ruby Mines.—Result for March was 68,000 loads washed, producing rubies valued at Rs. 80,000.

Pigg's Peak Development.—Crushed 2,400 tons for 358 oz. of gold: cyanided, 2,550 tons for 530 oz. of gold.

Ferreira Gold Mining Company.—Crushed during March, 11,114 tons, producing 7,917 oz.; value of concentrates caught, 1,375 oz.; yield by cyanide, 1,007 oz. Total, 12,299 oz. of gold.

Worcester Exploration and Gold Mining Company.—Last month's crushing yielded 2,074 oz. of gold.

Henry Nourse Gold Mining Company.—Result of operations for March: mill ran 26 days, crushed 3,680 tons, producing 5,179 oz. Cyanide, 6,450 tons treated 3,129 oz. Total, 8,308 oz. of gold.

Eastleigh Mines.—60 stamps ran 20 days. Total output 2,600 oz.

Beacon Gold Mines.—Obtained 502 ozs. of gold from 557 tons of ore crushed, value £1,98[illegible]. Profit, £9[illegible].

Montana Mining Company.—Total output for March: 6,200 tons of ore produced. 2,133 ozs. of gold and 6,030 ozs. of silver. Estimated value $43,800. Net profit $3,300.

* From January 1. † Eight weeks' strike

The Commission for the delimitation of the Burmo-Chinese frontier seems to have collapsed. The Chinese and English Commissioners have met and separated without doing anything There is a complete deadlock. Why?

A Chinese censor, said to be of the highest rank, has, it seems, in a memorial to the Emperor, accused the members of the Tsung-li-Yamen of being in the Russian pay. The sum paid them he fixes at 10,000,000 taels; but he adds that Li Hung Chang has received a million and a half of taels on his own account. This distinguished censor demands a full inquiry into his statements, offering as a condition that if Li Hung Chang be found guiltless in the matter, he himself (the censor) shall be decapitated; but if, on the other hand, the accusation should be proved, he prays for the execution of Li Hung Chang. The challenger has the courage of his convictions at all events.

The Chamber of Mines at Bulawayo expresses much regret at the retirement of the Duke of Fife from the directorate of the British South Africa Company, but the Chamber, it will no doubt be satisfactory to know, considers the proposed new form of government preferable in every respect to direct Imperial control.

The present right of full entry of British goods into Siberia from the Kara Sea, which Russia proposed to suspend, is to be continued on the recommendation of the Commission appointed to inquire into the matter, though several minor restrictions in the interests of Russian trade are to be introduced. Siberian traders themselves were the first to protest against the suspension.

Fierce indignation has been aroused in New Zealand by the presentation of a bill for £1,700 on account of the Prime Minister's expenses during the Jubilee tour. It was understood by the colonists that the expenses of the Colonial Premiers who came here for the Jubilee rejoicings were to be defrayed by England. Then why this bill for £1,700?

Newfoundland has a public debt of $17,000,000, upon which it pays an average interest of 4 per cent. If this interest were reduced to 2½ per cent., the colonists think it would be a great relief, which, of course, it would. They are to appeal to the mother country, therefore, to lend its guarantee, by which the interest might be reduced to the desired extent. If the Home Government are not too busy considering schemes for increasing the Navy, perhaps they will listen to the cry of the Newfoundlanders.

NOTICES.

Lieut.-Col. E. L. Marryat, R.E. secretary of the Rohilkund and Kumaon Railway Company, having joined the Board, has been appointed managing director.

At the meeting of the Court of Directors of the Royal Mail Steam Packet Company held yesterday, Admiral Ch[illegible], C.B., Deputy Chairman of the Company, was elected Chairman in place of Mr. T. R. Tufnell deceased, and Mr. Herbert Edemann, was elected Deputy Chairman.

Railway Traffic Returns.

Burma Railways.—Receipts for week ending February 26, Rs. 2,05,965; decrease, Rs. 20,074. Aggregate from January 1, Rs. 16,55,206; decrease, Rs. 2,93,535.

Great Western of Brazil Railway.—Traffic for week ending February 12, $39,146; decrease, $1,265. Aggregate receipts to date $304,516; increase, $31,253.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, April 2:—Ps. 6,000, increase Ps. 2,400. Aggregate from January 1, Ps. 129,300, increase Ps. 3,650.

Villa Maria and Rufino Railway.—Traffic for week ending March 26, $6,269; increase, $2,201. Aggregate from January 1, $55,116, decrease $4,861.

West Flanders Railway.—Gross receipts for week ending March 27, £1,944; increase, £47. Total from January 1, £26,093; increase, £644.

West of India Portuguese Railway.—Week ending March 5, Rs. 5,270; increase, Rs. 1,722.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending February 26, Rs. 6,217; decrease, Rs. 116. Aggregate from January 1, Rs. 43,378; decrease, Rs. 1,387.

Southern Mahratta Railway.—Receipts for week ended March 5, Rs. 104,121; decrease, Rs. 16,569.

Manila Railway.—Receipts for week ending April 2, $21,533; increase, $5,815. Aggregate from January 1, $254,622; increase, $62,867.

Cleator and Workington.—Gross receipts for the week ending March 26 amounted to £1,027, a decrease of £60. Total receipts from January 1, £12,274, a decrease of £609.

Cockermouth and Keswick Railway.—Receipts for the week ending March 26, £817; increase, £147. Aggregate from January 1, £9,931; increase, £952.

Quebec Central Railway.—Receipts for second week of March, $8,559; increase, $621. Aggregate from July 1, $59,865; decrease, $8,893.

Puerto Cabello and Valencia Railway.—Traffic return for week ended February 25, £1,063; decrease, £754. Aggregate from January 1, £7,426: decrease, £3,700.

Western of Santa Fe Railways.—Gross receipts for week ending March 26, $52,890; increase, $26,580.

Mobile and Birmingham Railroad.—Traffic for second week of March, $6,706; increase, $220. Aggregate from July 1, $268,401; decrease, $4,847.

Algeciras (Gibraltar) Railway.—Traffic for week ended March 26, Ps. 18,218; increase Ps. 2,378. Aggregate from July 1, Ps. 776,932; increase, Ps. 23,788.

Bengal Central Railway.—Traffic for week ending March 5, Rs. 19,291; increase, Rs. 2,365. Total from January 1, Rs. 186,497; increase, Rs. 23,343

Assam-Bengal Railway.—Traffic for week ended February 19, Rs. 27,506; increase, Rs. 7,760. Aggregate from January 1, Rs. 1,72,349; increase, Rs. 19,095.

Bengal Dooars Railway.—Traffic receipts from January 1 to February 19, Rs. 23,180; decrease, Rs. 6,828.

H. H. The Nizam's Guaranteed State Railways.—Traffic receipts from January 1 to February 26. Rs. 629,384; increase, Rs. 12,984.

Delhi Umballa Kalka Railway.—Traffic receipts for week ending March 26, Rs. 35,809; increase, Rs. 300. Total from commencement of half-year, Rs. 4,46,600; increase, Rs. 1,43,000.

Southern Pacific Railway.—The net earnings for the month of February, $1,470,137; increase, $622,711.

Villa Maria and Rufino Railway.—Traffic for week ending April 2, $8,806; increase, $4,173. Aggregate from January 1, $63,922; decrease, $688.

Rohilkund and Kumaon Railway.—Traffic for week ending March 5, Rs. 8,951; decrease, Rs. 5,512. Aggregate from January 1, Rs. 50,062; decrease, Rs. 9,166.

West Flanders Railway.—Gross receipts for week ending April 3, £1,927; increase, £5. Total from January 1, £29,149; increase, £670.

Peruvian Corporation Railways.—Receipts for month of March were $259,350; increase, $15,875.

Western of Santa Fe Railway.—Traffic receipts for week ending April 2, $50,710; increase, $28,940.

Delhi Umballa Kalka Railway.—Receipts for week ending April 7, Rs.30,700; increase Rs. 3,600. Aggregate from January 1, Rs, 4,84,300; increase. 1,46,600.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

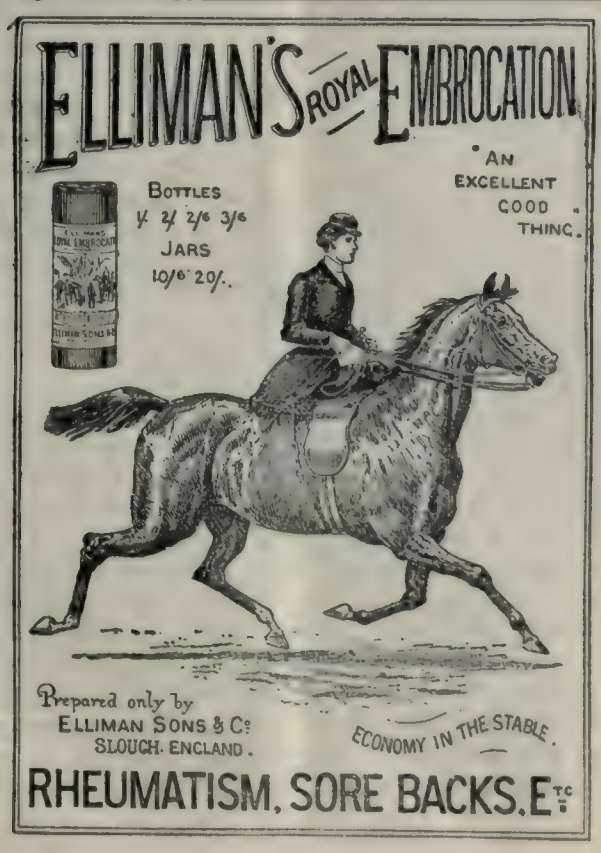
EDITED BY A. J. WILSON.

Vol. I.—No. 15. New Series. FRIDAY, APRIL 15, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.



All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

A Hardening Money Market.

Last week we had to write too early to be able to publish the decision of the Bank directors to raise their rate of discount to 4 per cent. The step in one sense took the market by surprise, in another it did not. That is to say, feelings of self-interest to some extent prompted dealers in money to hope for no worse than a 3½ per cent. rate, and a sort of pained surprise pervaded financial circles when the rate announced was 4 per cent. Evidently, however, it would have been quite useless for the Bank to move only half a step, and it is already very doubtful whether this 4 per cent. will be sufficient to stop further drafts upon the stock of gold. To bring gold back to us we may be already quite certain that 4 per cent. is not enough. We shall have to have a 5 per cent. Bank rate before any substantial strengthening of the reserve can be hoped for. The market recognises this by the manner in which it is keeping discount rates close up to the Bank minimum.

One consolatory feature, however, remains, and that is the power possessed by the Bank to make its rate effective. All through the present quarter it will be in command of the open market, and if necessities arising from bullion movements, or through the absorption of floating capital in a war between Spain and the United States, make a 5 per cent. rate advisable, the directors of the Bank can compel the open market to work close up to this standard. In some respects this is the only

redeeming feature now descernible. In nearly all other directions the prospect is far from satisfactory, and if it were not for the splendid output of new gold from the mines, we should look for a grave crisis in our credit system at no distant date. Happily, there is a large amount of gold coming in to satisfy the demands of foreign buyers. Still, even with this the year bids fair to be a troubled one for those much dependent on banking credit. We know nothing further about the intentions of the Indian Government with regard to a "gold standard," and whether that fantastic scheme, published last Sunday in a paper called the *Sunday Special*, be a forecast of Indian bureaucratic designs or not, is not of much consequence. What is plain enough is that India will require much assistance this year, and the dearer money becomes here the more urgent will be the necessity of India to have this assistance. Not only so, but our Australian Colonies will feel the need of more money directly credit becomes difficult here, and all State or corporate borrowers must come upon an open market which has no spare credit to dispose of. The worst of it is, too, that a good many sources of weakness are to be found at home. Credit has been far too much distended in recent years, as we have been continually insisting, and it will be very difficult to contract it under the conditions now prevailing in the money market. It must, however, be contracted if we are to regain a sound financial position, and the far-seeing banker and merchant is already drawing in his loans, or moderating his demand for loans. The process is a healthy one, and if carried out with caution will have most salutary effects upon the financial position in the City.

We ought to be strong there, for all around us there are abundant signs of approaching distress. We have noted elsewhere the positions of the money markets of France and Germany, and shall not advert further to that aspect of the subject. But the approaching collapse of Spain will not only accentuate the troubles of these markets, especially that of Paris, but cause some reflex disturbance here; and then Russia must not be left out of account. Russia will require more money this year for her great Siberian railway, and will probably find the Paris market unable to give it to her. Japan also is in necessities beyond what the last payment made to her by China can meet. A Greek loan is coming on the market immediately; it is borrow, borrow, everywhere. And the whole borrowing system of the world may be considered in a sense to rest upon the stability of the London market at the present time. If we keep financially strong here, and hold our resources, which are immense, well in hand, a profitable business may be open to us in supplying the immediate necessities of over-spending States all the world through. On the other hand, should our market become strained and incapable of affording relief to all who require it, the consequence to the international credit system of the world might be very serious. This, however, is not the immediately pressing question which we have to keep in view. It is, rather, How long will it be before the Bank rate has to be advanced to 5 per cent.? We cannot tell, except inferentially. Our Bank reserve wants strengthening. It ought to be ten millions larger than it is, and must be that if we are going to safely outride any severe credit storm. Now, a 4 per cent. rate is not endowed with attracting power sufficient to strengthen the reserve; therefore, an advance is certain to come, and should the directors of the Bank make up their minds to accumulate a larger reserve, it will come soon. They ought to take this course because, in their desire not to harass the market, they have let the reserve fall too low. It would not, for example, be sufficient to cover the demands any two out of twenty-five or more other banks in the country could pour in upon it in a day or two should a real crisis arise. Assume, then, that the banking reserve is to be strengthened, as the altered circumstances evoked by the Cuban dispute alone demand, and an advance in the Bank rate ought to take place within the next few weeks. Should war break out at once between Spain and the United States, as seems certain, a 5 per cent. Bank rate ought to be established with the least delay compatible with reasonable warning. This, briefly, is the position; and in our view, although there should be no haste, there ought to be no undue delay in putting the rate further up, especially now that the directors of the Bank are relieved from any imputation of taking advantage of the exhaustion, produced by the collection of the revenue, to make profit at the expense of the market. No help in creating a strong reserve can be looked for from any of the other joint stock banks. The Bank of England must accomplish the duty alone.

President M'Kinley's Cuban Message.

The variety of opinions expressed about this State paper are a striking testimony to its laboured weakness, and yet there seems to be a definite enough purpose behind the mass of verbosity. In another column we print a summary of it, because, in spite of its preachiness and long drawn-out fumbling in search of an argument, it promises to be a document of great historical importance. Nothing in it is more remarkable than the revelation it gives of the attitude of average American political sentiment towards European countries. A more undiplomatic State paper, in our sense of the word, could not be imagined. Mr. M'Kinley views the Cuban question purely from the standpoint of America, and the greatest weakness of his deliverances arises from his ignorance of Spain and Spanish ideals. That he should still be optimistic about peace and accord between his country and Spain over Cuba is a further striking proof of the isolation in which American statesmen exist. It is quite impossible for us to realise that attitude to the full, but there should be no mistake about the consequences it will in the present instance produce. The President of the American Union has emphatically declared it to be the clear duty of his Government to intervene in the Cuban dispute, to force itself upon Spain there, and to relieve the distress of the inhabitants who have been huddled into the towns by the sixteenth-century brutality of General Weyler, and still we are told the President believes in peace, apparently finding many of his countrymen to agree with him. There can be no peace based on such an attitude. Spain is kept from revolution at the present moment entirely by the belief of the people that the Government of the Queen-Regent will fight. Preparations for war, we are told, are going on with the utmost rapidity and regardless of expense, and war must ensue unless the American people are prepared to disown the policy enunciated by their

Chief Magistrate. Their representatives, at least, seem to be anything but that. In their passionate eagerness to drive the Spaniards from Cuba they abandoned all semblance of self-restraint on Wednesday, and, amid scenes of the wildest disorder, demanded instant war, heaping insults the while on Spain.

We are quite willing to believe that the American people are reluctant to draw the sword, but they have now been committed to a policy which, as it seems to us, must compel them to do so. Their Government cannot now draw back from the attempt to send relief to the starving inhabitants of the island, and this relief must be sent under guard of ships of war. The Spanish Navy is certain to oppose these ships, and thus war might even break out suddenly without formal declaration.

The President has asked the Congress for liberty to act on the lines laid down in his Message, and that liberty is sure to be accorded. A war fever has begun to rage throughout the country. All parties in the State seem to be ready to support intervention, and the disappointment of the Jingo, or annexationist, faction rests upon the absence from the Message of any indication as to what the ultimate fate of Cuba is to be. This faction wishes to incorporate it in the American Union, but we are quite sure that the best class of American citizens have no share in this baneful ambition. Nor has Congress, if we may judge by the drafts of the resolutions laid before both houses by their Committees on Foreign Affairs. It is only fair to the United States to recognise that the sentiment of the general body of the people is in the main a noble one. They desire to free Cuba, not to conquer it; not to make it a field to be exploited by the unscrupulous financial element far too much in evidence in American affairs, and if this high purpose is adhered to, unquestionably the States will have the sympathy of the British public. We have no desire to injure Spain, nor any hostility towards Spain, but we cannot shut our eyes to the fact that Spain has failed completely and absolutely to govern any dependency it ever possessed, wisely and to good purpose. The effect of her cruel and selfish maladministration is still visible all over Central and South America. When the territories there, so long subjected to the ravages of her governors and officials, broke away and became independent they found themselves in a condition too imperfect to be able to organise freedom, and it is only in our day that a great country like the Argentine Republic is beginning, and only beginning, to recover from the lawless misrule to which it was a prey for half a century after the Spaniard was driven out. The small States of Central America are still existing in a condition more or less chaotic, and Mexico is prospering under veiled despotism. Spain has failed, then, and deserves no sympathy whatever at our hands for the loss of what remains of her once glorious empire in the new world. We quite understand that her people are incapable of recognising their failure, that their sentiments of pride, inherited from a splendid past, prompt them to cling with the utmost tenacity to what remains of their empire. But that does not alter the fact that they deserve to lose it. Their misrule and the rapacity and corruption of the governors they have sent to Cuba have turned that fair island into a place of devastation and the home of misery. The brutalities of General Weyler put the finishing touch to the sufferings of the people, and not 5 per cent. of the remaining inhabitants, native born Cubans, have any desire that their country should continue dependent on Spain. We may be sorry that this fate should overtake a mother of nations, but free Englishmen cannot for a moment sympathise with the Spanish Government, or support it in a struggle to regain the island. Sooner or later it must have been free. The attempt to hold it has exhausted Spanish resources and brought the Treasury to the verge of national bankruptcy. By intervening now the United States will hasten the deliverance of Cuba and consummate the bankruptcy of Old Spain.

Curiously enough, discussions in London about this momentous question more or less overlook the real issues behind it. They take very little cognisance of the attitude of Spain, and speak of the Queen-Regent's Government as if it were a stable institution, like that of the German Empire or of Russia. It is a Government born of revolution, and it is destined to perish by revolution, in our opinion. By fighting the United States in one last desperate struggle to retain the Pearl of the Antilles, Queen Christina may hold on to her throne for a little time longer, but the inevitable defeat which must come will hurl her from that throne and give Spain some other kind of government. What kind it is impossible to forecast. Were the Ministry presided over by Senor Sagasta to temporise with the United States now and refuse to take up M'Kinley's challenge, it and the Queen-Regent would be hurled from power in less than a week. The instability of the Spanish Government is thus, in some respects, the most certain factor in determining the course of events in the immediate future. Spain, beggared though she may be, will not enter into the financial transactions so often proposed to her whereby Cuban security might be purchased and her finances relieved. The passions of the people are such that her Government must fight, and the United States cannot take a step towards carrying out their benevolent policy towards Cuba without provoking immediate war. This seems to us to be, in the main, the outline of the existing situation. What will develop when the struggle actually breaks out we cannot attempt to forecast. War is an ugly thing always, and the evil passions it evokes often lay hold of good men and carry them far from the line of conduct their nobler impulses would prompt them to pursue. It may be that the lust of conquest will come to dominate the United States when victory crowns their efforts, and it will be all the more likely to do so should victory prove difficult, slow of attainment, and very costly. We hope this will not be the case, and are perfectly sure that, up to now, the great body of intelligent American citizens have no more idea of appropriating Cuba as an imperial possession than we have. A mere cry for annexation would by itself fail to arouse any enthusiasm. It is because the war party and the annexationist can appeal to the compassionate sentiments of men and women, outraged as such by the story of Spanish inhumanity, that war for the deliverance of Cuba has become a popular demand.

The Report of the Chartered Company.

At last the directors of this company have taken the shareholders and the public somewhat into their confidence. Three voluminous pamphlets have been issued

dealing with the history of the company for the two years ended March 31, 1897. The information therefore is still twelve months behind date, and there seems no good ground for this slowness now that the Bechuanaland railway has been completed to Bulawayo, and that the telegraph is nearly all over Rhodesia. Would it not be better, then, if the directors were to delay the issue of their annual reports—for we suppose they will be annual in future—for another month or so to enable them to bring their facts and figures something like up to date? As far as they go the information in these various reports—one of which gives the history of the Matabeleland rebellion, another the story of the company's administrative action, and the third the report proper, with the accounts—is full and up to a point not unsatisfactory. A good deal of work has been done, and the country is now quiet enough to admit of settlers spreading over it, as well as to allow mining enterprise to be prosecuted with zeal. Not only has the railway from Capetown been completed to Bulawayo, but the opposition line, as we may call it, from Beira has made considerable progress and should soon be open to Salisbury. Leaving out of account, for the moment, the cost of the struggle with the Matabele, the ordinary receipts and expenditure of the company resulted in a surplus of £59,651 for the year ended March 31, 1896, but for the succeeding year there was a deficiency of £180,950, so that the aggregate excess of expenditure over income up to March 31, 1897, amounts to £1,145,205. Adding in the cost of putting down the rebellion, which is returned in the accounts as amounting to £2,265,876, including compensation—the said compensation having been paid to the amount of £360,000—the total shortcoming would be £3,410,000. Put in another way, the rebellion has absorbed the whole of the money obtained by the company as premiums on its later issues of shares, together with about £200,000 of the last debenture issue.

In their report the directors say that although they have not yet received the completed accounts for the year ended March 31 last, the revenue, exclusive of land sales, in that period amounted to £196,653, being the highest figure since the incorporation of the company. What the expenditure has been they cannot tell, but intimate that it has been "abnormally high," owing to the high rate of transport, and to the fact that the Mashonaland rebellion was only finally subdued in September last. In addition to the amount brought into the accounts as to the cost of the disturbances, and of compensation and food distribution to natives, the company seems to have spent nearly three-quarters of a million more, which, we presume, will appear in the accounts for the past year, when they come along twelve months from now. They say in the report that the total outlay on this head has amounted to "about three millions," all of which has been paid, and a balance of half a million is left to meet the ordinary expenses of the company. We cannot quite find this balance in the accounts appended to the report. It is true that the balance-sheet for March 31, 1897, shows cash under various heads to the amount of £597,083, but from this we have to deduct £159,000, representing creditors in London on open account, and bank overdrafts and creditors in South Africa. Allow that only £90,000 of this should really be charged against the cash in hand, and the total of that cash would still be little over half a million, while the large expenditure of the past year, not yet ascertained, has subsequently had to be provided for. The directors, however, speak of this half-million in the present tense; "it now remains," they say, "to meet the ordinary expenses of the company." We do not understand this, but it is noticeable that between March 31, 1896, and the same date in 1897 a quarter of a million in Consols, and five thousand De Beers shares had been sold to eke out the company's resources, and now another million and a half of new £1 shares is to be created and 250,000 of them issued immediately at £1 per share premium in order to give the company another half million to go on with. But the directors say that this money is not really wanted for current expenses. Hitherto the company has abstained from entering directly into the mining business, but the truncated board, for there are only four directors left now, think that "it would be advisable for the company acting under competent expert advice to join, under due safeguards, in providing the capital necessary for the development of particular properties," so they are raising this money. This also we do not quite understand, seeing that there are such a number of Rhodesian mining companies already in existence whose capital ought to be available for this purpose. We can afford to wait for further illumination, but meanwhile must be forgiven for regarding this issue of capital as ample confirmation of our oft-repeated, and as often officially denied, statement that company was hard up and in need of fresh money. Before passing on to deal with the financial position and prospects of the shareholders we may note once more that the company is responsible for twenty years for the interest on the £2,000,000 spent on building the railway to Bulawayo, and for the interest until October 1, 1919, on the debenture capital issued and to be issued by the Mashonaland Railway Company. Up to the present £1,150,000 of this latter capital has been issued. For the first four months, however, of its existence the Bulawayo line not only paid its expenses but earned a net revenue of £56,688, and while the "mining industry" is being prosecuted with the zeal of fervid hope the line ought not to be a burden on the finances of the guaranteeing company. But if gold be not forthcoming? Well, let us see.

In most respects, gold or no gold, it does not seem to us that the prospects of Chartered shareholders are particularly brilliant, even on a sanguine view of the future. Everything depends on finding payable gold in quantity. Should this gold be found, population will flow into the territory and money will circulate, bringing considerable revenue to the Chartered Company. But even so its prospects of a large free revenue to pay away in dividends are very small, within a measurable number of years. The first duty before the directors will be to wipe off the accumulated deficit now visible on the revenue account. Then they ought clearly to write off the cost of the Matabele rebellion, or, as we have already suggested, and better still, get the money back, with compensation for indirect losses, from Messrs. Rhodes and Beit, or others of the De Beers group, by whom both the Chartered Company itself and the Jameson raid were planned and organised. We are very glad to see that Messrs. Cecil Rhodes, Alfred Beit, and Rochfort Maguire are coming back upon the

board, and trust they re-appear on the understanding that the money they caused the Chartered shareholders to lose will be handsomely returned to them. Helped by such a restitution the outlook would be rather brighter, but at the best it does not seem to us to be very promising. With the quarter of a million of new shares, to be issued at once, the outstanding share capital of the company will amount to about 3,700,000 shares. A mere 10 per cent. dividend on this would require say £370,000, and that is the very smallest dividend which, one year with another, shareholders ought to expect, seeing that they are called upon to pay £2 even now for the £1 share, and notwithstanding the fact that a deficit of more than a million stares them in the face. But it will not be so easy in the future to float these shares as it has been in the past. To be sure, the directors hint delicately that the deficits on their administrative account, "the cost incurred in the settlement of the country," &c., not met by revenue, "will constitute a public debt whenever the inhabitants of Rhodesia are prepared to take over full responsibility for its administration." In this way the board hopes to see the company "reimbursed a considerable portion of its outlay." We hope it may be, for the unfortunate shareholders' sake. But how about the inhabitants themselves? They will have to find interest on this indefinite debt, plus, on the present capital basis, £200,000 a year for railway bond interest, £62,500 for Chartered Company's debentures interest, and, say, £500,000 as a 10 per cent. dividend on the £5,000,000 to which the share capital of the company will mount when all the newly-created shares are issued, as they soon will be. Their lot is not the most brilliant. But this is not all, by any means. Dozens of hungry shareholders in mining companies will be looking for returns. To meet the hopes of these, in addition to the modest requirements of the Chartered Company, as here outlined, a free revenue of at least £3,000,000 would be necessary. Need we add another word? Yes, what about Lord Grey's assertion that the Chartered Company has spent about £10,000,000 in developing Rhodesia? Does he stand by this assertion? We cannot make this amount even by including the 2,000,000 shares constituting promoters' swag and the £3,000,000 lost by the Jameson-raid-provoked Matabele rebellion.

British Foreign Trade in March.

Looking at the disturbed state of the world the returns of our over-sea business for the last month may be considered, if not cheerful, at least no worse than the circumstances would lead us to expect. In some respects, however, the large increase in imports, coming alongside a further decrease in exports, is to be lamented at the present time. The disparity between the two sides of our trading account in March was more marked than at the beginning of the year, imports having increased nearly 6¾ per cent., while exports have gone down 3¾ per cent. In other words, our imports were valued at £43,413,000, or £2,758,000 more than in March, 1897, while our exports were only £20,834,000, or £813,000 less. Taking the three months together, imports are only 1⅛ per cent. larger, and exports little more than 2½ per cent. less, than they were for the first quarter of last year. The figures for the month are thus decidedly worse than the average for the three months, and we received only a very small compensation in our increase of the exports of foreign and colonial produce. These amounted to £15,110,000 for the first three months of the present year, being an increase of £461,000, or about 3 per cent. on the same period of 1897.

Of course, as we have often explained, too much stress must not be laid upon sectional returns of this description, nor is it necessary to be alarmed at the steady expansion of our imports, because this might be due to the greater productiveness of our foreign investments, quite as much as to any tendency towards extravagance amongst the people. At the same time, and however well based our large import trade may be, its abounding excess can occasionally cause some inconvenience to us, and it is calculated to do so at the present time. We have more to pay for, and less goods exported to pay with, than is convenient at a moment when the demands upon the stock of gold in the country are persistent and formidable. Traders do not wait twelve months or more for the balance to adjust itself, either through the return of interest upon money invested abroad, or through the enlarged exports which, sooner or later, always arise out of enlarged imports. Wheat and dead meat and raw cotton and wool, with all the other raw products, which we buy either to consume or to turn into articles for sale, have got to be paid for promptly, and therefore our excessive importations just now add to the difficulties of the monetary position dealt with elsewhere in this number. We see traces of it, very distinct traces, in the statistics of bullion movements for the month and for the three months. A larger amount of new gold has come into this country during the present year up to date than in the same period of any previous year that we remember. No less than £4,442,000 in gold reached us during March, and in the three months we have received £9,259,000. The whole of this gold has been exported again since the first of January, and £914,000 of our existing stock as well. When we bethink ourselves how slender our stock is, and how necessary for our banking credit it is that it should be growing larger instead of growing smaller, and when, further, we consider that the enormously increased output of gold is not benefitting our reserve of the metal to the extent of a single sovereign, although it may indirectly benefit our commerce by enlarging our purchasing power, the seriousness of the position will be somewhat clearer. In a word, the manner in which our foreign trade is expanding on the import side alone is at present decidedly inconvenient.

Is there any hope, then, of an immediate expansion in our exports of commodities to counterbalance these heavy imports? We fear not; several powerful influences are against it. We should be disposed to put high customs tariff at the head of the list, were it not for the fact that these tariffs do not very sensibly hamper business if the people who have to submit to them possess the means to buy according to their tastes. If, however, the people who live under these tariffs are poor, and becoming poorer, the influence high duties exert in checking or destroying outlets for our products becomes powerful. At the present moment an

examination of the detailed figures in these Board of Trade Returns demonstrates that, whether through poverty or through the effect of political unrest, tariffs are damaging our business at many points. Our trade is declining with most Continental nations in nearly all branches of textile industry, and almost in proportion to the height of the duties set up against us. France, for example, whose tariff and other fiscal restrictions are almost Napoleonic in their rigour, is gradually becoming a closed market to us for cotton and woollen manufactures and for yarns of all descriptions—if we except linen goods and silks, the trade in which is never more than insignificant with this country. Trade with Germany makes really very little progress; with Italy it tends to dwindle, and with Spain, where we can trace Spanish figures in the return, it is at the very best stagnant, with a tendency downwards. And the worst of it is that in very few places outside Europe are our manufacturers and merchants receiving present compensation for this weakness nearer home. Our own Colonies are nearly all buying less than they did, Canada alone is doing a little, not much, more business with us; but, obviously, it cannot be a flourishing business for any length of time, so long as the necessities of the Dominion, to put it gently, compel its rulers to exact enormous duties on many British productions. We really wish Canadians had a sense of humour, for it might prevent them from making such curious mistakes as that of first raising a rate of duty against the world, and then ostentatiously putting the mother country on a "favoured nation" footing towards said increased duty, which, in not a few instances, leaves her industrial products at a greater disadvantage than they would have been at had no change at all taken place in the tariff, nor any "privilege" been ostentatiously accorded to us. They surely cannot be aware, these Canadians, that we look upon this kind of thing here as being much like the action of the shopkeeper who marks goods in his window at "25 per cent. discount on the usual price," having first taken good care to put 30 per cent. on. This is by the way, however.

Most of our Colonies have been doing less with us lately than they used to do. Those in Australasia, in particular, are now buying smaller quantities of most of our staple products. South Africa also is by no means a lavish customer, and whatever the sentiment of unity may be in regard to the Empire, it certainly is not a sentiment which transforms itself into pounds, shillings, and pence through the medium of our Board of Trade Returns. We may, however, freely forgive these Colonies, and particularly Australasia, for the immediate slackness of their trade, since their great purchases in the past were paid for with money borrowed here, the load of which remains to cripple their present purchasing capacity. From this point of view the backwardness of our Colonial trade may be a healthy indication which ought to be welcomed as affording a hope that better economic conditions are arising among them through thrift and abstention from borrowing.

Strangely enough, the countries that have been doing most of late to sustain the volume of our commerce, in textiles at all events, are British India and the Republic of Brazil. The imports of British cotton goods to India have been very much larger this year than last, and during the month of March alone the increased value is nearly half a million pounds. This, we fear, indicates unhealthy trading, because the people of India are certainly less able to buy our goods now than they were even twelve months ago. Their poverty is greater over large areas of the peninsula, and such trade as there is has been materially interfered with both by famine and plague. We must consequently look upon this expansion in business more as a result of an artificial rate of exchange than as the natural growth of enlarged prosperity. By forcing up the exchange value of the rupee the British exporter to India has been able to exchange that rupee to a greater advantage for sovereigns, and has, in consequence, glutted the market with goods, a proportion of which may remain for some time in warehouses and be financed partly on the money markets of India, quite straitened enough without this. As regards Brazil, the cause of expansion is not so obvious. The Brazilian exchange has been falling and lies now in the neighbourhood of 6d. for the milreis, the par value of which not so many years ago was 2s. 3d. This decline assuredly gives no stimulus to the importer in Brazil to buy, nor to the exporter here to sell, and yet it is a fact that Brazil is conspicuous as an increasingly large buyer of cotton piece goods at the present time. It may be only a temporary movement and we must not pass judgment upon it in haste, but trade in that direction requires watching, especially if continued returns indicate that it is being forced against the stream.

Of other South American States Argentina alone gives indication of reviving business with us, although the figures are not yet up to the level of those of 1896. Doubtless, however, the enlarged exports now going on from Argentina to Europe will be counterbalanced presently by increased imports from us. All Central American States appear to be in a bad way at present, through causes we cannot off-hand define. Possibly they are suffering, as we are, from the dog-in-the-manger fiscal policy of the United States. It is from the United States at any rate that our commerce is suffering most of all at present. All branches of our exports to the Union are feeling the effects of the Dingley tariff, except perhaps the linen trade. That has not fallen off appreciably either in quantity or value, nor has our export of jute manufactures suffered much, but the quantity of unbleached cotton piece goods, and of woollen and worsted goods of all descriptions has fallen off more or less seriously, woollen most of all. Two years ago the value of woollen and worsted manufactures sent from this country to the United States in the first three months of the year was £458,000. In the first three months of the present year it was less than £82,000. In like manner the value of cotton manufactures of all kinds has fallen from £528,000 to £408,000, most of the fall taking place in the unbleached or undyed fabrics. Exports of lace to the United States have also fallen off in value, and their tariff, or else our clumsiness, has almost completely shut out every kind of British machinery. We shall survive all this and come out victorious, there is not the least doubt, but the lesson of these returns is emphatically one of increased industry and greater thrift. This is not a time for the wage earner to wrangle over his pay, but to set to work to see how much more he can produce. Still less is it a time to drain £20,000,000 a year more than was wont out of the earnings and savings of the nation to be spent in preparations for war.

The Irish Local Taxation Muddle.

(From a Correspondent).

I am afraid it is only too true that protest of any kind against the financial proposals of the Irish Local Government measure is, as the editor of the Investors' Review has stated, absolutely useless. But it is often expedient to place on record a protest which, useless at the moment, still remains to justify future action when occasion for such action arises. The Liberal party did make such a protest by voting against the English Agricultural Rating Act, and it can scarcely be doubted that this Rating Act is helping to give it an opportunity of acting on its protest.

That Act is not in the least doing anything in the way of relieving "agricultural depression." No one really thought it would. But it must not at all be taken as parallel to what is now proposed to be done in the case of Ireland. The population of England is 29,000,000, of which only 3,000,000 at the outside are engaged in agriculture, and of these last only 223,000 are farmers, and as such recipients with the few landlords of the Agricultural Grant. There are 759,000 agricultural labourers, who, of course, as consumers of dutiable articles, help to pay the grant. But, as is evident, the 26,000,000 or 27,000,000 of the English population, holding all but a fraction of the valuation, great cities, towns, manufacturing centres, bear the burden. It is a folly, but they are able to bear it, and much more. It is quite otherwise in the case of Ireland. Of its 4,700,000 inhabitants, 2,978,000 subsist on 486,000 agricultural holdings, leaving 1,722,000 for the towns and villages. The valuation of the agricultural holdings is just about £10,000,000; of the non-agricultural, £4,500,000. But the valuation of the agricultural holdings has to be considered with the remark that, while the population on the small holdings is to be entirely credited to them, that on the larger is mainly made up of labourers and farm servants. Now, of the 486,000 agricultural holdings, those under £15 valuation alone are 332,556 in number, have a total valuation of £2,029,616, and support a population of 1,631,528. This enables me to say at once that the whole agricultural population of Ireland is made up, all but an insignificant fraction, of small occupiers and labourers, and that the valuation of the holdings of the former is about £3,000,000 out of £10,000,000.

Now the assessed rates being £3,095,000 the non-agricultural valuation pays one-half of them already—that is, £4,500,000 pays £1,500,000, which will be allowed to be very heavy taxation, while the agricultural valuation, £10,000,000, pays only an equal amount—£1,500,000. But in reality this agricultural valuation includes £10,000,000 rental, which pays only one-fifth of the rates, or £300,000, leaving £1,200,000 to be borne by the occupiers' interest, whatever that is. I know no reason why the inhabitants of Irish country towns and villages, poorer even than the occupiers of rural areas, should pay double the rates of the latter. Nor do I see why the rental, by far the most valuable element in the agricultural valuation, should almost entirely escape local burdens, necessary in order that it should accrue at all.

What is proposed to be done now is to impose £730,000 new taxation on the Irish people, a mass of already heavily taxed townfolk, small occupiers, and labourers, to exempt a rental of £10,000,000 from rates. "But the occupiers get part, say, £400,000 of it." Yes the section of them the Irish call "land-grabbers," he section responsible for the depopulation, disaffection and agrarian crime of the country even more than the landlords. Of the 486,000 holdings there are 15,000 over £100 valuation; total valuation £2,140,000, and population only 299,000, mostly labourers and farm servants. These 15,000 large occupiers represent the class who, with the landowners, pocket the £730,000. The small occupiers, some 2,000,000, get less than nothing, a negative quantity. In Ireland general revenue comes mainly from dutiable articles, the consumption of which nearly follows numbers. If the two millions of small occupiers get £100,000 of the grant, as general taxpayers they will have to pay at least £300,000 for it. The "land-grabber" gets the money, and besides, under Irish social and political conditions, all local power, which enables him to carry out the traditional policy of his class with reinforced vigour.

It has to be said for the financial transaction that it is the common expression of historical experience, and finds perhaps its most striking modern illustration in the great democratic community on the other side of the Atlantic. But still there is an engaging *naïveté* all its own about this plan of ours for encouraging agriculture by taxing spades. It is assumed that the £730,000 is Irish money. Our Irish financial authorities would be angry if we hinted otherwise; they even claim that part of the English agricultural grant is Irish money. Be it so; having a good firm road under our feet we have no idea of venturing on a bog neither land nor water. If the Irish choose to exempt by far the most valuable part of their local taxable fund from rates for the sake of the landlords and "land grabbers," we believe the Irish taxpayer must be unable to meet the cost of local administration. It is their own argument that he is frightfully overtaxed, and it looks like it when, for rates alone, a valuation of £4,500,000 pays £1,500,000, and £10,000,000, less by a rental of the same amount, pays £1,200,000. But the only way to remedy this is to make rental and the "landgrabber's" interest, now to a great extent exempt under a differential rating system, pay its fair share. It is no remedy to put £730,000 on the Irish general taxpayers, who to a great extent are small agricultural occupiers. And if the Irish pay part of the English agricultural grant, it is because they are relatively heavier contributors to indirect revenue. The remedy for that is to get rid of the grant, not to extend its vicious principle in aggravated form to the much poorer country. It is certain that every addition to indirect taxation tells most heavily against the Irish people. But the Irish financial "reformers" go farther. I have seen it proposed that the landlords and "landgrabbers" should be relieved of the Income Tax and Death Duties, of course without condescending to tell us at whose expense. But with the command of the Irish representation and press and local government in future, these gentlemen may well count the poor helpless Irish people as nothing, and the man who, like Mr. Davitt, really thinks for them, as a mere crank.

The principle of the English Agricultural Rating Act and of the proposed Irish measure is certainly the same; but what is a folly which Englishmen can grin at and bear, is a crime in the case of Ireland. Propping up and strengthening landlords, "land grabbers,"

and absentees, is to aggravate the real causes of the depopulation, pauperism, and disaffection of the country. That would be bad enough in itself, but it is much worse when effected at the expense of the Irish taxpayer, already over-burdened, at the same time imposing the inevitable contingency of increased rates on the present real ratepayers, those who pay £1,500,000 in towns and villages on a valuation of £4,500,000, and those who pay £1,200,000 on £10,000,000, less a rental of £10,000,000.

Our Trade and War.—1.

Some years ago the late Lord Derby remarked that the greatest British interest was Peace, but people nowadays, while they acknowledge this to be true, seem to attach a great deal more importance to making themselves ready for battle. Lord Salisbury complains that a section of the public, including (it is alleged by outsiders) some intimate connection with his own Cabinet, appear to be desirous of fighting the world at large and simultaneously, notwithstanding the fair share of alarums and excursions that we have on hand in different quarters of the globe. Lord Selborne says that the nation is suffering from suppressed irritation, presumably because we are not at war with at least two, or perhaps three, of the great Powers, in addition to our other commitments of a warlike nature. Lord Rosebery, in attending the recent dinner of the Associated Chambers of Commerce, remarked that while he expected to be a guest at a function at which peaceful trade subjects were discussed, he found himself assisting in what was more like an amateur Council of War. Mr. Ritchie, the President of the Board of Trade, made remarks of a similar character. All this points to a very serious position indeed, especially as it is emphasised by votes for the navy and army so unprecedentedly heavy that, including the interest on the debt, our expenditure for past wars and preparing for future ones is over £70,000,000 this year, or £1 15s. per annum per head of our population, or £8 15s. per average family of five persons. As this expenditure is generally defended or explained by the necessities of our trade, it is of interest to look into the statistics of our business with the rest of the world.

The general argument is that our possessions outside these islands, known as the British Empire, are due to past wars, that inter-imperial trade is all important to us, and that we should continue to make our dominions expand, by force if necessary, with a view to pegging out claims for posterity. On this theory our territories, especially in Africa, have been increased to an enormous extent during the past few years, following on which policy and the fact that we are not the only nation that pursues it, we have had to immensely increase our land and sea forces. In this connection the following figures are worthy of consideration :—

Totals of British Trade.

Imports.

Year.	From Foreign Countries.		From the British Empire.	
	Amount.	Per Cent. of Whole.	Amount.	Per Cent. of Whole.
	£		£	
1882.....	313,500,000	75·9	99,400,000	24·06
1896.....	348,600,000	78·3	93,200,000	21·09

Exports.

1882.....	527,800,000	73·3	191,700,000	26·6	719,500,000
1896.....	554,300,000	75·0	183,800,000	24·9	738,100,000

It follows from these figures that only one-fourth of our trade is done with the British Empire, and that three-fourths is done with foreigners, and that our business with our own people is decreasing, while what we do with others is increasing. We are all proud, as we may well be, of the magnificent heritage we have received from our forefathers, and are all absolutely determined that there shall be no diminution of those dominions on which the sun never sets. It is, however, on much nobler and loftier grounds than commercial ones that our glorious empire has been built up and is maintained. It certainly was not founded on the principle of the huckster desiring to extend his connection, for

> Trade's proud empire hastes to swift decay
> As ocean sweeps the laboured mole away.

Our ancestors never conquered a third of the globe on the principles now so often pressed upon us. Besides, if England determined to go a gunning, simply in order to annex fresh branches to her shop, where is she to do so? The whole of the temperate regions of the world are already occupied, mainly by ourselves or our children, and by the great powers of Europe, so that further conquests of territory in regions where the English race can thrive are absolutely impossible. There remain, therefore, only tropical or semi-civilised countries, and practically the whole of these, with the exception of China, are already annexed by some great Power—mainly, again, by ourselves. Further, it is with people inhabiting temperate and civilised countries that our trade is mainly done. The following table shows British trade with tropical or semi-tropical countries :—

—	Imports.	Exports.	Total.	Population.	Trade per head.
	£	£	£	£	s. d.
Haiti	92,000	295,000	387,000	?	—
China and Hong Kong	3,000,000	8,400,000	11,400,000	400,000,000	0 6¾
Japan	1,241,000	6,160,000	7,401,000	48,000,000	3 1
West Coast of Africa, British and Foreign	1,988,000	2,200,000	4,188,000	?	—
	6,321,000	17,055,000	23,376,000	460,000,000	—
India, &c.	32,200,000	33,900,000	56,100,000	312,000,000	4 2
Total	38,521,000	50,955,000	79,476,000	772,000,000	2 0¾

Here again is a table showing British trade with temperate countries :—

Imports and Exports.

Population	265,000,000
Trade	£658,700,000
Per head	£2 15s. 9d.

So far as such rough statistics can carry us, it would seem that 17 per cent. of our trade is done with the tropics, and 83 per cent. with the temperate zones or with civilised states. Per head the latter do about 27 times as much business with us as the tropics, and this is quite natural. A tropical denizen need take no thought wherewithal he shall be clothed, or how he shall be warmed and fed, and relatively little thought what he shall eat. A blazing sun diminishes or removes the necessity for clothing or fuel or houses, and a handful of rice or a few bananas are enough for food. The elder Mr. Weller waxed indignant on the exportation of "moral pocket 'andkerchers and flannel veskits" to negroes who cared for none of these things—but he was very wishful to apply straight "veskits" to erroneous philanthropists. Lord Salisbury is apparently of a similar opinion as regards certain unspecified war-mongers.

Economic and Financial Notes and Correspondence.

The Victory of Atbara—and After.

Whatever doubt we may have about the remoter consequences of the renewed effort to annex the Soudan to Egypt, it would be churlish to withhold hearty praise to the General and troops by whom this notable victory was won. Its completeness is the most gratifying thing of all since it renders further opposition of a formidable kind by the Khalifa and his Baggaras highly improbable. Further bloodshed of a wholesale kind has even become well nigh impossible, and surely this is a fact to be thankful for, especially in a country where blood has flowed in torrents these fifteen years past.

But what are we to do now? The troops will receive their medals, their officers and leader promotion and titles, all in the profuse fashion of the day. That goes without saying; but how is Egypt to bear the expenses of a reoccupation of a vast territory, now mostly desert, and of the re-establishment of a government at Khartoum? The reoccupied country is in no condition to furnish any part of the expense, stripped bare as it is and depopulated by the rapacious cruelty of the Mahdists. And what are we going to gain by this conquest? Employment for Englishmen, perhaps; but likewise the burden of supervising the new Government—nominally, that of the Khedive.

It is all very well to succeed in these wars. The glory may be great, and the conduct of British-led troops is nearly always something of which to be proud, as far as deeds of war of any sort can justifiably excite pride. But is it wise for us to scatter our energy in this manner over distant portions of the globe always difficult of access, and usually far from an inexpensive base? The imperialism which dictates these distant expeditions has from the first appeared to us a species of madness, and success in a fight cannot change our judgment in this instance. Sir Herbert Kitchener's victory is not the end, but the beginning of trouble. It opens up a great vista of conquest and of complications—with the French in the western Soudan, with Germany in the south, with Abyssinia in the east. We have entered upon the conquest and expansion of yet one more empire, whose responsibilities will weigh heavier and heavier upon us and tax our strength the more the further we go. And all the time we are overburdened with cares elsewhere—cares which might become dangers.

Let but a quarrel arise between us and Russia and where would our resources for holding the Soudan be found? We can obtain no compensation in that country for many years to come, its trade may never be worth to us one month's business with France, one week's business with the United States, a tenth part of the value of our trade with China. And we risk the loss of much of this good and sure trade with densely populated countries to gratify a restless itch for conquest. Who among us benefits by the gratification of this itch, except the "medals and ribbons" bands of the fighters? Why does the nation refuse to look at these deeds of arms from this common-sense standpoint? We are not usually a feather-pated people, and yet militarism has now apparently got complete hold of us, so that we shout ourselves hoarse, like a Roman crowd, in expressing our delight over a successful slaying match, and place feats of that sort far above the noblest achievements of the men who spend their lives in contributing to the happiness of their fellow-creatures through the expansion of industry and commerce. An abdication of manliness such as this is ominous of many things. Already we are weak before great Powers by reason of our many responsibilities.

The Paris Money Market.

Among the numerous indications that the French volcano is becoming hot to eruption point, the condition of the Paris money market is not the least significant. We do not see how the Bank of France can long adhere to its policy of refusing to sell gold without bringing the convertibility of its enormous mass of paper money into doubt. "Protection all round," which is the policy of the present ministry, is driving capital out of the country, and causing its foreign trade to contract or to become less profitable. The blow levelled at the open market in stocks and shares has given an immense impetus to this outflow of capital begun, perhaps, by the necessity for unusually large and expensive imports of food, and the crisis in Spanish affairs is doing much to put it out of the power of the French people to sell securities abroad to meet extraordinary calls thus arising upon the national funds. Here, indeed, the worst of the money difficulty lies. Apart from their Egyptian and Russian bonds the French have very little in the way of securities that they could sell abroad, and not much even of these could be sold at anything near the present quotations. With nothing particular to sell in the way of international securities France must export gold, and its departure will force the Bank of France to advance its rate. A 4 per cent. bank rate coming just before the general elections might evoke dangerous sentiments in the minds of a large body of the electorate, and would undoubtedly render M. Méline's administration very unpopular. This might not be by any means a misfortune were there something better ready to take its place. We can only trust that there is, although there are few indications of its existence in sight amid the storm of passions, all making for revolution, now agitating the French people. But common-sense, of which Frenchmen have far more than we give them credit for, may yet be victorious over revolutionary factions even though these should be reinforced by an untoward money market.

Dearer Money in Germany.

It would be curious were the eagerness of the Germans to stand beside the English as international money-lenders to bring about a banking or monetary crisis in Berlin. The probability that it will is not inconsiderable, since the Berlin money market, to use an expressive if rather vulgar Americanism, has obviously "bitten off a good deal more than it can chew," in contracting to take half the last Chinese loan. And the worst of it is that payment must be so prompt. China has to hand over some £12,000,000 of it to Japan in the beginning of next month, and in all probability

German banks will have to remit gold to London to cover their share of the money. Japan has a weakness for the Bank of England, and is comfortable in mind when its balances lie snugly in its keeping. Besides, most of the money is owing here by Japan, or will be as its naval programme gets filled in, and it is handiest to have the cash on the spot. In all probability, then, Berlin will have to remit gold to London in large amounts within the next three weeks. The export has already been pretty heavy, and we are nowise surprised to see "Bank rate" 4 per cent. in Germany. Soon it may be 5 per cent., and then difficulties will begin, especially as dearer money in London is already making it less easy for German banks to flood our market with their acceptances. By itself 5 per cent. would not hurt, it is the conjunction of circumstances which threaten mischief.

The Arauco Company, Limited.

It is much to be desired that this concern, which has now gone into liquidation, may not be allowed to pass out of sight without a very close examination into its origin and history. More than a million of capital is involved in it and we do not believe, from facts that are before us, that one half of this money was ever legitimately put into the company's affairs, or that the purchases of some of these properties at least were honestly made. It is rather a shameful story, but one very difficult to tell in the columns of a journal like this, or indeed to print at all except as the report of a public examination of the directors before a judge. We emphatically think that this examination ought to take place. It will be one more scandal if the people who were at the inception of this company, and who undoubtedly profited by it while it continued to exist, should not be called upon to give an account of their stewardship. One of the shareholders, Mr. Penfold, plainly stated at the recent meeting of the company that two of the directors, the late Colonel North and a Mr. Edmundson, applied for practically £90,000 worth out of a £100,000 worth of preference shares issued in December, 1886, and began disposing of their allotments in April, 1887. An examination of the Register of Shareholders proves this to be the case, and in fact the share issues appear to have been usually made to a great extent in this way.

North and the others sold their shares issued in February, 1897, steadily throughout the year, and in the same manner subsequent issues of shares passed into the hands of this man, his associates and "dummies," to be unloaded upon the public at more or less handsome profits. To facilitate this unloading the most sophisticated and misleading reports were manufactured and issued about the prospects and condition of the company, which were set forth as being of the most roseate description. Concessions were bought which turned out to be worth nothing, but for which large amounts of money were paid by the shareholders, or at least for which large amounts of share capital were created to be traded off upon an unsuspecting public. This kind of business involves very little risk to those conducting it from the inside. Long before the shares allotted to them are paid up they begin to sell, the "premium" being then probably at its highest, and long ere the liability for calls comes home they are clear of the affair, with all the small capital originally advanced back in their pockets, ten, twenty, fifty times over.

One thing that requires elucidation is the history of the coal concession which they bought with a lawsuit upon it. By the loss of this lawsuit this "concession" was rendered valueless, but the disaster was hidden up and another practically worthless property purchased about which the most outrageously extravagant and misleading language was used by the late Colonel North. "We have the refusal," said he, "of this property for fifteen days and another party wants to give £250,000 for it." All the time this mean imposture was unfolding itself the directors professed to be working for nothing; but one of their number had an agreement whereby he received 5 per cent. on the purchases and sales effected by him as sole agent of the Arauco Company, and 2½ per cent. commission on its freight business. This is only the briefest possible outline of a very disgraceful history, but we shall be quite prepared to supplement it and with greater emphasis, backed by extracts from the minutes of the board meetings and other documentary evidence, if the shareholders are willing and ready to bestir themselves to have the affairs of the company investigated to the bottom, with a view to obtaining restitution of some of the money of which they have been plundered. Colonel North is dead, but there are others alive who ought to be made to pay back what they have obtained out of financing this company. All that is wanted is pluck and unity of purpose among the aggrieved proprietors.

More Light on Northern "Terrors."

In spite of the fervid eloquence of Mr. Bottomley and the ready manner in which the "shareholders," dear simple folk, endorsed his views, we must again state distinctly that the constitution of this concern is of a most suspicious character. The more we examine its past history the more evident are the sordid nature of its surroundings and the utterly disappointing character of the results heretofore obtained. In our previous article of March 4, we stated that the Port Darwin Gold Mining Company, whose property now constitutes the backbone of the present Northern Territories Company, fell under the control of Mr. Hugh Watt, a man of unsavoury memory, more particularly in connection with the Chile-New Chile-Yuruari-Caratal reconstructions. Since then we have discovered that this man Watt was practically the founder of the company, arranging the Board to suit himself. He throughout its history took the leading share in its management, the first secretary having been Mr. Leonard Welstead, his brother-in-law, who subsequently became a director and went out in this capacity to the mine. We stated that the property was foreclosed upon by the mortgagee about 1890, but did not know until recently that the mortgagee was Mr. Hugh Watt himself! This we believe to be the fact, since Watt appeared as the vendor to Mr. Bottomley's "Terrors" company.

We have thus established that the Howley Mine, which forms the chief property of the Northern Territories Goldfields of South Australia, was twelve years ago promoted as a company by the said Watt, who worked it for about four years, sending out to the spot an expensive plant. At the end of this time it was foreclosed upon by this latter-day financier, and taken back by him for a mere bagatelle, shareholders in the unfortunate Port Darwin Company, we believe, never having had a chance to say "yea" or "nay" regarding the sacrifice of their property. After these revelations, and in view of information supplied to us, it seems only reasonable that we should call upon Mr. Bottomley to answer the following questions:—

(1) Is it a fact that the Howley Mine was offered in London and sold for £1,500 in cash?

(2) Is it a fact that the North and South Union Group of mines, which comprised more than the other properties making up the list of the Northern Territories Company's holding, were offered about in London for £3,000 in cash?

(3) Is it a fact that the ore is very refractory, and that the Port Darwin Company in its four years of existence —from 1886 to 1890—with complete machinery on the spot, never obtained any systematic returns?

(4) Does the Northern Territories Goldfields of South Australia hold any other property, outside those contained in the Howley Group and the North and South Union Group, mentioned above?

It may be inconvenient for Mr. Bottomley to answer these questions, but he will soon begin to discover that

something more is required at his hands than the musty generalisations and soft sawder hitherto furnished by him about the property of this company. The public does not, even in its maddest times, capitalise properties of this character at £1,000,000, as is done by the present price of Northern "Terrors," and the sooner it understands the true character of the adventure the more likely it is to avoid touching the shares.

"Awakening" of Austria.

It is now Austria's turn. She, too, it seems, has been awakened by the recent hubbub in the Far East to a sense of danger from the weakness of her navy. Where, however, the danger lurks it would be difficult to tell; for even Austrian Jingoes admit that her present navy is perfectly sufficient to protect her commerce and to guard her coasts. She has, we are told, no ambition for the acquisition of colonies, even if there were any left for her to acquire. Then why this uneasy rush for the building of new warships? For no reason apparently but a feeling of annoyance that Austria has been unable to send a fleet to China to seize, like other great Powers, a port or a province, or both, from the submissive Chinese Government. Germany has got ahead of her, and is likely to continue so; for, by the time Austria's first new ironclad is built, there may be little room to spare for new-comers. Still Austria is bent on having a big or, at least, a bigger navy than she has. A grant of 55,000,000 florins for this purpose is to be asked from the Parliamentary Delegations when they meet next week. It will add heavily to the financial burdens of the taxpayers; and these are already much more onerous than most people are aware of. Austria has for more than a dozen years kept herself in a state of complete preparedness for a war with Russia. It would have taken place many years ago but for the intervention of Prince Bismarck. But Austria keeps up her preparations. Her army, the *Times* Vienna correspondent avers, is in a state bordering on perfection. This, of course, means enormous expense; yet there is now to be added to it the costly luxury of a great navy craze. In a country such as Austria it seems a great and foolish vanity. It has surely enough already on its hands. Its warring races cannot agree even on an official language. They can neither separate nor live together in amity. They compel the Emperor to rule despotically in spite of himself, and to the close of his reign sober-minded Austrians look with well-founded dread and anxiety. In such circumstances it is surely a mistaken policy to insist on a large addition to an already sufficient navy. Italy, in this respect, is more prudent; she is selling ships, not adding to their number.

Cowell, Craft, & Co.

A few weeks ago we dealt with some of the concerns in which Mr. Richard Collins Drew was the leading spirit. Last week we read that one of these had been wound up under an order of the Court. This was the business of Cowell, Craft, & Co., which was promoted by one J. Jervis, with Drew to take over the goodwills, premises, &c., of Cowell & Drew, Gummand & Co., Craft & Co., & Rush's Laundry. The public were unappreciative, and the undertaking has not been a success. Mr. Justice Wright in making the order said there would be the fullest investigation into the affairs of the company, and we shall await the result with interest.

Wanted, a Hercules!

There is no doubt that the company Augean stable is in a bad condition. Recent investigations of several of the most outrageous swindles and fraudulent promotions show that some strong action is imperatively necessary. The power of holders of "underwriting" and "commission" shares to outvote bonâ fide shareholders is little short of a scandal, as well as the difficulty of obtaining any impartial investigation of the affairs of a company. Piecemeal legislation is useless. Strong sweeping reforms giving the means of first finding abuses and then the power of crushing them are required. But who will bring them forward?

German Enterprise.

"How often of late years has the remark been made that British commercial men are not up to date." Thus writes Mr. T. R. Mulvany in his report on Trade in Germany, and we might quote the same remark from almost every trade report that reaches us. Englishmen, we are continually told, are too old-fashioned, too "upish," and not sufficiently adaptable to make way with foreigners in this competitive age. The Germans, on the other hand, are adaptability itself, and can learn the language and conform to the customs of any land in which they may find themselves, and, in fact, so well do they thrive in "furrin' parts," that frequently, in the words of the song, "The Fatherland, the happy Fatherland, never sees them any more," so glad do they seem to get away from it.

Mr. Mulvany's picture of commerce and enterprise is certainly very glowing and his figures prove that the nation has indeed made rapid strides during the past few years, and threatens to take the shine out of us all if we do not look to our laurels. The secret of this success our Consul puts down to the "military organisation applied to trade and industry to meet the requirements thereof," and to a moderate protective tariff. But it is rather soon to say that this "military discipline will always be a success. The people themselves do not like it, Germany as an empire is still in its infancy, and the old maxim of "train up a child," &c., in many cases proves a fallacy. Still that it has been successful so far is beyond doubt. Germany at the present day is a great military power, and promises to be a great naval one, and there are many of its institutions from which, if we would only pocket our pride, we might take a lesson. Their State-controlled railways carry freight at such moderate prices, in some cases below the cost of production, as to make it impossible for foreign traders to compete with them in their home markets. Their industrial companies are managed by men with a technical knowledge of the concern. Their mines are not governed by a number of unpractical directors, but by a manager over whom is placed a board of supervision; and last but not least the professional company promoter is an unknown quantity, and "hence the tremendous dead weight of promotion capital does not exist."

Farmers' Troubles.

Among the troubles that afflict the agriculturist, the most tantalising is the weather. It can never be depended upon; and the modern prophets, smart though they be, have not proved of much use to the farmer. For a considerable time he has been anxious about the long-continued drought. The winter was mild enough, but unusually dry. The spring corn has been sown, at least in England, though there is a good deal yet to do in Scotland; the potatoes have been planted, and the mangold crop has been laid in the ground under tolerably favourable conditions. In these operations the drought was serviceable; but a good downpour of rain would have been welcomed even if it had somewhat delayed sowing. Pastures were at a standstill for want of moisture. Dairy farmers and graziers were especially anxious on this score. Rain has fallen within the last week or so in many districts, but hardly in sufficient quantities to be satisfactory. Still it has done some good. It was in time to help the newly-sown mangold; and the young spring corn and pastures were greatly refreshed by it. But vegetation craves for more, and it is to be hoped it will not be long delayed. The cold and frost at the close of March and early in April have not done so much harm as might have been expected Fruit trees look well. The recent sunny weather has

forced forth the bloom of plum and other fruits in great abundance. On the whole, though more rain is wanted, it cannot be said that the prospect for the farmer is bad; it is at least fair.

Dairy farmers have at present a special grievance of their own. A Cherbourg company threatens to flood our markets with what is called fresh milk. They even propose floating a company in this country, into which they mean to entice as many milk-dealers as they can. A herb has been discovered—so our Consul at Cherbourg vouches—which has antiseptic properties, and will keep milk fresh for six days. The Cherbourg company have bought the secret of distilling from this herb a liquor one drop of which will preserve the sweetness of a gallon of milk for a week. The prospect is naturally not relished by our dairy-farmers. They insist that the milk so treated is really drugged, and ought to be subject to the same sanitary restrictions as our home supply. It is possible there may be something in this objection. Chemical analysis only affords us negative results; it has not discovered the antiseptic drug, or whatever it may be, in the milk. The only supposition is that it must evaporate; but if it evaporates, how can it continue to affect the milk, so as to keep it fresh? Our own farmers insist that there is danger to health in milk thus treated, and would prevent its importation. But that is surely a mistake. Are our farmers not guilty of using antiseptics in the milk with which they supply us? It would be valuable in a sanitary sense if our milk supply were sterilised, and the Cherbourg people say they can do this if antiseptics are forbidden. So, no doubt, could our own dairymen. It is a matter for inquiry and experiment. We must not prohibit the importation of this milk unless it can be showu that it is dangerous to the public health; and as yet this has not been proved.

Great Central Railway Finance.

The directors of this company are issuing Lloyds' Bonds to their contractors, and these contractors are selling them in the City for what they can get. It seems a pity that the company should be reduced to this. Not that we object to the creation of temporary debt on capital account in itself. It would have been better had the whole debt of our railways been in terminable bonds instead of a perpetual bond upon them. But what is serious is the issue of these Lloyds' bonds without intimation to the regular proprietors of the company. They ought to know the proposed amount of the bond and the nature of the security given. Formerly a bond of this description issued by a railway company was regarded as a prior lien, taking precedence even of debenture stocks. Is it so in the present instance, or will the preference stocks alone find a new security placed in front of them? Perhaps the directors will say what they are doing, and how much money they are likely still to want. The London Extension, upon which the old Manchester, Sheffield, and Lincolnshire Company embarked so confidently, is surely costing far more money than was ever estimated for.

The Buenos Ayres Great Southern's New Capital.

Excellently as this premier Argentine railway is managed, we must confess that we do not like the manner in which the board proposes to raise fresh capital. The proposition is to issue forthwith £2,250,000 in "Four per Cent. Extension Shares, 1902," at a premium of £1 10s. per £10 share, the premiums of £337,500 thus received to be devoted to paying the 4 per cent. interest upon the new shares until 1902, after which date they will be merged into the ordinary capital, and rank for dividends in the usual way. By this arrangement there will be no charge against revenue during the four years, and this to our mind must unduly benefit the net earnings of that period.

Thus, of the money raised £600,000 is to be lent to a dock company upon security of first mortgage debentures, which, we presume, will bear interest. Then 275 miles of railway will be built with part of the money. One-sixth of the distance has already the lines laid down, so that a year hence the bulk of this new mileage ought to be open, and we dare say two years hence will see it all completed. New rolling stock is also to be purchased, and improvements on the main line are to be effected. The rolling stock can be purchased as soon as the money is raised, and the improvements will doubtless be pushed on quickly, so that we should imagine the company would have the full benefit of this extra mileage, revenue from its dock debentures, new rolling stock, and general improvements, for at least two years without it costing revenue a fraction.

In many ways the company would gain from the expenditure of this money, and so during at least two of the years during which interest is to be paid out of capital quite an unnatural condition of the revenue account would prevail. In the ordinary course of events we should have expected the dividends of this line to improve, and under such a stimulus they might easily rise to 8 per cent., if the board were inclined to distribute freely. In 1902, however, a change would come over the scene, for then the £2,250,000 of extension capital would come in for full rights. It would not be a question of finding the difference between four and eight per cent. upon that amount of capital, but of providing the whole eight per cent., as the four per cent. will until then be paid out of capital, and £2,250,000 is not a slight percentage of the ordinary capital, for its present amount is only £9,000,000. Something of the kind happened previously with this company, for in the years 1884 to 1889 it issued £440,000 of capital bearing a fixed rate of interest until 1894. In the interval dividends of 10 per cent. were paid, but by the time the last amount of capital obtained the full power to share in profits the dividends had declined to 5 per cent. Of course this decline was not wholly due to the extra capital, but we venture to affirm that the 10 per cent. might not have been paid for so long had the capital issues been arranged otherwise.

The Welsh Coal Strike.

Except in the increased injury to trade, there is no real change in the position of affairs in South Wales. The representatives of the colliers and of the employers had another brief conference on Tuesday; but as the former had no power to conclude an arrangement, there was no practical outcome of the meeting. The men, however, formulated their demands more precisely than they have yet done, and the employers intimated that, while still open to negotiation on the general question, they would in no circumstances accept the proposals for a minimum wage, or for the appointment of an umpire. This narrows the matters in dispute considerably, and if the men decide to drop those two propositions, and consent to confer plenary powers on their representatives, there is reason to believe that an agreement may be arrived at. Both sides seem to prefer the sliding scale arrangement, only the men wish that wages should in no case go below a certain limit, however much the price of coal may be reduced. The demand is unreasonable. If persisted in, it must lead to a prolonged struggle; but it need not yet be taken for granted that it will be persisted in, and hopes of an early arrangement of the quarrel are still entertained. It rests, however, with the men themselves; and, as they have revolted against their old leaders, and are not very confident about their new, there is great uncertainty about the immediate result.

ARGENTINE TRADE IN 1897.

A very interesting report on this subject has been compiled for the Foreign Office, by Mr. E. A. M. Laing, acting British Consul at Buenos Ayres. Its main lesson is that if a country is given a government capable of maintaining some kind of order and peace,

it makes progress even under adverse conditions. And the conditions were adverse in the Argentine last year, for the harvest of 1896 was practically destroyed by locusts and unfavourable weather, so that the people started badly. Then, to add to the difficulties of the agricultural population, the premium on gold kept falling all through the year. This had the effect of reducing the return measured in gold, which the producer got for whatever he had to sell, and, at the same time, he had to pay his labour and general expenses on the same scale as before. That is to say, while he only received an average of 291.36 paper dollars in 1897 for 100 dollars gold, as compared with an average of 296.16 in 1896, and of 344.39 in 1895, he was not able to proportionately reduce his labour bill. This kind of pinch illustrates the evil of a depreciated currency. When a nation's money begins to recover from the effects of a great depreciation the recovery inflicts a positive hardship upon all those who have to sell at a gold valuation the goods they produce in order to live. Nevertheless, Argentina has been steadily advancing. Foreign capital, especially German capital—borrowed in London perhaps—has been flowing into the country, and the railway companies, still principally English, have been extending their lines and bringing new districts in the great territory of the Republic within reach of settlers and markets. A great tract of country, for example, is being opened towards the west and south by the extension which the Great Southern Railway is building from Bahia Blanca to the confluence of the rivers Limay and Nouquen. This line runs south-west from Bahia Blanca until it meets the Rio Colorado, along whose south bank it goes for 65 miles, and then across the Rio Negro. When completed, the line will be 348 miles long, and will run through a country where excellent grazing land lies, while in the valleys of the Colorado and Negro rivers there are large areas which may be irrigated at small cost. Already population and building materials are flowing south-westward with the line, and Mr. Laing thinks that at no distant date an extension may take place to the rich slopes of the Cordillera, an extension which will establish a connection with Southern Chili.

Although the country is slowly making way, its foreign commerce last year bore unmistakeable traces of the locust plague. Imports fell from upwards of $112,000,000 to about $98,300,000, and exports from $116,800,000 to $101,170,000. England still leads in supplying Argentina with goods, the total received from us being valued at about $36,400,000 last year, which was a long way ahead of any other country, Germany and France coming next with little more than $11,000,000 each. But we do not occupy anything like the same position as purchasers of Argentine goods. France takes the lead there, and last year received nearly $23,000,000 worth as against about $13,000,000 sent to this country. Germany, even, buys more Argentine products than we do, her purchases last year amounting to rather more than $14,000,000. This is explained by the fact that France and Germany are very much larger importers of Argentine wool than we are. France took 188,000 bales last year, Germany about 98,000 bales and Belgium over 80,000, as against 19,500 sent to the United Kingdom. Mr. Laing, however, seems to imply that our neighbours did not retain all the goods nominally consigned to them, and that our proportion in the Argentine exports may be larger than appears. Our position as a great meat-eating nation is signally illustrated by the fact that last year we imported upwards of 2,000,000 frozen wethers, no other country taking any share in this trade except France, whose purchases amounted to about 57,400.

So far as competition goes, although the Germans are extremely busy in starting new companies out in Argentina, especially electrical companies, it does not appear that we are really losing ground as traders. Where other nations, and the Germans in particular, are making headway against us is in the production of inferior goods, got up in imitation of high-quality English goods and sold as such, passed off upon the ignorant who imagine that they are getting for very low price the same article they used to pay a better price for. This is not very honourable trade competition, but it is one we must put up with until the consumers in the Republic have been educated by experience. What hinders our business more than anything else is the tariff, and the tariff is, of course, a direct product of the monstrous debt which the "boodlers" of the past have piled upon the unhappy Republic. This tariff, for instance, hits bar iron so severely that a local firm, taking advantage of the export duty placed on old iron by an unenlightened government, buys up scrap iron, at its own price almost, and manufactures it into new bars. But we hold our own in industrial machinery of all sorts, which Mr. Laing reports to have been in brisk demand, more especially the good qualities of English make. He, however, emphatically adjures British manufacturers to be more careful in the packing of their goods and to show greater willingness to meet their customers' wants. In both these respects the habits of Continental dealers and producers are in marked and favourable contrast with our own. Not only should goods be well packed, but each case should be marked on the outside in plain figures with both the net and gross weight in kilos, and the measurement in metres, and the said weights and measures should be noted on the invoices.

Mr. Laing gives the Argentine Government great credit for its success in fighting the locusts. We hope he has not been misled in this matter, for his opinion is not quite in accordance with what we are hearing from other quarters. Its intentions are, no doubt, excellent, but the performance is by no means always equal to the desires of the amiable law-makers. Allusion is made towards the end of the Report to the resumption of full payment of the interest upon the national debt, the total figures of which are put by Mr. Laing at $425,000,000 gold, or $535 per head. Of course, there is no revenue to meet this generous determination of the Government, and, as we have often pointed out, it has been in far too great a hurry to play the supra-honest debtor. It has been able to "realise" only deficits every year since the crisis of 1890, and the deficit for 1898 is apparently estimated at $9,000,000 paper. This is to be made good in a very characteristic, but extremely objectionable way by compelling foreign insurance companies working in the country to buy $7,000,000 paper in 5 per cent. bonds at 80 per cent. of their face value, and by transferring $2,000,000 paper, estimated to be the "profits" on the working of the insolvent National Bank, to the Treasury. That is to say, $2,000,000 notes, which should have been cancelled and burnt according to law, will be re-issued. Even this, we fear, will not fill the gap, and the latest news in the City of London is that the Government of the Republic is busy arranging for the issue of a new loan in Europe. We have been expecting this for a long time. It was not wholly generosity which dictated the resolution to resume debt payments in full, whether there was revenue to do it with or not, but an unquenchable desire to finger more of our money. We are disposed, though, to think that in their haste to do this, the Argentine politicians have over-reached themselves this time. English investors have not yet forgotten 1890 and what followed it, and it will be extremely difficult to get them to subscribe a new Argentine loan at the present time. A very good thing also will it be for political honesty, and for the progress of Argentine, if people here do button up their pockets and refuse to lend a penny. Argentine is not marvellously well governed now; its greatest weakness, indeed, is in the character of its administration, the wastefulness of its politicians, and the feebleness of the central authority. Slowly, however, the power of the Buenos Ayres Government is becoming consolidated, and the country has been making progress in spite of all drawbacks. It will therefore come out right end up if left to grow naturally without help on a large scale from such dangerous stimulants as borrowed money always is. The progress in the future should be equally great with what it has been in the past eight years, and far more solid. The country is capable of being a great nation and will become one in time, we have not the least doubt, unless its prospects are damaged, or wrecked, by the corrupt influences which so nearly brought it to destruction in November, 1890. And, loan or no loan, 1898 is destined to be more prosperous than its immediate predecessor so far as the commerce of the Republic is concerned for the harvest is much larger, and better prices are obtained for the exportable surplus.

THE LIFE INSURANCE BLUE BOOK FOR 1896.

It is a pity the officials responsible for the production of this valuable compilation cannot manage to get it out some time within the twelve months succeeding the date of the figures. It has only come out a week or two ago and the balance-sheets of many of the companies for another year have already, in many cases, been made public. This gives an out-of-date aspect to the Board of Trade volume. Still, when it does come it is a thing to treasure. At present we can find room for only a few figures from the summaries appended to the returns made by the various insurance offices. These summaries show that at the date of the balance-sheets embraced in the compilation, the funds possessed by the ninety-two life offices dealt with aggregated £203,830,000. The "ordinary" life companies had an income of £19,605,000 from

premiums alone and the industrial companies, of which there are eleven altogether making returns—seven of them doing no other business—a premium income of £7,151,000. Altogether these companies received nearly £27,000,000 from premiums, £2,336,000 came to them as capital paid in against annuities purchased, and £8,445,000 was their income from interest and dividends. These figures give some idea of the magnitude of the business, and this idea is still further enhanced by the statement that the liabilities of these companies on insurance policies of all kinds aggregate £714,000,000, against which they have resources in life and annuity funds alone of £223,626,000. Their income increased last year by nearly £1,500,000, and the claims paid were £445,000 less than in the preceding year. On the whole, therefore, British companies are flourishing and growing in wealth. We may note that the average cost of conducting the industrial business exceeded 44 per cent. of the premium income. It should also, perhaps, be stated that the accounts here dealt with are by no means for a uniform period of time. Most of them are for the year ended December 31, 1896, but the return of the Friends' Provident comes down to November 20, 1897, and the Clerical, Medical, and General to June 30, 1897; the Life Association of Scotland to April 5, 1897; the National Guardian to June 30, 1897; the University to April 30, 1897, and so on. Consequently, it is possibly less the fault of the Board of Trade than of the insurance office officials that this return is so long in appearing after the date when the earlier balance-sheets, which form the great majority, have been made public.

IN THE DUTCH WEST INDIES.

Curaçoa seems to be in a rather depressed condition, what with its decreasing trade, financial deficits, and uncertain agriculture, and from Mr. Consul Jesurin's account of affairs there does not seem to be much present likelihood of matters improving. Prices in European and American markets are so low, tariffs so high, and competition so keen that profits in most cases are almost impossible to realise, and in one or two instances—the export of salt to the United States for example—the result is frequently a loss. The financial deficit for 1895 was over 108,000 fl.; for 1896 over 199,000 fl., and when the official statistics for 1897 are complete, the result, Mr. Jesurin tells us, will prove to be much worse. Pension disbursements, annually increasing, will amount to 14,766 fl. in 1898. The accounts of the Government schools show a deficit of 30,000 fl., which in 1898 will be much larger; and, in fact, the only institution which seems to have a balance on the right side is the Post-office. The island of Aruba, to be sure, possesses not unprofitable gold mines, but all that the Treasury receives from them is a paltry £200 a year, paid by the Mines company as rent. It is pleasant for us to know that under such distressing circumstances the importation of Wrexham Lager Beer is steadily on the increase, and whereas formerly it was unknown, at present the consumption is 25 per cent. of the total imports of this article. Our trade on the whole does not seem to have suffered much during the past few years, and in 1896 our exports to the country comprised about one-third of the entire merchandise brought there. But our shipping has fallen off greatly in the last year, due we are told to the fact that the Prince Line steamers have ceased calling at the port, and it might be well to consider the previous suggestion of establishing a British line of fast steamers to call there regularly as the American, French, Italian and Dutch lines do.

Critical Index to New Investments.

MANCHESTER AND LIVERPOOL TRANSPORT COMPANY, LIMITED.

The capital of this new creation is £300,000, in £1 shares, of which 200,000 are ordinary, and 100,000 deferred. No dividend can be paid on the latter in any year until 8 per cent. has been paid on the ordinary shares, in which case the deferred are entitled to the balance of profits available for distribution up to 8 per cent. and two-thirds of any surplus, the other third going to the ordinary shares. Subscriptions are invited for 150,000 ordinary shares while 65,000 deferred shares, with £6,000 in cash, go to the vendor, who appears to be Percy James Harmer, while E. H. Forwood, of the firm of Forwood Brothers & Co., who are the managers of the undertaking, is interested in the agreement and in the purchase consideration. The company will undertake the transport of merchandise by steamers between Manchester, Liverpool, and Birkenhead, through the Manchester Ship Canal. Steamers are to be constructed of varying capacity up to 1,000 tons, capable of performing the voyage between Manchester and Liverpool within six hours, and a dividend of at least 10 per cent. on the ordinary shares is spoken of. As a commercial undertaking we should rather doubt its chance of success, but the venture is so essentially local that investors here will no doubt leave the shares to Manchester and Liverpool.

BENT'S BREWERY COMPANY, LIMITED.

This Liverpool undertaking invites subscriptions for £50,000 in 5,000 6 per cent. cumulative preference shares of £10 each at 4 premium, which is a little under the market quotation of the existing shares, and at this price the yield is 4½ per cent. This additional capital is required to repay advances obtained to purchase licensed premises, and to pay for more properties. The premiums are to be added to the reserve, at present standing at £51,443. The company has done very well in the past, and the £10 ordinary shares, which stand at 17½, have received progressive dividends during the last three years of 6, 7, and 8 per cent. But existing share and debenture holders will naturally have preference in the allotment.

ROUMANIAN FOUR PER CENT. GOLD LOAN.

This loan, which is for 180 million francs, is being issued in Paris, the price being 93 per cent., and 105 million francs are for conversion purposes, the balance being for public works. The Société Générale de Paris, London Agency, will receive applications for the conversion of outstanding bonds of the Roumanian 5 per cent. 1875 loan and of the 5 per cent. Roumanian Rente Amortissable issued from 1881 to 1888, applications for the latter being only entertained to the extent of 36,320,000 francs. The issue price is decidedly high, and the terms offered should bring in outstanding bonds freely.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Buenos Ayres Great Southern Railway Company.—The half-yearly report of this company, just issued, is very much in the nature of an interim statement, but considerable information is furnished as to its current affairs. The half-year was not a good one for business in the Argentine Republic, but the receipts of the line increased by £43,416 to a total of £680,895. Working expenses were £33,567 higher at £288,947, and the net profit was therefore only £9,849 better at £391,948. The bad crops of the year 1897 were reflected in a heavy decrease in the carriage of cereals; but that is not an important section of the company's business, and other traffic more than made up for the loss. A little competition was experienced with the Buenos Ayres Western line, but the company is not troubled much in that way, and the increase of 2·38 per cent. to 42·44 per cent. in the percentage of working expenses was more the result of sixty-six additional miles of line being open, and a higher price for coal. The average gold premium of the six months was practically the same as in the corresponding half of 1896, and so it did not affect the figures. After meeting preference and debenture interest, the balance of £257,471 permits of a dividend at the rate of 5½ per cent. per annum, and the carrying forward of £9,971. This is ½ per cent. above the dividend declared a year ago, but the large increase of traffic in the current half-year has emboldened the Board to advance the rate. The company is extending its operations on all sides, and with a view to carry out its projects, the capital will be increased by £4,000,000. Of this £2,250,000 will be issued immediately as 4 per cent. extension shares 1902, bearing interest at that rate until the date mentioned, when they will rank with the ordinary stock. The new shares will be issued at a premium of £1 10s. per £10 share, and the premiums so received will be used to provide the interest upon the new capital until 1902. With the money an important section of 256 miles will be built from the station 25 de Mayo to Saavedra, forming an important loop on the most western part of the company's territory in the province of Buenos Ayres. Then £600,000 will be subscribed towards a new company that will build an important dock on the Riachuelo at Buenos Ayres, and several minor branches, and the improvement of the port at Bahia Blanca will be provided out of the funds thus found. None of the money, however, appears to be needed for the great extension to Nuequen, which was furnished out of the recent debenture issue. Progress on this extension is satisfactory and quite a half of the work appears to have been completed. The absorption of the Buenos Ayres and Ensenada Railway Company will hand over to the company the only line that works independently of it in the province of Buenos Ayres south of that city. It serves the coast towns just south of the city, including La Plata, the state capital

and in exchange for it the Buenos Ayres Great Southern will issue £517,300 of 4 per cent. debenture stock, £552,000 5 per cent. preference stock, and £660,000 ordinary stock, all this being in addition to the £2,250,000 of Extension capital; but the preference and ordinary capital forms part of the £4,000,000 new capital to be created. The company has thus spread itself out on every side, but the policy pursued is a definite one, and it seems to be rendering competition impossible, by its energy and foresight. The only line that in any way draws upon its territory is the Buenos Ayres Western, and if the latter obtains control of the Bahia Blanca and North-Western Company this competition might become more pronounced, but it could only be rendered important by great developments in the future, which at present are hardly in the range of practical politics. Therefore, to the Buenos Ayres Great Southern is left the task of developing the southern portion of the Argentine Republic that centres round the Rio Negro, which in the opinion of many is one of the most hopeful regions of that vast Republic. We trust it will deal mercifully with the settlers in its strength.

Rio Claro São Paulo Railway Company.—The revenue of this company last year amounted to £137,237, and including sundry balances the available sum at its command was £141,291. After payment of debenture interest, the shares received 14 per cent. in dividend, and a balance of £3,530 was carried forward. As is well known the revenue is derived from bonds of the Companhia Paulista de Vias Ferreas & Fluviaes, a substantial Brazilian undertaking that has leased the line. Last year with the exchange at 7½d. per milreis, the latter concern earned a net profit equal to £390,625, while the full service of the bonds held by the Rio Claro Company, including redemption, was only £163,625, and there is, we believe, virtually no debt in front of those bonds. At the same time, it is doubtful whether the dividends on the Rio Claro Company will be maintained at their present rate. The Paulista Company commenced to redeem its bonds a year ago, and by this time has paid off £56,400. Each year the amount redeemed will increase as redemption is cumulative, and so the amount received for interest on bonds held by the Rio Claro Company must diminish. The latter company invests the money received for redeemed bonds to the best advantage, but of course the return from these investments cannot amount to 3½ per cent., whereas 5 per cent. was received upon the bonds redeemed. The process will be a slow one, but it will be sure, and as the revenue has been divided pretty well up to the hilt in the past, there is no margin to meet a decline, save by reduction of dividend.

H. Herrmann, Limited.—This company, for manufacturing furniture, produced £12,017 profit last year, as against £14,134 in 1896. After adding £2,965, brought forward, the total permitted of the payment of the interest on the preference shares, a dividend of 7 per cent. on the ordinary shares, the placing of £1,498 to reserve, and the carrying forward of £3,124. The amount put to reserve commences that fund, but in the two previous years £3,198 was written off "Purchase of Business Account," virtually goodwill, and £4,244 was written off the stock, the balance forward being built up in the last three years. The balance-sheet ought, therefore, to have improved. The company has had to increase its loan from its bankers by £2,000 to £20,000, but by doing so it has cleared off the debt of £4,372 to the estate of the late vendor. In the past year the capital was divided into equal parts of 6 per cent. preference shares and ordinary shares, but no water was introduced, and the preference shares ought to be a fair investment to a moderate extent. We should like to see more details in the profit and loss account.

City of Buenos Tramways Company.—Last year the gross receipts increased £19,438, to £222,128, and the working expenses £14,680 to £158,570. The net revenue of £63,557 was therefore £4,758 higher, and after placing £10,000 to reserve, 7½ per cent. in dividends is paid upon the shares, and slightly more is carried forward. The reserve fund now amounts to £87,231, and of this fair sum £23,677 is invested in high class securities, and the balance has been employed upon the undertaking. Of late the investments have not been increased, as considerable expenditure has been entailed by improvements and extensions. A Fodder Reserve Fund of £8,000, however, has been built up of late years, which, we presume, is available for a sudden rise in the prices of horse forage. The capital is well adjusted, for there is only £116,000 of debentures to £675,000 of share capital. Like all the Buenos Ayrean tramways, the company suffers from the action of the Municipality, having to pay 6 per cent. of its takings to that rapacious body, which does not fulfil its own engagements, and at the same time has to spend considerable sums on new paving.

San Paulo (Brazilian) Railway Company.—In the half-year ended December 31 the gross revenue amounted to £405,188, and working expenses to £187,964, with a net revenue of £217,223, compared with £230,893 in the corresponding half of 1896. After adding £32,840 brought forward, a dividend at the rate of 11 per cent. per annum is proposed, and £105,448 is carried forward. The dividends upon the new preference and ordinary shares do not fall upon revenue, as they are provided out of a fund formed by the premiums received upon the new issues. No allusion is made to the attempt by the Mogyana Company to obtain capital to provide a competing line, but it is stated that the new works for doubling the line of the San Paulo Company are progressing satisfactorily. The dividend is 2 per cent. lower than that declared for the year ended June 30 last, and the decline must be considered as a result of the low exchange. This low exchange, however, ought to help the business of the country, and later on the company should benefit from the growth of general business. The Santos Harbour Works are being gradually finished, and this ought to help the company's traffic.

The London Life Association, Limited.—A justifiable pride is shown by the directors of this company over its results for the past year ended December 31, the ninety-first of its existence. Not only was the new business good, yielding new premiums amounting to £11,940, of which £9,264 represented renewal premiums, but the mortality was exceptionally favourable. There were only 92 deaths involving claims in 165 policies amounting to £180,100, whereas the life table used indicated a theoretical liability of £312,256. Fifteen policies for £17,882 were surrendered and their surrender values amounted to no less than £7,568, as against £6,128 received in premiums, so that the holders got back all they had paid and nearly a quarter as much again, which is very good investment indeed. Another 11 policies covering £16,750 lapsed, but we presume their existence had been but brief. The gross premium income was £346,616, and the interest income £174,549, or together £521,165. After meeting all out-goings, £126,437 was added to the life funds, raising their total to £4,508,100. This is a non-commission mutual office and the expenses of management took only £16,623, or about 4·7 per cent. of the premium income. The company has the bulk of its funds in home securities, but £571,377 is in Colonial Government securities, £248,700 in Indian and Colonial railway securities, and £184,619 in American railroad gold bonds. The directors have decided to take up endowment business and whole life insurance, with limited term premium payments.

The Sun Life Assurance Society.—Last year this society issued 2,329 new life policies, insuring £1,092,382, and yielding £43,939 in premiums; after deducting re-insurances against both these amounts. The total premium income was £419,986, and interest, dividends, and rents returned £135,026, making the total income of the life business £555,221. Claims, well within expectation, took £235,224, including bonuses. Policyholders further received £91,534 by way of cash bonuses, surrenders absorbed £20,855, and commissions and expenses, including valuation expenses, £69,057. With sundry smaller expenses the total outgoings are brought up to £472,520. Adding £55,217 received in the twelve months for annuities over the balance left, enabled the total funds to be increased £284,443 to £3,957,198 at the end of the year. An accident and general department has been established for the transaction of personal accident, Employers' Liability, and Workmen's Compensation insurance. Expenses and commissions took fully 16·4 per cent of the premium income, but £5,000 was laid out on the valuation and the bonus distribution. Nearly the whole of the company's money is invested in domestic securities.

Linotype Company, Limited.—This company is a re-arrangement, effected in December, 1896, of an older concern of the same name. The report, issued last month, is therefore the second under the new régime. There is again an increase in the profits from the sale of machines, royalties, &c. In 1896 the balance of profit and loss account amounted to £123,255, and in 1897 to £140,898. By adding to this balance £21,984, premiums received on new issue of shares, the total is further increased to £162,882, a very respectable total. Dividends of 6 per cent. on the preferred and 9 per cent. on the deferred have been paid. £25,000 is added to reserve, making this fund £281,875. New works have been erected, and to pay for these a mortgage debt has been added to the Company's liabilities; the authorised issue is one million, of which £250,000 has been issued. In the present condition of the Company's business there is ample margin for this amount of debt, but we must confess our examination of the balance sheet does not impress us with a high opinion of the Company's financial strength. By the re-arrangement of the share capital £812,000 was added to liabilities as bonus to the old shareholders. True the founders' shares have been wiped out, but this is perhaps the only feature in favour of the writing up of the capital. Patents and goodwill stand at £1,906,592. They may be worth this value and no doubt are, at present, but we certainly think the directors would be acting as cautious men of business in using some of the handsome profits now being earned in writing down this asset. Further the reserve fund is employed in the business, a very fashionable custom, but one which does not add that strength to the financial position of a company which the name "reserve" would imply. We hope the directors will turn their efforts toward the strengthening their company instead of the distributing of big dividends; they will be able all the easier to meet competition if such should spring up.

The Highland Railway Company.—Gross receipts for the half-year ended February 28, 1898, £235,063, expenditure £157,853, including a round £3,000 for Parliamentary expenses. Proportion of expenses to receipts 67·2 per cent. A balance of £10,477 was brought forward. Receipts rose nearly £11,000, and expenses about £9,000. The net revenue, balances forward included, was only £87,710, and after meeting all fixed and preference charges there was only £8,218 left, out of which a dividend at the rate of ½ per cent. per annum is declared. This leaves only £1,807 to be carried forward, so the company really did not earn a penny for its shareholders in the past half-year, and could not have paid more than ¼ per cent. per annum had its Parliamentary charges come out of revenue. Why is it that the figures in the directors' report of these in the appended balance-sheet do not always agree? Within the six months the company spent £121,232 on capital account, and looks to spending £131,250 in the current half-year. Dividends are payable on May 5.

The North British and New Zealand Investment Company, Limited.—In their eleventh Annual Report the directors of

this company state that the net profit to December 31 was £2,063, out of which £400 was put to reserve, and £1,291 devoted to the payment of a dividend of 5 per cent. on the share capital. Directors receive £200 for their services, and £172 is left to carry forward, or about £100 less than was brought in. Lending at paying rates continues difficult in New Zealand, so further sums have been brought home during the year, and £8,900 of debentures were paid off. This is, on the whole, the best thing that could happen.

The Central Argentine Railway Company has a very sorry tale to tell about the past year's working, the falling off in the gross receipts being £196,130, and in the net £150,768. Goods traffic yielded £143,259 less, and passenger £30,245 less. There were 319,326 fewer passengers carried, and 670,635 tons less of goods, but the percentage of expenses to receipts rose from 52¼ to nearly 60 per cent. All this is due to the damage done by locusts to the maize crop and the consequent loss inflicted on the country at large. After paying interest, rent charge, and Western section annuity, there remains only £127,673, of which a dividend of 1¾ per cent. for the year absorbs all but £10,158, which is carried forward. The company has so far done much better this year, the receipts for the first quarter showing an improvement of £73,000, but the stock does not offer much inducement to a purchaser, for if the dividend were to rise this year to 3 per cent. the yield on the present price would be under 4 per cent.

Entre Rios Railway Company.—The results of the working during the second half of last year are more unfavourable even than those of a year ago, the working expenses exceeding the receipts by £3,068, while the loss for the corresponding period of 1896 was £2,246. A decrease of £617 in passenger receipts was largely offset by an increase of £581 in goods, the latter being a satisfactory feature considering there was no wheat or maize to carry. Expenses increased by £906, but as this is due to repairs to carriages and wagons and to the permanent way, it should bear fruit in the future. The company received its interest as usual on its Argentine Funding bonds, but, of course, got nothing from the Entre Rios Government, so that with £7,283 brought in, the net receipts come to only £10,982, and after deducting the loss on the half year's working, the balance carried forward is reduced to £7,913. This poor display is attributed solely to the impoverished condition to which the province was reduced by the locust plague in the early part of 1897. Prospects, however, are more encouraging, as with an abundant wheat crop—an estimated yield of 250,000 tons being looked for, against 34,000 tons produced last year—the gross receipts for the first two months of 1898 have been higher than at any period since the railway commenced running, and the net receipts have been sufficient to recoup the whole of the £3,069 lost during the past six months, and to leave a profit of £5,625 on the eight months' working. We can only hope the improvement will be maintained, but at best the company's existence is a miserable one.

Cunard Steamship Company.—This report is somewhat disappointing, the profits for the year, with £2,181 brought forward, amounting to £222,475, or £27,000 less than those for 1896, when the amount brought forward was only £1,465. The very moderate dividend of 2½ per cent. is again paid, but the amount reserved for depreciation is only £166,938 against £184,822, and for the Insurance fund £27,999 against £32,417, and to pay the dividend £15,000 has to be taken from the Insurance fund compared with £10,000 transferred a year ago. The company suffered from loss of passenger traffic between Europe and the United States and the report in this connection describes 1897 as the worst of recent years. As showing how considerably Atlantic lines have suffered, the report says that in the first cabin business the total falling off for British and continental lines compared with 1896 was about 14 per cent; in second cabin 5 per cent., and in steerage 18 per cent. And what, we wonder, will be the falling off when war breaks out between Spain and the United States?

The Rio Tinto Company.—The twenty-fifth annual report makes a capital exhibit owing to the better price obtained for copper, the average having been £49 2s. 6d., compared with £46 15s. 9d. per ton for 1896. There seems to have been no desire to take too great advantage of the higher price, or perhaps it was thought wise not to press the metal forward too freely for the pyrites extracted during the year, amounting to 1,388,026 tons, were 49,306 tons less than in the previous year, the average copper contents being 2·810 per cent., compared with 2·931 per cent., and the 20,826 tons of copper produced at the mines was only 9 tons more than in 1896. Yet the profit on the sale of produce which was £626,287 in 1895, and £828,103 in 1896, further increased sharply to £987,523, the total receipts for the year, including £21,532 brought forward, reaching £1,132,145, or £159,888 more than in the previous year, and as much as £403,464 above the total two years back. With this great improvement in profits it was an easy matter to add £40,000 to reserve, raising it to £140,000, but the amount written off plant, &c., is only increased from £23,667 last year to £24,180. Administration expenses, both here and in Spain, were somewhat heavier, and taxes and dues came to £49,332, or £10,263 more than in 1896. Of the increase of £113,131 in net profit, all but £735 is distributed amongst the shareholders, the dividend for the year on the ordinary shares being £2 or 40 per cent. This is equivalent to a distribution of 22½ per cent. on the former undivided capital compared with 19 per cent. for the previous year, and only 11 per cent. for 1895. Good as the dividend is, the market was looking for more because the interim dividend had been 20 per cent., which encouraged expectations of a higher payment at the end of the year. As the stamps on the old share warrants could not be transferred to the new, the full duty of treble the ordinary transfer stamp (30s. per cent.) had to be paid on all the new shares issued in the form of warrants to bearer, which, with other charges incidental to the transaction, resulted in an expenditure of £52,389, and this amount has been charged to the account which bears the expenses of issue of the 4 per cent. mortgage bonds. This item stands in the balance-sheet at £165,031, but £56,160 of this has been written off, being the amount of the sinking fund on the mortgage bonds, and the whole of this account will be extinguished in the next two years. The ore on hand and produce afloat at the end of the year was valued at £693,000 compared with £736,925 in 1896, and the extension and development works and overburden account stand at £181,112, as against £194,330.

Tarapaca Waterworks Company.—Although a dividend of 7½ per cent. is again to be paid, the company did not do so well last year as in 1896, the net profit being only £40,404, compared with £53,000, so that after placing £10,000 to the account for the redemption of the debentures, and £10,000 to General Reserve, the balance carried forward is reduced from £17,393 to £8,050. The amount set aside for the redemption of the £50,000 of debentures is now complete, but only £20,000 is to be paid off at once, the remaining £30,000 having been continued for three years, owing to large expenditure for additional springs. Considering the depression in the nitrate industry the company has done very well, and we should have thought the debentures might have been renewed at less than 5½ per cent, but the debenture interest for the next few years will require only £1,650. One little drawback is that as a result of a decision of the Chili Courts the company has got to pay during the current year £10,000 for premiums on the vendor's shares, and possibly more if his claim for back dividends is established. But this is a matter which will only temporarily affect the revenue account.

The Ionian Bank.—Continued steady progress is reported, the gross profits which in 1895 were £19,459, and in 1896, £20,197, showing a further improvement during the six months ending December 31 last, to £21,089. The dividend is kept at the usual rate of 4 per cent. per annum, but the rest or undivided profit carried forward is increased to £29,314. The note circulation amounting to £222,770 shows a small increase, and there is a trifling addition to current accounts which stand at £76,000, but deposits bearing interest have increased from £206,000 to £236,000. Bills discounted and loans and advances are not much changed, but the bank has put more of its money into investments, and the loan to the Greek Government under convention for forced currency of its note circulation and its holding of Greek Government Treasury Bills both show moderate additions.

Eastern Produce and Estates Company.—Like the bulk of Ceylon tea-growing concerns, this company earned less profit last year than in the preceding twelve months. Income was £10,011 less at £121,180, but the produce on hand was £3,678 more, and £1,557 more was brought in. Working expenses on the estates were £1,751 higher, and administrative charges were a little more, but debenture interest was less. The net balance therefore of £44,731 was only £4,614 below that for 1896. Out of this £7.875 was used to redeem debentures, and £5,000 was placed to reserve. Dividend amounting to 7 per cent. for the year was then declared, and £10,878 was left to be carried forward, or a little less than was brought in. In the preceding year £13,125 was used to redeem debentures, and £5,000 was also put to reserve, but the dividend was only 6½ per cent. The board, however, had every reason to allow a small increase in dividend for the extra ½ per cent. only represented £1,495, and working expenses were unnaturally high last year, owing to the extra cost of rice arising from the Indian famine. The reserve now amounts to £25,000 and is practically invested outside the business. The balance forward will permit of the debentures being reduced this year to £95,000 as against an original issue of £195,200, and in the meantime the share capital has not increased. The acreage under tea only increased 115 acres, and the bulk of it is mature. The crop last year was about 200,000 lbs. below the estimate, and the average price of 7·06d. per lb. was ·27d. under the average of 1896.

Russian Petroleum and Liquid Fuel Company.—Dividend on ordinary shares £1. Advices from Baku show estimated production of petroleum from date of taking over properties to March 12 last was over 40,000,000 poods, which included the output of two prolific fountains. The greater portion of this has been sold at favourable rates. The £10 shares are to be divided into £1 shares.

PRESIDENT M'KINLEY'S MESSAGE.

The long-delayed Message of President M'Kinley in reference to Cuban affairs was sent to the Congress on Monday last. This, he says, had become his duty by reason of the warfare that for more than three years had raged in Cuba. He did so "because of the intimate connection of the Cuban question with the States of our Union, and the grave relation that the course which it is now incumbent upon the nation to adopt must needs bear to the traditional policy of our Government, if it is to accord with the precepts laid down by the founders of the Republic and religiously observed by succeeding administrations." The present revolutionary movement in the island, the President points out, is but the successor of similar insurrections, each of which has subjected the United States to great effort and expense in enforcing neutrality laws, has caused enormous losses to American trade and commerce, and, by the exercise of cruel, barbarous, and uncivilised practices of warfare, has shocked the sensibilities and offended the humane sympathies of the American people. Referring to the exaggeration of all these evils which has attended the present struggle, and to the fruitless

efforts of his predecessors to secure peace, the President describes the vain endeavours of Spain to suppress the insurrection by the "concentration" policy :—

The efforts of Spain to suppress the insurrection have been increased by the addition to the horrors of strife of a new and inhuman phase, happily unprecedented in the modern history of civilized Christian people. The peasantry, including all dwelling in the open agricultural interior, were driven into the garrison towns or isolated places held by troops. The raising and movement of provisions were interdicted, fields were laid waste, dwellings unroofed and fired, and mills destroyed—in short, everything that could desolate the land and render it unfit for human habitation and support was commanded and executed by one or other of the contesting parties. When the present Administration took office, the agricultural population of Cuba, to the estimated number of 300,000, was herded within the towns and their immediate vicinage, deprived of means of support, rendered destitute of shelter, left poorly clad, and exposed to most unsanitary conditions. As the scarcity of food increased with the devastation of the depopulated areas of production, destitution and want became misery and starvation. From month to month the death-rate increased to an alarming ratio; and by March, 1897, according to conservative estimates from official Spanish sources, the mortality among the Reconcentrados from starvation and the diseases thereto incident exceeded 50 per cent. of the total number.

Having referred to his previous efforts in connection with the situation in Cuba, to American relief measures, and the recognition by the Spanish Government of the necessity for a change in the condition of the Reconcentrados as well as the efforts for its amelioration, the President gives the conclusion at which he has arrived in the following sentences :—"The continuation of the strife means the extermination of one or both parties. Realising this, it appears my duty in a spirit of true friendliness no less to Spain than to the Cubans, to seek to bring about the immediate termination of the war."

He goes on to say that he does not think it expedient or wise, at present, to recognise the independence of the so-called Cuban Republic. There remains the alternative of intervention to end the war, either as an impartial neutral by imposing a rational compromise between the contestants, or as the active ally of one or other of the parties. The forcible intervention of the United States as a neutral to stop the war would be justifiable on rational grounds, which President M'Kinley thus summarises :—

First, in the cause of humanity, to put an end to the barbarities, bloodshed, starvation, and horrible miseries now existing there, and which the parties to the conflict are either unable or unwilling to stop or mitigate. It is no answer to say, "This is all in another country belonging to another nation, and is, therefore, none of our business." It is especially our duty, for it is right at our door. Secondly, we owe it to our citizens in Cuba to afford them that protection and indemnity for life and property which no Government there can or will afford, and, to that end, to terminate conditions which deprive them of legal protection. Thirdly, the right to intervene may be justified by the very serious injury to the commerce, trade, and business of the people, by the wanton destruction of property and the devastation of the island. Fourthly, the present condition of affairs in Cuba is a constant menace to our peace and entails upon this Government enormous expense. With such a conflict waged for years in an island so near, with which our people have such trade and business relations, where the lives and liberty of our citizens are in constant danger, their property destroyed, themselves ruined, where our trading vessels are liable to seizure and are seized at our very door by the warships of a foreign nation, the expeditions of filibusterers that we are powerless altogether to prevent, and the irritating questions and entanglements thus arising—all these and others that I need not mention, with the resulting strained relations, are a constant menace to our peace and compel us to keep on a semi-war footing with a nation with which we are at peace.

Coming to the destruction of the battleship *Maine*, President M'Kinley says :—

These elements of danger and disorder, already pointed out, have been strikingly illustrated by a tragic event which has deeply moved the American people. I have already transmitted to Congress the report of the Naval Court of inquiry on the destruction of the battleship *Maine* in the harbour of Havana. The destruction of that noble vessel has filled the national heart with inexpressible horror. Two hundred and fifty-eight brave sailors and marines and two officers of our Navy, reposing in the fancied security of a friendly harbour, have been hurled to death. Grief and want have been brought to their homes, and sorrow to the nation. The Naval Court of inquiry, which, needless to say, commands the unqualified confidence of the Government, was unanimous in its conclusion that the destruction of the *Maine* was caused by a submarine mine. It did not place the responsibility—that remains to be fixed. In any event, the destruction of the *Maine*, by whatever exterior cause, is a patent and impressive proof of a state of things in Cuba that is intolerable. That condition has been shown to be such that the Spanish Government cannot assure safety and security to a vessel of the American Navy in the harbour of Havana on a mission of peace and rightfully there.

Referring to the proposal made by Spain to refer to arbitration all differences which might arise on this matter, the President simply says, "To this I made no reply." The President finally enunciates his conviction that a long trial has proved that the object for which Spain has waged the war cannot be attained :—

The only hope of relief and repose from a condition which can no longer be endured is in the enforced pacification of Cuba. In the name of humanity, in the name of civilization, on behalf of the endangered American interests which give us the right and duty to speak and act, the war in Cuba must stop. In view of these facts and these considerations, I ask Congress to authorise and empower the President to take measures to secure the full and final termination of hostilities between the Government of Spain and the people of Cuba, and to secure in the island the establishment of a stable Government capable of maintaining order and observing its international obligations, ensuring the peace, tranquillity, and security of its citizens, as well as our own, and to use the military and naval forces of the United States as may be necessary for these purposes and the interest of humanity. And to aid in preserving the lives of the starving people of the island I recommend that the distribution of food supplies be continued, and that an appropriation be made out of the Public Treasury to supplement the charity of our citizens. The issue is now with Congress. It is a solemn responsibility. I have exhausted every effort to relieve the intolerable condition of affairs at our own doors. Prepared to execute every obligation imposed upon me by the Constitution and law, I await your action.

The Message closes with a reference to the decree of the Spanish Government, directing General Blanco to proclaim an armistice. The fact of this armistice, the President says, was not communicated to him until after the preparation of his Message. He is sure it will receive the attention of Congress. "If," he concludes, "this measure attains a successful result, then our aspirations as a Christian, peace-loving people will be realised. If it fails, it will be only another justification of our contemplated action." The Message was referred to the Foreign Committees of both Houses.

These Committees on Wednesday presented resolutions to the Senate and to the House of Representatives declaring for instant war with Spain. The Senate Committee also declared their belief that the "destruction of the *Maine* was compassed either by the official act of the Spanish authorities (and the ascertaining of the particular person is not material), or was made possible by negligence on their part, so willing and so gross as to be equivalent in culpability to positive criminal action." The Naval Committee of Inquiry reported that they had not obtained evidence "fixing the responsibility for the destruction of the *Maine* upon any person or persons." In the House of Representatives a suggestion for a discussion upon the resolution raised a tremendous row, during which men fought, called each other "liar" and "scoundrel," and rushed about like madmen. It was a scene such as has not been witnessed for years, even in the House of Representatives. A minority report was presented to the Senate, simply recommending the recognition of the Cuban Republic. The final decision may not be given for a few days yet.

THE PROPERTY MARKET.

The sales at Tokenhouse Yard last week dropped down to a total value of £63,528. Of course the holidays affected both the amount and the character of the property offered; but the returns contrast strongly with the total of the corresponding week of last year, which amounted to the handsome sum of £156,896. The returns for the month of March, however, are remarkably satisfactory, as may be seen from the following official summary :—

	March, 1897.	March, 1898.
At the Mart	£393,981	£817,000
Country and suburban	314,464	587,438
Private contract sales	65,495	53,510
	£773,940	£1,457,948
Amount of sales reported from January 1 to March 31		£2,550,798

The aggregate for yesterday week was £8,100, and to this total Messrs. H. E. Foster & Cranfield contributed £7,110. Their principal lot was a reversion to one-eleventh share of trust funds of the estimated value of £44,100, life aged 64, for which £2,130 was paid.

Some of the provincial sales are worth noting. A site abutting on Briggate and Trinity-street, Leeds, comprising 813 square yards, on which are licensed house and other properties, was disposed of for £28,700. The site of the Battle of the Standard (A.D. 1138), at Northallerton, Yorks, comprising 64 acres, was sold for £1,115. Private treaty sales include the ground lease of Savoy-mansions, a block of offices and flats in the liberty of the Savoy, at a price approaching £20,000. The Cardiff Tin Stamping and Enamel Works, leasehold for eighty-nine years, rental £330, changed hands at £15,000, while Lynn Farm, near Cardiff, 15½ acres, went for £1,510. Mr. E. D. Newman, at Uxbridge, among other freehold properties, disposed of Whittingham's Farm, with dwelling, buildings, and 23 acres of market garden land, for £3,000. A freehold farm, 79½ acres, at Harlton, Cambridgeshire, was sold by Messrs. Wright & Scruby for £1,000.

There was little or nothing doing at the Mart on Tuesday and Wednesday.

The *Estates Gazette* notices a new system of land purchase, which it considers likely to take hold—that of paying a small proportion of the purchase-money down, and the rest in instalments over a certain term of years, to cover interest and principal. Messrs. Lumleys, for instance, offer to sell a farm of 111 acres in Kent on the plan of taking 15 per cent. of the price on sale, and the balance in seventy half-yearly payments of 2½ per cent., the total amount being paid off in thirty-five years. The purchaser, however, has the option of paying off the balance at any time without notice.

Mr. Alfred Richards announces the sale of a large and valuable block of freehold property in Wood-green, at the Mart on the 18th inst.

Mr. A. Dowell recently sold at Edinburgh the estates of Harperfield and Greenstrands, Lesmahagow, Lanarkshire, comprising an area of 333 acres, for £10,000.

The German Emperor has made a "graceful concession" to British susceptibilities. On hearing of the victory of Atbara, he immediately telegraphed to the English Ambassador in Berlin, expressing the pleasure he felt, and asking that his congratulations might be conveyed to the Marquis of Salisbury and the Sirdar. The incident is not without its significance. It may not be intended to wipe out the famous telegram to President Kruger, but it may perhaps be taken as in some sort an acknowledgment—a cordial acknowledgment—of the nice things said by Mr. Balfour as to Anglo-German relations in the Far East.

Liverpool and Manchester merchants connected with Sierra Leone take a very serious view of the revolt out there. Mr. James D. Marcus, who has had factories in the colony for many years, and has only just arrived in England, says the disturbance has been caused by the hut tax, and will continue as long as an attempt is made to collect that obnoxious impost, which every trader in the Colony objected to the Government putting in force. At the Colonial Office, however, they say there is every reason for hoping that the rising was merely local and altogether unimportant. There has been nothing in the form of regular warfare.

The Investors' Review.

The Week's Money Market.

The advance in the Bank rate to 4 per cent. last week had little effect upon the market for short loans, which continues to be fairly supplied with balances left over from the Government disbursements. For a time 3 to 3¼ per cent. was quoted for day to day loans, but during the greater part of the week about 2¾ per cent. was the working figure. Loans for a week, however, ruled throughout at about 3 to 3¼ per cent. As the Bank of England sponges up loose cash this ease must diminish, if the political position does not improve, and a gradual approach towards the official minimum will be obligatory even for short advances. The discount houses upon the Bank's advance only raised their allowances on deposits by ½ per cent. to 2½ per cent. for "call" and 2¾ per cent. for "notice," but a further advance will be necessary on their part when the market hardens, as it soon must. The joint stock banks, of course, increased their rate of interest on deposits by 1 per cent. to 2½ per cent. That is their automatic proportion.

Discount charges moved more closely in accord with the Bank rate than money rates, the political uncertainties having greater weight when the period to be reviewed runs over months instead of days. At first there was an inclination to quote 3½ per cent. for three months' choice bills, but this quickly changed to 3⅝ to 3¾ per cent, and for the last day or so 3¾ to 3⅞ per cent. has been the ruling figure for choice bills of all dates running up to six months. The volume of bills on offer has also increased, especially long dated bills, so that the possibilities of a further hardening of the market are being anticipated. Now that the reserve of the Bank of England stands at only £18,433,000, the directors may be expected to take active steps to prevent any serious further depletion of its stock of gold. To attract the metal it has raised its buying price of German and French coin to 76s. 6d. per oz., but at present the open market is bidding higher for the coins, and, as matters stand, the Bank could not obtain gold from this quarter. Gold, however, ought to come from Berlin as, although the Bank of Germany has raised its minimum to 4 per cent., the value of money in Berlin has not responded, and 3 per cent. is the outside quotation. The Paris cheque has also risen to 25·33½, so that we should have considerable assistance from the Continent in meeting any further demands for gold on American account. If the political position grows worse, however, the United States will certainly press for gold more vigorously, and may easily cause our rate to rise to 5 per cent. The conditions, therefore, favour a hard market, even if the political position is not aggravated.

The Stock Exchange settlement was an easy one, but the rate for advances was raised by about ½ per cent. to 4¼ to 4½ per cent. The lower rate, however, was that mostly current for old money, and there was very little fresh borrowing done.

Yesterday's Bank return was nothing like so sensational as that for the previous week, which we print below for reference. One or two points, however, in the figures deserve attention. To begin with, the market has not been in the least enriched by the disbursement of Government moneys. "Public" deposits, which represent treasury and departmental balances, have fallen off £638,082 during the week, but the whole of the money, together with £556,456 from the "other" deposits, which contains the bankers' balances and other market moneys, has been absorbed in paying off loans due at the Bank, or in meeting matured bills of Exchange held by it. "Other" securities are accordingly down £1,324,090, but their total of £34,087,675 is still far above the normal amount, and indicates that the market must have, let us say, to be moderate, quite £6,000,000 of its pledged securities or bills to redeem, probably mostly the latter. And all the time the Bank is losing gold. No decrease took place in the reserve last week. On the contrary, it increased by £82,711 to £18,433,658; but this increase is altogether due to the return of notes from circulation. Gold has gone out—£183,000 of it for abroad—to the amount of £598,484 within the week. This and the previous week's domestic absorption is, no doubt, due in the main to the Easter holidays; but its withdrawal none the less weakens the Bank's stock of gold for the time being, and it is now down at £29,436,488. Some people have supposed that other banks are taking to hoarding gold. We wish they were, but the figures do not support this view, and, as a matter of fact, less gold has gone into circulation this April than last. It is not the domestic ebb and flow which bothers us, but the export of the metal to America and the market bareness. Both these point to an early further advance in the Bank rate.

SILVER.

At one time the price of bar silver for immediate delivery declined to 25 1/16d. per oz., but there has been a fair amount of buying from India, and supplies have been small, so that the quotation recovered to 26d. per oz. At this figure the metal was offered freely and the price fell back to 25 1/16d. per oz. The two months' forward quotation has ruled at 7/16d. below the spot price throughout the week. Monetary pressure has increased in the Indian cities, and the exchange has risen to 1s. 3 13/16d. For all that the "bazaar" quotation for silver has remained at about 67½ for spot, and consequently the purchases on that account are easily explained. No heed was paid to the statement that the contents of the despatch sent by the Indian Government to the Home Government were known in Calcutta, as the information came through an untrustworthy source. At the same time, the raising of a loan of 20 millions sterling under Imperial guarantee, and the melting down of rupees, is a psuedo-heroic policy that the Indian Government in its present muddle might easily make a despairing grab at. A little talk was also indulged in as to the chance of the Hispano-American dispute affecting supplies of silver in the market, but the opinion seemed to prevail that the metal could easily come by indirect routes if Spanish cruisers proved troublesome. The India Council sold its drafts easily this week at a higher price, one lac of transfers actually going at 1s. 4 1/32d.

BANK OF ENGLAND.

Stock Market Notes and Comments.

Most of the past week has been a holiday, and during the days that the market was open no business to speak of has been done. As we are writing the fortnightly account is in process of settlement, and so small is it that no difficulties are apprehended in connection therewith. We have therefore really very little to say about the past and there can be but slender temptation to launch out upon the future. All markets are in a state of suspended animation, pending the issue of the present dispute between Spain and America. It is no use for a man to have decided views on the course of prices, because there is so little scope for acting upon them that were he convinced of peace he could not be an extensive "bull," and were he certain of war he would find it equally difficult to sell a large "bear." This perhaps is fortunate, certainly for the Stock Exchange it is. Its commitments are small, and therein lies its strength. Were there enormous speculative accounts unliquidated within the markets at the present moment we should have serious trouble disclosed there at no distant day. But these dangerous speculative positions do not exist, so far as we can discover. There is no evidence of them in the account carried on from fortnight to fortnight. What, however, we do see is plenty of evidence that the public outside is pretty heavily loaded up, and dearer money is sure to bring a larger and larger supply of privately pawned stock into the market. It is dribbling in now and generally proving difficult of sale. The time is consequently drawing nearer when investors will have more favourable opportunities to buy than they have had for a long time back. Also it is to be noted that some *chateaux d' Espagne* of finance which have been constructed during the times of cheap money, with the rapidity of Aladdin's palace of delight, are beginning to shrivel up. Should we have money at 5 per cent. for a few months there will be some curious revelations in this direction from which the public may perhaps acquire a little transitory sense of prudence. The clover and honey days of living on the margins of interest are over and gone, for this year at any rate. We shall have much more to say in this column when the harvest of folly begins to be gathered. At present we can only note the drift of things and continue to advise people with money to invest to be in no hurry to buy. Prices will be more favourable ere long.

The Week's Stock Markets.

Stock markets opened very firm on Thursday last on the news of the postponement of Mr. M'Kinley's message, and Spanish stock and United States Railroad shares quickly rose several points, but the rise in the Bank rate and unfavourable political rumours soon had an adverse effect and the earlier advance was lost. By the time the Stock Exchange was re-opened after the Easter holidays Mr. M'Kinley's message was known; but it was not sufficiently definite in its expression to encourage speculators, while the arranging of the account, although a very light one, and the absence of many of the leading Jewish members, tended to restrict business to such an extent that it was practically at a standstill on Tuesday. Since then the decision of the Committee of the United States Senate has been received. Their report recommending Cuban independence had a depressing effect on prices, confirming the impression that war is inevitable unless the European Powers intervene. The Paris Bourse became very weak, and Wall-street operators, finding that London was selling heavily, threw large blocks of stock on the market, and the latest quotations are considerably below those ruling at the end of last week.

Consols have given way under the influence of dearer money and the continued uncertainty of the political outlook, and the price touched 110⅛ at one time, that being the lowest point of the year. Other investment stocks have been depressed, Colonial Government securities being especially weak, while the premier stocks of the leading Home Railway companies show a further shrinkage.

As regards Home Railway stocks there is very little to be said. The Easter traffic returns were considered satisfactory and, despite the almost entire absence of business, prices were well maintained until Wednesday, when they gave way in sympathy with the sharp break in Spanish bonds. South-Eastern Deferred became especially weak, for no particular reason, and the whole list shows adverse changes. Continuation rates were much about the same as last time. Great Eastern was carried over at about 3/16 backwardation, but quite at the last there was a small contango. Great Western and North-Western rates were ¼ to ⅜, and Midland and North-Eastern 1/16 to ⅛ per cent. The settlement gave little trouble, the account open being very small.

Although the Wall Street market was kept open all through the Easter holidays it might as well have been closed for all the good it has done. Business was practically at a standstill, the time being almost entirely taken up in discussing the political situation. The delay in the appearance of the President's message was viewed favourably, and repurchases by bear operators on Monday, on the news of the Spanish armistice in Cuba, sent prices up a little, but when Mr. M'Kinley's

Message came out there was a relapse, although not much stock was forthcoming. New York naturally waited to see how the London Stock Exchange would receive the President's message, but it was considered much too vague to encourage speculation either for the rise or fall. The action of Congress was awaited with considerable interest, and when the committee of the Senate announced their decision, the liquidation which followed caused a big break in prices, and no support whatever was forthcoming. The *Financial Chronicle* tables show an increase of 10·13 per cent. in the gross takings of seventy roads for the fourth week in March. Canadian and Grand Trunk stocks had their one brief interval of firmness, the traffic returns being again good, but quotations have since followed the downward trend in all other departments, and are now well below those of last week. Nothing further has been heard of the rate-cutting question, beyond the announcement that the committe has still failed to arrive at any decision in the matter.

Apart from the rapid ups and downs of Spanish four per cents. there has been little of interest happening in the Foreign market, and the tendency, after being fairly steady, finally became decidedly weak. Spanish bonds rushed up to 50¾ on Thursday on the postponement of Mr. M'Kinley's message, and then dropped to 44 7/8, and after rallying to 45½ again slipped back. A sharp decline has also taken place in Italian Rente, and

Russian, Turkish, and Portuguese stocks have all been pressed for sale. South American descriptions, apart from the steadiness of Uruguay 3½ per cent., also present a weaker appearance, the further fall in the Rio Exchange still seriously affecting Brazilian bonds, and Argentine and Chilian are lower in sympathy. All the Continental bourses have been in a very nervous state, and it did not take much selling to put prices down. The settlement in this department was a very simple matter, and continuation rates generally ruled about ½ per cent. higher than last time, Spanish and Italian being carried over at from 3 to 5 per cent.

Foreign railway stocks have been entirely neglected, almost the only changes noticeable being a fall of 2½ in Buenos Ayres and Ensenada, and a slight recovery in Cordoba Central (Central Northern) income stock.

About the only feature in the Miscellaneous Market was a sharp rise in Russian Petroleum ordinary, fresh rumours of "splitting" being again circulated. Changes in the upward direction are also noticeable in Liebigs, Spiers & Pond, Vickers and Maxim, Lyons, and Elysée Palace Hotel debentures, but on the other hand, Brewery issues have been pressed for sale, Guinness ordinary falling 10, Combe debentures 2, and several others were marked down a point. Electric lighting companies' shares are lower in several instances, and declines have also taken place in Birmingham Vinegar, Peebles, Spratts, and British Electric Traction. Lipton issues have been hardly mentioned.

The feature right up to the close of business was the activity in Spanish stock, which finally closed well above the lowest point of the week. The Paris Bourse was very weak, and the heavy fall in Italian, Spanish, Argentine, and Brazilian, as well as Rio Tinto and De Beers shares, which took place early to-day (Thursday), was entirely due to sales from Paris. The recovery in Spanish 4 per cent. helped to strengthen United States Railroad shares which closed fairly steady, a good deal of bear covering taking place. Consols were weaker, although not closing at the worst, and Home Railway stocks picked up a little when it was found that the Bank rate was not changed.

Mining and Finance Companies.

In the South African market there has been little or nothing doing, and prices have hardly moved, except Chartered shares, which fell to 2 9/16 on the proposal to issue 250,000 new shares at 2. The settlement was more than usually uninteresting, and one of the lightest known. Rates showed but little change in spite of the rise in the Bank rate, Rand mines being continued at about 6, and East Rand at 7 per cent., the general charge being 7 to 9 per cent. Western Australian ventures call for no special mention, copper shares remain fairly steady, and Indian shares close firm, the rise in Ooregum being due to the remarks made by the chairman at the meeting.

The Russian Embassy at Constantinople has again demanded the appointment of Prince George as Governor of Crete, and the King of Greece is said to have declared that the matter is practically settled. It is about time.

The voluntary opening of new treaty ports by the Chinese Government is said to have been done with a view to inducing England to agree to a revision of the tariff in accordance with Article XXVI. of the Treaty of Tientsin.

Dividends Announced.

MISCELLANEOUS.

Montana Mining Company, Limited.—Dividend of 3d. per share.

Bayliss, Thomas & Co.—Interim dividend of 10 per cent. per annum for the six months ended March 31.

Douglas Southern Electric Tramway, Limited.—3 per cent. on the 7 per cent. preference shares. Balance forward, £265.

London Stock Exchange.—Dividend of £4 10s. per share, making with the interim paid on November 2, £7 10s. per share for the year. £5,000 to be placed to reserve, leaving £34,939 to be carried forward.

R. & J. Pullman, Ltd.—Interim dividend on the ordinary shares for the half-year at the rate of 7 per cent. per annum, also the half-year's dividend on the 5 per cent. preference shares.

Brilliant and St. George United Gold Mining Company, Ltd.—1s. per share is announced.

Crescens, Robinson, & Co., Limited.—7s. per share on the ordinary shares for the six months ended December 31.

Eastern Produce and Estates Company, Limited.—Final dividend on the ordinary shares of 4½ per cent., making 7 per cent. for the year.

Union Steamship Company, Limited.—Dividend for the half-year ended December 31 at the rate of 14s. per share on the fully-paid shares, and 7s. per share on the shares with £10 paid, which, with the interim paid in October last, will make a total dividend for the year of £5 10s. per cent.

Bonanza, Limited.—Interim dividend of 50 per cent., being at the rate of 100 per cent. per annum, for the half-year ending April 30.

Great Eastern Collieries, Limited.—Dividend of 5 per cent.

Trust and Agency of Australasia.—Dividend of 2s. per share, making a total distribution for the year 1897 of 20 per cent.

Van den Bergh's.—Dividend on the ordinary shares at the rate of 10 per cent. per annum.

BREWERIES.

Bartholomay Co. (Rochester).—Interim dividend on the preference shares for the six months ended March 31 at the rate of 8 per cent. per annum.

INSURANCE.

Commercial Union Co.—20s. per share, making with interim 30 per cent. for the year as compared with 25 per cent. for 1896.

RAILWAYS.

Great Northern (United States).—Quarterly dividend of 1½ per cent. upon the preferred stock, and a quarterly dividend of 1¾ per cent. on the St. Paul, Minneapolis and Manitoba Railway Company's 6 per cent. guaranteed shares.

Wellington and Manawatu Company.—5 per cent. dividend declared.

Taltal Railway.—Interim dividend for the half-year ended December 31 of 1s. 3d. per share.

MINING RETURNS.

Koffyfontein.—Returns for March are 2,500 carats diamonds.

Frank Smith Diamond.—5,500 loads washed, producing 209 carats.

Kimberley Waterworks.—Consumption of water for March, 13,250,000 gallons.

Nigel.—Crushing for March.—Battery 1,295 oz.; cyanide 1,573 oz.

Malayan (Pahang) Exploration.—1,700 tons crushed, 593 oz. gold; value £2,100.

Henry Nourse.—Crushed 8,680 tons, producing 5,179 oz. Cyanide, 6,450 tons treated, yielding 3,129 oz.

Leicester Consolidated.—From mine, 3,725; from floors, lumps and hoppenings, 3,175 loads washed, producing 235 carats.

Hall Mines.—7,437 tons of ore smelted, yielding 357 tons matte containing (approximately) 156 tons copper, 111,420 oz. silver, 272 oz. gold.

Northern Territories Gold Fields of Australia.—1,200 tons treated 887 oz. troy.

Sons of Gwalia.—Tons crushed 990; yield in oz. 1,241; tailings assay 28 dwt. per ton.

Ferreira.—Crushed 11,314 tons, bar gold extracted 7,917 oz., concentrates caught 275 tons. Cyanide works—bullion produced from tailings, 3,007 oz.

City and Suburban.—Crushing for last month yielded 11,030 oz.; profit, £17,326.

Windsor.—From mill.—Crushed 3,482 tons; obtained 1,189 oz.; from cyanide works obtained 655 oz. Profit for month £3,027.

Champ d'Or.—Crushed during March 5,672 tons, yielding 2,190 oz.; cyanide, 3,685 tons treated, yielding 778 oz.

Transvaal Gold Mining Estates.—From mill—Crushed, 8,860 tons; obtained 3,359 oz. fine gold. From outside cyanide works, tons treated 2,497; yield 993 oz. gold. Central cyanide works, tons treated 6,920; yield 2,411 oz. gold.

Jumpers Deep.—Tons crushed by 75 stamps, 9,550; yield in fine gold, 3,119 oz. Sands and concentrates treated by cyanide, 4,000 tons; yield, 1,070 oz. fine gold.

Geldenhuis Main Reef.—Gold from mill, 542 oz.; gold cyanide works, 410 oz. Ore milled, 1,634 tons; tailings treated, 2,640 tons.

Grand Central.—Crushed, 4,500 tons, yielding bullion estimated at $55,000; concentrates estimated to realise $15,000; expenses for the month, $29,000.

Great Boulder Perseverance.—Returns from smelting works, 247 tons for 894 oz.; 770 tons of ore milled for 807 oz.

Jubilee.—Tons crushed, 5,595, obtained 2,065 oz. Tailings yielded 733 oz.; total, 2,798 oz.

New Guadalcazar Quicksilver.—The production of quicksilver for the past month amounts to 11,000 lb. = 146⅔ flasks.

Siam Company (Limited).—Kabin Mine, 58 tons ore crushed from Sydenham shaft, producing 52 oz. gold, and 395 tons ore crushed from Beresford shaft, producing 155 oz. gold.

Sheba.—6,880 tons of ore, 2,680 oz.; 3,780 tons of tailings, 910 oz.; 130 tons of concentrates, 780 oz.; total, 4,370 oz.

St. John del Rey.—Produce month of March, £17,962 yield per ton, 66 of an ounce troy.

Alaska Mexican.—Return for March:—Milled, 15 200 tons; sulphurets treated, 216 tons; bullion from sulphurets, $10,047.

Balmoral Main Reef.—2,425 oz.

Block B Langlaagte Estate.—Mill.—Ore crushed, 12,420 tons of 2,000 lb.; gold retorted, 2,860 oz. Tailings (cyanide process).—Tons treated, 7,200; gold recovered, 1,563 oz. Concentrates (cyanide process).—Tons treated, 192; gold recovered, 504 oz. Total gold recovered, 4,027 oz.

Brilliant and St. George.—Crushed during the month, 1,768 tons of quartz for 2,322 oz. of gold.

Cassel Coal.—Output for March, 25,350 tons.

Consolidated Main Reef.—March production.—2,015 oz. from 5,159 tons; 894 oz. from 4,584 tons cyanide; total, 2,909 oz.

Consolidated Murchison.—Crushed 384 tons, obtained 399 oz. of gold.

Crown Deep.—Tons crushed by stamps, 20,200; yield in fine gold from mill, 4,566 oz.; tons of sand and concentrates treated by cyanide works, 17,330; yield in fine gold from sands and concentrates, 4,915 oz.; tons of slimes treated, 2,860; yield in fine gold from slimes, 237 oz.

Crown Reef.—Crushed by mill.—15,911 tons; yield in smelted gold, 7,312 oz.; yield in smelted gold from cyanide works 3,882 oz.; yield in smelted gold from slimes works (including balance for February and output for March), 886 oz.

Durban-Roodepoort.—Results for March:—Quartz milled, 10,120 tons for 5,060 oz.; tailings treated, 6,545 tons for 1,281 oz.; total, 6,341 oz.

Geldenhuis Deep.—Results for March:—Tons crushed by stamps, 24,100; yield in fine gold 6,851 oz.; tons of sands and concentrates treated by cyanide works, 18,090; yield in fine gold, 3,703 oz.; tons of slimes treated, 6,058; yield in fine gold from slimes works, 220 oz.

Geldenhuis Estate.—Results for March: Crushed 16,008 tons; obtained from mill, 6,394 oz.; obtained from concentrates by cyanide, 896 oz.; obtained from tailings by cyanide, 2,252 oz.; obtained from slimes by cyanide, 498 oz.; slags, &c. equal to 703 oz.—total, 10,743 oz.

George Goch Amalgamated.—Result during March: 7,956 tons crushed, yielding 1,715 oz., and 1,292 oz. from tailings.

Ginsburg.—March production, 2,591 oz.

Glencairn Main Reef.—March production, 6,958 oz.

Hannan's Reward.—Results for March: Cement crushed 950 tons, yield 120 oz.

Kalgurli.—245 tons sent to South Australia for treatment have yielded a result of 2,100 oz. of gold.

Lancaster.—Crushed, 7,980 tons, yielding 2,817 oz.; treated 7,580 tons by cyanide, yielding 1,399 oz.

Langlaagte Estate.—Production for March:—Mill.—Ore crushed, 18,985 tons of 2,000 lb.; gold retorted, 6,657 oz. Tailings, cyanide process.—Tons treated, 11,700; gold recovered, 1,662 oz. Concentrates, cyanide process.—Tons treated, 434; gold recovered, 1,872 oz.

Langlaagte Star.—Production for March:—Mill.—Ore crushed, 5,302 tons of 2,000 lb.; gold retorted, 2,532 oz. Tailings, cyanide process.—Tons treated, 5,760; gold recovered, 966 oz.

Meyer and Charlton.—Crushed, 9,348 tons; gold won, 2,720 oz.; extracted 1,175 oz. from tailings.

Mikado (Lake of the Woods District), Ontario.—Mill crushed 1,116 tons, yielding 530 oz.

New Heriot.—Last month's crushing yielded 5,824 oz. Profit, £8,705.

New Primrose.—March production, 9,484 oz.

New Queen.—Result of crushing for past fortnight:—1,220 ft. formation—335 tons, yielding 295 oz.; No. 4 formation—67 tons, yielding 42 oz. gold.

New Rietfontein.—March production, 2,087 oz.

New Spes Bona.—March production, 2,122 oz.

New Zealand Crown Mines.—Tons mined during month, 1,700; tons crushed, 1,764.

North Randfontein.—Production for March:—Mill—ore crushed 6,447 tons of 2,000 lb., gold retorted 1,732 oz; tailings, cyanide process—tons treated 3,360, gold recovered 472 oz.; concentrates, cyanide process—tons treated 85, gold recovered 189 oz.

Nourse Deep.—Results for March; Tons crushed by stamps, 7,648; yield in fine gold from mill, 2,165 oz.; tons of sands and concentrates treated by cyanide works, 6,080; yield in fine gold, 1,905 oz.

Ottos Kopje.—7,030 loads washed during the week ended April 7; 240 carats of diamonds won, including one stone of 15 carats. March output, 900 carats, realized £1,115.

Porges Randfontein.—Production for March: Mill—ore crushed, 7,220 tons of 2,000 lb; gold retorted, 2,627 oz.; tailings, cyanide process—tons treated, 5,250; gold recovered, 548 oz.; concentrates, cyanide process—tons treated, 111; gold recovered, 366 oz.

Princess Estate.—Result for March: Crushed, 5,150 tons; gold won, 1,894 oz.; extracted from tailings, 826 oz.; total, 2,720 oz.

Rietfontein A.—March production, 4,737 oz.

Robinson.—Production for March:—Mill—crushed, 14,918 tons of ore; yielded in smelted gold, 10,640 oz.; from concentrates (by chlorination), 1,214 oz.; from tailings (cyanide process), 3,422 oz.; from slimes, 1,178 oz.; from own ore, 16,454 oz.; from concentrates bought (by chlorination), 2,913 oz.

Robinson Randfontein.—Production for March:—Mill.—Ore crushed, 4,593 tons of 2,000 lb.: gold retorted, 1,979 oz. Tailing (Cyanide process):—Tons treated, 3,520; gold recovered, 523 oz. Concentrates (Cyanide process):—Tons treated, 64; gold recovered, 194 oz.

Roodepoort.—March production, 986 oz.

Roodepoort United Main Reef.—Result for March:—Crushed, 7,930 tons, producing 2,999 oz.; cyanide, 923 oz.; total, 3,922 oz.

Rose Deep.—Results for March:—Tons crushed by stamps, 16,651; yield in fine gold, 5,465 oz.; tons of sands and concentrates treated by cyanide works, 12,773; yield in fine gold, 2,831 oz.

Van Ryn.—Crushed, 11,153 tons, yielding 3,011 oz. Cyanide, 7,560 tons treated, yielding 1,362 oz.

Village Main Reef.—Result for March:—Crushed, 7,978 tons, yielding 4,089 oz.; treated, 4,930 tons cyanide, producing 1,875 oz.

Waitekauri.—During the month ended March 26 the mill yielded £4,760 from 1,675 tons.

Wemmer.—Result during March:—Mill crushed 7,004 tons, yielding 4,392 oz. Cyanide plant—4,875 tons treated, yielding 916 oz., and from concentrates, 170 tons caught, assaying 110 dwt. per ton. Total, 6,243 oz.

Wentworth Gold Fields.—Four weeks' return:—615 tons of ore have been crushed, containing 785 oz.; and one ton rich crude ore has been shipped, containing 77 oz.

West Rand.—Crushed 3,960 tons, yielded 967 oz. Cyanide treated 2,705 tons, yielded 803 oz.

Witwatersrand.—Result during March:—Mill crushed 15,150 tons, yielding 3,951 oz.; 10,530 tons cyanide tailings treated, yielding 1,525 oz.

Angelo.—Crushing for last month:—Tons crushed, 6,569; ounces recovered, 3,162; tons treated by cyanide, 5,132; ounces recovered, 2,383; ounces recovered from slags, 167.

Buffelsdoorn.—Production for March, 2,902 oz.

Cavlloma Silver.—March production was 13,000 oz. fine silver in export ore and 12,500 oz. fine silver in bullion.

Frank Smith Diamond.—5,100 loads washed, producing 221 carats.

Great Boulder Proprietary.—For the fortnight ended April 12:—Tons crushed, 1,415; yield of gold in ounces, 3,146.

Hannan's Brown Hill.—550 tons of sands, 453 tons of slimes treated; 1,830 oz. of gold recovered.

"Jumpers."—Crushed. 11,500 tons; obtained from mill, 3,670 oz. of gold; from concentrates by cyanide, 503 oz. of gold; from tailings by cyanide, 900 oz. of gold.

New Comet.—Crushing for last month:—Tons crushed, 4,861; ounces recovered, 1,818; tons treated by cyanide, 3,765; ounces recovered, 1,060; ounces recovered from slags, 50.

Paarl Central.—From mill.—Crushed, 6,615 tons, yielding 1,556 oz. of gold. From cyanide works.—Treated 4,700 tons, yielding 1,055 oz.—total, 2,611 oz.

Premier Tati Monarch Reef.—Returns for March: 1,500 tons crushed, including 275 tons surface low grade ore; yield of retorted gold, 503 oz.

Robinson (Western Australia).—During March, 570 tons were crushed, yielding 143 oz. gold, exclusive of tailings and concentrates.

Ruth Mines.—Output for March; 346 tons of ore, giving an estimated net profit of £7,850.

Treasury.—Output for March: 5,600 tons yielded 3,813 oz.

Waihi Gold.—Bullion return from old mill only for 24 days, £11,350 from 3,200 tons.

Weld Hercules.—Crushed 207 tons, produced 135 oz. of gold.

Wolhuter.—Result for March: Crushed 13,431 tons, total ounces bullion and cyanide, 6,936.

Burbank's Birthday Gift.—Total amount crushed for March, 1,400 tons, yielded 1,926 oz

Moodie's.—Tons crushed 990, yield 494 oz.

Mount Morgan.—Tons chlorinated, 11,324; gold returned, 14,294 oz.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

L. E. H. (Kensington).—1. The company is, I believe, an honest one. 2. Only if considered a speculative investment. 3. I do not, neither for nor against. 4. Competition is hardly likely. 5. A decrease in population is the chief source of danger to the undertaking ; from the nature of the industry it follows such might happen. It has been rumoured that the mines are being rapidly exhausted, but a new process of treating ores, which have hitherto been unworkable, it is hoped will assist in prolonging their life. Apart from the reasons you mention, this uncertainty helps to keep down the price. The company's reserve is not very large, and a buyer should certainly put aside part of his dividends as a private contingency fund. Dealings are carried out on the Stock Exchange, though the shares are not officially quoted. I am returning papers as requested.

B. H.—3 and 4, 1, 2. The two last have not, I think, much chance of improving in value, though both are honest and well managed.

NOTICES

Messrs. Blake, Boissevain, & Co. advise holders of Dutch Committee certificates issued against deposit of the Union Pacific, Lincoln, & Colorado Five per Cent. Bonds that they are prepared to exchange the same against the securities of the Union Pacific Railroad Company. Each holder of a $1,000 certificate, in addition to his proportion of Union Pacific securities, will be entitled to receive a cash payment of £4 2s. 1d., being 2 per cent. of the face value of his bonds. Holders of original bonds who have not, so far, deposited are given the opportunity to do so at the office of Messrs. Blake, Boissevain, & Co. up to and including April 23 on payment of a fine of 2 per cent. of the face value of their bonds, and will, upon deposit, become entitled to the new securities and cash payment mentioned above, but bonds not deposited by that date will be irrevocably excluded from any participation in the agreement with the New York Union Pacific Reorganization Committee, under which the new securities are issued to holders.

The coupons due May 1 next on the Chinese Imperial Government seven per cent. silver loan of 1894 will be paid, on and after that date, at the offices of the Hong Kong and Shanghai Banking Corporation, 31, Lombard-street, E.C.

The numbers are published of the bonds of the Kingdom of Hungary three per cent. gold loan which were drawn on the 1st inst., for payment on and after July 1, 1898. The drawn bonds will cease to bear interest from the date of their maturity.

Lloyds Bank Limited notifies that in order to prepare the half-yearly dividends due May 1 on the Tynemouth Corporation three per cent. redeemable stock, and the South Shields Corporation three per cent. redeemable stock, the balance of the several accounts will be struck on the night of the 16th inst., and that on and after the 18th inst. the stocks will be transferable ex dividend.

With regard to the Guatemala External Debt the Council of Foreign Bondholders have received telegraphic advices from Guatemala stating that the Legislature has reduced the duty on coffee to $1 silver from July 1. This reduction is in violation of the agreement entered into with the bondholders, which fixes the duty at $1½ gold for ten years from August, 1895.

No trouble seems at present to be apprehended in connection with the Russian demand for the transit of warships and troops through the Dardanelles. The rumour that Austria contemplated raising objections is denied, and it is further explained that Russia has asked leave of the Porte for only one war vessel and two thousand troops to pass through the Bosphorus, not twenty thousand as has been reported. The Sultan granted the necessary permission of course. How could he refuse ?

The German Asiatic Bank is to establish a branch at Kiao-Chau in a short time. Other banks are expected to follow its example.

Next Week's Meetings.

MONDAY, APRIL 18.

Crystal Palace	Cannon-street Hotel, noon.
Leland Stanford Gold Mining Co. ...	3, Clements-lane, noon.
Louise & Co.	Winchester House, noon.
Matabele Gold Reefs & Estate ...	Cannon-street Hotel, noon.
Redfern	Cannon-street Hotel, 11 a.m.
Rhodesia Goldfields	Cannon-street Hotel, 2.30 p.m.
Tarapaca Waterworks	Winchester House, noon.

TUESDAY, APRIL 19

British Shipowners	Liverpool, 1.30 p.m.
Calcutta Tramways	11, Abchurch-lane, 12.30 p.m.
Candelaria Waterworks and Milling	Winchester House, 11.30 a.m.
Croydon Tramways (Adj. Gen.) ...	Guildhall Tavern, 2 p.m.
London and Brazilian Bank ...	7, Tokenhouse-yard, noon.
Mercantile Bank of India	Winchester House, 1 p.m.
Rio Claro São Paulo	Cannon-street Hotel, 2.30 p.m.
San Jorge Nitrate	Winchester House, 2 p.m.
Scottish Metropolitan Life	Edinburgh, 3 p.m.
Standard Life Assurance	Edinburgh, 2 p.m.
Tottenham and Forest Gate Railway	28, Great George-st., S.W., 3.30 p.m

WEDNESDAY, APRIL 20.

Buenos Ayres Great Southern Railway	Cannon-street Hotel, noon.
Chartered Bank of India, Aust., and China	Cannon-street Hotel, 1 p.m.
Indo-European Telegraph	Winchester House, 12.30 p.m.
Tharsis Sulphur and Copper ..	Glasgow.

THURSDAY, APRIL 21.

British South Africa Company ...	Cannon Street Hotel, noon.
City of Buenos Ayres Tramways ...	Winchester House, 12.30 p.m.
Hall Mines	Winchester House, 2 p.m.
Sierra Buttes Gold Mines	Cannon-street Hotel, noon.

FRIDAY, APRIL 22.

Achilles Goldfields	Winchester House, noon.
Economic Life Assurance	6, New Bridge-street, 1 p.m.
San Paulo Brazilian Railway ...	Cannon-street Hotel, 1 p.m.

TRAMWAY AND OMNIBUS RECEIPTS.

Bordeaux, + £74; Calcutta, + £119.

Anglo-Argentine, week ending March 14, £586 increase; City of Buenos Ayres, week ending February 21, £508 increase.

Milan cotton-spinners have made an urgent appeal to the Italian Foreign Minister to know how neutrals may be affected in the event of war between Spain and the United States. Their cotton supply comes almost entirely from the Southern States. The cargoes are always paid for at the port of embarkation, and are often shipped on Spanish or American vessels. If war broke out would the belligerents be held ultimately responsible for the capture or damage or loss which might be inflicted on the citizens of neutral Powers? The Foreign Minister's reply was exceedingly guarded. It amounted only to this, that, if war should break out, the Italian Government would associate itself with other Governments in all measures which appear "best calculated to render less serious for neutrals the war between the two States which did not adhere to the Declaration of Paris in 1856." That is rather cold comfort, but nothing more could have been said in the business. As neither the United States nor Spain is bound by the Paris Declaration, it is entirely in the discretion of the two countries named how they may treat neutrals in such circumstances.

A Parliamentary return just issued enlightens us as to the cost of our telegraph service since 1870. On the whole, it has resulted in considerable loss. In the twenty-eight years the total amount received has been £48,985,040, and the total expenditure, including interest on stock created on account of the telegraph service and redemption of debt, £49,999,827, an excess of expenditure over receipts of £1,014,787. Excluding interest the expenditure was £47,362,845, leaving a balance of receipts over expenditure of £1,622,195. In eleven out of the twenty-eight years there were deficiencies—the years being 1884 to 1888, and 1892 to 1897 inclusive, so that the profit on the business done is not growing apparently.

There has been some softening in the language of the Bulgarian Press towards Turkey, and Prince Ferdinand, confident that there will be no early breach of the peace, has gone back to Vienna, where his mother, the Princess Clementine, is now convalescent. A few weeks, however, may possibly alter the aspect of affairs. The time for active operations in Macedonia has not, so the Athen's correspondent of the *Times* assures us, yet arrived. But it may not be long delayed.

There would seem to be no present remedy for the deplorably unsatisfactory working of the mixed tribunal at Cairo. M. Bellet, President of the Court of Appeal at Alexandria, was asked to come to the rescue, but he declared it to be impossible for the Egyptian Government to provide a remedy, "because it is obliged to accept the nominees of the various European Governments, who are too often mere incapables," some of them without either legal or judicial training. Which are the Governments that thus make Cairo a dumping ground for their favourite noodles?

The gold exported from New Zealand during March amounted to 24,467 oz., of the value of £94,857, as against 18,644 oz., value £72,702 in the same month last year.

There has been a serious mistake somewhere as to the cost of the proposed foot tunnel under the Thames at Greenwich. The amount for which the London County Council obtained the sanction of Parliament was only £70,500, but the amended estimates now show that the total cost will not be less than £155,150. The acceptance of tenders is, therefore, postponed to enable the Council to obtain Parliamentary sanction for the additional cost.

There is further trouble for Spain—a rising in Celbu, one of the Philippine group. It may be serious, though it is said at present to be of "no importance." Of course no rising is officially admitted to be of importance until it is impossible to hush it up or hide it.

The gold output of Victoria amounted for the first quarter of the year to 174,754 oz., an increase of 13,968 oz.

Messrs. J. & R. Coats, the great Paisley thread firm, are said to have been making experiments with a thread which, after undergoing a particular process, gives an imitation of silk. What success has been obtained is not yet known. Similar experiments have been made by other firms, and a Bradford house did obtain a fair result, but actual success cannot be said to have been obtained yet by any of them.

After having been closed for nine years, the Alexandra Palace at Muswell Hill has been re-opened as a place of entertainment. It was well patronised during the holidays; but whether it will prove popular enough to produce a dividend for the patient shareholders remains to be seen.

Francis Richard H. Jordan, the absconding director of the Brinsmead Company, who was arrested at Capetown on March 23, has been brought up at the Mansion House, charged with fraud in connection with the formation of the company, and remanded in custody. He was undefended and said little himself.

The Clyde Trustees recently made reductions in river dues calculated to amount to £17,370; but this amount has already been made up by increased trade, and if the present ratio of increase continues, the Trust will have a surplus of £50,000 for the year.

The American-Australian Line steamer, which left Sydney on the 10th inst., took 300,000 sovereigns for San Francisco.

Sir Frederick Abel has issued what is ostensibly a defence of the Imperial Institute, but is really only an excuse for its shortcomings, and in considerable measure a confession of failure. Sir Frederick admits it was "an unfortunate circumstance" that the Institute was placed so far from the commercial centre of London, that it has not practically realised the proposed system of commercial correspondence with the colonies, and that a lack of funds has prevented other work that was contemplated being accomplished. However ornamental, the Institute has certainly proved a useless establishment.

We are glad to hear that the plague mortality in Bombay is steadily decreasing, while the returns of the Port Trust show a substantial recovery in Bombay trade during the quarter.

Traveller's tales continue to come from Klondyke. The latest is that of three miners, who assert that about 20 tons of gold—worth about £2,000,000—will be sent out as soon as navigation opens. Of course, there are also the usual stories of the finding of big nuggets. We must wait for their confirmation, however, "until the navigation opens."

An Imperial Ukase has been issued in Russia decreeing that the total amount of fine silver roubles and small coins in circulation shall not amount to more than three times as many roubles as there are people in Russia. Fine silver roubles are to be lawful tender up to 25 roubles as between private individuals, and the Imperial treasury will accept payments in silver of any sum whatsoever, except in the case of Customs dues or other imports paid in gold, where only accounts not exceeding five roubles may be paid in silver.

The President of the Council at Athens has been assuring Thessalian deputies that the evacuation of Thessaly will certainly commence on April 15. The Turkish troops, we are further told, are ready to move to Volo, the port of debarkation, and the commandant has given orders for a complete abstention from excesses. We are glad to hear it, and shall be still more glad to see the evacuation successfully completed.

They seem to take things very leisurely at the Japanese Treasury. The final accounts of the expenditure and revenue in connection with the war were only presented to the throne a few weeks ago after verification by the Board of Auditors. The total expenditure is given as 200,915,508 yen.

Here is good news from New York. There seems some prospect of a comparatively early arrangement of the Alaskan sealing question being concluded. The United States proposed it, and Lord Salisbury assented, suggesting that other Canadian questions be submitted simultaneously to a joint commission. To this the American President agreed, and a Conference on the subject will shortly assemble at Washington.

Railway Traffic Returns.

Burma Railways. — Receipts for week ending March 5, Rs. 2,07,073 ; decrease, Rs. 6,096. Aggregate from January 1, Rs. 18,85,292 ; decrease, Rs. 2,76,618.

Great Western of Brazil Railway.—Traffic for week ending February 26, $32,551 ; increase, $2,282. Aggregate receipts to date $376,101 ; increase, $41,096.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, April 9:—Ps. 5,400, increase Ps. 150. Aggregate from January 1, Ps. 134,700, increase Ps. 3,800.

Villa Maria and Rufino Railway.—Traffic for week ending April 9, $2,976 ; decrease, $784. Aggregate from January 1, $66,898, decrease $1,472.

West Flanders Railway.—Gross receipts for week ending April 10, £2,045 ; increase, £171. Total from January 1, £31,246 ; increase, £840.

West of India Portuguese Railway.—Week ending March 19, Rs. 3,745 ; increase, Rs. 960.

Quebec Central Railway.—Receipts for third week of March, $8,362 ; decrease, $823. Aggregate from July 1, $68,227 ; decrease, $9,717.

Mobile and Birmingham Railroad.—Traffic for third week of March, $7,472 ; increase, $856. Aggregate from July 1, $275,874 ; decrease, $3,991.

Algeciras (Gibraltar) Railway.—Traffic for week ended April 2, Ps. 18,950; increase Ps. 540. Aggregate from July 1, Ps. 795,882 ; increase, Ps. 24,328.

Bengal Central Railway.—Traffic for week ending March 15, Rs. 19,300 ; increase, Rs. 550. Total from January 1, Rs. 2,05,797 ; increase, Rs. 23,893

Assam-Bengal Railway.—Traffic for week ended February 26, Rs. 27,005 ; increase, Rs. 2,645. Aggregate from January 1, Rs. 2,00,014 ; increase, Rs. 22,400.

Atlantic and Danville Railway.—Traffic receipts for month of March, $53,321 ; increase, $7,337.

Midland Uruguay Railway. — Receipts for month of March, £3,510 ; increase, £395.

Bengal Central Railway.—Traffic receipts for the week ended March 19, Rs. 20,256 ; increase, Rs. 3,158 ; aggregate from January, Rs. 228,087 ; increase, Rs. 29,085.

Burma Railways.—Traffic return for week ending March 19, Rs. 2,07,025 ; decrease, Rs. 5,409. Aggregate from January 1st, Rs. 21,08,173 ; decrease, Rs. 2,66,171.

Cockermouth and Keswick Railway.—Traffic return for week ending April 9, £803 ; increase, £64. Aggregate from January 1, £10,740 ; increase, £1,081.

Delhi Umballa Kalka Railway.—Receipts for week ended April 9, Rs. 34,000 ; increase Rs. 2,800. Aggregate from January 1, Rs, 5,18,300 ; increase, 1,49,400.

Cleator and Workington Junction Railway.—Traffic receipts for week ending April 9, £919 ; decrease, £145. Aggregate from January 1, £14,293 ; decrease, £754.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending March 12, Rs. 6,525 ; decrease, Rs. 3,064. Aggregate from January 1, Rs. 57,034 ; decrease, Rs. 11,783.

Great Western of Brazil.—Traffic receipts for week ending March 5, $36,171 ; increase, $14,360. Aggregate from January 1, $412,273 ; increase, $55,456.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S F. Snk.Fd. *sinking fund;* Certs., *certificates;* Debs. or Dbs., *debentures;* Db. or D.Stk., *debenture stock;* Pf., Prf., or Pref., *preference;* Prefd. or Pfd., *preferred;* Dfd., *deferred;* L. or Ltd., *limited;* Sh., *share;* Ans., *annuities;* Cu. or Cm., *cumulative;* Gu or Guar., *guaranteed;* Bds., *bonds;* S., Sr., or Ser., *series;* In., Ins., Insc., *inscribed;* Dr., Drgs., Drwgs., *drawings;* Stg., Strlg., *sterling;* Lia., *liable to;* Sp., Surp., *surplus;* Per., Perp., *perpetual;* Ln. *lien;* Lo. *loan.*

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

Vol. I.—No. 16. New Series. FRIDAY, APRIL 22, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,

On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.

The advantages of such Insurance are as follows:—

1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of Interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,

In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.

Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

HEAD OFFICE:

49, CHANCERY LANE, LONDON.

CITY OFFICE:

56, MOORGATE STREET, E.C.

CALEDONIAN INSURANCE COMPANY.

The Oldest Scottish Insurance Office.

LIFE ASSURANCE WITH AND WITHOUT MEDICAL EXAMINATION ON EXCEPTIONALLY LIBERAL TERMS.

Example of the Company's Threefold Option Investment Policy.

Entrant at age 26 may secure in return for an Annual Premium of only £30 the following benefits—

A. An Assurance of £1,000, payable if death occur before age 65;

B. An Endowment of £2,000 on attainment of age 65; or in lieu of B. one of the following options:

C. A paid-up Assurance of £2,800, commencing at age 65; or,

D. An Annuity after 65 of £106 : 11 : 8,* with a paid-up Assurance of £1,400 commencing at 65; or

E. An Annuity after 65 of £213 : 3 : 4,* without any paid-up Assurance.

* The Annuities quoted are for males, and are dependent on the present prices being still in force when age 65 is reached.

Fire Insurance at moderate rates and on good security.

Head Office: 19, GEORGE ST., EDINBURGH.

LONDON: 82, King William Street, E.C.;
14, Waterloo Place, Pall Mall, S.W.

The Investors' Review.

Shall We Soon Have a Five per Cent. Bank Rate?

It is not an off-hand matter to answer this question, but we are bound to say that 5 per cent. seems less immediately probable this week than it did last. Several favourable features have come to the surface in the meantime, and chief of all an increased import of gold. We knew, indeed, that Germany was likely to send large amounts here on account of the Chinese loan, but doubted whether it would be of much benefit to the open market, or that it would outweigh the increased exports of the metal to the United States, consequent on the outbreak of hostilities. At the time that we are writing the probability is that there will be enough gold arriving to enable the Bank of England to meet any immediate American demand without further advancing its rate for another week, at all events, and the directors were quite right not to move it up yesterday.

It is estimated that within the next four or five weeks some four millions in gold may reach this country, and we should not be surprised to see this amount exceeded, because in the month of March alone our imports of the metal exceeded four millions, as we pointed out last week. Then the spring currency demand for domestic purposes has already passed its worst and in a few weeks' time some coin will be returning from Scotland

and Ireland, as well as from the English provincial business centres. It is just possible, therefore, that the market may rub along in much its present condition for some weeks longer. All, however, is only conjecture, because we have an unknown quantity to deal with in the demands of the United States. If they choose, or if they want the money, there cannot be a question that they can take large sums in gold from us within a very few days. They might easily ship, for instance, a couple of millions within a week, for their banks hold large amounts in sterling bills which could be poured in on us at any moment. Even were gold known to be on the way here, and proved to be on the way by the advances the Bank of England has undertaken to make without interest against shipments of it before arrival, the nervousness of the market would be too great in the event of such a draft on our resources, were no protective measure adopted in the shape of an advance in the Bank rate to 5 per cent. The sum of the matter, therefore, is that while we have good reason to hope that money will not become much dearer, an early advance in the rate to 5 per cent. is by no means improbable.

Our own market can, we think, stand a 5 per cent. Bank rate should it come. Certainly the business of the country ought to be able to stand it, and we do not think that the finance market, as we may call it, has yet attained to such a rickety condition as would cause it to topple over if subjected to the pressure 5 per cent. involves. It would, however, be altogether different with the French market, and we must keep an eye upon that throughout the coming months. Its present prospects do not please us at all. Not only has the enormous expenditure of the French Government told heavily upon the further resources of the French people, but its recent fiscal policy, and its determination to uproot the great band of open-market brokers and bankers, all tend to produce a serious dislocation of credit in France. It will be in vain for the Bank of France to keep down its rate at 2 per cent., should our official rate go to 5 per cent., and struggle against exports of gold by advancing its premium on the metal. Capital is leaving France too fast on many accounts to make this policy any longer practicable. The Bank of France may before long have to raise its rate to 4 per cent., and the consequences of an advance to 3 per cent. only might be serious just now. Hence, probably, the weak policy of its directors in doing nothing to protect their market. This is but another way of pointing out how exceedingly cosmopolitan the London money market now is. Thanks to its supreme position the action of the Bank of England tells with immense force on every money market in Europe. And the consequences to distant markets of an advance in its rate to 5 per cent. might be so serious as to bring back trouble to us from abroad. What will India do, to take another example, should money become stringent here, and 5 per cent. does mean stringency nowadays. The leading Presidency Banks have been striving for months to keep their doors open: will they be able to keep them open with money difficult to obtain and dear in London? We should like to hear the opinion of some thoughtful and experienced banker on this question. Meanwhile, the nearer our open market works to Bank rate the better will it be.

The Hispano-American War.

Before these words can reach the eyes of our readers the final step will certainly have been taken which must render war inevitable between the United States and Spain. On Wednesday morning, President McKinley signed the Resolutions finally passed by both Houses of Congress, after a brief struggle on the part of extremists in the Senate to embody in them a recognition of the independence of Cuba. These Resolutions, which we print below*, transmitted to Madrid in some more or less diplomatic form, must bring on a conflict, but who shall fire the first shot may remain for some little time a matter of conjecture. In obedience to the directions of Congress the United States Executive may send a fleet at once into Cuban waters, where it will immediately be attacked by the Spanish vessels of war there; and if any attempt at landing is made, we shall have a bitter strife on land as well as at sea in full career, perhaps before another week has passed. A bold enemy, as Spain once was, might take the initiative and send vessels of war, half privateers, to harass American commerce and disturb the repose of American ports along the Atlantic coast, but Spain is not, we fear, capable now of daring such as this. If her rulers are prudent, at any rate, they will act on the defensive, for in spite of the boasts of the Spaniard, their country is by no means in a position to sustain a prolonged struggle under modern conditions of warfare, and with a power like the States.

Wednesday's newspapers contained a very striking interview with a Spanish diplomatist, described as being of the highest standing, in which the leading characteristics of Spanish pride and notions of honour were exhibited in the highest degree. According to this gentleman, Spain will fight to the last to retain Cuba, although her misgovernment of Cuba has long made her a disgrace to civilisation. He does not fear division among the people. Carlist and anarchist, republican and socialist, men of every political colour, will stand together with their backs to the wall and fight to the last so that Cuba may not be lost to Spain. A long tirade in this strain is wound up with the following peroration, which we quote and commend to the study of our American readers. It will give them a better notion of the characteristics of the Spanish mind than any recent utterance we have seen:—

There is no question at present as regards money in Spain to carry on the war. Money can be had. The national subscription

* Whereas the abhorrent conditions which have existed for more than three years in the island of Cuba, so near our own borders, have shocked the moral sense of the people of the United States, and have been a disgrace to Christian civilisation, and culminating as they have in the destruction of a United States battleship with 266 of its officers and crew, while on a friendly visit to the harbour of Havana, cannot longer be endured, as has been set forth by the President of the United States in his Message to Congress on April 11, 1898, upon which the action of Congress was requested: It is therefore resolved:

1. That the people of the island of Cuba are, and of right ought to be, free and independent.

2. That it is the duty of the United States to demand, and the Government of the United States does hereby demand, that the Government of Spain shall at once relinquish its authority and government in the island of Cuba, and withdraw its land and naval forces from Cuba and Cuban waters.

3. That the President of the United States be, and hereby is, directed and empowered to use the entire land and naval forces of the United States, and to call into the actual service of the United States the militia of the States to such an extent as may be necessary to carry these Resolutions into effect.

4. That the United States hereby disclaims any disposition or intention to exercise sovereignty, jurisdiction, or control over the said island except for the pacification thereof, and asserts its determination, when that is accomplished, to leave the government and control of the island to its people.

for war is overwhelming—everybody is giving up something. The Queen has headed the list, and the people, to the very women in the fields, are giving even their small pieces of jewellery and their savings. Spain is not financially moribund as some would make believe, and our resources are enormous where national honour is at stake. The Bank of Spain is rich and is with the Government; and there is also the power to put back the payments on the debts of the country, which, of course, would be a last resource. A suspension of payments under this head would not go hard with any one. As to the payment of our soldiers, it is said that our men in Cuba have not been paid for twelve months. That is nothing: a Spanish soldier gets his food and his clothes while on service, and when he goes on leave the whole of his past earnings are given to him in a lump sum. So in this case. Payments may be backward, but the soldiers generally desire it to be so, in order that when they return to their homes they can have their money in bulk. Every man who now joins the army will be quite willing to forego his daily pay under the circumstances.

Spanish resources, discipline, and national honour are all on our side!

Notwithstanding this vaunting confidence we do not believe that Spain can sustain a prolonged conflict. She has not the means. So far is her Bank from being "strong," that at the present moment its resources are strained almost to breaking point. The paper money emitted by it amounts to some fifty-two millions sterling, against which the Bank holds less than ten millions sterling in gold. All through the Cuban rebellion the Bank has been drawn upon by the Government to make good the deficiences in the revenue. It has had to advance money on Cuban bonds which could not be emitted to the public, to provide money for the coupons due on the Spanish debt, and to find the interest on the Cuban debt which otherwise must have gone into default. The war, in short, begins for Spain with an empty Treasury and exhausted credit; and it is to be feared that not all the jewels that the Spanish women can contribute, nor all the subscriptions handed into the Treasury by citizens of every degree, from the Queen Regent downwards, will do much to fill the yawning cavity which must immediately open in the Budget. Modern wars are dependent upon finance to an immeasurably greater extent than wars of former generations. One might almost say that the country with the longest purse is sure to be the victor. In the present instance we have very little doubt that victory will lie ultimately with the United States, and we should not be in the least surprised if her triumph came quickly. In spite of his boasting the Spaniard must know that he cannot continue to devastate Cuba under pretence of ruling it. The hand of fate is upon him. His race he is so proud of has had its chance in the world, none a greater chance, and it has been flung away. Judgment has long ago gone forth against the Spaniard as a ruler and decreed his expulsion from dominions conquered by his sword and cursed by his sway. On the other hand, by avoiding a great battle and sticking to the forts which protect Havana harbour, the Spaniards might give the United States far more trouble than the war party there appears to count on. As we pointed out three weeks ago, when first we insisted that war must come, the American people appear to labour under many delusions in regard both to their own strength and to Spain's capacity for prolonged resistance. Strangest of all seems to be the delusion of President McKinley, if the New York correspondent of the *Daily News* correctly reports his ideas. The President, this gentleman telegraphed on Wednesday night, still holds the notion that the Spaniards may permit him to send food to the "interned" Cubans starving behind the Spanish lines. A chance of peace, he thinks, lies in this quiescence. He must, indeed, be a simple-minded and benevolent gentleman if he can adhere to this idea after reading the speech of the Queen Regent to the Cortes and the accounts of the enthusiasm of the Spanish people. But the truth is, the American people and their President have, as we have insisted more than once, completely misunderstood the Spaniards, and have been totally unable to measure the effects which their words and acts have on the Spanish mind. And they may have to pay dear for their mistake.

Should this latest war of deliverance end soon its effects will not be of an enduring description on European money markets, nor on the prosperity of the United States, but it is quite certain that Spain must default upon her public debt. This consummation, however, was on its way in any case and was merely a question of time. It is quite consistent with experience of Castilian notions of "honour," as one has remarked, for Spanish statesmen to repudiate public obligations while clinging to the remnants of a once magnificent dominion. Should the war last for any length of time there would, of course, have to be large creations of United States debt, and the money procured by these creations would have to come to some extent from this side. We notice with interest that the Washington Government proposes to open a domestic loan for subscription throughout the country by the people. The bonds will be on sale at post-offices and other public places throughout the Union. A good deal of money may be collected in this manner, but we are not sure that the nation will, even in its present enthusiasm, find as much as twenty-five millions sterling, because it cannot spare the money. A war of three years, which the Spanish diplomatist predicts, would absorb a good deal more than that, and the United States would have to come to London, the only market in Europe probably able to help her. We should be quite willing to lend whatever sum is required on terms; but it might be prudent on the part of our Government, should the opportunity arise through American necessities, to make some stipulation to the effect that the hostile commercial policy, pursued by the American people towards us in particular, should be to some degree modified if we are to assist them in their foreign war with our capital. This, however, is not an immediate question, and it is not necessary to speculate over what is to be. The one significant fact is, that war has practically commenced between two Powers, one great and the other wrapped up in the memory of past greatness. War of all kinds means destruction of capital, waste of life and money, and it will be time enough to deal with the causes and the effects of this struggle when it has made some progress.

The Disappearance of the Coulisse.

The question of the disappearance of the Coulisse is so grave, and touches so many and considerable interests, that it vitally concerns not only financiers but the general public also. Legally, the Paris Bourse is formed of sixty Agents de Change, who constitute the Parquet. Its organisation strikes an Englishman as somewhat strange, and he cannot fail to compare the Paris market with that of London. He

wonders why it is not organised on the system of our Stock Exchange, which facilitates all business transactions to the owners of stocks. The French Government has not thought fit to alter the situation of the Parquet and of the free market (the Coulisse) by abolishing the monopoly of the Agents de Change, but in compliance with the demand of the official agents it has just condemned the Coulisse to extinction, and the sentence will be carried out at once. The number of the official Agents de Change was fixed by the code of commerce of the First Empire, their number in 1793 having been 138. The values quoted at that time were very limited, but although the conditions are now very different, and the number of stocks now on the market amount to many hundreds, the Agents de Change are still only sixty. It is permissible to ask if the old laws and the new measures to be decreed will really accomplish that which is desired, or whether they will bring about a totally different result? In striking at the liberty of transactions on securities it is not improbable that an extremely disastrous perturbation may be caused to the general prosperity, and occasion much injury to the business of the future. The industrial and financial movement has created a formidable quantity of certificates representing a large part of the national wealth, and the permanent circulation of these values is consequently of much general interest. Unfortunately, the restricted number of the Agents de Change, even though increased to eighty, and the prominent place which the public funds and the stocks of the great financial and industrial companies occupy in their operations, prevent them from giving due care and consideration to smaller affairs. The shares issued by companies and public loans other than those of the State are thus condemned to remain always in the same hands, which is contrary to their nature and to the conditions under which they were bought, or to suffer, through the lack of a public market, a constant depreciation which must very unfavourably influence public opinion on the principle of association. In consequence of the exercise of a monopoly which, though not satisfying the public needs, is compelled to transgress the very laws of its being, an immense portion of the national wealth is forced to remain unfruitful. The Corporation of the Agents de Change has never had a constitution so opposed to the general interest as that which it is about to acquire. It cannot be thought for a moment that the eighty Agents will suffice for the necessities of the circulation of the great personal fortune of France; and it is very doubtful if their organisation is sufficiently well ordered to give satisfaction to capitalists.

It is absolutely certain that public affairs will suffer from the manner in which they will be conducted, and that the insufficiency of the intermediaries will be so evident that their situation will soon become perilous; their limited number makes its impossible for them to transact the immense amount of business which will be expected of them. It cannot be doubted that to concentrate all the negotiations of a vast quantity of certificates of various kinds on a market restricted and without possible competition, is to render that market confused, disordered, and inaccessible to the public, whose interests will be sacrificed to private interests, and the final result will be that capital will cease to patronise it.

On the demand of the Company of the Agents de Change the Coulisse has been legally destroyed, as was the case about 1860, and the negotiation of all kinds of values except Rentes, the railways, and the great financial companies will be without intermediaries from July 1. The law gives to the Agents de Change *alone* the right of conducting negotiations, which makes them in fact official brokers, since they are forbidden under severe penalties to conduct any commercial or banking enterprise. The disappearance of the Coulisse will enlarge the scope of the operations of the Agents de Change, and they will establish correspondents and even representatives in the principal towns of France and abroad, as is done by bankers, and they will receive and transmit orders from place to place. These operations constitute what is called "arbitrages," and are settled by means of current accounts and commercial bills. These are really banking operations, and the Agents de Change will thus be brought to do the same thing as the suppressed *coulissiers*. It is clear that the destruction of the free market, which will raise the value of the firms of the Agents de Change, will result in completely altering the mission with which the law has invested them, and that in spite of themselves they will be obliged to become, at the same time, both ministerial officers and bankers, and this situation will expose them to great risks. Firms will soon change hands frequently, and disasters may happen which will remind one of what followed the *débâcle* of 1882. It seems to us that the official character of the Agents de Change would not suffer in the least were it decided that negotiations which must, or are desired to have an authentic character could not be conducted except through their medium; but that all operations involving risks should be denied them, as they are to the notaries. In that case the Agent would become a species of commercial notary recommended to the confidence of both Frenchmen and foreigners. We may mention here that the Coulisse brought considerable capital to the Paris market, as well as a prodigious activity and a large extension of business. It included several houses with a large capital, and conducted financial operations of a speculative nature for its clients. Whilst the Agents de Change met the needs of the capitalists and saving public, the Coulisse gave its services mainly to bankers, business men, and speculators. In 1872, M. Thiers, and, later on, M. Tirard, publicly acknowledged the useful rôle played by the Coulisse in the interest of the public credit, and it was in consideration of that that it has been permitted to continue its operations for forty years.

The monopoly and the free market could certainly be conciliated by making the *coulissiers* pay a tax in the form of a stamp to the Company of the Agents de Change in compensation for the presumed injury they may cause it; this arrangement would have the effect of uniting the interests of the Parquet to those of the Coulisse. To thus concentrate all the operations of the free market in the hands of the Syndicate of the Agents would be equivalent to giving to the latter a mission of public order which would considerably increase the importance of their functions. The existence of the free market, that is to say, the surveillance exercised, the solidity created, and the responsibilities offered by a large number of intermediaries, would give to the market a security that it cannot possess under the new regulation. Small capitalists, who will be henceforth sacrificed to the larger, will find neither aid nor counsel

in the Agents de Change, who will naturally neglect affairs of little importance, and will on some occasion, perhaps not far distant, refuse to respond to a national loan; for that *clientèle* which has hitherto proved itself so useful will have taken its money elsewhere. By driving away the Coulisse the Parquet will create a state of inertia which will cause the country to doubt both its strength and its resources. In the midst of an apathy which will only be aroused by suspicion or fear, the slightest disturbance in the financial economy of France will inspire the greatest alarm. M. Cochery would show himself to be as expert in finance as he proved himself a good administrator of the Post Office fifteen years ago, if he would allow the tremendous wealth of France to circulate, to increase, and to expand by permitting it the liberty hitherto enjoyed. That country meets with little trouble a really formidable budget, and would continue to do so without excessive grumbling if the fortune of its citizens developed in the same proportion as the charges which are imposed on them; but to attain that result it is indispensable that individual activity should be encouraged instead of paralysed by the privileges of monopolists and by the restrictive measures which are to-day condemned by all farseeing men.

Our Trade and War.—II.

West Africa and China.

How little tropical man requires of England may be judged from our trade with our West African colonies, some of which we have held for centuries. The following returns are significant:—

—	Imports.	Exports.	Total.
	£	£	£
Niger	312,000	607,000	919,000
Lagos	1,256,000	562,000	1,818,000
Sierra Leone and Gambia.	291,000	381,000	672,000
	1,859,000	1,550,000	3,409,000

With foreign West Africa, our trade is £779,000 all told, and though it would be much more, no doubt, were it not for the protective system of Germany and France, the trade with our own colonies, and with the great back country they serve, shows how trifling it would be at the best. The negro wants no clothes, and a few Birmingham or other beads content him as ornaments. The small arms of that enterprising centre are not allowed to be imported for fear of their becoming inconvenient for European rulers, nor are electro-plate and steel pens in much demand. For an immense distance inland man has to war with nature and malaria in such irresistible forms that even the negro cannot stand against them. Miss Kingsley, in her fascinating book on West Africa, shows that the population is only maintained by the arrival of fresh tribes from the far interior, who sooner or later die out. With the exception of Algeria, we hold, in South and Central Africa, the whole of that continent which possesses no value for commercial purposes, nor can ever possess any. Yet there are many people who would apparently welcome war in order that we might obtain still more fetid mangrove swamps in West Africa.

Another and much larger section would direct our warlike attention to China, and (without touching on political considerations at all, or discussing whether our Government has done well or ill in the urgent crisis in the Far East) it is quite possible to calmly examine the trade aspects of the question. The teeming population of China is supposed to number some 400,000,000. The Chinese are in their own way highly civilised, with a civilisation far older than our own, and in commercial matters their organisation is remarkably good, while they are as able as merchants as any people in the world. Since we opened China by force of arms, the import tariffs of the Empire have been reasonable, and although internal duties may add to them, there does not appear to be nearly the difficulty in introducing English goods that exists in protectionist countries. The system of inland navigation is wonderfully good, and an enormous population lives in the great river valleys where they can easily be reached by foreign traders. Nevertheless, with our practical monopoly of the China trade for something over half a century, our imports from and exports to China only amount to £11,400,000 a year, a trade of 6¾d. per head. With the British Empire as a whole the trade appears much more important, as of the Chinese imports in 1895 of 180,000,000 Haikwan taels (£29,400,000) no less than 143,000,000 taels were from the British Empire. Of this total, however, 88,000,000 taels, or about one-half of the whole, were from our colony of Hong Kong, and undoubtedly included an immense quantity of goods sent to that great free emporium from countries outside the British Empire. The British exports to Hong Kong in 1895 were under £10,000,000, while the exports from Hong Kong to China were over £14,000,000. In the same way about one-half of the Chinese exports appear from the returns to be to the British Empire, but again about two-thirds of this total were sent for distribution to Hong Kong. The figures for direct trade with our colonies are separately given, confirming the idea that much that goes to Hong Kong is from other countries than our possessions. A little over one-third of the total Chinese imports consists of cotton goods, machinery, metals, and manufactures which interest England more or less; and about one-sixth consists of opium, which is of great importance to India. So far as cotton goods are concerned, the English trade can only be a temporary one, as the Chinese have coal and cotton of their own, and are rapidly starting spinning factories. China, also, is rich in minerals, which only await development. The introduction of railways might work a great change, but as things are the small impression we have made on the Chinese is shown by our miserable export trade of 5d. a head. Our exports to protectionist Russia are 40 per cent. more in amount than to all China, and are four times as much per head of the population. The Metropolitan Press is full of invitations to action that might easily mean that we should have to fight Russia, Germany, and France combined on the subject of China. But our exports to those countries are eight times what we send to China, so that from a business point of view such an awful and world-wide war would be suicidal. Of course points of national honour might necessitate such an appalling conflict; but the point we are upon is the desirability or the reverse of such a war for trade pur-

poses. Our Government is of course absolutely right in endeavouring to keep the doors of China open as wide as possible, but very different questions would arise if we defied half the civilized world, say, about 230,000,000 of Russians, French, and Germans, if they attempted to close some of the back entries, an intention which they altogether deny.

Four Important Ceylon Tea Companies.

Ceylon tea companies, as a rule, are small, but in the past week four of the large ones issued their reports. Each company complains of a lower price obtained for its tea, and naturally the higher exchange and enhanced cost of rice, through the Indian famine, adversely affected profits. It might be well to explain that the cost of rice affects the companies from the fact that they are bound to supply their coolies at a fixed price, and in times of high prices the companies have to pay a good deal more for the grain than the amount received back from the coolies. The exchange for the year 1897 averaged just about 1d. per rupee higher than in 1896, which meant an increased working charge of about ¼d. per lb., while the higher price of rice represented nearly another ¼d. per lb. So the companies had their charges increased by ½d. per lb., in addition to which a lower price was obtained for their tea. The increase in acreage, too, was very moderate, as the following table sets forth :—

	Mature area.		Crop.		Price per lb.	
	1896.	1897.	1896.	1897.	1896.	1897.
Ceylon Tea Plantations	acres. 7,998	acres. 8,067	lb. 3,763,167	lb. 4,000,516	d. 8¼	d. 7⅞
Eastern Prod. and Estates	9,490	9,565	3,715,000	3,635,000	7⅞	7 1/16
Nuwara Eliya	1,734*	2,302*	565,692	899,223	9⅜	9¼
Standard	1,519	1,680	602,773	749,680	9⅞	9¼

* Part of this worked for only some months in year.

The Eastern Produce Company actually obtained a smaller crop, but the Nuwara Eliya had an output exceeding the estimates. In its case, however, the increase is in a great measure due to the fact that it is a new company, and in 1896 it evidently did not gather the full crop upon its acreage. The Standard Company included another estate it had purchased, but even then the yield per acre is higher, while the Ceylon Tea Plantations had merely an ordinary increase. Under these circumstances the profits of the companies working under normal conditions were bound to be lower, and the following table gives the amount and the manner in which it was divided :—

	Net Profits.		Put to Reserve, &c.		Dividend.	
	1896.	1897.	1896.	1897.	1896.	1867.
Ceylon Tea Plantations	£ 48,896	£ 43,713	£ 18,392	£ 11,600	Per cent. 15	Per cent. 15
Eastern Prod. and Estates	48,212	40,890	23,219	14,963	6½	7
Nuwara Eliya	9,910	13,584	953	1,023	6	6
Standard	10,991	10,920	2,500	2,000	15	15

The increased profit of the Nuwara Eliya was mostly due to its working the greater part of its estates for the whole year, but it must have done relatively better than the other three companies. Yet the margin set aside for reserve before paying the dividend compares badly with them. The fact that the older concerns have been so prudent in the past mainly accounts for their good exhibit at the present time. In spite of the decline in profit, the Eastern Produce is able to pay a higher dividend (this, however, only represents £1,500), and sets aside nearly 40 per cent. of its profits to reserve and depreciation, and the two others pay the same dividend, the Standard setting aside nearly 20 per cent., and the Ceylon Tea Plantations 25 per cent of their profits to reserves. Beside these statements, the deduction of £1,023 by the Nuwara Eliya, or about 7 per cent. of the profits, is poor, especially when it is remembered that £481 of the sum is represented by the writing off of the balance of preliminary expenses. Yet this company, of the quartette, needed most in the way of accumulation from revenue, for taking the generally accepted formula, its capital cost works out at £89 per mature acre, as against about £30 per mature acre for the Eastern Produce and Standard Companies, and £21 per acre for the Ceylon Tea Plantations. Of course, we know that an acre of the Nuwara Eliya must be more valuable than an acre of the other three, for on an average it obtained last year 518 lb. of tea per acre, worth 9¼d. per lb. Accordingly, in working out the formula we have treated every acre of immature Nuwara Eliya tea as being worth £40 an acre, as against £20 per acre for the immature tea of the other companies. Even allowing for these circumstances, we must assume that the company is highly capitalised, and it would have been more prudent to have paid less in dividend and studied reserves to a greater extent. It is, however, a high-grade company, and so far has not worked the whole of its properties for a year. Of course the shares of the Eastern Produce, Ceylon Tea Plantations, and Standard Companies stand at higher premiums in the market than those of the Nuwara Eliya, but even when this is taken into account the latter company compares badly. Treating debenture and loan capital as being worth par, the market valuation per mature acre works out as follows :—

	Market valuation.	Deduction for reserves and immature acreage.	Mature acreage.	Market value per acre.	Profit per acre.
	£	£		£	£
Ceylon Tea Plantations	581,654	109,951	8,067	58	5¾
Eastern Prod. & Estates	485,000	96,258	9,565	41	5½
Nuwara Eliya	250,000	25,517	2,302	97	8½
Standard	136,100	20,055	1,680	69	7

Yet if we take the present price of £11 per £10 share for Nuwara Eliya, £27 per £10 share for Ceylon Tea Plantations, £6⅜ per £5 share for Eastern Produce, and £14 per £6 share for Standard, we find the yield to an investor works out at about 5½ per cent. in each case. It is not, perhaps, a high return for an industry subject to fluctuations of exceeding severity, but then the three older companies have never paid dividends up to the hilt, and last year their profits were reduced from every cause. Rice will certainly not be so dear this year, and in other respects these older concerns ought to be better fitted to meet the future than the weedy productions of the last few years. We are glad to learn that the increased cost of working last year has proved a blessing in disguise to prudently worked concerns, as the putting out of heavy extensions has been brought to a standstill. Many of the new companies were to do this upon borrowed money, but the money has not been forthcoming, and so the extensions have had to be

postponed. A year or two back, when Sir James Muir, the Buchanans, and others of that enterprising *genus* were launching their ill-balanced productions, the older concerns were very much in the state of mind assigned to Wellington at Waterloo by French writers when they say, he prayed "for night or Blucher." In the tea-growing industry "night and Blucher" have come together in the shape of a high exchange and low prices, and the consequence is that crudely formed and wasteful schemes are feeling the pinch severely. It is yet too early to estimate the mischief such have given rise to, but of one thing we may be certain, the bad results achieved by a number of them will effectually prevent more capital being put into this industry for some time to come.

The Budget.

The Chancellor of the Exchequer delivered his Budget speech in the House of Commons yesterday afternoon, and, as we anticipated, he had small consolation to offer the taxpayer. Though the Imperial Revenue has been enormous, the expenditure has managed to keep pace with it fairly well. A surplus of £3,678,000 was realised in the year just closed. Out of this £2,550,000 have already been appropriated for public buildings, and the remainder stays in the Exchequer.

A year ago in his estimates Sir Michael was very modest, as he had to confess last night. No doubt the high death-rate among millionaires during the last twelve months has made his forecast more erroneous than it otherwise would have been, but still he was modest, and we cannot blame him for being so. We trust that his errors of past years, for 1897 was not the first, will not have drawn him into a snare, and that he may not have "o'erleaped himself" to fall on the other side in this Budget. He estimates the revenue at £108,615,000 and the expenditure at £106,829,000, giving a surplus of £1,786,000, and this is all there is for the taxpayer out of this vast sum. It is not enough to allow a penny off the income-tax: that would take £2,150,000, he tells us. As a sort of half-way measure incomes between £400 and £700 are to enjoy abatements on a sliding scale. We doubt the wisdom of this policy, as it seems to us to give relief to a class of people who have no real claim to such consideration. Further, the proposed change only involves a paltry amount, £100,000 a year, and looks unpleasantly like a vote-catching project, designed to tickle the ears of the minor *bourgeoisie*. The question arises, where is this principle going to stop? We observe that the House received the announcement that cigars were not to share in the relief granted to tobacco with protest and dissent, and Sir Michael will find that grievances against the tax gatherers are not confined to those with incomes below £700 a year.

It is satisfactory to note that the revenue authorities are waking up to the bad effects of the engaging habit known as "grogging," which consists, according to Sir Michael's description, of "getting hold of the emptied spirit casks, soaking them with water, and selling the spirits secured in that way free of duty." In one case, it appears, as much as 124,000 gallons of proof spirits had been thus obtained. The thought makes one's mouth water, but we agree with the Chancellor that the law dealing with this interesting industry should be strengthened.

Opinions will differ as to whether indirect taxation should have been reduced at all as long as direct imposts are at a height which is simply outrageous in time of peace. However, Sir Michael seems to have decided that such a reduction was necessary to round off the beauties of his Budget, and after hesitating between tea and tobacco — from both of which, as he told the Committee, he is a total abstainer—he has plumped for tobacco. It appears that the weed is consumed but moderately in these islands. The Frenchman smokes 2 lb. 5 oz. per head, the Austrian 2 lb. 13 oz., the meditative inhabitant of the Happy Fatherland 3 lb., and the Belgian comes in an easy winner with 4 lb. 12 oz. : yet the Briton, "though we are a richer country and are not averse to paying for our personal indulgences, and the working class is better off," consumes only 1 lb. 13 oz. Sir Michael believes that there is room for expansion here, and hopes, with his genial optimism, that the reduction of 6d. a lb. on unmanufactured tobacco will reach the consumer. We beg to doubt this, seeing that the fragrant weed is usually bought by the ounce, and 6d. in the pound works out at an inconsiderable fraction—from the point of view of the retailer—on the ounce. The percentage of moisture is also to be reduced, "and as drier tobacco is more quickly consumed," quoth the Chancellor, with his tongue in his cheek, "the seller will have the prospect of obtaining advantage." Quite so ; but why claim this as a benefit to the consumer?

Altogether, the Chancellor's speech was well digested, clearly expressed, and business-like. It introduced no heroic alterations in our fiscal system, and if its novelties were of a rather peddling order, they are not likely to provoke much vehement criticism from any quarter. We must suggest, however, in conclusion, that the possible effects of the war that is now beginning were perhaps passed over a little hastily. It is easy enough to hope that "any disturbance in the western hemisphere will be more than compensated by the happy improvement in the condition of India, and by the result of events that have recently occurred in the Far East;" but is the improvement in India already so "happy"? We would fain believe it; but, on the other hand, the possibilities of disturbance to trade, owing to the Spanish-American war, are exceedingly serious.

Economic and Financial Notes and Correspondence.

That Blessed "Chartered" Company.

It is unfortunate for us that the long-delayed meeting of the shareholders in this company should be held on a day, and at an hour, which makes it impossible for us to deal adequately with it in this week's number. Perhaps, however, nothing will be revealed of any such tremendous importance that it cannot keep a week for criticism. If we may judge by the documents the directors have drawn up and made public the chairman's story will be a very simple one. Indeed, there is no story, only a good deal of vain boasting about what has been done, and of random prophecy as to what is going to happen in the future, when the gold is found on the mul-

as we may call them, issued a week ago, and cannot find in them any fact of a consolatory kind to Chartered shareholders. Some people have told us that we let the directors down too easily last week; but really there was nothing new to say about them or the company they are supposed to govern, and the time is past for any effective criticism calculated to protect the unsuspecting investor from loss through purchasing "Chartered" shares. The folly has played itself out for the present, and if there be gold in Rhodesia, a thing no man yet knows, it is only fair that those who have been victimised into buying these shares at ridiculous prices should have the chance a discovery of rich gold deposits will give them to pass their investment on to some others as trustful in mind as they were. For our part we are altogether suspicious about the alleged richness of reefs and what not, paraded in these reports. Not a single fact is found in any of them leading to the inference that a "mine" of any richness is known to exist. The directors of the company, his Grace the Duke of Abercorn, Earl Grey, Lord Gifford, and Mr. George Cawston, call attention to the statement made by two or three of the mining companies printed as an appendix to their report. We have looked at these, and there is nothing in them of the least value in guiding the judgment of the investor. In short, it is the absence of facts which excites our suspicion far more than the statements actually made, although these are wretched enough from every point of view. Vague talk about excellent land for settlement, if irrigation could be arranged for, a large scheme of railway extensions, a full-dress parade of officialdom, showing a tremendous machinery erected to conduct the affairs of less than five thousand whites, lamentation for the scarcity of labour—a scarcity it is proposed apparently to remedy by importing coolies from abroad—these and such like statements and communications, mixed up with abundant doses of prophecy, form the substance of the reports, and they at no point give the lie to the opinions expressed by the late Lord Randolph Churchill in those frank letters written by him during his memorable journey through Mashonaland. We recommend those who think of touching this speculation to go back to the book in which these letters are reprinted, and to read the chapters there on the agriculture and mining prospects of the territory he went through. When they have done that we hardly think they will invest even now in Chartered shares, although there is a chance of making 6d. to 8d. per share on the current market price out of the new allotment.

Mr. Rhodes, we may however say now, made a great speech, in which he condescended to correct the assertion made by Earl Grey that the company had spent £10,000,000 in "developing Rhodesia." "As a matter of fact," said the orator, "it was between five and six millions, and it was raised by debenture debt." This fogs us nearly as much as the "Earl's" assertion, but it at least seems to admit tacitly that all the share capital of the company, and all the premiums netted on the later issues of it, went in promoter's gratifications, and in paying the cost of the rebellion. For the rest, he spoke with more than his usual confidence about the presence of payable gold in the country, boasted of his Bulawayo railway, "which cost only about £3,000 per mile, and was now paying about £40,000 per annum," and told the audience—a cheering, vehemently enthusiastic crowd—that he had asked the Government to help him to find the £2,000,000 required to extend the railway from Bulawayo to Tanganyika, a distance of 800 miles. "When we get to Tanganyika," he rolled out, "we shall have Kitchener coming down from Khartoum," doubtless with cent. per cent. dividends in his pockets. The whole harangue was first-class jingo-finance of this description, with barely an ounce of sober fact to buoy it upon. And it was touched in with a dashing cynicism never quite absent from any utterance of Mr. Rhodes. "Don't gamble in shares," he cried, "I do not wish to see that,"—which is good of him, considering, and makes us think that he really does read the Investors' Review now and then for his chastening. But what has the taxpayer to say about the proposal that he should guarantee 3 per cent., or a subsidy, to the Tanganyika Railway?

The Expulsion of "The Times" Correspondent from Havana.

On many grounds this is to be regretted, and not least because it is a step which proclaims once more to the world the jealous and intolerant character of the Spaniard. No man could be less a cause of offence than Mr. Charles Akers, the *Times'* special correspondent, himself, except in one regard—he has a habit of telling the truth. But he never puts the truth forward offensively—witness his recent letter, quoted by us some weeks ago, on the evil case into which Spanish finance has fallen through having to bear the cost of this long-drawn-out struggle of the Cubans for independence. The figures therein massed ought to have been of the greatest value in the world to the Spaniards had they been a sensible people instead of proud moonists, dreaming of a past that was great and grandiose certainly, but never glorious with the glory of freedom and humanity. It would have been invaluable just now to have had a man of Mr. Akers's acumen and probity, clear-eyed and practical, on the island, ready to let the world know from time to time what was going on; and the natural result of his expulsion will be to dispose Englishmen to put no faith whatever in any news emanating from Spanish sources. But Spain was ever obscurantist and secretive.

Shall Coal be Contraband of War?

War being now practically declared between the United States and Spain, a question of great importance, both to the two belligerent parties and to neutral States, presses for immediate solution, viz., shall coal be considered as contraband of war? Since the Declaration of Paris in 1856 there has been no war between two naval powers, and therefore the question has never been decided in practice, but international lawyers are, generally speaking, agreed that coal should be declared contraband, as, owing to the advance made in steam navigation, it has become the most necessary of all stores in naval warfare. But though jurists recognise this fact, Governments do not; for Russia in 1884 declared that she would be no party to any article in any Treaty which declared coal to be contraband of war. In the approaching struggle, however, it would be in the interests of both belligerents, and especially in that of the United States, if the rule were laid down that all coal being carried to any port in the country of either of the belligerents should be contraband of war, no matter whether it was destined for re-coaling ships of war or for purely peaceful purposes. Owing to the fact that the war, in the beginning at any rate, will be carried on almost entirely round about Cuba, this rule would prove of immense benefit to the United States, for they could then stop and seize all cargoes of coal, covered by a neutral flag, going to Cuban or other Spanish ports in the West Indies. The Spanish Navy would then, after the stock in their bases on that side of the Atlantic had been exhausted, become absolutely helpless, incapable either of preventing the States from landing troops in Cuba, or of interfering with what American over-sea trade remains. British shipowners and coalmasters, therefore, must not be surprised if the United States Prize Courts lay down the rule that coal is contraband of war, but should rather recognise that in doing so the States are trying to shorten the struggle as much as possible. This means a shorter interruption of legitimate trade. Coal declared contraband, in a word, should mean a speedy return of peace.

The New Company Bill.

There is little doubt that the present Bill, namely, the Companies' Act (1867) Amendment (No. 2) Bill is the outcome of the recommendations of the Departmental

Committee appointed by the Board of Trade in 1894 and the decision in the case of the Kharaskhoma Syndicate. The first object of the measure is to repeal Section 25 of the Companies' Act, 1867, which enacted that all shares should be deemed to have been issued and held subject to the payment of the whole amount thereof in cash, unless it had been otherwise determined by a contract in writing filed with the Registrar of joint stock companies. In the Kharaskhoma case it was decided that, in order to comply with this section, the contract must state the consideration for the shares, and that it was not sufficient to recite in the filed document that by another agreement, not on the file, the shares were agreed to be allotted, for the considerations therein mentioned. But the Lords Justices refused to give any opinion as to the particularity with which that consideration was to be stated. Now to us that seems a very proper decision. What it seems to say is this: "The section must be complied with, not only in the letter, but in the spirit, and the safeguards given by the legislature are not to be frittered away by any technical avoidance of the true meaning of the Act."

However, be that as it may, it is now intended to repeal that section in toto, and after providing in the second section for existing contracts and subsidiary contracts which do not fully disclose the considerations, the Bill goes on to enact that after the commencement of the Act, whenever a company limited by shares makes an issue of shares in its capital, a notice in writing shall be sent to the Registrar within a month of such issue, stating (1) the number, class, and nominal amount of such shares; (2) how many shares were issued on the footing that they were to be paid for in cash; (3) how many were issued as paid up, or partly paid up, for some consideration other than cash. The penalty for default is to be £5 per diem during the time that such default continues.

As far as it goes this seems a move in the right direction, but its steps in that direction are few. We shall now have a clear statement in the case of each company of the bonâ-fide cash shares, and the "other" shares. Undoubtedly it would have been better had the statement been made to include what was the actual consideration, "other than cash," for which the shares were issued. In many companies this would prove entertaining reading. The great fault, to our mind, is not what the Bill does, but what it does not do. Piecemeal legislation such as this is of very little use. So long as these shares, issued for considerations other than cash, can be placed on an equality with cash shares, so long as the imperfect means of getting an inquiry into the state of a company exist, our company law must be still declared to be in a poor and unfinished state.

The West Virginia and Pittsburg Railroad Company.

Messrs. Brown, Shipley, and Company have invited holders of the bonds of this railway, which is a dependency of the Baltimore and Ohio Company, to send them in to be exchanged for their negotiable certificates not later than the 1st of next month. The bonds went into default on the 1st inst., and it is necessary that the interests of holders should be protected. They cannot therefore do better than accept the help of this eminent firm of American bankers, and the bonds ought to be sent in to it at once. The reorganisation plan of the Baltimore and Ohio is said to be nearly completed, and united action may be necessary to prevent undue advantage being taken of the helpless position of lines like this, which are more or less at the mercy of that company.

Dearer Money and Investment Stocks.

The inevitable retreat of first-class investment securities directly money became dearer is now in full progress, as will be seen from the subjoined table, which records the fall so far since the beginning of last July. Readers of the Review have been warned for some time past that money was going to be much dearer this year than usual, and, as a fall in investment stocks is always the natural sequence of higher rates, they will have been well prepared for the pegging back now going on all round. Owing to the long period of cheap money, all gilt-edged securities had been worked up to heights never before attained, and therefore the influence of a stiffer money market will be greater than usual.

The set-back has little more than commenced as yet, for money promises to be dear throughout the summer, to say the least, while a prolonged struggle over Cuba and a large loan issued over here by the United States is a probable contingency which would mean heavy

gold exports and a 5 per cent., or possibly 6 per cent., Bank rate. This, if maintained for any length of time, would induce another 10 or 20 point drop. And we are quite prepared to see it, time given.

The Coal War in Wales.

Without organisation, without funds, with some of the men already receiving parish relief, with no hope of help but such as workmen in other trades may be willing or able to afford them, the South Wales colliers have finally declared for war against their employers. The speakers at the Cardiff Conference on Monday, at which the final plunge was taken, seemed to have no very clear idea of what they wanted, and no idea at all as to how they may secure what they demand. They were as men groping in the dark, or waiting for miracles and sure of their performance. They first rejected by a majority of 54,000 the proposal to confer plenary powers on their leaders for the purpose of negotiation with the employers, which of course means virtually that they reject negotiation altogether. They spoke like conquerors dictating terms, not like ill-equipped combatants spoiling for the fray. 62,714 voted against any sort of sliding scale; 29,094 were for some shadowy kind of scale which probably they did not themselves comprehend, and could not explain. Nay, so infatuated and foolish in their infatuation are these poor men, that it required all the impassioned eloquence of "Mabon," the leader they refuse to trust implicitly, to induce them to refrain from asking the enginemen and stokers to cease work. That is, they were prepared to drown the collieries, and so, as they imagined, ruin the owners, oblivious of the fact that they were thus destroying the chances of future work for themselves!

Their present demand is for an advance in wages of 10 per cent., to continue for at least three months. It was a "toss-up" whether 20 per cent. should not be demanded, and a very large number voted for the higher figure. But the majority stuck to the lower figure, and so it became the claim of the Conference. It really did not matter much which of the two amounts was chosen; the one is as likely to be granted as the other. Another remarkable feature in the business is that the thoughtless miners declare that the owners can well afford to grant the 10 per cent. because several collieries have conceded it and are now working merrily! It never seems to have occurred to these men that fancy wages may easily be paid where fancy prices are being received for coal. The Scotch miners have had a shilling a day added to their wages because orders that would otherwise have been executed in Wales have been sent to Scotland and the North of England. Of course, as soon as the Welsh dispute is settled—and it is impossible the contest can be very prolonged—the fancy prices will disappear, and so will the fancy wages. It is the strike in the larger number of the pits which has forced up prices and wages in the few that are at work. The sliding scale is now in abeyance, but the Welsh miners are good enough to tell the coal-owners that when the 10 per cent. advance has been granted, they will be ready to have a talk about a new sliding scale; but it must be a leisurely talk. No plenary powers to leaders; and no decision come to until the whole of the hundred or hundred and thirty thousand miners have given judgment on each particular point. These colliers seem to live in a queer world of their own, where they appear to imagine they have only to stretch out their hands to take what they want. They are making up an awkward object lesson for themselves. A strike undertaken so recklessly, without thought or care as to consequences, cannot but fail, leaving only misery as the portion of those who provoked it and of those unhappily dependent upon them.

A "Bull," a "Bull"! My "Colours" for a "Bull"!

Mr. Bottomley favoured the mining market with a particularly pungent Caudle lecture preliminary to his departure to look after his racehorses at Newmarket. Apparently, this swaggering understudy Barnato of the hour entertains the belief that there have been "bears" wickedly at work depressing shares of companies that stand subservient to his bidding. In a screed rich with metaphor and brimful of oracular threats, he hurls defiance at all such, and in the same breath whines "Come, buy; come, buy" to the public. Why this wail, printed in all newspapers and sent broadcast through the post with a penny-stamped envelope enclosed to carry the order back? Surely all this pother must be a great mystery to the ordinary bystander. That prices should fall in the present condition of affairs is only natural, and that shares which had been put up so openly by the "rigging" process should sink back at the prospect of a 5 per cent. Bank rate is only the ordinary experience of the Stock Exchange; yea, even when the leader in a "deal" has bought in against the "bear" more than the entire issued capital of the thing "rigged."

Yet all that poor angry Mr. Bottomley can suggest to his humble and devout supporters is contained in the following rules of conduct:—(1) Hold on to your shares; (2) if you have been induced to sell, buy back at once; (3) buy as many more shares as you can afford to pay for; (4) and above all, insist upon delivery. Now, this is a very beautiful programme and simple too—for Mr. Bottomley. In his eyes its chief merit must rest in the assurance it gives that, if carried out, it will afford him and his friends a fine market to realise upon. By his own statement he and his friends had due for delivery to them 80,000 more shares in the Northern Territories Company than were in existence. Accordingly, fresh buyers must, it would seem, purchase now from this clique, and even at £2 a share, or upwards, said clique's profits would be enormous. No doubt the position in regard to other companies of the group is very similar.

We, therefore, cannot refrain from thinking that the following passage in this noble philanthropist's manifesto has slipped in by mistake:—"When a number of men—actuated, as I have said, by motives of avarice or envy—band themselves together, and, callous to the interests of bonâ-fide investors all over the country, stand at nothing to accomplish their ends, you will probably agree with me that they deserve no quarter." The danger lurking in this passage is that the public may apply these remarks to Mr. Bottomley and his friends themselves instead of to the wicked "bears" against whom the hard doom is really pronounced. That would be such a pity, after all the trouble devoted to the manufacture of this brilliant outburst, that we deem it a kindness to show every one concerned just how the thing stands. Are we right, though? Really now, when you ask, we have a doubt. If Bottomley & Co. own all the shares of the "Terrors" Company and 80,000 more, what do they want you and us, good readers, to buy for? The thing is so good, "don't y' know!" True, but can it be that these self-sacrificing beings are so disinterested as to think they have too much of a good thing? We give it up and, being in doubt, shan't buy. Our little moneys are of use to us. They could be none to such a "brillionaire" as Mr. Horatio Bottomley.

Mr. Hugh Watt.

It is best to print the following effusion exactly as it stands, although we must apologise for laying such stuff before the readers of the Investors' Review. Perhaps, however, they may thus be enabled to estimate the moral status of the class of men Mr. Watt, in some degree, represents. His epistle indeed, is excellent as a self-revelation, and on that account alone may be forgiven. Its writer confessedly knows nothing either of the Investors' Review or its conductors, and allows his pen to fly along oblivious of the fact that they may know a

good deal more about him than they think their readers would be interested to see printed :—

"Northern Terrors."

To A. J. Wilson,

Editor "Investors' Review."

I have at last succeeded in getting a copy of what any respectable person having regard to the fabric of wilful falsehood it contains would characterise as your lying and disreputable "rag." The term unsavoury is unfortunate in your mouth. I have always been unsavoury to company wreckers, blackmailers, "rag" touts guinea pigs, and other such human vermin which now infest the City. Your article dated 15th inst. indicates both ignorance and rascality, because records exist proving your statements to be wilful falsehoods. I had no official connection with either the Chile or Caratal Companies, as every man not of mushroom growth in the City knows.

The New Chile Company under my presidency became the richest mining proprietary incorporated in London, and its reconstruction has to pay off a large debenture debt and meet previous liabilities. We obtained about £300,000 sterling of bullion, but the costs in Venezuela swamped even one-ounce crushings. I invested about £50,000 in the company, and year by year desired to resign unavailingly because none of the rich holders would take my place. All British mines there have failed, swamped by fines, tariff, transport, &c., &c. Port Darwin Company was not my creation, nor was I vendor. In fact, I was the means of cancelling the vendor's stock, and purchased every share I held therein. Subsequently, having acquired about 90 per cent. of the stock, advanced on mortgage, but offered to forego this for a similar advance by others. Company never got to work, as machinery bought and erected swamped working capital. Mine was offered for sale, but no bid, and I stepped in and paid all debts, taking property (not then of any value) believing, however, therein, and spent a lot of money exploiting territory. Your mala fides is manifest in every line, because you ignore rich returns since 1892, and you seem so debased as to ignore the full particulars of properties acquired, published with official reports and crushings. You know it is a shameless and barefaced falsehood to say the Howley Claim, which you know has only ten acres (one claim) "forms the chief property of the Goldfields Company," which you know has acquired 700 to 800 acres (fifty claims), and six mills and full plants (not one, as in case of Howley); but parting with the last remnant of respectability is, of course, a small matter to you. If you had wanted any facts I possess of properties prior to sale you could have had them, but that would not suit your infamous object.—Yours, Hugh Watt.

Argentine Notes.

It is absurd that the only market for the sale of cattle and sheep in the whole of Southern Argentina is at Buenos Ayres, and that the farmers of the Rio Negro have to forward all their live stock to that port. They are entirely at the mercy of the Buenos Ayres Great Southern Railway for the carriage of their freights, and in consequence lose from 25 to 30 per cent. on the price of each sheep in sending, to say nothing of the deterioration in value through spending two or three days in a train without food or drink. There was a rumour that the New Zealand Shipping Company were going to start a "frigorifico" at Bahia Blanca, and to call there regularly for live cargo and frozen meat. Why not? The farmers of the neighbourhood could supply plenty of stock to keep at least one freezer going, and would be greatly benefited by such a procedure. In time, there is no reason why Bahia Blanca should not become as great a port as Buenos Ayres, and direct all the shipping of the southern regions.

The outcry made in our English papers against the cruelties and great loss of life suffered by the live stock cattle and sheep shipped from Argentina to England is beginning to have some effect, for we hear that the *Nacion*, an influential Buenos Ayres paper, is sending a member of its staff on an extended tour to report on the methods employed by different countries. He is to go in a steamer carrying a full live stock cargo from Buenos Ayres to Liverpool, visit the various live stock receiving ports here, then go to the States, and recross in a cattle boat to England. Before returning to America he is also to visit the chief ports on the Continent. We hope that the knowledge he will thus acquire will do some good. Speedy reformation is very necessary, otherwise the trade will be hurt.

Railway Capital Expenditure.

A competent statistician, writing in the *Financial Times*, sums up the capital outlay of the English and Scotch railways, as during the fifteen years ended with 1897, in a table which we take the liberty to reprint:—

Company.	Capital expenditure 1883 to 1896 inclusive.	Capital expenditure year 1897.	Capital expenditure 1883 to 1897 inclusive.
	£	£	£
Caledonian	8,556,753	502,904	9,059,657
Furness	292,993	50,743	343,736
Glasgow and South-West.	4,874,181	168,089	5,042,270
Great Central	14,666,465	2,371,726	17,038,191
Great Eastern	10,477,444	627,727	11,105,171
Great Northern	9,667,499	1,499,608	11,167,107
Great Northern of Scotland	1,376,521	164,494	1,541,015
Great Western	13,769,470	1,154,832	14,924,302
Highland	2,479,737	247,185	2,726,922
Lancashire and Yorkshire	13,960,433	995,822	14,956,255
London and North-West.	16,442,123	905,173	17,347,296
London and South-West.	12,089,608	852,182	12,941,790
London, Brighton, and South Coast	2,983,283	292,843	3,276,126
London, Chatham, and Dover	3,182,095	125,044	3,308,139
Metropolitan	1,446,052	147,399	1,593,451
Metropolitan District	1,045,291	14,841	1,060,132
Midland	24,732,949	1,695,004	26,427,953
North British	10,968,395	1,196,987	12,165,362
North-Eastern	10,585,301	580,690	11,166,060
North Staffordshire	438,658	33,508	472,166
South-Eastern	3,404,990	607,602	4,012,592
Total	167,440,301	14,234,403	181,675,693

The writer adds :—

The above indicates the enormous outlay of over 181½ millions during the fifteen years 1883-1897, both inclusive—an average of rather over twelve millions per annum. The Midland still maintains with ease its leading position as the railway which in recent years has expended most on capital account, the next being the North-Western, which is, however, rather more than nine millions behind its rival. And, as our details of the expenditure during 1897 clearly show, there is at present no slackening of the rate of outlay.

We may go further, and allege that there will be no slackening until the companies are brought face to face with the consequences of their extravagance through some decline in their business, or revolt of the trading and travelling community against their exactions. Much of the money thus piled up on these roads represents relief of revenue charges; it is extravagant expenditure at nearly all points, and it creates an illusory industrial prosperity which helps, equally with the lavish expenditure of the Government, to mislead the nation as to the true extent of its wealth and prosperity.

The Fish Oil and Guano Syndicate.

Our lively Irish compatriots have taken up this new adventure with great gusto. An enthusiastic meeting was held in Dublin on the 5th inst., at which it was agreed to convert this syndicate, whose capital is £40,000, into a company with a share capital of £250,000 in £1 shares. £200,000 of it is to be distributed to the shareholders, that is, £5 for every £1 original capital. And still £50,000 is left to provide working capital, £10,000 to be issued forthwith at £2 premium per share. Lord Lurgan, the chairman of the meeting, delivered a speech giving a glowing account of

the company's prospects. We hope he will prove a true prophet, though he did hold forth in his own country. Various companies in various countries are to be floated to acquire the rights and patents to prepare fish oil and guano, and from these the parent company is to receive handsome sums. What the total capitalisation will be of these various concerns it is not easy to discover, but it was vaguely magnificent and Dunlopist in statement. One company alone is to have a "capital," so-called, of £500,000. We have already seen the prospectus of the American Fisheries Company, which was floated earlier in the year, and it did not inspire us with enthusiasm.

The chief excitement, however, at the meeting was the story of Volenite. This, it is claimed, is a new substance which "is equal to gutta percha and superior to vulcanite." For electrical work its insulating powers are said to be marvellous, and the cost of production is to be the merest trifle. It is very pleasant reading, no doubt, and fortune seems to be within easy grasp for Pat and Mike, and we are sorry to spoil the picture by a hint that there appears to be a good deal to be done before success is secured. Fish oil, fish guano, and volenite may all be wonderful articles of commerce, but they have yet to be proved so. We cannot look with favour on the financial methods of this syndicate. It is not a straightforward action, in our opinion, to tempt people into subscribing for shares in companies with large nominal capitals before any kind of genuine business has been built up for such companies to live by. Our advice, then, is to leave these ventures to those who know all about them, and to read the reports of such meetings as that where Lord Burgan prophesied at random with a large grain of salt.

Electric Lighting Companies and Local Vestries.

Subjoined is a sensible view of this question, which was dealt with in these columns a fortnight ago. But in this instance we do not know that the Marylebone Vestry can be blamed much. It has been roused to action by the manner in which the Metropolitan Electric Company has abused the monopoly it has hitherto enjoyed within the parish. Probably a fair revision of its tariff would avert the threatened competition :—

To the Editor.

Sir,—A feeling of uneasiness has been created in the market for electric lighting shares by the action of the Marylebone Vestry. Tha body has signified its intention of applying to Parliament for powers to start lighting by electricity on its own account, and so enter into competition with the Metropolitan Electric Lighting Company, which has put down mains and erected stations for the supply of current in that district. There is a great deal to be said on behalf of local bodies controlling the lighting of their districts, but the Marylebone Vestry's action seems open to question. After allowing the Metropolitan Company to obtain powers for their district and to sink capital in the laying of mains, building of stations, &c., and by their work prove that electric lighting is a commercial success, it does not appear honest for the Vestry to enter into competition by means of the ratepayers' money. Such competition must be one-sided, for naturally the Vestry would do its utmost to cut into the business as it would not be hampered by the necessity of making ends meet. What the inhabitants would gain in the way of cheaper lighting would be offset by the increased debt that must be incurred before the Vestry's supply could be started. Further, it should not be forgotten that all these companies have the length of their existence defined by Act of Parliament : at the expiry of their powers the Vestry can acquire their stations, plant, &c., at a price entirely depending on the money spent on erecting them, without any addition for goodwill. If the Marylebone Vestry had followed the example of the one in St. Pancras, which refused to give powers to any private enterprise, no objection could be raised to their application. Under these circumstances we have no doubt shareholders in the various electric companies will support their directors in opposing the Marylebone Vestry.

In all this there is a lesson for directors of electric lighting companies. It ought to impress on them that the existence of their companies is limited, and therefore their efforts should be towards economical and careful management, and the building up of good reserves rather than the distribution of fat dividends. By these means prices of electric lighting shares will not be forced up to giddy heights, and when the time comes for them to hand over their trusts they will be able to do so with the knowledge of having done their duty properly and well. Y. Z.

Distressed Mauritius.

The latest advices from this Colony indicate that matters are going from bad to worse. Already the attention of Mr. Chamberlain has been drawn to the distress prevailing amongst the planters and working population, and a plea has been put forward that similar assistance should be given to Mauritius to that which is now being accorded to the West Indies. Mr. G. D. Coriolis, the Surveyor-General of the Colony and a Member of Council, estimates that the population has to struggle with a deficit of 10,000,000 rupees as the result of its trading for the past three years. The consequence is that capital has been leaving the island, and its available currency has undergone a reduction of at least 2,000,000 rupees, through export as the result of the disasters in 1895. To add to the difficulties, interest is very high. The Mauritius planter, for example, has to pay 15 per cent. for the discount of his paper besides an export duty upon his sugar, whereas the sugar growers in Queensland get their money, it is alleged, at from 3 per cent. to 4 per cent. and have no export duty to pay, the consequence being that they have almost closed Australian markets to Mauritius sugar. To remedy this state of things it is suggested that the Government should be empowered to organise agricultural banks by means of which loans at moderate rates of interest might be made upon the growing crops, under proper security. This is a reasonable proposal, and if the British Government, in its liberality, can see its way to render the planters some further assistance, the difficulties might be surmounted. Failing help, it seems probable that by the end of the present year the Government of the island will be in pretty serious trouble. A deficit of 1,000,000 rupees is estimated as the probable result to it at the end of the present year. As it will not be possible to impose fresh taxes, the only alternative is to reduce expenses, and this must fall upon the Government employés. There ought to be a remedy for this state of things. Mauritius is not played out. All that seems to be required is some further supplies of capital, accessible to the planters at moderate rates of interest. No species of agricultural industry can thrive which has to borrow money at 15 per cent. and pay taxes in addition. Will some member of Parliament kindly jog Mr. Chamberlain's memory upon this matter ?

British Trade and Foreign Rivals.

In the current number of the *Economic Review*, Mr. A. W. Flux supplies a needed corrective to the nonsense too glibly talked about the decadence of English trade and commerce. Because things "made in Germany" are making their appearance in places where they had never been before, and anxious consuls and no less anxious protectionists are making the most of what is the undoubted advance in German commerce, must we therefore conclude that British enterprise is dead, or that British commerce is disappearing from the face of the earth? Where is the proof? We have given too much attention to the partial statistics of the "fair traders," whose only nostrum for saving us from foreign rivalry is to exclude it, and thus deprive us of the greatest stimulus we have to exertion and enterprise. There may, as Mr. Flux admits, be evidence of loss or of too slow progress in special directions, but then, on the other hand, "there is a great mass of trade in which sufficient progress is being made to nearly or quite counterbalance" the losses thus made. "Where are the (foreign) gains—in what trades?" There is no explicit answer to these questions. The truth is, our censors and croakers have been looking only at scraps and corners of trade statistics which

indicate slight losses here, and partial decreases there, but never take the trouble, perhaps hardly know how to get at the broad results and great volume of our foreign trade. This is what Mr. Flux has attempted to do. He has compared British exports with the most authentic estimate of the exports of the world—that formed by Dr. von Juraschek; and the conclusion he comes to—is bound to come to—is that British trade, though it necessarily fluctuates, sometimes very greatly, has kept, and is still keeping by a long way, its lead in the commerce of the world. Mr. Flux gives in a series of diagrams a vivid picture of his results and conclusions. Among other things he shows us that Germany, though an energetic rival, is far from being our greatest. In some things Belgium's rivalry is more serious, and is not dangerous merely because of the smallness of the country. Our real rival and most powerful competitor is the United States. Her competition is already close. Only within the last fortnight she has carried to the Clyde quantities of pig iron 10s. a ton cheaper than it could be procured at home; while a Clyde shipbuilder has given an order for 5,000 tons of steel ship plates to an American firm, which can send them from the States at a figure much below what the British manufacturer demands. This is a competition that will increase, and will tax our manufacturers' energies to cope with far more than the competition of Germany. America has also vast stores of mineral wealth hardly more than tapped yet. But as yet even her competition need not frighten us. She *may* some day take our place in the van of commerce; but that day is a long way off, and is not certain of ever arriving.

The Panawal Tea Company.

The Secretary-Director of this company does not naturally like our remarks about his company, as the subjoined letter sets forth. At the same time the facts are unfortunately in favour of our contention, although we did not accuse his board of "dividing profits up to the hilt," as he implies in his letter. Does it not, however, stand to reason that the 8 and 10 per cent. dividends of 1894, 1895, and 1896 were ill-advised in face of the fact that only 2 per cent. could be declared for last year, of which nearly one-half was drawn from the balance forward. Mr. Batten should turn to the record of the Eastern Produce Company, which, with a capital cost of about £30 per acre, prefers to set aside about 40 per cent. of profits to reserves, rather than increase its dividend above 7 per cent. If the Panawal Board had followed this policy in past years it would not have had to make such a poor display this time :—

To the Editor.

Dear Sir,—I have read with some interest the article in your issue of the 8th inst., but, is it entirely just so far as the Panawal Company is concerned?

If your critic had taken the trouble to examine the Report he would have found that the capital cost per acre for "Tea in full bearing" when the company was formed was £52 7s. 7d., as against, on December 31 last, £38 12s. 11d. per acre, showing a reduction in capital cost per acre since the formation of the company of £13 14s. 8d., say about 25 per cent.

The directors might have treated the balance of the proceeds of the sale of Ranegama, less cost of factory, some £500, as profit available for distribution amongst the shareholders, had they not thought it wiser to continue their policy of writing down the cost per acre of the "Tea in full bearing."

I think in common fairness you ought not to have overlooked these facts. Your financial critic on tea does not seem to go into the capital cost per acre of "Tea in full bearing," as shown in each annual report.

If the directors had pursued the policy that you seem to indicate of paying up to the hilt, how could they have written down the cost of "Tea in full bearing" by 25 per cent. since the formation of the company?

He also overlooks the fact that the Coolie Advances are valued in the balance-sheet at 11·41d. per rupee, while the present rate of exchange is about 1s. 4d., a further reserve of some £200, in addition to the £230 "reserve fund," which sums, if taken into account, would further reduce the present capital cost per acre.

Surely for a tea company a better "reserve" (for which your critic clamours) could not well be found than by gradually writing down capital cost per acre. J. H. Batten.

Troubles of Austrian Traders.

"Fair" traders at home should carefully read and inwardly digest the complaints uttered by Austrian manufacturers and traders at a conference which has just been held at Vienna. While our "Fair" traders never miss an opportunity of urging renewed protection in this country and the shutting out of foreign competition, Austrian traders are complaining that high Customs tariffs and the absence of foreign competition are ruining them. There were other complaints, especially of the Austrian iron ring, which was denounced as one of the most serious obstacles to the development of native industry; but the Customs dues "which excluded foreign competition" were looked upon as worst of all, because, in excluding outside competition, they fed and nourished rings and monopolies. The Hungarian Government devotes constant attention to the development of native industry, with the result that trade there is in a tolerably healthy and vigorous condition. But the Austrian Government seems to have no time, perhaps hardly even the opportunity, to consider trade questions. It cannot even get the *ausgleich* with Hungary renewed, though that is considered of the utmost importance for Austrian trade. As for Customs tariffs, the inadequacy of inland navigation and of railway communication, the high railway rates, and the lack of facilities for obtaining credit, the Government might consider how to reform them, but the members of the Reichsrath will discuss nothing but what has been aptly described as the sterile nationality question. It was suggested at the conference that a separate party should be formed, devoting itself exclusively to the interests of trade. An energetic commercial party might do much good. Certain it is that unless Austrian traders and manufacturers set about energetically helping themselves, their condition must get steadily worse. Trade rings and high Customs dues mean trade ruin in the end.

Critical Index to New Investments.

City of Sheffield.

The corporation will receive offers for loans in sums of £100 and upwards, on mortgage of the rates, to be repaid in six months. Interest March 1 and September 1. Corporation is also prepared to receive offers of loans of £50 and upwards on deposit, interest due same date. A mortgage will be granted to depositor, but he will have to pay the *ad valorem* duty of ½ per cent. This sort of business is more for insurance companies than for the general public.

Joseph Crosfield and Sons, Limited.

This company was formed in July, 1896, to acquire the business of Joseph Crosfield & Sons, Bank Quay Soap Works, Warrington, established in Waterloo year. In addition to soap the company are manufacturers of caustic soda, silicate of soda, and chemically-pure glycerine, being contractors to her Majesty's Government for the last-named article. During the past year the businesses of Messrs. D. C. Keeling & Co. and Messrs. Medley and Son, soap manufacturers of Liverpool, have been purchased and absorbed by the company. More working capital is now needed for extensions and additions to the works and plant, and the Manchester and Liverpool District Banking Company are therefore authorised to receive subscriptions for an issue of 20,000 5 per cent. cumulative pre-preference shares of £10 each at £11 per share, being part of an authorised issue of 25,000 shares. The capital already in existence consists of £150,000 ordinary and £150,000 5 per cent. preference shares, all of which is held by the directors and members of the Crosfield family, £150,000 4½ per cent. irredeemable first mortgage debenture stock, and £140,000 4½ per cent.

"A" debenture stock. The new issue, of course, ranks before the existing preference shares, and is entitled to repayment of capital at £11 per share. The assets standing in the books at the date (not given) of the last stock-taking, together with the additional working capital provided by this issue, amount to £772,000, or presumably the assets stood at £552,000. Voisey & Worthington certify the net profits for fifteen months ended February 28, 1898, at £60,000, being at the rate of over £48,000 per annum, while the debenture interest will absorb £12,675, leaving £35,325 to meet the dividend of £10,000 on the pre-preference shares. The company has entered into a contract with Messrs. Williamson, Murray, & Co. relative to this issue, and this may be inspected; but as applicants have to go to Warrington to do so, it is not of much use to intending subscribers in London. We think it would always be well if copies of such contracts could be seen in all cities or towns where subscription lists are opened. The company seems to do a sufficiently profitable business to make the new issue a fair investment, though we should have preferred more details about the assets and a fuller statement regarding profits.

STEVENSON & HOWELL, LIMITED.

Formed to take over from beginning of the year a business of manufacturing chemists, distillers, and importers of essential oils and essences, manufacturers of colours, technical chemists, &c. carried on at Southwark, with branch offices at Manchester and Glasgow, and agencies abroad. Capital £200,000 in £1 shares, one-half ordinary and the other 5 per cent. cumulative preference; 80,000 of latter offered at par; interest March and September. Purchase price £160,000, comprising £80,000 in cash, and £80,000 in ordinary shares; balance of capital reserved to be issued when needed. Premises only leasehold with unexpired terms from 64 to 75 years. Assets of firm, December 31 last, exclusive of goodwill, stated at £72,925, but no particulars given. Chartered accountants certify profits of last ten years continuously progressive; those for 1895 being £15,130; for 1896, £15,737, and for 1897, £17,747; average for the three years £16,205, or sufficient to pay interest on present issue of preference capital four times over. A moderate investment might be made by those who know the business to be good.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

The Union Assurance Society.—In 1897 this company enjoyed a gross income of £902,285, being £65,036 more than in 1896. Of this income £454,083 came from the Fire Department, being an increase of £30,565. The Fire Department was worked at a cost of 33·38 per cent. of the premium income and losses paid and outstanding came to 56·4 per cent. Stated in money, the losses were £254,820, and the expenses and commissions £151,787, therefore the profit on the year's operations amounted to £48,058, which was not a strikingly favourable result, and the directors have wisely transferred £75,000 from profit and loss to the fire account in order to create a reserve fund to cover liabilities under current policies, the fire fund remaining at the same figure at the end of the year as at the beginning, namely, £323,539. In the Life Department 3,642 new policies were issued, insuring £1,141,594, and yielding £40,675 in annual premiums, besides £1,931 in single premiums. Of this total a small amount was re-insured, and the net premium income for the year amounted to £330,708, or to £24,270 more than that for 1896. In addition to this the company received £80,147 from interest on invested funds, and £27,797 as profit on investments sold, so that its entire income in this branch amounted to £438,702. Claims absorbed £194,458, including those arising upon twenty-one endowment policies, and expenses and commission took £58,124, being 17·58 per cent. of the premium income, which was fairly high, but still ·39 per cent. below the ratio of the previous year. The net rate of interest actually realised on the total funds, productive and unproductive, was £3 16s. 5d. per cent. after deducting income tax, and the directors say that, with the view to maintain the rate of interest, certain changes in the investments have been made, resulting, amongst other things, in the realisation of the substantial profit above-mentioned. They add, further, that they have satisfied themselves that the values at which the investments stand in the society's books are in every way justified, and that, while no investment has been written up in value, those which have fallen in price have been written down to their market value at the end of the year. This is a fair and straightforward method of dealing with investments. After meeting all outgoing surrenders, cash bonuses, claims, &c., a balance of £175,470 was left, which, being added to the Life Assurance Fund, brought it up to £2,155,329 at the end of the year. The society has a paid-up capital of £180,000, and a Life reserve fund of £350,000, forming additional security to policy-holders over and above the Life Fund already mentioned and the uncalled capital of £270,000. The bulk of the Life and other funds are invested in securities within the United Kingdom, but in the Life Department about £413,000 is invested in Indian, Colonial, and foreign stocks.

The Anglo-French Exploration Company, Limited.—The report of this company for the year ended December 31 last does not strike us favourably; for one thing, it is not frank and straightforward. Reading it cursorily, one would imagine that the company was really making way, but it does not appear to be doing anything of the sort. A balance of £96,862 is brought out at the credit of profit and loss, but it is subject to the deduction of £38,344 due to the managing director in South Africa, and to £24,508 written off for "ascertained losses." Deducting the £62,852 thus reached from the credit balance there is only about £34,000 left which could with any stretch be called "profit," and had it not been that a balance of £104,474 remained to the credit of this account from the previous year, and that £50,000 is taken from the reserve fund, although how it could be got out of that we are not told, the directors could not have paid the preference and ordinary dividends, still less have given £27 4s. 5d. to each founders' share of £1. The ordinary shares received 3s. for the year, and the preference shares got, of course, their 6 per cent. When these dividends are paid a balance of £36,196 will be left to carry forward, as against £104,474 brought down. This does not seem to us prosperity, especially as the company does not possess large resources in the shape of funds in hand, and has no separate investments for its reserve, while at the same time it lies under contingent liabilities amounting to £135,237. The directors state that the investments held by the company are as heretofore taken in the balance-sheet at either average cost or balance of cost. We confess we do not know what this means. It, however, was satisfactory to the board, for taken together with the cash then in hand it brought out an excess of assets over called-up capital and liabilities amounting to £460,000, of which £200,000 stands at the credit of the reserve fund. This is really a way of saying that the reserve fund is a mere excrescence or book-keeper's product, and we should very much like to know how the managing director became entitled to his £38,000. There is no information in the report worth a broker's half commission on ten shares.

The Stock Exchange.—The report of the managers of this great institution for the year ended March 25 last indicates some reduction in its prosperity. The total of the receipts was £245,631, against £266,955 in the previous year, a reduction of £21,324. Against this, expenses were only reduced £9,870, from £99,497 to £89,629, so that the net revenue for the year was £11,457 less at £156,001. Adding the balance of £33,938 brought forward, there remained £189,939 to be dealt with, and out of this two dividends, one of £3, and the other of £4 10s. per £12 share have been paid, absorbing £150,000 and leaving £34,939 to be carried forward. Receipts from entrance fees fell from £88,830 to £59,421, which was below the average of £66,126 for the past five years. At the date of the report the membership stood at 3,962, and the number of admitted clerks was 2,601, showing an increase of 104 in the membership, and a decrease of fourteen in the clerks. This would indicate an increase in the revenue for the current year. In 1876, when the new deed of settlement took effect, the number of proprietors was 268: it is now 998, and we hope this total will rapidly increase, for the ideal is that every member of the "House" ought to be a proprietor holding one or more shares. The paid-up share capital of the company is £240,000, but it has issued £250,000 3½ per cent. debentures and the total amount of its balance-sheet, including the balance at credit of income account, was £804,980 on March 25 last. The proprietors have £32,210 at the credit of leasehold redemption account and a reserve of £72,566, besides a floating debt of £80,000.

Indo-European Telegraph Company.—The receipts of this company last year amounted to £130,347, as against £123,539 in 1896. Working expenses were a little higher, so that the net profit amounted to £60,968, or an increase of £5,534. The board with characteristic caution increased the amount placed to reserve by £5,000 to £15,000, and then paid the usual dividends and bonus, equal to 10 per cent. for the year, carrying forward £9,073 as against £7,704 brought in. The reserve will then amount to £292,276, and is wholly invested in high-class securities. The amount spent upon the undertaking is written down each year, and now stands at only £363,529. Needless to say, the trading and cash balances are much in favour of the company, and after paying the dividend and meeting trading liabilities, it has nearly £80,000 to its credit on this account.

City of Santos Improvements.—The weakness of the Brazilian Exchange has unfavourably affected the revenue of this company, and after writing off £1,843 on this account, the profit for the past year was £7,702. This permitted of the redemption of £591 of debentures and a dividend of 5 per cent. on the preferred ordinary capital. Last year the same dividend was paid, £1,000 being placed to reserve, and £1,675 written off debenture issue expenses. The company has entered into a new water contract, practically on a gold basis, with the State Government and, the new capital having been placed, the works are being rapidly pushed forward A loan of £24,800 has been raised, and the existing debentures amount to £17,900, which is not a heavy debt for this company with £100,000 of preferred ordinary capital, to say nothing of £35,000 of deferred ordinary. The reserve fund amounts to £7,210, but is wholly in the business.

Great Northern Telegraph Company of Copenhagen.—The preliminary working account of this company shows that the traffic receipts for last year, after allowing £17,070 for loss on exchange, amounted to £346,267, or an increase of £13,186. Working expenses were £4,504 larger, but interest and sundries came to

very much less, and the net revenue of £324,224 was below that of 1896 by £27,313. The usual £10,000 of debentures are redeemed, and £21,111 is placed to amortisation account, or half the amount so contributed a year ago. Only £77,777 is placed to reserve, or £5,556 less than for 1896, but the dividend is maintained at 10 per cent., and the sum of £61,057 is carried forward, or slightly more than was brought in. The company is in splendid financial condition, for the outstanding debentures only amount to £160,000, and the reserve stands at £1,158,918, being almost wholly invested in high-class securities. Trading balances are of course in favour of the company, and the share capital is only £1,500,000.

Alagoas Railway Company.—Although the receipts of this line fell off last year, working expenses were reduced still more, so that the surplus of 89,024 milreis compares with 68,058 milreis for 1896. This profit, however, had to bear £2,596 for charges in England, and this left only £50 as the net profit, as against a net loss of £31 for the preceding year. The Government guarantee, amounting to £41,799, was, however, paid, and this allowed of debenture interest being met, £2,261 of debentures to be redeemed, and dividends amounting to 4 per cent. to be declared upon the ordinary shares. After this the balance forward will be increased by £1,326 to a total of £13,240. It is an unfortunate showing, and no one can be surprised that the position of these Brazilian guaranteed railways is less and less liked.

San Paulo Gas Company.—The bad conditions of business in Brazil last year were reflected in the diminution of the revenue of this company by £5,295 to a total of £96,208. In addition, the loss on exchange was greater, amounting to £3,927, but £1,000 of this was met by a deduction from reserve. After placing, as a year ago, £10,000 to contingency account, the net profit was returned as £24,825, or only £1,796 less than the previous year. This permitted of the payment of dividends equal to 10 per cent., and the carrying forward of about the same amount as was brought in The expenditure upon fresh works, on account of the new contract, is being proceeded with, and it is intended to raise a sum in debentures not exceeding £50,000 to provide funds for this purpose. In the meantime, we might mention that the reserve has diminished by £2,637, and the £20,000 that ought to be in the contingency account has disappeared from the balance-sheet. Doubtless the sums have been used in the new extensions, but nothing is said about them in the report. For all it says, they might have been non-existent.

Australian Mortgage, Land, and Finance Company.—Not only can no progress be reported towards the very fine position formerly occupied by this company, but the shareholders have to face a further reduction of profits which, for 1897, were only £42,640 compared with £54,093 in 1896. The consequence is that the dividend has to be lowered to 7½ per cent. for the year, as against 10 per cent. a year ago, 12½ per cent. for 1895, 15 per cent. for 1893 and 1894, 17½ per cent. for 1892, and 20 per cent. for 1891. It is fortunately seldom that shareholders in a sound and well-managed concern such as this have to abide with such a progressive reduction in dividend, but the directors are not to blame, and in face of the difficulty of getting good business we think they have done very well. The continued decline in profits is the outcome of the policy adopted at the time of the Australian crisis, when not only crippled but diseased financial institutions were assisted along to drag out a miserable existence and to be a mill-stone round the neck of enterprise and progress for years. Apart from this fundamental reason for the continued depression the report tells us that the past season in the Australian Colonies has again been severe, causing a considerable loss in sheep and a poor lambing. Recent advices, however, state that rains have now fallen over the greater part of the colonies, and prospects are, in consequence, brighter. The steady rise in the price of wool, which manifested itself at the opening sales of the year and attained further development during the second series just closed, is also a satisfactory feature. The movements shown by the balance-sheet include a trifling reduction in advances on wool, but an increase of £170,000 in loans on land and stock, which with the value of properties, amount to nearly two millions. Cash in hand and bills receivable now stand for £35,849, whereas a year ago the item included short loans in London, and figured for £283,872. Of the difference another hundred thousand pounds has been put into investments, which with the holding of Consols, now amount to £955,000. On the other side debentures are £77,000 less, and bills payable £93,000 less, against which there is an increase of £180,000 in sundry creditors and customers' balances. The position disclosed is sound enough, and the fact that the total of the balance sheet exceeds 3½ millions, and was under 4 millions at the end of 1892, when the company was paying high dividends, shows how solid the business was then, and how well it has been kept together.

John Barker & Company, Limited.—Although this company pays such a high dividend, we cannot commend the manner in which profits are divided. The gross profit of £148,942 was only £855 more than in 1896, but working expenses were considerably higher. Despite the fact that less was set aside to repairs and depreciation, the net profit of £52,410 was £4,317 less than in 1896. Yet the same dividend of 13⅓ per cent. was declared upon the ordinary shares, which permitted a distribution of £2 4s. 6d. per £1 management share, or at the rate of 225 per cent. Only £1,000 was put to reserve out of revenue, as against £7,000 a year ago, and the amount forward is slightly higher. The sum of £63,000 received as premiums upon new shares was certainly placed to reserve, raising its total to £75,000, but the paring down of the allowances for reserve, depreciation, and repairs is not a happy sign. The present year, we believe, has opened badly in this trade, and the company will have to provide dividend upon the £40,000 of new ordinary capital, which if the dividend is to be maintained, will mean an increased charge of about £5,500. The allocations to reserve and depreciation, however, will not surely bear any further reduction. The directors show a remarkable desire to drop off this board.

London Trust Company.—As usual, this company does not publish a list of its investments, so that the report tells one very little. The £2,013,077 of investments and loans yielded a revenue of £84,083, and after meeting expenses and debenture interest, the balance allows of 4 per cent. being distributed on both preferred and deferred stocks. The sum of £1,546 is placed to reserve, and the balance of £5,257 carried forward is slightly higher than the sum brought in. The amount placed to reserve has been devoted to writing off the value of securities, and so the reserve remains at £40,000. Nothing definite is said about the market value of the securities, the only remark being that the value is slightly better than at the corresponding period of last year. Last year the report stated that the value of securities was slightly less than that of the preceding year, but when that year is referred to, it is found that the only statement about them was to the effect that there was a considerable improvement in the value of securities generally. All this does not bring light as to what the market value of the securities held really is, and this manner of giving information is quite in consonance with the policy of a board that does not publish a list of securities. We never exercise faith in these cases.

Highland Tea Company of Ceylon.—For a small company this one's record for last year was not bad. There was a moderate increase in the output, but the average price realised per pound was nearly ½d. less, while exchange, of course, operated against it. The net profit of £2,371 was therefore £200 less, but it permitted the board to distribute 7 per cent. in dividends, or the same as last year, and to write off £260, the balance of the preliminary expenses. In doing this the balance forward was reduced by £129 to only £75. Although last year was a bad one for the industry, we should have preferred to see this company distribute at least 1 per cent. less in dividend, and so have prevented the capital cost of the block rising. It is too freely assumed that matters will mend this year, and companies of this class would have been wiser if they had kept more in hand to meet the uncertainties of the future.

Poonagalla Valley Ceylon Company.—The coffee crop of this company failed almost entirely last year, but that does not mean much. With 53,500 lb. more of tea secured the total revenue fell off £997, as the price of 7½d. per lb. obtained was nearly 1d. per lb. less. Expenses were higher owing to the special causes affecting the industry, and the result was a gross profit of £1,168, against £2,845 for 1896. After debenture interest and general charges had been met the beggarly net profit of £207 was left. In this parlous state of affairs the board waived their fees, and as £362 was brought forward, a dividend of 3 per cent. was declared, as against 6 per cent. for 1896, and the miserable sum of £44 was carried forward. It would have been better if less had been distributed in dividend last year, and no dividend at all paid this year, for we note that the capital account continues to rise, while liquid assets are very small. Further capital will probably have to be issued, and the poor condition of the company perhaps made worse.

The Debenture Securities Investment Company.—We have always liked the frank way in which the affairs of this company have been put before its shareholders. The wisdom of this policy seems to be having its reward, for in the report for the year ended March 31 last we are told that the proprietors allowed the directors not only to pay 4 per cent. on the preferred stock and 5 per cent. on the ordinary stock into which the 40,000 shares of the first issue have been converted, but to set aside £13,350 to the reserve fund, which thus in three years has been raised to £34,150. In addition £210 has been written off preliminary expenses, and all current charges met, a balance of £36 being left to carry forward. Securities have appreciated £3,279 over cost price, but this appreciation is quite rightly not taken into the balance-sheet. A full list of investments is appended to the report, and shows that the money in the company's hands has been widely distributed.

The Ferreira Gold Mining Company.—This is in several respects the model company of the Transvaal as far as gold mining is concerned. It is not such a great company as the Robinson, but its board has followed a much more conservative and satisfactory policy in regard to its capital, which has not been inflated at all. On the contrary, it remains at the modest total of £90,000, and developments have been met very largely out of the revenue. No wonder, therefore, that the dividends have been good and that the shares should stand at a very high premium. Last year the cash profit amounted to £358,700, and a balance of £165,602 was brought forward from the previous year. This gave £524,302 for distribution, and £80,244 of this was expended on capital account. Another £270,000 was devoted to the payment of dividends, and a balance of £174,058 was left to carry forward. The dividends came to 300 per cent. for the year on the paid-up capital. Large amounts were written off for mine development and depreciation, and, with all this allowed for, the total balance at the credit of profit and loss in the balance-sheet is about £430,000. If a long life could be guaranteed to this company it would be the most desirable investment the Rand could offer, but its life will probably be brief.

Submarine Cables Trust.—For 1897 the revenue was £23,156, including £159 brought forward. Both the October and April coupons for last year were met, the balance of 10s. due on the April one having been paid in July. The money was also in hand for the coupon due on the 15th inst., which has been duly met. After meeting the expenses of the Trust, which amounted to £1,560, and paying these coupons a balance of £20 is left to be carried forward, so that there is nothing much to come and go upon. The trustees

state that they have sold the balance of the Anglo-American Telegraph deferred stock held for the Trust, and got £69,200 for it. This money has been reinvested, in accordance with the Trust Deed. We hope the new investments will help the revenue a bit, but of what do they consist ?

Royal Mail Steam Packet Company.—The disturbed condition of Brazilian affairs has, of course, had a bad influence on the earnings during the past year, particularly in the second six months, owing to the Government of Brazil curtailing their subventions in aid of immigrations, to stagnation of trade there, and to the bad effect of the further fall in the exchange. In addition, the bad harvest in Argentina, and the condition of West Indian interests were also factors in the decline of freight and passenger receipts. The falling off in the latter compared with 1896 was as much as £30,000, while receipts from freight were £3,800 less, and even Government contracts and postal services yielded rather less, the total earnings being £741,045, as against £776,549. On the other hand, expenditure increased by £5,726, which is moderate, considering that 47,000 additional miles were run. The amount transferred to meet repairs of the Fleet is consequently only £65,000 compared with £95,000 a year ago; the usual sum of £47,700 is carried to insurance account, and £68,698 is written off for depreciation compared with £80,707. With the reduction of £42,000 in these appropriations there is a balance carried forward to profit and loss account of £10,758, against £9,980 in 1896, in spite of increased expenses, and the substantial reduction in receipts. Shareholders again receive two dividends for the year of 30s. each, which absorb £45,000, and £5,000 is transferred from the insurance account to repair and renewal account, which partly makes good the smaller appropriation from profit and loss, and the reserve of the insurance account remains at £250,000, to which it was recently raised. This is not a grand start for the new chairman to make, and the outlook at present does not indicate that the current year will be any better.

Union Steamship Company.—The report states that the trade and commerce of South Africa, and in consequence the company's receipts, have been materially affected by the rinderpest and prolonged drought. From this statement, and the fact that the amount available, after providing for depreciation, coal, wages, and other expenses, is £177,922 as compared with £155,142, we may conclude that less has been allowed for depreciation, or else that expenditure has been cut down. It is, however, impossible to learn what has been really done from the few particulars given in the thing the directors call their profit and loss and revenue account. Of this amount £125,000 is transferred to insurance maintenance, wear and tear and reserve account, and a dividend of 5½ per cent. for the year is paid on the share capital. While the reserve and insurance accounts have been further strengthened, the net cost of the ships has been written up from £1,229,927 to £1,341,720, and the net cost of property and plant from £90,178 to £137,565. The dividend is ½ per cent. better than was paid for 1896, but whether the directors are justified in paying it is not clear. It is, however, considered good enough to ask for an addition of £500 to their salary. Direction stands in the present accounts for the fairly substantial sum of £2,417, equal to over 6 per cent. of the dividend paid to shareholders, and the company has not been doing at all brilliantly for several years past.

Vienna General Omnibus Company.—During the half-year ended December 31 last, the number of omnibuses at work was twenty-eight in excess of 1896, and the receipts increased by 70,676 florins, but the addition to expenses was as much as 127,469 florins. The number of passengers carried rose from 7,621,000 to 8,365,000, and 4¼ kilometres were run against 2½, but all this extra work proved expensive, for the average daily earnings per horse dropped from fls. 2.61 to fls. 2·37. Receipts are said to have been affected for several months by many of the leading thoroughfares being broken up by the municipal authorities for laying down a new service of gas pipes, which not only diverted the 'buses from their established routes and turned traffic over to the tram cars, whose lines were left undisturbed, but largely increased the expenses by the extra mileage necessitated by the obstructions. Expenses were also affected by the serious advance in drivers' and conductors' wages, and provender cost more, and although efforts to improve matters were made by keeping down outlay on maintenance of carriages, harness and buildings, the available balance carried to revenue account is only £4,054 compared with £8,787 a year ago, and after paying debenture interest the profit for the half year is £2,062, against £6,590. This profit, added to £8,048 brought forward, gives £10,111, and an interim dividend is to be paid at the rate of 5 per cent. per annum. This is a poor result from a concern having a share and debenture capital of £134,000, but shareholders are cheered by the prospect of increased traffic in the summer from the opening of the International Exhibition, and from the celebrations of the Imperial and Royal Golden Jubilee.

Buenos Ayres (New) Gas Company.—The profit of this company in 1897 was £1,663 less than in 1896, and while debenture interest was a little lower, the sum of £10,335 was written off as depreciation as compared with £7,054 a year ago. The net profit of £34,681 was therefore £4,308 below that of 1896, but the directors were able to declare 6 per cent., or the same dividend as last year, and to carry £792 more forward. There was, however, no allocation to reserve, whereas a year ago £5,000 was placed to that fund. But it is better policy to pay close attention to depreciation rather than heap up a big nominal reserve at the cost may be of the assets. Another wise step has been the writing off of the amount of £13,919, standing to the credit of renewal account, from the sum set down as representing service pipes and meters in use and in stock. Even then the item stands at £54,149, and naturally in time renewals must be needed. In the year, the old £200,000 of 6 per cent. debentures were converted into £220,000 of 4 per cent. debenture stock. The operation, however, appears to have been very costly, for in addition to the increase of £20,000 in principal, £18,906 had to be set down for discount and expenses, There should, however, be a saving of £3,200 a year from the conversion, and it would be prudent to set aside this saving, or a good portion of it, to wipe out the amount, which cannot be considered a satisfactory asset. We notice that the assets have been swelled by Deuda Consolidada, valued at £24,965, and we hope this paper evidently received in payment of the Municipality debt will prove better secured than the old Municipal bonds. The South Barracas Company still appears to be a moderate drain upon the undertaking, but taken as a whole the balance-sheet has improved considerably.

Pacific Loan and Investment Company.—After providing for debenture interest and all charges for the past year, the available balance is £19,313, against £20,603 at the end of 1896. The dividend is again 6 per cent., and the reduced balance of £8,063 is carried forward. The directors say that the maintenance of better prices for grain has improved the position of many of the company's borrowers. On the other hand, partial crop failures following years of low prices, and so affecting certain borrowers, have made it needful to effect some further foreclosure, with the result of iucreasing the total holdings. Sales amounting to £11,892 have been effected during the year at a gain to the company of £4,241, which amount has been passed to the credit of the "Foreclosed Properties Suspense Account." The balance-sheet shows that against £392,900 of debenture stock, the share capital is £187,500 paid up, and £562,500 uncalled, and there is also a reserve fund of £85,000, but this is not separately invested in securities. Amongst the assets, mortgages, loans, &c., have diminished from £534,000 to £510,000, while foreclosed properties have increased from £91,513 to £109,515. With 17 per cent. of their mortgages on their hands the directors should be thinking about improving the look of their balance-sheet, even at the cost of dividend.

West Flanders Railways.—The general revenue account of this company for the half-year ended December 31 showed a surplus of £37,324. The sum of £3,529 is set aside to various reserves, in addition to which £4,100 had been spent in redeeming bonds. A supplementary dividend of 2s. 4d. per share was then declared on the preference shares, making the dividend for the year 13s. 4d. per share, and 9s. 3d. per share was distributed on the ordinary shares, making the total return for the year, on those shares, 15s. per share. These are the highest dividends yet declared by the company, and the directors have signalised the event by establishing a general sinking fund, which they started with a contribution of £1,200 for last half-year. The sum put to this fund may, according to circumstances, be either reduced or increased with a view, on the one hand, of maintaining as far as possible the rate of dividend latterly paid, and on the other, of accumulating such a sum as will more completely attain the object of the board and provide for any possible depreciation in the assets of the company. One cannot imagine an English company doing the like.

THE UNITED STATES AND SPAIN.

President McKinley's Ultimatum.

The American President signed the joint resolutions of Congress on Wednesday morning at 11.24, and soon after signed a dispatch containing an ultimatum to Spain. A copy of this was handed to the Spanish Minister at Washington, who immediately demanded his passports, and as promptly received them. The ultimatum was presented to the Spanish Government by General Woodford, the American Minister at Madrid, yesterday evening.

The Spanish Queen's Speech.

The opening of the Cortes at Madrid on Wednesday afternoon presented a scene of great brilliancy and enthusiasm. The Queen Regent read the Royal speech, sitting on the throne, while the young King occupied a seat near her. The speech is quiet in tone. It begins by acknowledging with gratitude the intervention of the Pope, and the friendly attitude of the Great Powers; and then says:—

It is possible that an act of aggression is imminent and that neither the sanctity of our right nor the moderation of our conduct nor the express wish of the Cuban people freely manifested may serve to restrain the passions and hatred let loose against the Spanish Fatherland. In anticipation of this critical moment, when reason and justice will have for their support only the Spanish courage and the traditional energy of our people, I have hastened the assembly of the Cortes, and the supreme decision of Parliament will, doubtless, sanction the unalterable resolution of my Government to defend our rights, whatsoever sacrifices may be imposed upon us to accomplish this task. In acting thus in unison with the nation I not only perform the duty which I swore to fulfil when I accepted the Regency, but I also seek to strengthen my mother's heart with the confident belief that the Spanish people will display a force which nothing can shake until the time when it will be given to my son to defend, in person, the honour of the nation and the integrity of its territory.

The following is the concluding paragraph of the speech:—

Even though the future shows dark before us, even though difficulties surround us, they will not be beyond the powers and energy of the country, which in the end will triumph. With an army and navy whose glorious traditions make courage even more courageous, with a nation united as one man in the face of foreign aggression, with faith in God who has always aided our ancestors in the great crises of our country's history, we shall, with no less honour than of yore, pass through this new crisis, which it is sought to bring upon us by provocations devoid either of reason or justice.

Under the liquidation of the London and Universal Bank, Limited, Mr. Samuel Wheeler, the liquidator, announces that a third and final dividend of 2s. 6d. in the pound has been declared, and that it may be received at his office, 33, Carey-street, any day except Saturday, between 11 and 2.

TRADE AND PRODUCE.

War, the apprehension of which has been such a disturbing element in our increasingly prosperous trade, must now be regarded as close upon us. The American ultimatum was presented to Spain yesterday. Next week may probably witness the commencement of hostilities. It is too soon to venture on an estimate of its probable effect upon trade; but, if it benefits some portions of our business, it must seriously damage others. The shipping industry will, no doubt, be the first to feel its evil effects; and this is all the more unfortunate in that our shippers were evidently entering on an exceptionally busy season; and freights have been going up for some little time. Much will, however, depend on what may be declared contraband of war, and whether either or both combatants contemplate the issue of letters of marque to privateers. There seems a belief or impression that the United States will not do so; perhaps even Spain may also refrain. Nothing certain is known on the subject. The gunmakers of Birmingham will lose nothing by war. It is likely to make good to some extent the loss put upon them by the closing of the Persian Gulf ports to the importation of arms. Wheat dealers may be said to have been preparing for the approaching struggle for some time. Prices have gone up from 1s. to 3s. per quarter within these last ten days, and they are pretty certain now to go up further. It is just possible, however, that the likelihood of war was not responsible for all this rise. Home stocks had undoubtedly diminished a good deal, and large shipments were looked forward to for their replenishment. American dealers have been for some time hurrying off wheat cargoes before the expected declaration of war should interrupt the trade, and a considerable quantity of wheat must now be on the sea on its way here. The cargo market has been kept active for weeks by the steady Continental demand—much of it possibly for the replenishing of Spanish stocks. Prices for spot and futures have alike gone high—about a shilling further advance being netted on Wednesday in spot as well as in futures.

If coal is not declared contraband of war, the disturbance caused in that market by the stupid strike of the Welsh miners would be considerably intensified; for Spain, in the event of war, would require large supplies of coal for her navy. No doubt she has been looking during these last few weeks to the augmentation of her stock of coal, but it is now such a prime necessity in naval warfare that she could hardly have yet got sufficient to carry her very far. But the general expectation seems to be that coal will be declared contraband of war; and, if so, our coalowners will lose many good fat orders, and Spain will be very adversely affected in her naval operations. It may be noted that the Scotch colliers who demanded a shilling a day increase in wages, have had their demand conceded, and so a strike in the Scotch coal trade has not been added to that in South Wales. The owners preferred to pocket the high prices going to entering upon a contest with their workmen.

It does not seem as if the iron trade will be greatly affected by the outbreak of war. Of course, if prolonged, it must affect the imports of raw material; but it will be some time before that can be felt. The general position of the iron trade is excellent. The results of the quarterly meetings are regarded as encouraging, and better rates are quoted in some instances, while, in every case, old rates are well maintained. Scotch iron and steel makers are reported to be so pressed with orders that they can make their own terms, and most of them have a year's work secured. The Glasgow market was surprised—perhaps a little fluttered—by the arrival of a sample of pig-iron from America at 10s. per ton below the price at which it could be got at home. If the sample was up to specification a considerable further importation was expected; but that expectation may not now be fulfilled. Another fact is worth noting. Clyde shipbuilders are very busy, and the demand for ship plates has consequently been large; but British makers have so raised their prices that a Clyde firm placed an order for 5,000 tons of ship plates with an American house on terms lower than he could command here. It is a fact that may show how the wind blows; and British manufacturers may make a note of it. Whether the war will interfere with the delivery of the order remains to be seen. British ship plates have been quoted as high as £5 15s. per ton. Iron settlement prices on Wednesday were:—Scotch, 46s. 1½d.; Cleveland, 40s.; hematite, 49s. 7½d.

Copper, which early last week showed little alteration in value, took a sudden turn upwards towards the end of the week. On Friday the price had risen 10s. per ton from the 7th inst. There was a good deal of buying, apparently in American interests. The reason for the sudden rise is not quite clear. There has been no falling off in imports. Messrs. James Lewis & Son state that up to the 18th the imports had been 4,898 tons, and the deliveries 6,042 tons greater than last year. During the last fortnight stocks have increased 1,113 tons, and the visible supplies 1,452 tons. The larger part of the recent imports have been from the United States, but after to-morrow they must be considerably checked if not altogether cut off. There has been great activity in the market during the week, with an almost continued rise in price. On Wednesday there was at one time a further gain of 5s. to 6s. 3d. per ton, but before the close there was a fall of 2s. 6d. from the highest point. On Second Change, Messrs. Lewis Lazarus & Sons state, 400 tons sold at £51 17s. 6d. and 16s. 3d. cash, £51 18s. 9d. for May 11, and £52 7s. 6d. three months. Settlement price for standard, £51 17s. 6d. net.

Wool is somewhat unsettled. There has been no marked alteration since the last auction sales, and possibly not much may be expected until we have some experience of what the sales opening on May 3 are likely to turn out. Manufacturers did not respond very willingly to the sharp rise in prices at the last sales; and there is not much demand for any but merinos and the finer class of wools. In Leeds the cloth trade is rather dull as yet; but the prospects for the season are considered good, especially in the finer materials. There is depression in Leicester, though the yarn market is fairly active. In Huddersfield, however, there have been numerous orders for inferior and medium worsteds and serges, and for tweeds, which can be made into suitings at low prices, while in the finer makes of plain vicunas and serges and of fancy worsteds there is a steady business, though hardly up to the average, owing to the absence of an active Continental demand. The River Plate wools auction at Liverpool on Wednesday was well attended, and a fair business was done, though at a slight reduction for merinos and crossbreds.

THE PROPERTY MARKET.

The Mart has now recovered from the holidays. These told rather heavily upon business this year, the total for Easter week being only £28,785, in contrast with £62,605 for the same period last year. Yesterday week the total realisation was £15,285, consisting largely of freehold property. This was also the case on Friday, though the total reached only £12,580. Messrs. Dennant & Co. sold a profit rental of £150 for nineteen years, arising from the "Zetland Arms" public-house in Old Brompton-road, for £1,400, and a block of houses in Wallbutton-road, Brockley, held for seventy-seven years, at £1,550. Seven freehold houses in Farningham were disposed of by Messrs. Stimson & Sons for £1,660, and thirteen leasehold houses in Bexley for £2,490. Four freehold shops in High-street, Islington, realised, in the hands of Messrs. Hoppé & Snowdon, £4,620. Messrs. A. J. Sheffield and E. Holsworth also disposed of several lots of freehold property to ready buyers.

If the total sales at the Mart on Monday did not reach a high amount—£15,880—the attendance was good, and business brisk with the auctioneers who had engagements. Again there was a large show of freehold properties. Messrs. Moss & Jameson disposed of two freehold shops in Cambridge-road, Kilburn, for £2,740, and Nos. 28, 30, and 32, Andre-road, Battersea, went for £1,350. The total realised by this firm was £5,725. Mr. Alfred Richards sold four freehold residences at Wood Green for £3,600, and Messrs. Egood & Fuller a freehold shop in the Blackfriars-road for £2,320, about thirty-five years' purchase on the present rental. Mr. W. A. Blakemore got rid of three out of four lots offered by him in the City, in Brixton, and at Battersea, at a total of £2,310. Two farms —Wakeham's and Poff's, at Bexhill-on-Sea, of eighteen and twenty acres—were offered as building sites, but failed to attract purchasers, and were withdrawn at £17,500 and £9,250 respectively. The rage for building does not seem to have reached Bexhill yet.

They were very busy at Tokenhouse Yard on Tuesday and the sales for the day amounted to the handsome figure of £52,810. The biggest business was done by Messrs. Wriford & Dixons, who disposed of numerous lots of reversions and freehold property at very high prices. This is not surprising when it is understood that the freehold properties were situated in Holborn, Piccadilly, Leicester-square, Oxford-street, Berwick-street, Wardour-street, and Tottenham Court-road. The Paris Hotel and Restaurant, Berwick-street, freehold, rent £130, went for £3,260. The residence at 14, Dover-street, Piccadilly, also freehold, fetched £5,400, while another freehold residence in Wardour-street brought £3,560. Almost the only lot put up by this firm of auctioneers which remained unsold was the "Coach and Horses" public-house in Carnaby-street, Regent-street. Licensed properties seem to be commanding less and less attention. Five more of them were put up on Tuesday at Masons' Hall Tavern, but not one of them was sold. The rebound from the inflation in this class of property last year has been very severe. It must be noted that Messrs. E. & H. Lumley sold at the Mart the Glebe Farm, of 622 acres, at Stockton, Wilts, the Bishop of Southwark being the purchaser. The property, as we have already stated, was offered on the plan of payment by a deposit of 15 per cent., the balance spread over thirty-five years by equal half-yearly instalments. The successful experiment is likely to be widely followed.

Though the total realisations at the Mart on Wednesday amounted to only £18,750, the business was good. A leasehold residence in Clarence-terrace, Regent's Park, in which Mr. George R. Sims resides, was sold by Messrs. H. E. Foster and Cranfield for £2,250. Mr. T. G. Wharton disposed of a corner block of shop property at Walham Green, covering an area of 4,500 ft., and let on repairing leases, expiring in 1902, at £32 per annum, at £3,025. An enclosure of freehold building land at Teddington, containing nearly 3½ acres, was placed by Mr. E. Pennington, for £2,500, a price that was considered very satisfactory. Messrs. Edwin Fox & Bousfield sold a freehold ground rent of £800 per annum, secured on 54, Pall Mall, with reversion in 76½ years, for £26,700, or about 33½ years' purchase.

Mr. Rhodes has, according to a *Daily Mail* correspondent, completed a big scheme for the removal from Cape Town to Rhodesia of 10,000 Fingoes, in order to augment the supply of native labour for the mines in Rhodesia. The ten Fingo indunas who negotiated the matter have returned from Rhodesia delighted with the terms and with the country. Whole locations will be removed, men, women, children, and cattle, by railway, and the Cape Government is actively assisting in the scheme. Each head of a family will receive a title to ten acres of land, free of taxation, on condition of working a certain portion of every year, a similar arrangement to that made in the Cape Glen Grey Act. The 10,000 Fingoes represent the first batch; more will follow as they are required.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

SUN LIFE

ASSURANCE SOCIETY.

ESTABLISHED 1810.

Funds in hand exceed £3,900,000.
Total Income exceeds £600,000.

The "Perfect Protection" Policy.

LIFE OR ENDOWMENT ASSURANCES

WITH

Relief from payment of Premiums during PERMANENT or temporary illness causing inability to attend to ordinary occupation for at least two consecutive months;

Suspension of payment of Premiums to meet policy-holders' pecuniary convenience;

Immediate payment of half the sum assured on disablement by total loss of eyesight or of two limbs;

AND

Special and attractive Bonus Scheme, providing large reductions or **total extinguishment of Premiums** payable after age 60.

THE "PERFECT PROTECTION" POLICY affords the most complete and suitable Assurance ever offered to professional and business men dependent upon their own exertions.

The Investors' Review.

The Week's Money Market.

The discount market perceptibly eased off in the beginning of the week owing to the fair sums in gold arriving from abroad, but the last two days saw a sharp upward turn. Business "outright" became difficult on Wednesday, the rate for such accommodation being then quoted 4¼ per cent., and the majority of the transactions were conducted on the basis of 3⅞ to 4 per cent., "subject to half the advance in the Bank rate." When it was found yesterday that the Bank directors had made no more in the rate there was a little more inclination to take bills, but the rate for three months' remitted paper did not fall below 3⅞ to 4 per cent. The market, indeed, will probably continue to act cautiously in the present state of affairs, and in its present mood would rather lose business, as it is doing, than lock up its resources too freely. The Bank of England has taken a further step towards attracting gold from abroad by making advances free of interest for short periods to importers bringing gold over. The arrangement is understood to have been entered upon at the suggestion of the importing firms, but the mere fact that the Bank of England should adopt such a course has rather tended to increase the cautious attitude of the market. The result has been that on the week the Bank gained quite £500,000 from the foreign movements, and with the Continental exchanges standing at their present height, further arrivals seem probable. The Bank return was therefore much stronger, and were it not for the political uncertainties, a very different state of things would prevail in the market.

The figures in the Bank return do not, it is true, indicate great strength measured by the enormous interests dependent upon its power to meet demands from all the ends of the earth. The reserve is still only £19,688,000, although that is an increase of £1,254,000 on last week, and the "other" deposits, which contain the balances upon which the smooth working of other banks throughout the kingdom with liabilities aggregating £800,000,000 or so depend, are only £36,621,000, or £714,000 more than last week. Yet the position would tend to become easier through the bent of Continental exchanges in our favour, and, had we merely our own imperial interests to look to, the summer might be passed with no advance beyond 4 per cent. But there is a war risk before the market, and the Bank has only £30,270,000 in gold on hand to cover that risk and meet all home demands to boot. Therefore the Bank is still weak and the increase of £834,000 in its stock of gold, £499,000 of it in gold from abroad, since the previous return was made up counts for very little. Happily the Bank remains in control over the market, and can force it to keep rates up whether inclined so to do or not. The "other" securities have actually risen £152,000 this week to £34,239,000, and the balances of the Government departments (public deposits) have been rising also, so that, at £12,675,000, they are £679,000 larger now than they were a week ago. However inconvenient this husbanding of money by the Treasury may be to dealers in credit, it is useful just now to the Bank in helping it to keep a tight grasp over the open market. For all that, the discount houses

will do well not to let the fear of a 5 per cent. rate go from before their eyes.

SILVER.

Bar silver late last week dropped to 25⅝d. per ounce for immediate delivery, and although the price recovered to 25 11/16d. per ounce at one time, it is not particularly firm at this quotation. The monetary pressure in India, which at first encouraged purchases of the metal, has rather hurt the market for the metal there, and the quotation in the bazaars has therefore dropped back to 66½. Further discussion went on as to the chance of war affecting market supplies, but there does not seem to be any tangible reason to assume that they would be diminished. Although the balances of the Banks of Bombay and Bengal improved, there has been considerable applications for India Council drafts, chiefly on account of Calcutta. Under this influence the price for transfers has been raised to 1s. 4 3/32d., and the Council has increased the amount offered on Wednesday next to 60 lacs. Treasury balances in India are about at their highest, their total at the end of March amounting to 16 crores, and some relief should be obtained as the total declines. India exchanges have risen 3/32d. to 1s. 4 1/16d., but Chinese rates show an inclination to droop.

BANK OF ENGLAND.

Stock Market Notes and Comments.

We have again not much to say this week about the Stock Exchange. It has continued to gnaw its thumbs, in a sense, and to curse the "Yankees" for destroying business. The general feeling throughout the country is on the whole strikingly sympathetic with the American people in their present dispute with Spain, but this is by no means the sentiment prevalent on the Stock Exchange, and it is not wonderful that it should be momentarily angry instead of pleased. This Cuban affair caught our market in full career towards great triumphs in American railroad securities. Jobbers and brokers had loaded themselves up, in many instances, to the utmost of their capacity with these securities, in the full expectation that the development of prosperity in the United States this year would have enabled them to realise at very handsome profits. Instead of profits they now see ghastly losses staring them in the face, and they naturally curse. Nevertheless, they will be quite ready to commence the play again directly affairs seem to take a favourable turn, and for our part we should advise those of our readers who hold American securities to maintain a calm spirit. Good will come to the Union out of this struggle—good and perhaps also evil. Many things may be changed as the result of it, and assuredly it cannot be more than a temporary check to the development of the country's magnificent resources. It is very doubtful, indeed, whether the war will have any appreciable effect in diminishing the prosperity of American railways this year, and should it end speedily in a triumph for the United States naval and military forces, there will be no holding prices back. The risk, therefore, of keeping what one has got seems small, and the chance of an increase in the present loss not very serious.

Outside American "rails" and Spanish bonds, we may say that there has been nothing doing on the Stock Exchange beyond the struggles of speculative investors all over the country to unload what they are no longer able to carry. Readers of this Review know very well that we have insisted, to weariness even, upon the remarkable extent to which a prolonged season of cheap money has allowed the habit of private pawning of securities with banks, for the sake of the margin of interest thus obtained, to be developed. As long as money was cheap we could not point to facts in any number in proof of our statements, and the haughty man of the market scouted us as merely a "theorist," a "pessimist," and so on. Proof in abundance is coming forth now, and will be found by any one who cares to look, in the steady decline which has set in among all investment securities from Consols down to the lowest railway preference treated as investment stock. If any man will take the trouble to compare to-day's prices of British Corporation stocks, Home railways debenture, guaranteed, and preference stocks, or Colonial bonds with those of six months ago, as he can do to a sampling extent in an excellent table contributed on another page of this number, he will find that they have already fallen from 5 per cent. to 10 per cent. Some recent speculators' or syndicators' pets have even depreciated more. For example, the fall in India 2½ per cent. is, we believe, about 13 per cent. In this case weak syndicates who subscribed for the loan when it was issued at fancy prices are at the bottom of the rapid decline; but with old stocks nothing of the kind is at work. There the fall arises from the struggle of multitudes of nominal holders to escape from a position which once brought them profit, but now causes them a loss they are unable to bear. And the bankers who chirpily lent on these "first-class" stocks to all and sundry are now beginning nervously to call in their loans. So steady is the stream of this kind of selling—forced and voluntary—that the jobbers have in many cases a great deal more stock already on their hands than they care to carry, and are certainly in no mood to make further purchases. Consequently, the actual prices sent out night after night in the official list are all more or less hollow; that is to say, the quotation may be, say, 148 to 151, but the man who wishes to sell five thousand stock might, perhaps, find a jobber, after some considerable difficulty, willing to give him 145. In many cases there is no actual practical quotation, as we may call it, in these securities; they simply cannot be sold except at odd times and by driblets. And this is the result merely of an advance in the Bank rate to 4 per cent. What will the consequences be should that rate go to 5 per cent. or 6 per cent.? We must leave the answer to the imaginations of those who have been foolish enough to get caught in this trap.

But if first-class investment securities are being struck by blight in this manner on a very moderate advance in the rates for money, what is going to happen in the more or less purely speculative markets, such as those for De Beers and Rio Tinto shares, for Argentine securities, for Italian bonds, for Transvaal gold mine shares, for Rhodesian shares and Western Australian shares, with all the host of miscellaneous "industrial" shares that have been poured out upon the British public during the last five years? We ask this question, but do not attempt now to answer it. We prefer that readers should ponder over it, and think out an answer for themselves. Who would care to hold shares at the present time in a company which may have nothing in the way of substantial assets to represent the market price of its shares? Have we not been right throughout in protesting against the system of fancy market premiums, which cheap money has allowed to come into existence.

The whole machinery of modern company promotion and premium concoction is now going to be put to the test, but the resulting downfall of it may not be immediate. Readers must not run away with the notion that we expect a crisis next week, or next month : it may not come next year. What we insist upon is—and they will do well to attend to our warning — that the elements of a crisis lie around us on every side, that we are travelling towards a crisis, and that therefore the prudent man will now, while there is time, so arrange his affairs as to make himself safe against the worst that his imagination may conjure up to him as likely to happen when the crisis comes : we are merely speaking common sense. Surely this is plain enough. It is no interest of ours to "croak," for the so-called croaker is always unpopular. We warn and adjure and beseech, because we cannot do otherwise without lying.

He alone is serene in mind just now who owes no man anything, who has not pawned stock with his banker to the limits of his available capital, who has not invested his money in rubbish the touts recommended to him as "good for a rise," "an excellent 10 per cent. investment," or ensnared the simple into by such other garbage of stock phrases as the corrupt hireling may have at command.

The Week's Stock Markets.

Business has come practically to a standstill after a week of suspense, and the downward movement in all departments led by the foreign market is simply a reflection of what has happened on the Paris and other Continental bourses. The Stock Exchange generally has had to come to the conclusion that there is now very little hope of a peaceful solution of the dispute between the United States and Spain, and with the prospects of a rise in the Bank rate in the near future, none of the dealers are very anxious to increase their commitments. Needless to say the latest quotations are the lowest of the week, and in most cases the worst of the year.

In the market for Home Government securities Consols kept tolerably steady for several days, but eventually gave way in sympathy with the weakness displayed in all other markets, and the 2½ per cent. "Childers" 2¾ per cent., the Indian sterling loans, and Bank of England stock have all participated in the fall. Home corporation issues, Colonial Government and Indian Railway stocks show a considerable decline, but the heaviest falls have taken place in the premier securities of the leading Home Railway companies, large blocks coming on the market, and selling being hardly practical, dealers showing a disinclination to make prices.

The Home Railway market shared in the more cheerful feeling displayed by markets generally on Friday, when the political outlook was promising to take a more favourable turn, and the tendency has been a tolerably firm one since, due more than anything else to the fact that business has continued to be on the smallest possible scale. A collapse, however, occurred on Wednesday, although there was very little stock offering, and the latest quotations are the lowest of the week. Great Eastern has been the principal sufferer, but this was partly accounted for by the announcement of a new issue of capital to the extent of £675,000, and the traffic return was not up to expectations. Great Central issues have also been conspicuously weak, and this is also the case with the stocks of the mineral lines in the Welsh coal district, where the deadlock still continues. Some of the heavy lines expect to benefit by the dislocation of goods traffic during this dispute, and North Eastern Consols have met with rather more support than has fallen to the lot of other stocks in this market.

United States Railroad shares were comparatively steady, with dealings on a very small scale, during the early part of the week, and even the news of the resolution passed by Congress, which amounted practically to a declaration of war against Spain, did not cause much of a fall. Wall-streef operators have been adopting a waiting policy, and doing little or nothing beyond marking down quotations a trifle in sympathy with each fresh decline in Spanish stock, and there is evidently a very large speculative account open for the fall on this side.

Canadian Pacific and Grand Trunk stocks opened the week with a firm tone, and a moderate rise was established, only to be lost again, owing to the report that the officials of both companies have returned to Montreal from New York, having failed utterly to arrive at any solution of the rate war. This makes the third failure to come to a settlement of the question, and the prospects are not very encouraging. Both the traffic returns were wonderfully good, especially the Trunk statement, and considering all things the market in the latter company's stocks has been rather a good one. A sharp break quite at the last took place in Canadian Pacific

shares, in sympathy with the weakness of the American market.

Matters have steadily gone from bad to worse in the foreign market, and hardly one gleam of sunshine has penetrated through the gloom overhanging the whole list. True, prices rallied to such an extent on Friday that Spanish bonds actually closed the day with an advance of ⅛; but, as the price has since dropped 10 or 12 points, too much stress need not be laid on the temporary recovery. The Paris Bourse has been demoralised by rumours of serious financial embarrassments, followed by several failures in connection with the mid-monthly settlement. Heavy selling of Spanish bonds from Madrid has been going on all the week, and a number of failures have also been announced from that quarter. Next in importance to the fall in Spanish 4 per cents. is the big drop in all the Mexican Government stocks, due to the forced closing of weak Continental accounts, and sales by German syndicates, who apparently are afraid that Mexico may be drawn into the quarrel between Spain and the United States. All South American stocks, at all dealt in, show a big loss on the week, among which may be mentioned Guatemala bonds, the fall in this case being accentuated by the action of the authorities in fixing the duty on coffee at a lower level than had been agreed upon with the bondholders. Brazilian bonds weakened, but only to a lesser extent, the exchange being tolerably steady.

Foreign Railway emissions were again pressed for sale, and the fall amounts to something like six in several instances. Alagoas stocks were especially weak on the unsatisfactory report, and heavy declines have occurred in Buenos Ayres Great Southern, Minas and Rio, Costa Rica, Bahia Blanca Preference, and United Railways of the Havana. The old Mexican companies issues gave way in sympathy with the Government bonds, in spite of a good traffic return and the steadiness of the silver market.

Little has happened of interest in the miscellaneous section, but changes are not all in the downward direction, although nearly so. Crystal Palace debentures show a rise, the scheme of reconstruction having been approved, thereby securing new capital to the extent of £100,000. Royal Mail Steam Packet shares advanced owing to the satisfactory report; and a jump of 5 took place in Daimler Motor, while Lyons' shares have been inquired for on rumours of a 20 per cent. dividend. On the other hand Welsbach issues continue on the down grade; Coats' declined, heavy selling being indulged in by Glasgow operators; P. & O. deferred fell 5, and Anglo-Ceylon Estates 10, and falls are also noticeable in Aerated Bread, British Electric Traction, and Hudson's Bay, while telegraph, electric lighting, gas and water stocks, and most of the tea companies issues show losses. Cycle shares close weak, Dunlop deferred more especially so, and the "split" among the directors of the Syndicate Music Halls has led to a lot of selling of that class of shares. Gas Light and Coke stocks show little change, although it is reported that the company's Bill for converting its various issues is to be opposed at every stage in its passage through the House of Commons.

There was little of interest in markets during the closing hours of the week. Spanish 4 per cents. dropped still lower, making a total loss of 11½ on balance, and the last price was the worst. All foreign stocks closed weak, but there was a slight recovery in Rio Tinto shares. Home Railway stocks were again pressed for sale, with the exception of Brighton "A," which was rather inquired for. Canadian Pacific shares closed flat on heavy selling orders from Berlin, and Mexican Railway issues were very depressed; but Grand Trunk descriptions and United States Railroad shares were somewhat steadier at the last.

Mining and Finance Companies.

The South African market, after a brief period of steadiness, gave way under the influence of Continental sales, which especially affected De Beers, Rand Mines, and one or two of the other favourites of the Paris Bourse, and the result is that prices again mark a considerable fall all round. Western Australian ventures gave way in sympathy, the feature being the collapse of the "Bottomley" group led by Market Trust. Copper shares have been very depressed, Rio Tinto on heavy sales from Paris, the Mount Lyell group on the death of the chairman of the North Mount Lyell Co., and to a lesser extent to the publication of a poor return by the parent company, and Anaconda and Cape Copper and several minor concerns in sympathy with the rest. Indian shares close dull at a moderate decline.

NOTICES.

With reference to the Guatemala debt, the Council of Foreign Bondholders is informed by the Minister of Guatemala in Europe that he has received a telegram from the Minister of Foreign Relations in Guatemala, of which the following is a translation:—"Assembly reduced coffee duty 81. Government disposed to assign other revenues or to enter into arrangements with the bondholders. Make this known.—Anguiano."

The Bank of Montreal will pay, on and after May 2, the half-year's interest due on May 1 on the Province of Quebec 5 per cent. loans of 1874 and 1876.

The British Bank of South America, Limited, notifies the bondholders of the Mogyana Railway Company 5 per cent. debenture loan that the interest thereon due on the 1st prox. will be paid by it on and after Monday, the 2nd prox.

Messrs. Glyn, Mills, Currie, & Co. notify that they are prepared to pay, on the 1st prox., the coupons of the Uruguay 3½ per cent. consolidated debt due on that date.

The Bank of China and Japan, Limited, intend to make, on May 14 next, a final repayment of 10 per cent. to depositors in the Bank of China, Japan, and the Straits, Limited (in liquidation), who will then have received the full amount of their deposits, with interest at 4½ per cent. per annum to above date. This anticipates the date (October 31, 1899) fixed under the reconstruction scheme for final repayment, by about 18 months, which must be gratifying to those concerned in the liquidation, and should induce confidence in the new institution.

The result of the poll of the London and Northern Assets Corporation, Limited, on the resolution for the adoption of the scheme proposed by the directors for the amalgamation of the Corporation with the London & Northern Debenture Corporation, Limited, was to-day declared in favour of the scheme as follows:—For the resolution, 25,593; against, 10,866. Having been passed by both Corporations, the scheme will now be carried into effect as speedily as possible.

An extraordinary general meeting of the Harvey Steel Company of Great Britain, Limited, is to be held at the Westminster Palace Hotel, Victoria-street, Westminster, on April 28, 1898, at 2.30 p.m., to consider the following resolution:—"That each of the existing £10 shares in the company's capital be divided into ten fully paid £1 shares." Should the resolution be passed by a majority it will be submitted to a subsequent extraordinary meeting for confirmation.

Messrs. Glyn, Mills, Currie, & Co. have received a cable from the London and River Plate Bank at Monte Video, announcing the dispatch by mail of a remittance amounting to £5,800 for the service of the Uruguayan 5 per cent. loan of 1896.

Mr. George White was yesterday elected President of the Bristol Stock Exchange.

Dividends Announced.

MISCELLANEOUS.

D. & W. Murray, Limited.—Interim dividend on the ordinary shares at the rate of 7½ per cent. per annum.

Bell's Asbestos Company, Limited.—Dividend at the rate of 4 per cent. per annum. £2,338 carried forward.

Dunville & Company, Limited.—Interim dividend of 13s. per share for the half-year ended March 31.

Great Northern Telegraph Company, Copenhagen.—Dividends amounting to 10 per cent. declared, £77,777 added to reserve, and £61,057 carried forward.

Anglo-Continental Gold Syndicate.—12½ per cent. per annum on the ordinary shares.

Russian Petroleum and Liquid Fuel Company, Limited.—Interim dividends on the preference shares of 6½ per cent. per annum, calculated from the due date of the instalments up to and including March 12, and on the ordinary shares of £1 per share.

Netherlands Incandescent Gas Light Company, Limited.—Dividend of 10 per cent.

Kaffirs Consolidated Investment and Land Company, Limited.—Dividend at the rate of 3d. per share for the month of April.

De Lamar Mining Company, Limited.—Dividend for the year ended March 31 of 6d. per share.

Victoria Gold Mining Association.—6d. per share.

Transvaal Gold Fields, Limited.—1s. per share (5 per cent.) for 1897, £1,500 to be added to reserve, and £127,781 carried forward.

United States and South American Trust Company, Limited.—Dividend recommended at the rate of 5 per cent. on the preferred stock for the half-year, and at the rate of 1 per cent. for the year ended April 4. £1,000 to be added reserve, and balance forward of about £1,400.

Neuchatel Asphalte Company.—A final dividend of 7s. per share, making, with the interim dividend, a total dividend of 11s. per share for the year 1897.

Alliance Investment Company.—Directors recommend a dividend of ½ per cent. remaining unpaid on the preferred stock, and, in addition, a dividend for the half-year ended April 15, at the rate of 4¾ per cent. per annum, making, with the interim dividend, 4⅞ per cent. for the year on the preferred stock.

RAILWAYS.

Northern Pacific.—Quarterly dividend of 1 per cent. on the preferred stock.

Taltal Company, Limited.—Interim dividend for the half-year to December 31 at the rate of 1s. 3d. per share.

Mexican National, Limited.—Dividend of £2 15s. 8d. per cent. on the "A" certificates.

Rohilkund and Kumaon Railway.—Dividend for the past half-year of £2 10s. net.

Costa Rica Railway.—Dividend for the year 1897 of 4s. per share, £8,000 being added to reserve fund, and £6,797 carried forward.

BANKS.

Bank of Montreal.—Dividend for the half-year ended 31st. inst., at the rate of 10 per cent. per annum.

Bank of Adelaide.—Dividend at 7 per cent. per annum, £5,000 being added to reserve fund (making it £160,000) and £15,962 carried forward.

BREWERY.

Dartford Company, Limited.—Interim dividend on the ordinary share capital at the rate of 6 per cent. per annum for the half-year ended March 31.

MINING RETURNS.

Brilliant Block.—Crushed 1,131 tons of quartz for a yield of 893 oz. of gold.

California Exploration.—Crushed 398 tons, bullion produced $3,650, sulphurets estimated $270.

Eaglehawk Consolidated.—Partial clean up 149 oz. of gold.

East Murchison United.—Great Eastern—1,050 tons of ore crushed; 1,010 oz. of gold obtained. Donegal Lenses—750 tons of ore crushed; 590 oz. of gold obtained.

Luipaard's Vlei.—March crushing—Tons crushed, 3,600, assaying 8¾ dwt.; gold obtained, 1,150 oz.

Ottos Kopje.—7,088 loads washed during the week ended April 14; 179 carats of diamonds won.

Palmarejo.—Return for March—Crushed 1,800 tons; panned 1,650 tons, producing $45,000.

Premier.—625 tons for 317 oz.

Agamemnon.—200 tons of ore mined, 225 tons of ore treated, 150 oz. bullion recovered.

Barrett.—Gold yield for March, 510 oz.

Bonanza.—Results for last month:—From mill—crushed, 5,706 tons; obtained 5,104 oz. of gold. From cyanide and slimes works—treated, 5,611 tons, yielding 3,123 oz. of gold; total, 8,227 oz. of gold.

Chiapas.—1,950 tons of ore crushed, yielding 86 tons of concentrates. The stamp mill ran twenty-seven days, crushing 1,550 tons of tailings, yielding 180 oz. of gold.

Klerksdorp Gold and Diamond Company.—Results of crushing for March, 700 oz. of gold.

Lake View Consols.—Clean up for March—Crushed 4,935 tons, yielded 4,402 oz. of gold. Cyanide return: 3,624 tons treated, yielded 2,072 oz. of gold. Concentrates, 25 tons value, 875 oz. of gold. Total return for March, 8,030 oz.

May Consolidated.—The yield of gold during March was 5,715 oz. from 14,500 tons crushed. Cyanide, 9,145 oz. from 8,890 tons. Total for month, 7,860 oz.

Mikado, Ontario.—Further cablegram from the manager states that the output for March should have been 730 oz. of gold instead of 530 oz. as previously advised. This is exclusive of tailings.

Simmer and Jack. Crushed 29,240 tons, obtained 7,781 oz. of gold from mill and 3,010 oz. of gold from tailings by cyanide during the month, also slimes 889 oz.

Worcester.—Result of crushing—Main reef, 3,948 tons; south reef, 799 tons; yield of gold, 1,915 oz.; concentrates, 457 oz.; tailings, 510 oz.; total, 2,888 oz.

Mount Lyell.—From March 10 to April 6, inclusive, a total quantity of 10,960 tons of ore have been treated: 8,979 tons from open cuts assaying before treatment—copper, 2·98 per cent., silver, 3·21 oz. per ton; gold, 0·196 oz. per ton: 1,983 tons from No. 4 Tunnel assaying before treatment—copper, 7·23 per cent.; silver, 7·58 oz. per ton; gold, 0·059 oz. per ton. The converters have produced during the same period 315 tons of blister copper, containing—copper, 310 tons; silver, 35,733 oz.; gold, 1,689 oz.

St. John del Rey Mining Company.—Gold produce, April 1 to 10, £6,296; yield per ton, ·77 of an oz. troy.

Wassau (Gold Coast).—602 oz. of bar gold from 557 tons of ore; 22 stamps worked 22 days. Detailed result of February return:—The 10-stamp 750-lb. mill worked 25 days 18 hours; and the 12-stamp 550 lb. mill 22 days 19 hours. Ore crushed, 572½ tons, producing 724¼ oz. bar gold, which together with 22¼ oz. from pan amalgam, gave 786 oz. standard gold, and realised £3,068 4s. 6d.

Menzies Lady Sherry.—Crushed 50 tons for 97 oz.

Bellevue Proprietary.—Clean up for fortnight—140 tons crushed for 326 oz.

Burbank's Birthday Gift.—Crushed 480 tons; yield 660 oz. free gold, exclusive of tailings.

Day Dawn Block.—Result of crushing for the fortnight ended the 16th inst.—Tons crushed, 1,440; yield of gold, 1,333 oz., including tailings.

De Lamar.—Return for March, including clean up of old mill:—Leached, 900 tons; bullion produced from cyanide treatment, $16,413; surplus from clean up of old mill, $6,300; estimated value of ore and mill residues shipped to smelters, $3,824; miscellaneous revenue, $120.

Ouro Preto.—5,629 tons of ore produced 1,721 oz. of gold.

Pahang Corporation.—March returns:—Jeram Lumpong Mill; 1,470 tons of stone crushed, producing 77 tons of black tin; Jeram Batang Mill—775 tons of stone crushed, producing 18½ tons of black tin.

North Boulder.—401 oz. gold from 447 tons crushed.

Victory (Charter's Towers).—Crushed 106 tons for 340 oz.

Frank Smith Diamond.—4,700 loads washed, producing 251 carats.

Hyderabad (Deccan).—Output of coal from the Singareni Collieries for four weeks ended March 26 was 29,514 tons.

New Australian Broken Hill Consols.—17 cwt., containing 2,050 oz. of silver, all from level No. 1.

Lake View South.—Crushed 1,300 tons for 321 oz.; also 32 tons concentrates worth 13¼ dwt. per ton.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

Next Week's Meetings.

MONDAY, APRIL 25.

San Sebastian Nitrate	Winchester House, 3 p.m.

TUESDAY, APRIL 26.

City of Glasgow Life Assurance ...	Glasgow, 3 p.m.
Day Dawn Block and Wyndham Gold Mining	Cannon-street Hotel, 2 p.m.
Hand in Hand Fire and Life ...	26, New Bridge-street, 1 p.m.
London and Westminster Finance Corporation...	5, Fenchurch-street, noon
London Corn Exchange	Mark-lane, 12.30 p.m.

It is understood that the assessment on the Baltimore and Ohio stock under the plan of reorganisation now in course of elaboration will be 20 per cent., and that the holders will receive preferred stock for the amount.

Railway Traffic Returns.

Burma Railways. — Receipts for week ending March 19, Rs. 2,27,636 ; increase, Rs. 20,832. Aggregate from January 1, Rs. 23,89,527 ; decrease, Rs. 1,91,621.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, April 16 :—Ps. 5,050, increase Ps. 80. Aggregate from January 1, Ps. 139,750, increase Ps. 3,880.

West Flanders Railway.—Gross receipts for week ending April 17, £2,394 ; increase, £371. Total from January 1, £34,591 ; increase, £1,319.

West of India Portuguese Railway.—Week ending March 25, Rs. 4,164 ; increase, Rs. 1,625.

Quebec Central Railway.—Receipts for fourth week of March, $13,473 ; decrease, $984. Aggregate from July 1, $81,700 ; decrease, $10,702.

Mobile and Birmingham Railroad.—Traffic for fourth week of March, $9,633 ; increase, $460. Aggregate from July 1, $285,528 ; decrease, $3,530.

Algeciras (Gibraltar) Railway.—Traffic for week ended April 9, Ps. 20,650; increase Ps. 150. Aggregate from July 1, Ps. 816,532 ; increase, Ps. 24,478.

Bengal Central Railway.—Traffic for week ending March 26, Rs. 29,938 ; increase, Rs. 8,434. Total from January 1, Rs. 247,835 ; increase, Rs. 27,328.

Assam-Bengal Railway.—Traffic for week ended March 12, Rs. 23,273 ; decrease, Rs. 958. Aggregate from January 1, Rs. 2,40,909 ; increase, Rs. 17,815.

Puerto Cabello and Valencia Railway.—Traffic receipts for week ending March 11, £1,217 ; decrease, £243. Aggregate from January 1, £9,675 ; decrease, £3,244.

Delhi Umballa Kalka Railway.—Receipts for week ended April 16, Rs. 29,200 ; increase Rs. 1,900. Aggregate from January 1, Rs, 5,47,500 ; increase, 1,51,300.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending March 19, Rs. 8,325 ; decrease, Rs. 6,490. Aggregate from January 1, Rs. 65,285 ; decrease, Rs. 18,317.

Western of Santa Fe Railways.—Gross receipts for week ending April 16, $41,500 ; increase, $30,910.

Cleator and Workington.—Gross receipts for the week ending April 16 amounted to £903, an increase of £65. Total receipts from January 1, £15,196 ; a decrease of £689.

Cockermouth and Keswick Railway.—Receipts for the week ending April 16, £905 ; increase, £167. Aggregate from January 1, £12,450 ; increase, £1,248.

Manila Railway.—Receipts for week ending April 16, $18,982 ; increase, $1,544.

Southern Mahratta Railway.—Receipts for week ended March 26, Rs. 97,416 ; decrease, Rs. 40,883.

Great Western of Brazil Railway.—Traffic for week ending March 12, $30,696 ; increase, $4,654. Aggregate receipts to date $442,970 ; increase, $60,111.

Villa Maria and Rufino Railway.—Traffic for week ending April 16, $4,782 ; increase, $1,781. Aggregate from January 1, $71,680, increase $309.

The approximate traffic return of the Manchester Ship Canal for March shows a take of £16,337, as compared with £14,762 for the corresponding month last year, while the total receipts for the three months to date have reached £53,922, as against £46,601 a year ago.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 17. New Series. FRIDAY, APRIL 29, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

Hispano-American Sinews of War.

It is hardly a war yet, and impatient sensation lovers among us as well as in the United States are beginning to jeer at Mr. McKinley for what they describe as his absurd attempt to carry on war in a peaceful, merciful, or "benevolent" manner. The "quaker warrior" some wags have already nicknamed him. They should possess their souls in patience, for in all probability sensations in plenty will gratify their craving before many weeks, perhaps before many days, are over. In one sense both Governments seem to have been taken by surprise at the rapidity with which events moved, the United States not least. Neither Power was ready for the fight when war actually broke out. We have said all along that the American Government misunderstood the temper of the Spanish people, and this is now demonstrated to be the just view by the haste with which they commenced the business of war when they found their efforts to deliver Cuba by peaceful ways scouted. Without an army, with a fleet scattered to all the ends of the earth, and without funds in hand, they rushed to the fray and have not yet found the foe. But mistakes and miscalculations of this kind will right themselves very soon in the United States, all the sooner perhaps if they, to begin with, meet with a rebuff or two at sea, as is by no means improbable. Meanwhile, it is interesting, from our point of view, to observe how

the two Powers are setting about the provision of money, the sinews of war.

The one country is rich, with, on the whole, a willing population behind its Government; the other is not exactly poor but dominated by a Government which has only a precarious hold on the affections of the people, and has always found the utmost difficulty in raising taxation. To no small extent the measures taken by the two Powers to raise funds illustrate this divergence in their respective positions. A loan of $500,000,000 in 3 per cents., payable "in coin"—that ambiguous phrase which may yet cost the States so much—is expected to be launched in the United States in portions as required, and will doubtless be sold up to a point without difficulty. Also new taxation is to be imposed by doubling the duty on excisable liquors, raising the tobacco excise, and making additions to the stamp duties, and so on. These changes are in all calculated to bring $100,000,000 per annum more into the Treasury. And this is perhaps the best course the Washington Cabinet could have taken, for should the people become accustomed to this internal taxation it may, when peace is restored, afford a basis from which enlightened statesmen can work to get the Customs tariff reduced and a more liberal foreign trade policy established. Hitherto, Protectionist obstruction has always prevented the establishment of the inland revenue on a satisfactory footing. In the meantime, such large measures for meeting war expenses indicate a very deliberate purpose on the part of the Washington Government to carry the struggle to a successful issue, cost what it may. We must now, therefore, at least pay the American people the tribute of being in earnest over this matter. They have made up their minds to drive the Spaniards out of the western hemisphere, and we have not the slightest doubt that they will succeed. Whatever follows, humanity must gain by their triumph.

Spain, on the other hand, betrays her financial straits the moment she tries to find means to fight with. A forced loan of one year's taxes is to be wrung from the people in addition to the ordinary taxation of the year, and the note issue of the Bank of Spain, already so swollen that the peseta is at about 45 per cent. discount, is to be extended by another 500,000,000 pesetas, so that its maximum will amount to two milliards, or £80,000,000 nominal. Not much change in taxation appears to be possible to eke out this dangerous source of "supplies," but the project for re-leasing the Almaden quicksilver mines is revived, and another loan is, if possible, to be raised on the security of a tax upon navigation. Of course this latter loan cannot be anything but an internal one, and we fear it will be very feebly subscribed. Indeed, the bulk of the people cannot have the means with which to subscribe, harried as they will be by the payment of two years' taxation in one, plus the corrupt commissions wrung from them as usual by the tax collector. And the sum obtainable from the Almaden Mines will not go very far. The present loan issued by the Rothschilds only amounted to £3,318,100 originally, and there is still £348,400 of it to be paid off. It is a 5 per cent. loan, and was issued at 80 per cent., with a sinking fund of 1½ per cent. Not much better terms could be obtained now, in the damaged condition of Spanish credit, for a fresh loan on the same security, but let us suppose that, by extending the lease and enlarging the output, if that be possible, Spain managed to get £3,000,000 on this security in the French or English markets: it would be but a drop in the ocean. Now Spanish helplessness in money matters is a main factor in determining the outcome of this conflict. Should the Spaniards make a dash at the American fleet, cripple it, sink it, drive it away from Havana and scour the Atlantic coast of the United States in piratical style with cruisers as privateers—then it is possible, although very improbable, that the United States would hurry to make peace on the terms of the *status quo ante*. On the other hand, should Mr. McKinley's tactics of playing a waiting game, sending relief to the starving inhabitants of Cuba, arming the insurgents and supporting them with a division of United States regulars, keeping strict watch the while over Havana, be capable of being maintained, then long before the autumn Spain must be brought to her knees and obliged to surrender Cuba on any terms or none. She cannot prolong a contest in these days under modern conditions of warfare, and is wholly unable financially to bear the strain of a long-drawn-out blockade.

Stock Market Notes and Comments.

Everybody is still waiting for this war to begin, and business continues nearly at a standstill. So bad is it that some people were expressing the hope that to-morrow might be made a Stock Exchange holiday, seeing that Monday is one by old usage. It is indeed most irksome to be engaged in Stock Exchange business at present. Nothing can be done satisfactorily with a reasonable conviction that profit will result. The "bull" and "bear" are alike nonplussed. It is no use to sell American railroad shares for the fall, because the war might be over in a week or two, and then where would the "bear" be? Equally vain is it to buy them for the rise, because it is possible that the Spaniards might have the first advantage, in which case prices would fall much lower than they are now. And if that applies to American railroads, which were by far the most active market in the Stock Exchange before this Spanish quarrel broke out, it is equally applicable to foreign Government securities. We, indeed, cannot speculate in them because we do not hold any worth speaking of. All, then, the London market can do is to pick up a little as intermediary to the speculations originating in other markets. We do not trust the more rickety classes of Continental securities enough to buy "bulls" of them, and the "bears" of them among us have been so often pickled that they are shy of having another fling; besides, what is the use of selling such stocks as Spanish "fours," or Portuguese 1 per cents. at present quotations? Both these may be worthless, and even if not there is not much to hope for in them in the shape of a rise.

The most perplexing division of the stock markets at the present is that for South American securities. Why should Chilian and Argentine bonds have been slipping back so persistently until just the other day? We can understand the fall in Brazilian bonds, for the wonder has been for a long time how they ever kept the prices they did; but Chili we have always believed to be recuperating, and undoubtedly her successive administrations have made the most strenuous efforts to put and keep her finances in order. The Argentine

Republic, too, we have been preached into believing on the reforming and reviving tack. Only a few months ago the Government of Buenos Ayres solemnly decreed the reconsumption of payment in full upon all classes of the public debt, and entered into arrangements for assuming the derelict debts of the various provinces. It was all rose-water and sweetmeats from the financier's point of view, and yet here the various classes of bonds have been tumbling £1, £2, and £3 a day sometimes, dragging Argentine railways down with them at the very time when their traffics were beginning to improve under the influence of this year's better harvest. What does it all mean? We cannot yet say; but one probable cause of the fall might well be the necessity many great market proppers have recently been under of finding ready money. In other words, the lower prices reached by whole groups of securities together illustrate the solidarity of the financial market-controllers all the world over. Provided no great loss falls upon this body of international financiers at one point, they can usually work all markets according to their will. We know very well, for instance, that the Argentine Republic, although mending in some ways, and gradually filling up and growing richer, is, from the point of view of its Government, by no means in a position to resume full payment of its public debts, still less to load itself up with the provincial debts as an additional burden on the federal Budget. This weakness, however, in no way deterred the financiers who sway the fiscal policy of the Republic from undertaking a campaign to raise the market price of its loans. They had the means to do this, and also to enable the Argentine Government to seem solvent for a time sufficiently long to insure the sale of the bonds they hold to investors the world over, if not at a profit, still at very much less loss than they stood to incur some years ago. We have not the least doubt that, but for the untoward outbreak of this quarrel between the United States and Spain, the financiers in charge of Argentine credit would have successfully concluded the campaign undertaken with this object and once more have handed over large masses of doubtful bonds to investors at high prices, to their own great relief and enrichment. But the Government of Washington has temporarily upset their calculations, has driven Spanish bonds down from 60 or thereabouts to the neighbourhood of 30, and in doing so has forced the international financiers to come to each other's support. Money has already had to be withdrawn from all kinds of enterprises in order to prevent a general breakdown in Latin finance, and Argentina came in for its share of the rebuff. If the war goes on for any length of time we may see much greater depreciation and much more expanded than anything that has yet taken place, although these last few days have seen a pause and a rally. It need hardly be said that a market so dominated, or driven, through the necessities sometimes of the great potentates of finance, is not a market in which the private individual should dabble much. Least of all should he buy when they seem to be doing so.

Since the Chartered meeting, and, above all, since the Boer Government conceded 10s. per case on the price of dynamite, we have had a brisk effort made to put life into South African shares. Rand Mines have been run up a pound or two in spite of the distressed state of the French open market, already almost in the throes of dissolution, and there have been bobbings up of 5s., 10s., or a pound in many other shares of properties or alleged properties.

These movements are like the jerks of a galvanic needle. There is no solidity in them, and they are not as yet backed up by public buying. The utmost that even the Chartered stalwarts have been able to do has been to raise that company's shares by half-a-crown, which was no sooner gained than lost again, although the "rights" to the new issue are valued at 6½d. So long as the masses of share dabblers throughout the country refuse to join in the play instability must be the aspect of the market, and we earnestly hope they will not join. We have again and again given them abundant reasons why they should not, and must unweariedly repeat the advice, for the simple reason that it embodies a profound conviction that prices are, on the average, far too high measured by intrinsic values. And the unfortunate individual who is sitting upon shares at probably much higher prices ought never to "average" with a view to minimise his loss. The policy he ought rather to pursue is to unload a little of his holding on every advance in the market. It is not at all the game of the "bosses" that he should make money out of them, it must never be forgotten. Their object is to increase in wealth at his expense.

We have dealt with one of the Australian puddles elsewhere, and may let it alone here, but may say in regard to Copper shares that we do not much believe in a great increase in copper mining profits through the present war. Shares, led by Rio Tinto ordinary, the most manipulated thing on the Paris Bourse, have been going up, and may continue for some little time to do so. Those who possess any should not wait for the inevitable reaction to let the ardent financiers have them.

Northern "Terrors" Collapse.

On several occasions recently we have drawn attention to the outrageous speculation in the shares of this company, if we can call it a company. It was capitalised nominally at £300,000, and the £1 shares were introduced upon the market at £3. At the mid-April account these shares were carried over at £4 each and had been higher. Between then and the end of last week they fell to less than £1, and disaster has followed, although the jobbers managed to screw up the price to 1¼ for "making-up" purposes on Tuesday. We are not able to state what the resulting differences to be paid are, but the lowest estimate we have heard of is £120,000, and the probability is that the amount will prove to be very much larger. Happily the public are not very much interested in this gamble, and the loss will fall more, if we may so phrase it, on the guilty than on the innocent. Altogether something like forty members, or firms, of the Stock Exchange are involved in the smash, and one firm is said to owe upwards of £70,000 as its share in the loss. Various attempts at a composition have been made, but as we write we cannot say that any of them is in a position to be carried out. The difficulty is to find the money, and in all probability the bursting of this bubble will have been found to mark the end of what we cannot but regard as a nefarious conspiracy upon the credulity of the public.

What astonishes one most is that firms classed as "most respectable" on the Stock Exchange should be found to have voluntarily involved themselves in such a business. That they have done so is an illustration of the ravenous competition for business which goes on amongst the members. No broker or jobber of the least intelligence could have been unaware of the character of those companies of which the Northern Territories was the latest outcome, the ultimate flower, so to say. They were a matter of paper and ink and cheap-Jack oratory throughout. Possibly some substance may have been behind one or two of them, in the shape of mining properties in Western Australia with some little gold to show. Whether that is so or not was really of no consequence to the business in hand, which was to manufacture company after company, with capitals entirely out of proportion to any solid business or industry they might have to do, and, by means of trading in the shares of these companies, to endeavour to draw in large sums of money from the always gullible public. The whole thing was worked by two or three men, and it is quite conceivable that the dealings might have been so arranged as to leave the losses to fall upon the mushroom companies, while the individuals who created them and used them as their tools cleared out with what money there was to be had. The time has not yet come to write the history of this miserable affair, and we are not sure that it could be fully written unless an investigation takes place before an experienced Judge of the High Court. It is, however, alleged that some of the brokers who have been occupied in creating this unsubstantial financial structure are in the position to receive large differences, while some of the companies which have been buyers of the Northern Territories Company's shares are so crippled that the utmost we have heard offered by way of composition is 10s. in the pound. How one set of brokers could be in this position, while another and larger band by dealing for the same group of men have to encounter losses, which in some instances must be unbearable, is more than we can explain, except on the supposition that some members of the "ring" have "ratted" against their partners, and in doing so hastened the consummation certain to come sooner or later to all such squib and cracker company fashioning and share tossing.

There could indeed be but one end to this sort of aërated finance, so attenuated was its substance, the very facility of manufacture and success, up to a point, presaging its sudden collapse one day. A group of individuals allot themselves the shares of successive companies as they are created and start a swarm of brokers to buy and sell for them, or for account of one or other of the set. Little money is requisite in such operations, because the shares need not be paid for. They are all in the family as it were, and Jack buys from Tom, and Tom buys from Dick, and Dick from Ebenezer, until together they sometimes work prices up to quite giddy heights, waiting always for the chance to unload upon the public. When the public, attracted as flies to the candle by the advancing quotations, does buy the band divides great fortunes; but when the public, chilled by many sad experiences, only looks on, the day soon arrives when the whole of the frail structure topples to the ground of its own pithlessness. Then losses have to be borne by the instruments of the market marauders within the market; and there is wailing and blasphemy in place of confidence and the chink of pocketed gold.

We cannot say we feel any pity for the brokers and jobbers, directly, and with foreknowledge of the plot, engaged in furthering this Northern Territories gamble; if they are all ruined and driven from the Stock Exchange it will be good for the moral tone of that body. Many members, however, both brokers and jobbers, are innocently involved in smashes of this sort nearly always. They deal for clients who will buy, or they are drawn into jobbing against their better judgment because the thing is done in their market, and have to suffer for the sins of others. The very fact, however, that a number of innocent people may find themselves drawn into the whirlpool of destruction such collapses create, should stir the Stock Exchange as a body to endeavour to find some means by which financial Dick Turpinism in any shape could be effectually dealt with on its first appearance. There is something altogether anomalous in the freedom with which Stock Exchange habits of business permit operations of this kind to be conducted time and again to their disastrous conclusions. The consciences of the markets will not be moved by this one lesson, but they are going to have some others, perhaps of a sharper description still, and by the time members have run the gauntlet through a series of liquidations, bound to strip numbers of them of all they possess, and to throw not a few out of the Stock Exchange as defaulters, it is not improbable that they will have become awake to the fact that they have other duties to perform in relation to the public than that of mere instruments of money making, so called. We conceive that neither broker nor jobber is justified, for the sake of any commission paid to him, or of any "turn" offered to him on prices, to buy and sell pieces of paper which he must know to be of suspicious origin or altogether worthless. The morality of this kind of business is much on a par with that of the unclean usurer who traffics in forged bills of exchange. It is habit alone which blinds men to the infamy of "rigging" impostures such as the Northern Territories episode has proved to be.

Some Conditions of Modern Warfare.

An American correspondent, in a letter to us dealing with the dispute between the United States and Spain, remarks that the war, if it does come, will be of great scientific interest even if it goes on but for a few weeks in good earnest. When it is over the world will know something of the real value of the various sorts of ironclads, torpedo boats, torpedo destroyers, &c., and of modern fortifications for harbour defences. "It will be odd," he goes on to say, "if after all your incessant war talk, your millions of soldiers, and hundreds of war craft, peaceable America should be the first to have a fight." As we write the probability of a fight has been turned into a certainty, and the prospect of immediate hostilities opens up many possibilities besides those connected with the efficiency of the various engines of destruction modern ingenuity has brought into existence. Already we have had some instruction as to the value of ironclads in the conflict between China and Japan, and the impression left on our mind by that war is that the huge battleship is by no means the ultimate perfection of

a vessel of war. But that far-away strife had comparatively small effect upon the economic condition of European nations. It did not disturb Western money markets nor cause Bourse speculators to tremble for their fate at each turn of the strife. Neither Japan nor China were then involved in modern European finance to an extent which could have affected the stability of any market for a single hour. It will be altogether different with the war between the United States and Spain, and already the mere prospect of this war has produced distressing consequences on every Exchange where tokens of public indebtedness are dealt in.

When war is spoken of in the United States the mind naturally goes back to the condition of things existing at the time of the outbreak of strife between the North and the Southern Confederacy thirty-seven years ago. That gigantic struggle produced immense consequences on the industries of the United Kingdom, and profoundly influenced our mercantile credit for some years, but the world was not then linked together by electricity as it is to-day. The first Atlantic cable was not laid till 1865, and it was not until the succeeding year that regular telegraphic communication was established between the two great divisions of the English-speaking people on either side of the Atlantic. Since then this method of instant communication has been established, not only between Europe and America, North and South, but between all parts of the British dominions and the Far East. The whole world over, where civilisation has made only a beginning of existence, this means of inter-communication is now in constant use. So familiar are we with the telegraph in daily life that it is extremely difficult for us to realise what the world was like when communication was slow between distant parts of the earth ; when it took nearly a fortnight, for instance, to convey the intelligence of a victory or a defeat in the United States to the English people, or a month to bring similar news from India. Now all the world lives in the open and in constant inter-communion. If there is a heated discussion in the House of Representatives at Washington in the evening of one day we know all about it in outline in London next morning at breakfast time. Rumours fly across the wires as fast as they are generated, and the minds of people here have frequently been perplexed and dismayed, during recent weeks, at the variety of passions at play in the United States alone.

Many effects flow from this facility of intercourse between nation and nation. In some respects it is a most powerful aid in the maintenance of peace. A false rumour does not get time to grow and lay hold upon the imagination of the people as it could do in the old days. It would be impossible now to have a seven years' war over the question of a "Jenkins's ear," cut off seven years before the strife began, which the alleged shearing of it helped to bring on. Witness the calmness which has succeeded the first excitement about the blowing up of the United States cruiser *Maine* in Havana harbour. Report after report about the origin of this lamentable catastrophe has reached us from America with such rapidity that the first horror has been completely dulled, and it is difficult for people here to enter now into the feelings of resentment which appear to play so large a part in drawing the United States into a conflict with Spain. Perhaps this apathy arises to a considerable extent from the general refusal of the English mind to accept the theory that the ship was blown up by a mine laid, treacherously or otherwise, in Havana harbour, and exploded with deliberate intent to destroy the great ship and her crew. Much as we know about Spanish habits of cruelty, and about Spanish Jesuitry in polities, we have all along refused to accept the decision of the American Committee of Inquiry, and of the American people, that it was a mine, no matter how fired, which blew this vessel to pieces. This attitude, perhaps, helps to make us doubt whether Americans believe the theory themselves. Be that as it may, unquestionably, had we only heard of this disaster some time after its occurrence, by letters giving substantial details from the American point of view, it is not improbable that we should have worked ourselves into a white heat of indignation against Spanish treachery. But when assertion and counter assertion came hourly to hand from Madrid and Havana, from Washington and New York, the hubbub created by this conflict of assertion helped to calm the mind, and we are in no danger now of misconstruing the motives which are driving the American people into war, so far at least as the loss of the *Maine* is concerned. Nor can the American people themselves be in that ignorance of Spanish sentiment and Spanish pride which might easily have prevailed but for the instant communication of all that passes in Madrid and throughout Spain to the American newspapers. Certainly, the telegraph may be made to convey lies, and even when it tells the truth passion may distort the truth ; but, making all allowances, it does seem to us that this facility for the instantaneous interchange, if only of anathemas, is a help in preventing those misunderstandings arising from ignorance, out of which so many wars have sprung. In the present instance peace has not been brought about by the aid of constant talk across the ocean, but that is because a situation has arisen in Cuba, and in the United States, too strained and difficult to be smoothed down by any interchange of proposals. If Spain had been able to put aside her false pride so far as to sell the island to America, war might have been averted, and Spanish finances put for a time in some kind of order. Failing that, however, and failing a voluntary relinquishment of the island by the Madrid Government, a struggle to drive the Spaniard out was sooner or later inevitable.

More interesting even than the question of the influence of telegraphy in helping nations to keep peace with each other are the effects it produces upon what may be called the international money market. In the good old days rival nations might fall out and pound away at each other for years without materially affecting the well-being of next-door neighbours not actually involved in the conflict. It is otherwise now when the whole world, one may say, is held in mortgage, more or less, in London, Paris, Berlin, Amsterdam, and New York. Undoubtedly the telegraph has brought all markets for dealing in public securities into most intimate relationship. It has done more ; it has made all markets cosmopolitan in their transactions according to the degree of their wealth. Hence such an event as a war between two countries like Spain and the United States, whose securities are dealt in on every important Bourse in Europe, produces far-reaching effects upon credit beyond anything previously experienced. We do not suppose that the defeat of Spain will have anything like the momentous consequences which the defeat of France had in 1871. It

may, however, be said that France alone then suffered, while other markets gained. The power of London, for example, as the Clearing House pivot on which the world's finance turns, was incalculably enlarged by the Franco-Prussian war. Its consequences were by degrees to bring first French and then German capital here in large amounts. Before the war it was possible that the Paris Bourse might, under enlightened administration, have become the great international market of the world. After the war it was no longer possible; London became undisputed master, and in spite of a valiant struggle of twenty-seven years Paris is to-day, partly because of recent legislation, threatened with a lapse into complete insignificance. And it is just at Paris that the effects of this war over the fate of Cuba will tell with most disastrous consequences. Already the mere rumour of war has brought enormous loss upon French holders of Spanish bonds. The first effect of the war will unquestionably be to throw Spain into bankruptcy as a nation, and bankruptcy, as we have before said, is almost certain to be accompanied by revolution and social disorganisation of a very dangerous kind. Should such domestic upheavals take place in Spain, then the French people will suffer, not merely by the reduction of the market value of Spain's public obligations to rubbish prices, but likewise by the depreciation sure to take place in the securities of the Spanish railways, which are to a large extent now owned in France. The effect, in short, of Spain's defeat, and the consequent collapse of Spanish credit, might be such in France as to hurry on the revolution now, to all appearance, preparing to burst forth there. And the international character of all markets for public securities is already strikingly illustrated in the consequences which are flowing from the destruction of the values of Spanish securities held in France. This has told upon the power of French operators to hold any class of securities. They have been obliged to sell Italian Rente, Rio Tinto and De Beers mine shares and even Egyptian bonds, in order to find the means to meet the strain put upon their resources by the decline in Spanish securities. Again, French weakness has reacted upon our market, and, conjointly with the withdrawals of gold for the United States, has helped to send up the value of money in London high enough to oblige speculative holders of all classes of securities here to become sellers. A general lowering of quotations has occurred through the precarious condition of Spanish finances alone, and when we add to that the effect of a mere prospect of war upon the price of American railroad securities held here, and dealt in in London, Belgium, Holland, and Germany to an extent we cannot estimate, we can partly realise how tremendous consequences might flow instantly from any great disaster in war, no matter to which combatant. The whole world hangs together in a manner it never did before. International credit has been worked up to a degree of delicate permeation throughout all forms of business to an extent never before witnessed in the world's history.

One consolation arises from this. If the world is not too much overburdened by debt, the distribution of the blow to credit caused by any single event or catastrophe prevents that blow from having the destructive effect at one point it might under other conditions have had. In a sense, the risk of revolution in France through the default of Spain may be said to have been sensibly lessened by the facility the telegraph has given to speculators all over the United States to sell "bears" of Spanish "Fours." Every nation, including our own, has joined in this "bear" selling, to no small extent by being instantly, and all at the same time, made aware of the danger impending to Spanish credit. By this action, which has sent Spanish bonds down 45 per cent. in two months, French holders have at last probably found buyers at better prices than could have been secured if their market had been isolated, or if communications had been slow, as in the old days, between Europe and America. The "bear" is obliged to buy back, and in buying supports the market he seeks to destroy. Left to itself, the Paris Bourse, or at least the *Coulisse*, might have almost foundered under the blow administered by the outbreak of war between the United States and Spain. There would have been no outlet for the stock Frenchmen held. It would have fallen in price, and no buyers would have been encountered to arrest the fall. Banks and banking institutions might have collapsed under the strain, bringing such a degree of social misery into existence through their failure as might have thrown France into the hands of socialists and anarchists for a period long enough to destroy her precariously founded republican institutions. This catastrophe, at any rate, has been averted by the free market the rest of the world has lately given French holders of Spanish bonds. They have been able to sell, and in selling to minimize their losses. The bonds they sell pass through the intermediary "bear" purchaser's into other hands all over the world, and should the bonds go lower and lower, as they probably will, the loss will be distributed over such a wide range that it may be borne without producing a breakdown in public credit at any one point. This is a phase of modern finance which must never be lost sight of in estimating the probable consequences of any particular event upon banking stability.

Our Trade and War.—III.

Colonial Expansion.

Our advisers who desire that England should defy the world in general, and its chief Powers in particular, and that we should annex all the unoccupied land left on the globe, from a commercial point of view recommend a policy that is too extended and which savours of reckless commitments beyond the resources of the British firm. The annual profits of our China trade at 5 per cent. would represent annually about £600,000, and of our West African trade, £170,000, or, say, in round figures, £1,000,000. What would a war about either of these countries cost? Possibly some £500,000,000, or our profit on the trade for 500 years to come, in addition to the untold losses that a collision with any Great Power, not to mention three of them at once, would inflict upon our commerce. Let us, therefore, clearly recognise that a war for trade in these directions would be absolute lunacy from a mercantile point of view. Of course war is at times a sad necessity when the honour of the country is involved, but let us be very clear first that such a state of things has arisen, and, in the meantime, like the strong man armed, keep our own house in dignified peace.

So far as foreign possessions are concerned, no one who looks at the map can doubt that England holds the

best. If other Powers at the eleventh hour wish to pick up the fragments that are left, let us leave them to do so without an exhibition of childish and paltry jealousy, especially as any gain they may make must necessarily benefit us in some way. With one-third of the world to administer, we have our hands more than full. If in the past, our statesmen wisely refrained from occupying any portion of the mainland of China when the only difficulty would have been the burden of administration, added to our already gigantic responsibilities, it would be obviously unwise in the extreme to undertake such a task and to start a great European war as well.

The policy of colonial expansion on the part of France and of Germany has not had encouraging results. France was earlier in the field and has more valuable possessions, but Greater Germany appears to contain less than 1,000 Germans, notwithstanding its vast size. The fact is that colonies in the tropics or among semi-civilised races in no case bring much grist to the mill. Those of our colonies which are of any use from a trade point of view are in temperate climates, such as North America or Australia. India may appear to be an exception, but is not so when the enormous size, the teeming population, and its advanced civilisation are considered. The natives of India take only 2s. 1¾d. per head of our produce, while our temperate zone colonies take some £3 10s. per head. Our exports to India are swollen by the construction of railways in that Empire, and this may for very many years continue. Apart from this, what do the natives want from us? A rich Bengali Baboo spends 4d. a day on home-grown rice and dresses in white cotton, which will soon be made at home for him. What can the hundreds of millions of Indian poor want from us in a warm climate? Of the exports of British produce, not one-fifth goes to the tropics, the remaining four-fifths mainly going to Europe, the United States, Canada, Australia, and South Africa. If Germany and France wish to bring the waste places of the tropics into order by all means let them do so. If Russia wishes to open up Northern China, it would only be to our benefit. We have practically no trade there now, and after all Russia takes four times per head from us what China does under present circumstances. That Russia, Germany, or France will make much of colonial expansion appears open to doubt, and this affords another reason for the unadvisability of war directed against their policy.

Even if it were true that our wars in the past gave us a colonial empire and our inter-imperial trade of £183,000,000 a year, it does not seem to have been commercially a good investment. A profit of 5 per cent. on that total would be £9,150,000, and of 10 per cent. £18,300,000. Our national debt, due entirely to these wars, has for nearly a century been a fearful burden on our population. Its incidence is now greatly reduced, but it still costs us £28,000,000 a year. From a trade point of view, this looks very like a national loss of £10,000,000 a year. Our Empire must thus be defended on much wider grounds, and is happily most defensible upon them. Nor is it by any means clear that our Empire and our Imperial trade are due to our past wars. In a sense, no doubt, our old conflicts with Spain, and afterwards with France, gave us the mastery of the seas, and thus led to our acquiring our colonies. But the latter would have been useless to us without many other circumstances. In the past, Spain, Portugal, Holland, and France have been the greatest colonial powers in the world, and gained their positions by war. Where are their Empires now, and what good did they ever do them? The two first-named powers were mainly brought to their present sunken position by the burden of extraneous empire—a warning surely to us not to extend our responsibilities too far. Our colonies proper have succeeded, because we had and have a redundant population, and because the discovery of steam power was made in this country where we had the command of coal, iron, and abundant capital. We thus got the start over Continental nations who were immersed in wars, and in their consequences, at a time when we enjoyed (with the break of the Crimean war) over three-quarters of a century of complete European peace. Now that the unification of Germany and Italy, the breaking of the restless spirit of France, and the natural and prodigious advance of Russia in population and civilisation, have all brought about a new and apparently fairly settled balance of power, other nations are treading on our heels. Our old monopoly of external commerce is at an end, our lead in the world's market is gone, and eager foreign rivals dispute every scrap of our trade. Is this a time for bloated armaments, for hasty wars, and possibly for the conscription, particularly when our competitors have made a study of our past and present errors and weaknesses, so as to avoid them all? It is often advanced as a reason for the necessity of opening new markets, by war if necessary, that our old ones are one by one being closed to us, through the Protectionist policy of other nations. What are we to do, under what is called a system of one-sided free trade, when door after door is slammed in our faces? The prophets of ill, as in so many other cases, lament too previously, for such hard things as facts are against them. It is, of course, perfectly true that we should in some respects be much better off if other countries adopted a modern commercial policy, but as it is we do pretty well—in fact, a good deal better than our neighbours. In 1882 our trade with countries doing £10,000,000 a year and upwards with us, in Europe and its existing and former colonies, and with the United States, was £460,000,000. In 1896 the figures rose to £470,000,000, an increase of £10,000,000, although prices had fallen enormously in the interval. It is true that the increase was in our imports, but this simply means that the dividends paid to us on the foreign investment of our profits had risen £10,000,000—a not unsatisfactory tribute paid by other nations to our prosperity. Although this is so far satisfactory, there is unhappily reason to think that foreign nations are gaining ground on us in trade matters.

The Condition of Brazil.

In one sense remarkably little is known about it. For years back the Rio exchange has been declining until it is now well below 6d. per milreis, showing the currency of the country to be at a discount of quite 80 per cent.; and in a general way the public knows that Brazil has not only an extravagant and helpless central Government but a number of more or less corrupt and wasteful State Governments, so that, great though the natural resources of the country are, they are absorbed or scattered so much that

both State and Federal Treasuries exist in chronic impecuniosity. The rate of exchange barometer, in short, points straight to national insolvency. In such circumstances the continual puzzle is how Brazil manages to maintain appearances by paying the interest and sinking fund charges on her foreign debt, as well as the guarantees accorded to the subsidised railways, mostly constructed with English money. Some little light is thrown on problems of this kind by the very interesting report of Mr. Consul-General Wagstaff on the trade of Rio de Janeiro for the past year. He points out, for instance, that a commercial crisis has been precipitated by the exclusive attention which Brazilian planters have devoted to coffee growing in the past few years. Seduced by the high prices prevailing some time ago, they went in wholesale for extending the plantation of the shrub, with the consequence that the supply of the berry is now enormously in excess of market requirements. Between 1887 and 1896 the average profit of the planter is estimated by Mr. Wagstaff to have been 150 per cent., and great as the fall in the price of coffee has since been he can still produce it at a profit. Naturally, however, the low prices now ruling have hit the power of the Government to remit to Europe very severely, because, although the export of coffee has risen until last season it reached the total of 9,678,317 bags, it does not yield sufficient to give the Government a large margin to draw upon. And the worst of it is that other sources of wealth have been so completely neglected by a class intent in the pursuit of fortunes in coffee, that the people have to be fed from abroad, and are thus entirely unprepared to encounter misfortune.

Time given, this condition will doubtless improve, and already the cultivation of Indian corn and beans at least is extending, and the planters are becoming awake to the necessity of producing something besides coffee for export. Movement, however, in this wholesome direction takes time, and before it can be carried to the extent necessary to save the country its central Government may founder in bankruptcy, if nothing worse. In vain does the Rio Government struggle along by raising local loans, by floating Treasury bills in London, and perhaps by squeezing further advances out of the Rothschilds, who are as deeply implicated in Brazilian finance as the Barings were in Argentine. The day must come, under present conditions, when it will be impossible for the Government to meet its sterling obligations in Europe, and our impression is that it is not now a day far off. The crisis which has been grinding along in Brazil, for the last four or five years at least, is now breaking out in an acute form in Portugal, with whom, as the mother country, Brazil still maintains intimate relations. Should a collapse happen in Portugal, it must hasten the end in Brazil likewise, and it would not in any way surprise us if the additional strain put upon international credit by the present war were to upset the equilibrium in both countries. We have dwelt only upon the financial aspect of the question, because it is the most pressing, but traders will find a great deal to interest them in Mr. Wagstaff's report, and should give careful heed to his advice with regard to the packing of goods, so as to make them pass the Custom House easily, and study the tariff changes, which to some extent appear to be favourable to a revival of trade. It by no means follows that because the Governments of Brazil, federal and local, may be more or less insolvent, or likely to fall into insolvency, the people are therefore poorer. Under certain circumstances the bankruptcy of a Government might well be a nation's salvation. In the case of Brazil we should not be at all surprised were its collapse as a federal State to lead to the institution of a number of independent Republics. We have spoken only of coffee. What interest have Bahia and Pernambuco in coffee? The question alone suggests cleavage enough to sunder North from South.

Economic and Financial Notes and Correspondence.

Some Consequences of a State of War.

Whether there is to be fighting or Spanish privateering or not—we expect plenty of both—commerce is already beginning to feel the effects of the declared state of hostility between the United States and Spain. Postal communication has been stopped in the United States with Spain and all Spanish Colonies, and the British Postmaster-General has issued a notice that, communication with Cuba being interrupted, letters for Havana and all other places in the island will be detained in the Post Office and not forwarded until some opportunity arises for their safe transmission. Letters, however, directed to be sent by any particular route will be dispatched, although the Postmaster-General has no ground for supposing that they will in consequence secure early delivery. This is perhaps a small matter. Of more importance. however, is the advance in rates of marine insurance. British companies in New York have raised their rates on American bottoms 50 per cent., and in addition they now charge a premium of 10½ per cent. for long voyages, and in some cases as high as 5 per cent. for Transatlantic voyages. These advances are made on account of the uncertain position of the Spanish navy, and because Spanish privateers have been reported on the British coasts. The effect of such high rates will be to send trade more and more into British channels. American ships will no longer be able to sail under their own flag, and the commerce of the port of New York will suffer diminution. American trade, however, as we have frequently pointed out, need not necessarily be much interfered with in bulk by these consequences of a state of war. It will simply be diverted to Canada, for the most part, and perhaps also to Mexico. It is an ill wind that blows nobody good. What a pity the Canadian Government has not got its subsidised line of mail steamers ready. They might have done a roaring trade this summer. Could it not arrange with the Orient, or some other limp company on this side, to fill the gap meanwhile until the chosen contractors have had time to raise the money and build the ships?

Mr. Rhodes—A Correction and Criticism.

With only an imperfect report in an evening newspaper to guide us last week, we somewhat misunderstood Mr. Rhodes's statement with regard to the money spent in what he is pleased to call the development of Rhodesia. In order to put ourselves right we give the correct version in full and shall offer some comments upon it.

First of all there is the money you have spent in the development and conquest of the country which you have named after me. Now that money is roughly not £10,000,000, as Earl Grey, if he will allow me to correct him, has stated, but is roughly about six millions. That I say is a debenture debt. I am speaking to two audiences—not only here to the people of this country, but to the people in that country, which is becoming a self-governing State—just like another State of South Africa—and the money expended in the conquest and development of it should, when those people have become fully a

self-governing State, become a debenture debt of the country. We must look at these things broadly. The people who are really going to benefit most by the expenditure of the money in bringing Rhodesia into a condition of civilisation are the people who will come after us so far as settlers are concerned. A new country is very difficult. Everything is raw, everything is difficult, everything is against you. Some of you no doubt have read the stories of the Governors of Australia. When they commenced the state of the country was regarded almost as hopeless. Now it has four millions of people and a revenue of £100,000,000 a year. And with regard to Rhodesia I think it would be unfair to solely debit you or the first people of the country with the total cost of the conquest and development from barbarism to civilisation. The people who benefit by the expenditure should repay it in the form of a public debt, and when the country changes from a Chartered administration, and becomes a self-governing State, it must take over from you what debt you have incurred in connection with the conquest and development of that country. And I feel sure they will do it.

It will be remembered that we challenged Earl Grey's statement at the time and it seems to us that he ought to have at once corrected so glaring an exaggeration. That, however, is his affair and may be left where it stands. Of much more importance is the indication the above extract gives of Mr. Rhodes's intention to lay upon the backs of the inhabitants of Rhodesia, as soon as a decent pretext is given him to do so, a debt of about £6,000,000. How he arrives even at this figure we do not know. Hardly so much has been spent on wars and everything else, if we exclude the 2,000,000 of shares taken as promoter's fee by him and his associates of the De Beers syndicate, which originally projected and carried out the annexation. Including the premiums received on the shares and the debentures, we cannot find that quite £4,000,000 of money has really been put into the territory directly by the company. The inference, therefore, is that Mr. Rhodes does intend to throw the 2,000,000 shares divided up by the promoters into the total "debt." In a common man this proposal would meet with the utmost condemnation, but Mr. Rhodes is *sui generis*, and his cool proposition was greeted with cheers by the enthusiastic shareholders.

From their point of view, indeed, the cheers were justified. If the settlers in the territory of the company can be loaded in this way at the start, and persuaded to pay, say, 5 per cent. upon the "bonds," Chartered shareholders would enter upon a revenue of £300,000 and still possess the whole of their shares on which to receive whatever "profit" could be extracted in addition. That is one way of looking at the proposed transaction, and it heightens our admiration for the splendid impudence which conceived it. It might bear another aspect, however, even for Chartered shareholders, were the debentures given to them for their so-called "expenditure" in the country, including the £3,000,000 swallowed up in the Matabele and Mashona rebellions, to be sold to third parties, for then these third parties would hold a mortgage over the territory which might become extremely burdensome. Shouting shareholders might reflect that this would not be the only debt Rhodesians would have to carry by any means. As we pointed out a fortnight ago, the "progress" they create must provide interest on a railway capital the total of which may soon be another £6,000,000, all of which would come before the Chartered shareholder. And there is all the mining capital in addition which will look for revenue in some shape, with probably mine debentures bringing ever so many other dogs to wrangle over the bone. Hence the estimate put forward by us that £3,000,000 of free revenue—free to be taken from them—would have to be produced by the inhabitants of the country before they could put a bit of bread in their own mouths, so to say, is by no means an exaggerated one, and, however delighted shareholders may be at the prospect, we think sensible people may well hesitate, not once, but many times, before committing their future to a country prospectively eaten into to this extent by its conquerors with their dependents, suckers, and hired chorus of applauders.

Cuban Horrors.

Before giving way freely to the call for "sympathy with Spain," for "money to help Spain to fight," and so on, the City should read the *Daily Chronicle* of Thursday's report of an interview with Mr. G. C. Musgrave, its special correspondent, lately ejected from the island by the Spaniards, and now on his way back again. In this interview Weylerism is set forth in all its horrors of murder, rapine, laying waste, starvation, and every crime the history of Spain as a ruling power has made us familiar with since her conquests in America began. The Spaniard of peace and "good society" may be, generally is, a gentleman in manners and speech. But place him in uncontrolled sway over a number of his fellow men and he oftener than not develops the instinct of the bloodthirsty savage. Weyler, in Cuba, was merely a modern replica of Alva in the Netherlands, probably without Alva's fanaticism, and the worst of it is that the Government of Spain is too weak to be able to keep its agents in order.

"But Mr. Musgrave may be exaggerating." Well, it is easy for our Foreign Office to put his credibility to the test. He tells a story of the murder of a British subject, a Mr. Dalregon, in cold blood. The Spanish soldiers woke him in the middle of the night and shot him dead without a word of explanation. This British subject left a wife and family it would appear, and, if they also have not since been done to death, redress of their wrongs ought to be required of the Spanish Government, unless it can give, or compel General Weyler to give, an explanation of the deed which may remove it from the category of wilful murder.

The Tax on Bills of Exchange.

In his reply to the desultory talk over his Budget, Sir Michael Hicks-Beach passed heedlessly over the suggestion of Sir Samuel Montagu that a committee should be appointed to deal with the question of foreign bills of exchange. Sir Samuel wishes to have the laws and customs regulating these settled by international agreement. We are not sure what he means by that, but on one point he certainly was justified in drawing attention to this subject. Last July, in dealing with it in this Review, we pointed out that the present uniform tax of 1s. per cent. on all bills of exchange, no matter of what currency, was tending directly to destroy our former large business in this negotiable instrument, and to throw payments more and more into the form of sight cheques and telegraphic transfers. As we then pointed out, the stamp on a seven-day bill is equivalent to 2·3 per cent. per annum on the amount of it, a quite absurd impost; and it astonishes us that the Chancellor of the Exchequer, who has been himself a bank director, did not catch at the opportunity Sir Samuel Montagu's suggestion opened up to him to set on foot a movement to remove at least this anomaly. Had he devoted himself to the labour of graduating the stamp duty on bills of exchange so that those of brief currency, up to two months, say, would pay less considerably than those bearing more distant dates of payment, he would have powerfully assisted the bankers of the City to resume and maintain their hold upon this international instrument of commerce. The reform would have been a worthier one in our opinion than the proposed changes in the income tax, or the reduction in the tobacco duty, one of which does not seem to us fiscally sound, and the other nobody has yet said "thank you" for. However, a lowered tobacco duty does appeal in some sense to the masses, even if they get nothing by it, whereas the proper regulation of bill stamps would have seemed to the multitude of the electorate only to touch the pockets of the City—those bulging pockets.

The Rise in Wheat.

If it had been Great Britain herself that had delivered a declaration of war against another Power, there could scarcely have been a greater turmoil among wheat dealers than has prevailed for the last ten days or a fortnight. Prices have gone up with a rush and a bound until business was done at 47s. a quarter, and in one instance, at least, at 48s. That is the highest figure

as yet. The average is probably not more than 45s. or 46s., but the tendency is still upward, and it is not impossible that it may soon reach even 50s.—the highest price touched since 1891, when the Russian ukase against the exportation of wheat caused an extraordinary, though happily temporary, excitement in the wheat trade. For the present enormous rise in wheat there seems no adequate reason. Farmers, it is said, hold out because they believe rates will be higher yet. Possibly; but it may easily happen that they may hold out too long, and suffer loss in consequence. For many weeks past the rates for wheat have been firm, with an upward tendency; but until last week the rise was comparatively small, and no fear was entertained of exceptional rates. The imports for the season up to last week were about a million quarters less than those of the same period last year. It was estimated some weeks ago that to keep up stocks to their average level between now and August we should require to import about 10,000,000 quarters. There has also for weeks been an exceptional demand for France and the Continent; but all these causes combined would not have produced a very serious rise in the price had it not been for the bursting of the war cloud between Spain and America.

But that can only be regarded as an excuse or pretence. New York exporters have for weeks been busy sending off large shipments of wheat. Many of them are now on the way. There may be some little delay before these exports are resumed; for the doubt about the attitude of the United States and Spain towards the Declaration of Paris, and the engagement of privateers made shippers timid. But that doubt is now dispelled. Both countries have repudiated privateering; for though Spain reserves to herself a conditional right to resort to it in case of a change of circumstances, nobody believes that she will do so. The war risk fixed by the Marine Insurance Companies on British vessels from the United States and Canada is only 5s. per cent. in contrast with £2 per cent. on ships sailing under the American or Spanish flag. The insurance companies, therefore, have no great apprehension of interference with grain freights in British vessels, so that there can be no solid reason for the extraordinary upward spurt in the price of wheat. It cannot last. There are ample stores of grain in the United States and Canada for our own needs as well as those of the Continent; and these will be forthcoming in due time. Indian wheat, too, and Argentine will soon be abundant on the market. So the reign of the speculative "bull" can only, we believe, be of brief duration.

The Neutrality Proclamation.

This document, to those who expected logical precision and clear definition of what is contraband of war, may be somewhat disappointing, but we do not see that, with a due regard to all the interests concerned, the proclamation could well have been any more clear or precise than it is. It is quite according to precedent. Indeed, in the main, it may be regarded as a veteran that has done duty in several wars. No doubt something more definite was perhaps expected on the question of coal; but had the English Government declared coal contraband of war, its motives would have been misunderstood, and it would certainly have been accused of favouring America at the expense of Spain. If, however, coal is not made contraband of war, her Majesty's subjects are left in no doubt as to how and when it may be supplied to belligerent vessels. Such ships on entering English ports may be supplied with just enough coal to carry them to their nearest home port, and no ship can be supplied a second time within three months, unless by special permission. This may not perhaps be altogether agreeable to coal dealers who hoped for an opportunity of doing a big business with belligerent craft. But no neutrality proclamation would probably have satisfied the aspirations of such gentlemen. What that document has to aim at securing is that there shall be no repetition of the *Alabama* difficulty; and this the proclamation, if impartially carried out, may easily do. It has at least been very effectual in the case of the American gunboat *Somers*, at Falmouth, in regard to which it cannot be said that we have been led astray from the strict path of neutral duty by sympathy or sentiment. Of course there are difficulties in the neutrality proclamation in the way of the unwary, but they are scarcely to be avoided in such a document. The main thing is to insist on its impartial enforcement. Spain may deserve nothing special at our hands, but at least she is entitled to strictly legal and just treatment as a belligerent; and benevolence may be mixed with our neutrality to America without straining official proclamations, which must descend to farce and worse if their provisions are not carried out with the utmost impartiality.

Dutch Petroleum and the Standard Oil Company

We are glad to read in Mr. Consul Robinson's report from Amsterdam that, so far, the attempts of the Standard Oil Company of America to obtain a footing in the petroleum interest of the Dutch East Indies has not met with success. The company sought to buy the shares of the Mocara Enim Company, an important concession in Sumatra, but at an extraordinary general meeting of the latter held in February last to ratify the agreement, the Dutch Government interfered and stated that no concessions would be granted "to a company under the control of the American monster monopoly." Whether the Standard Oil Company will be effectually stopped by such a statement is doubtful, but the Government seems quite determined to resist it to the utmost. "The agitation against the Standard Oil Company's monopoly," says Mr. Robinson, "in so far as this inflicts on this country all the dangers and disasters caused by an exclusive supply of low-flashing oil, is a constantly increasing one." We are delighted to hear it, and, now that Sir Vivian Majendie is dead, hope to see this good example followed vigorously by ourselves—by the people, we mean, not by our Government. It never does anything which savours "of interference with the liberty of the subject," or of the alien, to blow himself and his neighbours to pieces if he chooses.

Agriculture in Germany.

Mr. T. R. Mulvany, H.B.M.'s Consul at Düsseldorf, is evidently a persevering as well as an energetic gentleman; and it will not be his fault apparently if we are not made thoroughly acquainted with all the ways and outcome of German trade and commerce. But he should stick to facts: his theories are of little use where they are not misleading. Here, for instance, as introductory to an interesting paper on German agriculture which he has had compiled by a German gentleman who evidently knows his subject, Mr. Mulvany gravely informs us that while the British farmer has been discouraged and depressed by the difficulties which confront him, the German farmer has made progress "under the less adverse policy of a moderate amount of protection and fair railway freights." Then he speaks of this industry in England and Ireland as being "a hopelessly minous one." Even English farmers, much as they may be given to grumbling, would scarcely agree with such a hopeless statement; and as to the "moderate amount of protection" being a benefit to the German farmer, the voluminous facts marshalled in Mr. Koenig's report seems to us to show that it has nothing to do with the success of agriculture in Germany.

Not only do the State railways give the German farmer the benefit of the "fair railway freights" which are denied to the British agriculturist, but the State provides him with a large number of technical educational establishments where he may be thoroughly fitted for his business. Then there are the State experimental stations, where all sorts of experiments are made for the benefit of the farmer, where also fodder, manures, seeds, and so forth are tested for a merely nominal fee. The transfer of land is almost as simple and easy as that of any commercial commodity. There are few large

farms—absolutely none above 500 hectares, or about 1,000 acres. Eleven per cent. of the farms are under four acres, and 44 per cent. from ten to forty acres. This refers more particularly to Westphalia. General workmen and farm labourers are encouraged to acquire land and build their own cottages, with the result that the workers are settled and easily available in the various districts. Fruit-growing adds much to the income of the German farmer, while the English farmer will hardly look at it; and, even if he did, the railways would extract a too great percentage of the profit in freight for carrying the fruit to the central markets. The very moors are cultivated with profit in Germany; and vast tracts of waste land have thus been turned into fruitful districts, growing some of the finest sugar-beetroots to be seen in Germany. Credit banks are also numerous. In all these things the State has been and continues to be helpful. In fact, the German farmer gets so much done for him by the State that he ought to be ashamed to keep the State picking the pockets of the consumers for him under the guise of "protection," moderate or otherwise.

Unfortunate Austria.

What is Austria coming to? While her commercial men are appealing for legislative reforms in relief of trade, her politicians seem bent on making legislation of any sort impossible. The scenes witnessed in the Reichsrath since its reassembling are enough to make moderate men despair of Parliamentary Government. Three or four deputies who were suspended in one of the many riots in the Reichsrath before Christmas, and were deprived of their official salaries for three days, have won a victory in the law courts. The judges have ordered the salaries to be paid, and thus virtually declare the famous Lex Falkenhayn illegal. Undoubtedly this is a triumph for the Opposition deputies, but instead of accepting it quietly, and setting about the business of the nation like sensible practical men, they celebrate the event by an orgie of riot. They have carried a motion for the impeachment of Count Badeni, the former Premier, by a majority of eight. But to what end? Nothing more will probably be heard of it, unless the absence of impeachment proceedings be made the excuse for further disorder. The sooner commercial men found a commercial party in the Reichsrath the better for themselves and the country. There will be no commercial reforms for them otherwise. Then there is the *Ausgleich* to be settled. Unless it is arranged soon the very union of the dual kingdom will be in jeopardy. There is a colonial party in Austria. It wishes to found a colony in East Asia. It has been casting longing eyes on China, at which every Power but Austria has had its pull, and it proposes to send a Commission to the Far East to inquire how best Austrian interests may be furthered in that distant quarter. The Emperor approves and encourages the project; but what is the use of it if the Reichsrath is to confine itself to miserable wranglings over trifles, leaving the real interests of the country to take care of themselves? Austrian trade is still in swaddling clothes, and without more freedom, it must lose strength until its continued existence may be in danger.

THE COTTON MANUFACTURING INDUSTRY OF MEXICO.

A very interesting and instructive report is that of Mr. Lionel Carden on the subject of the ancient industry which at the present day forms such a profitable source of revenue to the Mexican Government. Practised by the natives for centuries before the Spanish conquest, it was not encouraged or protected under Spanish rule, which strove rather to check any enterprise that might interfere with the trade of the mother country, and not until after the Independence were any efforts made to revive this languishing source of wealth. The first factory was built in 1834, near Puebla, with a view to taking advantage of the abundant jute supply of that district, water being the only motive power used in the earlier stages. It is still the principal power, fuel being very dear, and consequently all, or nearly all, of the sites for subsequent factories were chosen with the view to water, except in one or two instances where other advantages had to be taken into consideration. In 1896 there were 107 factories at work throughout the Republic, with an aggregate of 13,826 horse power, forty-five being worked by water alone, twenty-eight by steam alone, and twenty-eight by steam and water combined, the proportion of steam in these last averaging about 25 per cent. of their total power. The machinery in the same year consisted of 13,660 looms, 448,156 spindles, and 24 printing machines, to which 500 looms were added in 1897, and by the end of this year another 1,200 will be in operation. We are glad to note that English machinery is increasing rapidly in favour on account of its superiority and stability, and that for some years past all the new machinery erected has been of English make. Mexico cannot manage to raise much more than half the raw material required annually in its factories, and imports the rest from the United States, levying a customs duty of about 1d. per lb. The price of the native cotton is also governed by that of the foreign, and in 1896 the mean price per lb. was 20 cents for both Mexican and foreign. The total amount consumed was 53,273,397 lb., at a cost of $10,645,679, or about £1,065,000. The total cost of production, including over $2,000,000 paid in taxation, Mr. Carden estimates at about $18,000,000, and though unable to give the exact profits in the industry, they are generally stated at from 20 to 30 per cent. on the actual capital invested. Up till now Mexico has not been able to supply the local demand for cotton fabrics in her markets, and has had to import low grade price goods from England, but as the manufacturing capacity increases in greater proportion annually than the consumption, it will not be long before the factories will produce all that is required in the country, and enable the people to dispense with our aid. This, however, Mr. Carden points out, is with regard to low-grade goods only, the Mexican operative being incapable of skilled labour and unable to make tissues of finer finish or with any variety of textures. English merchants, instead of losing what trade they have, might greatly increase it by the introduction of new materials direct to the consumer, especially among the poorer classes.

Critical Index to New Investments.

LONDON GENERAL OMNIBUS COMPANY.

Issue of £75,000 4 per cent debentures, being part of £300,000 authorised. Tenders are invited at a minimum of 110 per cent. The stock which is redeemable October 1, 1934, presumably at par, is secured on the freehold and leasehold properties of the company, and interest is due April and October. The paid-up capital is £700,000, and the reserves £165,000, while the net income for past twenty years was equal to £73,577 per annum, and for last year reached £119,856. The directors do not condescend to say what the money is wanted for. Can it be for motors? Whatever it is for we do not approve this piling-up of debenture debt when the main security the company has to offer is short leases, the value of which is being rapidly written up in the balance sheet. Allowing for redemption in thirty-six years, the yield of £3 10s. 3d. per cent. is not at all tempting considering the security. A point to notice is that the trustees for the debenture-holders consist of the chairman, deputy chairman, and another director. Trustees should never be members of the board.

THRELFALL'S BREWERY COMPANY, LIMITED.

This Liverpool and Manchester Brewery is making a further issue of shares. It has an authorised capital of £1,000,000, of which three-fourths is subscribed and paid up. It now offers 7,500 ordinary shares of £10 each at 37½, which should bring to the company's treasury £281,250, but the premium is to be placed to the reserve fund. The money will be used in the business, and in paying for properties recently purchased and in the purchase of further properties. This is a wonderfully good brewery. The new issue has caused the existing shares to fall £3, but as they are still 4½ above what the new shares are offered at, the latter will be promptly taken up by existing shareholders, whose applications will very properly be first considered.

BROOKS & DOXEY, LIMITED.

A Manchester business of textile machinists, founded by Samuel Brooks in 1859, now employs over 1,000 men, and the two establishments cover an area of nearly fifteen acres. Land and buildings,

almost freehold, are valued at £168,618, and stock, stores, and work on hand at £77,329, while book-debts are guaranteed to produce £44,500, and patterns, patents, and trade marks are put in for £10,000, nothing being charged for goodwill. This makes a total of £300,448, and the vendors have agreed to accept £300,000, two-thirds of which will be cash. The capital comprises £100,000 in ordinary shares, £100,000 in 5 per cent. preference shares, and £100,000 4 per cent. debenture stock, and the vendors take one third of each class. Accountant's certificate is not satisfactory, merely stating that profits for four years ended December 1896, were sufficient to pay 10 per cent. on ordinary shares. This is as far as we are taken, for the works were almost closed for eight months last year owing to the engineers' and spindle-makers' strikes. It is unfortunate that the business should be offered immediately after such a disastrous year. The business may be good, but there is nothing in the accountant's certificate to prove that it is not a declining one.

NOVELLO & CO., LIMITED.

This company is formed to purchase the well-known music publishing business founded by Vincent Novello in 1811, but the purchase does not include the branch in New York. It is difficult to learn much from the accountant's certificate. No account, it seems, has ever been taken of the machinery and plant, nor has stock been taken of the music, &c., in hand, the profits having always been dealt with irrespective thereof. Then, as regards profits, no details are given beyond the simple fact that during the five years ending December, 1897, they exceeded £100,000, or an average of £20,000 per annum. Assets included in the transfer amount to £270,000, of which book debts represent £34,535; stereotyped and engraved plates, £81,685; and plant, fittings, &c., £40,421. Deducting trade debts, £12,138, to be paid by the company, the goodwill and leaseholds stand for £88,154. The share capital is £270,000 in £10 shares, equally divided into ordinary and 4½ per cent. preference, and £90,000 of the latter is offered to the public at 5s. per share premium. The remainder of the share capital is taken by the vendors, and although we do not see the purchase price stated, we assume it is £270,000 as well as the premium on the shares offered. The accountant's certificate is not at all to our liking, and that the assets are worth the amount stated we should much doubt. Even were the shares offered at par, we see no attraction in them.

L. ROSE & CO., LIMITED.

We have all heard of Rose's "Lime Juice Cordial," and this is the company that makes it. The share capital is £150,000 in 15,000 6 per cent. Cumulative Preference shares of £5 each and 75,000 ordinary shares of £1 each. Preference shares alone are offered for subscription, all the ordinary, with £65,000 in cash being taken by the vendors. No statement of assets is supplied, but profits for past three years are certified at £7,466, £10,986, and £12,061. This shows good progress, and as the preference dividend will require only £4,500, this should be easily forthcoming. But what is the security for the money? and are the West Indies going to be affected by the war? In spite of the excellent profit shown, we should not be surprised if the issue does not meet with a very cordial reception.

E. ROBINSON & SONS, LIMITED.

Company is formed to acquire and extend the thirty-year-old business of tobacco, cigarette, and snuff manufacturers of St. Peter's-gate, Stockport. Capital, £100,000 in £1 shares, 35,000 being 5 per cent. cumulative preference, and the remainder ordinary. Little is said about past profits beyond the fact that for three years ended January 7 last, they amounted to £22,033, or an average of £7,344 per annum, but this does not show whether profits are rising or diminishing. Assets are taken over at £75,000, but of this only £13,001 represents freehold property, and machinery and plant, the remaining £62,000 being made up of book debts, £14,810; stock-in-trade, £30,582; and goodwill, £16,605. The vendors ask £75,000 for the business, which seems a very full price; of this amount £50,000 is to be cash. Interest on the preference shares should be pretty safe on this basis, but still, we have not a high opinion of the concern.

THE GROSVENOR DAIRIES, LIMITED.

The company offer £30,000 6 per cent. cumulative preference shares at par for the purpose of buying eight "businesses" owned by the Manor Farm Dairy, Clapham. These "businesses" comprise only ten shops; and although the dairy has been carried on for twenty years, only one year's profits are given, aggregating £4,764, while a Philpot-lane firm value the leases, goodwill, &c., at £30,715, goodwill probably bulking largely. The shares now offered appear to be part of the capital offered last year, which met with only a poor response, and we see no reason why investors should come forward more liberally on the second asking.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Economic Life Assurance Society.—In their seventy-fifth annual report the directors of this mutual office state that 559 policies were completed in the year, insuring £469,777 and yielding £15,161 in new premiums, of which £4,825 were single premiums. Part of this was reinsured, so that the net addition to the premium income was £10,271. The total premium income less reassurance was £225,196. Claims absorbed £287,571, including bonus additions, this being less than 83 per cent. of the amount allowed for according to the Institute Table of Mortality, while the claims were under 72 per cent. of the expected number. A large annuity business is done by this society, and last year £80,822 was received on this account in purchase of eighty-eight annuities aggregating £6,930 per annum. Expenses and commission, after making adjustment for single premiums and the capital received for annuities, was reduced from 13·45 to 12·85 per cent. of the premium income. The rate of interest received on the total funds fell 2d. per cent. to £4 0s. 5d., which is still a very good rate. As the result of the year's business the total funds of the society were increased by £97,000 to £3,783,278, and this large sum is nearly all invested at home, only £552,204 being in Indian and Colonial Government securities and £36,070 in Foreign Government securities. The interest income amounted to £147,219.

The City of Glasgow Life Assurance Company.—This company's fifty-ninth annual report for the year ended January 20 last states that 1,081 policies were accepted, insuring £627,305, and producing £22,637 in annual premiums. A considerable proportion, however, of this was reinsured, so that the net addition to the company's risk was £508,005, and to the premium income £19,353. Only £1,536 was received as single premiums. The total net premium income is now £213,577, and the income from interest and dividends, &c., was £83,220 last year. The company does a small annuity business, having sold immediate annuities of £1,241 within the year, against which annuities amounting to £939 fell in. Claims in the insurance department, including bonus, amounted to £129,120 net. They arose in consequence of the death of 198 policy holders, and both number and amount are stated by the directors to be again considerably within those expected and provided for by the company's calculations. The total receipts of the year were £396,100, and the disbursements £210,198; this left £95,972 to be added to the accumulated funds, raising them to £2,380,802. The company's investments yield an average interest of £3 15s, 8d. per cent. A committee of directors report that the securities are in perfect order, and that their market value is in excess of the value in the books. The ratio of expenses to premium income exceeded 17·5 per cent., which is high in these days of falling interest and keen competition. The great bulk of the company's funds appear to be judiciously invested in home securities.

Otago Harbour Board.—Mr. Hugh Gourley, the chairman of this board, makes a favourable report on the business of the harbour for the past year, stating that, notwithstanding the large expenditure of £13,000 on the works, the surplus of revenue amounted to £2,664, which raised the credit balance to £7,858. The increase in the revenue was £7,160 he states, but it does not appear to us that this can be the case, because £3,604 is included as proceeds of the sale of debentures. We reckon that capital, but there may be some special reason which we do not know for treating the money differently in these accounts. Assuming that these debentures were capital, then the expenditure of the year would appear to have exceeded the income by £600. The matter is trifling enough seeing that such a large sum was spent on works, and there can be no doubt that the board has an expanding income, so we merely allude to the subject for the sake of clear book-keeping. All the charges on the outstanding debt of £687,400 were fully met, and the board appears to have no floating obligation of any sort. Power has been given by the New Zealand Parliament to expend £11,600 on capital account in the improvement of the harbour, and, no doubt, this is a wise outlay.

The Union Bank of Scotland, Limited.—For the year ended April 2 this bank made a profit of £151,039, to which £25,965 has to be added, being the balance brought forward. This gives £177,004 for distribution, and £110,000 of it is set aside to pay a dividend of 11 per cent., or 22s. per share in two equal halves on May 10 and November 10 next; £10,000 is placed to cost of bank premises; and £30,000 added to reserve or rest, making its total £595,000, exclusive of the amount set aside for dividend and the balance forward, which latter amounts to £23,338 after income-tax has been paid. From these figures it is evident that the bank might have easily paid a larger dividend, but the directors have done wisely in strengthening the reserve. Eleven per cent. is a very good return, even on a bank share, and we hope this conservative policy will be adhered

to until the reserve at least equals the paid-up capital of £1,000,000. The balance-sheet is well divided up, and indicates both the bills discounted, advances or cash credits, and the loans on securities. In addition, various classes of investments are set out, and show that the bank's money is well administered. The total of the balance-sheet amounts to £14,151,685, the liability on deposits being £11,239,481.

Schweppes, Limited.—The directors of this company have issued their first report covering a period of nearly eight months up to December 31 last, being the time of the company's life. In this they state that the net profits came to £40,896, and they think this satisfactory, although it does not allow more than 2 per cent. per annum to be paid on the deferred capital of £350,000, this dividend to be reckoned only from the date of the payment of the final instalment on the shares. In justification of their cheerfulness the directors urge that immediate loss of revenue has arisen from the reduction of the charge to customers for bottles to a uniform rate of 1s. per dozen. Already, they state, this concession has stimulated consumption to such an extent that the sales of the year have increased by upwards of 1,500,000 bottles. It is possible, therefore, that the company may do better in the future. At the same time, there is no getting over the fact that a capitalisation of £1,250,000 is an enormous one for such a business, and to bring it into proper trim a large sum from revenue ought to be devoted each year to writing down goodwill. Unless this is done the company can never be in a position to meet adversity or keen competition from rivals less handicapped.

The Edinburgh Investment Trust, Limited.—For its ninth year, ended March 15 last, this company made a profit of £19,543, after providing for interest and expenses of management, and exclusive of profit on investments sold. Out of this they met the preferred stock dividend, and paid 3 per cent. on the deferred stock for the year, leaving £3,709 to be carried forward, as against £1,594 brought in and included in the total profit just mentioned above. No particulars are furnished with regard to the investments of the company, but the directors state that £428,388 is in stocks and shares of public companies and £271,489 in railway bonds, debentures, &c., and that the total of £699,878 thus reached is distributed over 282 investments, being an average of about £3,480 in each. There appears to be depreciation on these investments, well as the money is distributed, and accordingly the sum of £8,086, realised as profit on the sale of securities during the year, has been applied to meeting depreciation. We should have liked to see some valuation of the securities held.

Industrial and General Trust.—The revenue of this Trust in the past year ended March 31 from dividends, interest, and commissions was a little higher, but profit on realisations was less than half the amount obtained in the preceding twelve months. Expenses were slightly lower, and the net balance of £68,916 was £20,504 below that shown a year ago. The usual dividend of 5 per cent. only absorbed £47,125, and the sum of £12,500 was applied to the reduction of the debenture stock rebate and expenses account, and £9,317 put to reserve, raising it to £35,000. The amount carried forward—£4,095—was then about the same as that brought in. The debenture stock rebate and expenses account now amounts to £37,500, the wiping out of which remains as a charge upon the net revenue of future years. The reserve is specially invested in high-class securities. The investments stand at about the same amount in the books, but loans against securities have risen very much, being £66,428, as against £28,001 a year ago. We hope these will prove more fortunate than those of a former generation. A glance through the investments shows that the realisations effected were often well timed, but these operations, we should imagine, tend rather to dilute the quality of the investments. At the same time, there appears to be a tendency to return to the old underwriting devices of what we thought was a bygone era in regard to this Trust. For instance, in the list will be found fresh investments as under :—

	Nominal Amount.
	£
Monger's West Australian Stores Preference ...	1,555
" " " Ordinary ...	1,270
" " " Founders' ...	127
Mountain Copper Company Shares	11,250
National Electric Free Wiring Company ...	1,570
Schibareff Petroleum Company Preference ...	6,500
" " " Ordinary ...	3,300
Rhodesia Breweries Ordinary	3,000
New Trinidad Lake Asphalte Debentures ...	23,500
	£52,072

These are relatively such large blocks that little short of underwriting business could have induced the company to go into the ventures so heavily. As a matter of fact, they are all hazardous, and no doubt some of them will prove troublesome later on. In the year just passed the company may easily have got rid of more shares of this class, so that commission-shearing operations may have been bigger than these figures would seem to point to. At the same time, the amount mentioned compared with the total investments is not large, but it is not wise to sell good securities, even if they are overvalued in the market, if the money is to be placed in issues of this class.

Aboukir Company.—This company has been working since 1888 upon land in Egypt reclaimed by the draining of a large lake. At one time its indebtedness was very considerable, but steady selling of land has at last enabled the reduction of the debenture and loan debt to be taken in hand. The profit and loss account is a rather involved affair, but apparently the revenue was £10,554, chiefly from profit on land sales, against which expenditure for maintenance came to £2,790, interest and salaries to £6,027, and depreciation to £102. The net balance was therefore £1,633, but £2,488 was brought in, and accordingly the directors propose the first dividend in the history of the company of 3 per cent., carrying forward £1,628. It is evidently preparing to pay off more of the debentures and then convert the remaining indebtedness into a form of debt bearing a lower rate of interest. Such a step is urgently needed, for the charge now is about 6 per cent., but the present time is not the best for such an operation, and by waiting a little longer the principal of the debt to be dealt with ought to be further reduced and so facilitate the operation. If that is carried through in a prudent manner, a good portion of the revenue ought to be freed, and regular dividends become a probability.

Pacific Trust Association.—This Liverpool concern has a paid-up share capital of £100,000, and debentures outstanding to the extent of £46,020. Against these it has £105,147 in mortgages and loans upon land in California, Oregon, and Washington, and £36,711 in foreclosed properties. Including £850 brought forward, the total income was £12,421, and after payment of expenses there was a net balance of £4,433. A dividend of 2½ per cent. was declared, and £1,933 carried forward. Profit to the extent of £1,254 obtained on sale of foreclosed properties was put to a special reserve. The ordinary reserve is £5,000.

Highgate Hill Tramways.—The new company to work this cable line is capitalised upon a sensible footing, £15,000 covering the purchase consideration of the tramway, depôt, machinery, and cars. To find the money for this, £10,000 in shares and £6,000 in 5 per cent. mortgage debentures have been issued, and the company appears to owe but little besides these amounts. Last year the line was worked for eight and a half months, and in that time the revenue was £3,735, which left, after paying debenture interest, a net profit of £308. This permitted a dividend of 6d. per £1 share and the carrying forward of £50. It is claimed, however, that £326 special expenditure was included in the working expenses, and, as presumably this will not recur, it will leave a margin to provide against depreciation in future years.

Doom Dooma Tea Company.—This is first amongst the important Indian tea companies to issue its report, and the experience it sets forth does not augur well for the statements of other companies. A total of 1,812,990 lb. of tea was produced, or 38,374 lb. less than the preceding year, and nearly 200,000 lb. below the estimate. Cost of manufacture and bringing the tea to market was increased by the higher exchange and the high price of rice, so that the total cost was 8⅜d. per lb., or 1¼d. per lb. above that of 1896. At the same time, the average price obtained was 11⅛d. per lb., or ⅛d. per lb. less than in 1896. The company was, therefore, hit on all sides, and the result was that the profit for the year was only £19,040, as against £31,607 for 1896. Fortunately, the prosperous season in 1896 had been utilised by placing £10,000 to reserve, and so the board are able to declare the same dividend—12½ per cent.—as a year ago, but in doing so they reduced the amount forward by £2,067 to a total of £1,965. The company, however, has a reserve fund of £30,000, and last year must be considered exceptionally bad. The loss on rice incurred by the company amounted to no less than 10 per cent. of the outlay at the gardens, and, of course, this expenditure left nothing to show for it.

London General Investment Trust.—This company has done so well that one rather fears that future years will not show such good results. Upon investments and loans amounting to £245,000 it obtained a revenue in interest and dividends amounting to £15,594, or well nigh 6½ per cent. We are quite prepared to admit that it started at the right time, that is, when prices of securities were low, but even allowing for that circumstance, such a return appears to be abnormal. This is especially the case as in all probability the revenue from certain classes of investments may easily show a falling off this year. The board employed £1,750 of the profits in writing down the cost of certain securities, and £300 more was written off preliminary expenses, the balance providing the preference interest, and 7½ per cent. on the deferred stock, as against 7 per cent. for the two preceding years. It seems a pity that the amount written off preliminary expenses was reduced, as the sum still left in the balance-sheet is £1,900, after the company has been in existence for eight years. The sum of £8,110 was obtained from profit upon realisation of securities, and this has been added to reserve, raising its total to £16,330. It is intended to convert the founders' shares, but in dealing with this matter, it ought to be kept in view that the past year was probably exceptionally favourable for the company. The balance-sheet looks well, loans being rather less, and the only debt of importance being £24,161 for bank loan and overdraft. The securities are said to have a market, or estimated value of £6,302 above the value in the books, which is in addition to the reserve. A good deal of the valuation, however, must be upon estimates, as the securities without an official quotation form a fair portion of the investments.

Bell's Asbestos Company.—The profit-earning character of this business seems to steadily decline, for last year the profits amounted to £10,000, as against £15,772 in 1896, and £28,443 in 1894. The charge for interest and management fees (the directors have evidently been paid in part on a scale dependent upon profits) was less, but the net profit of £5,171 for last year was £4,596 below that in 1896. Fortunately, last year £4,000 was added to reserve, and so the board only reduce the dividend by 1 per cent. to 4 per cent., which enables them to carry forward £2,339, or £371 more. Debentures to the extent of about £3,500 were redeemed in the year, and in certain other respects the report, in the meagre information it supplies, gives evidence of cautious

policy; but this, of course, is of little avail if profits continue to run off at the pace they have been doing lately. Some statement, therefore, is needed in order to prevent shareholders from becoming thoroughly disheartened.

Bechuanaland Exploration Company.—After having been in existence ten years this company has paid three dividends, all in one year—1895—amounting to 6s. per share. Upon the strength of that remarkable performance its shares were run up to a high figure, which induced unfortunate holders to subscribe for fresh shares at a fancy figure, and upon the £162,069 netted in this way as premiums the company appears to have been living of late. Last year, with a revenue of £26,734, the expenditure came to £34,651, and so a loss in working of £7,917 was shown. Against that only £1,438, the balance brought in, could be placed, and the remaining £6,478 is left as a debit for the future. The directors are bound to admit at last that the £369,627, standing in the balance-sheet as the company's interest in stocks, shares, and syndicates, must be taken subject to depreciation, and accordingly they have withdrawn £72,069 from the premium account and put it to a "special reserve against depreciation." The future, of course, is stated to be very hopeful, but so it has been declared to be from the beginning of the history, and we note that the company has a liability of £68,713 in connection with its interests in stocks, shares, and syndicates. If these do not turn out better than they have done so far the consequences might be inconvenient. The company has shed one of its founders, for Mr. George Cawston will no longer grace its board. We wonder has he any reason to regret his connection with this singularly unfortunate company.

Hand-in-Hand Fire and Life Insurance Society.—For the past year, the 201st of the society's existence, the out-turn of the fire department has been bad. Losses and expenses, including commission, amounted to £107,107, while net premiums came to only £103,372, consequently there was a loss of £3,735 on the year's business, without taking account of the income from investments. The directors state that this loss has arisen chiefly through the Cripplegate fire of November 19 last, which cost them about £21,000, the largest loss the society has ever had by one fire, except one in 1766, when it lost £25,758 by a fire in Cornhill. In the past ten years, however, a profit of £130,833 has been made, of which £107,361 has been paid in company's returns, and the balance, £23,472, as well as interest, has been added to the accumulated fund. The net fire premiums of the year showed an increase of £3,302, and the loss ratio was £71·2 per cent. In the life department business was better, the new business of 1897 being the largest ever transacted by the society. Five hundred and seventy-three new policies were issued, insuring £351,983, and yielding £13,553 in annual premium. The total net premium income was £182,038, and 135 claims by death absorbed £125,545. The ratio of expenses and commission to premium was just over 12 per cent. After meeting all charges in both branches of the business, the accumulated funds, which include the general fund fire and life, and the life insurance fund under the Act of 1870, were augmented by £14,444 to £2,820,658. Valuation of the life department liabilities has again been made at 3 per cent., and shows an unappropriated surplus of £344,727. Excluding funds invested in reversionary interests, the average rate earned was £3 14s. 6d. The directors express regret at the retirement of Mr. Blenkinsop, the secretary, who has been thirty-seven years in the society's service, twenty-five of them in his present post. All except about £500,000 of the company's funds is invested in home securities of the best class.

The United States and South American Investment Trust Company, Limited.—This company's financial year ends on April 4, and it is now eleven years old. For the period just closed income was £40,687, and outgoings of all kinds, including interest on debenture stock, left £23,232 as net revenue. Adding the £1,009 brought forward, the entire free balance was £24,241. Out of this the preferred stock dividend has been paid and 1 per cent. for the year on the deferred stock, leaving £1,000 to be added to reserve and £1,491 to be carried forward. Considerable particulars are given regarding the company's investments, some of which are showing improvement, and a net profit of £11,258 from sales among them was added to the reserve, raising it to £17,909. From this however, £10,656 has been deducted and written off against securities permanently depreciated in value. Up to now the company's power of investment has been restricted to North and South American securities. Powers, however, have been granted to extend the limits, and the trustees propose to take advantage of them. They seem to be working the Trust with care and judgment on the whole, and some chance of improvement should be given by the recovery of Argentine agriculture and the rise in the prices of many Argentine securities. We are glad to see that the company does not appear to have much money in Brazilian securities, although it has quite enough to give it some trouble. A very full list of investments is appended to the report, including a separate one of securities purchased during the year. From this latter we notice that "extended powers of investment" have already been exercised, as we find Bovril preference shares, Austrian Incandescent shares, Bechuanaland Railway debentures, De Beers shares, Cory & Son's ordinary shares, North Worcestershire Breweries "B" debentures, Scheppes shares, and Welsbach preference and ordinary stock among the items added to the property of the Trust. We do not know that we can commend very cordially the judgment which has dictated some of these purchases.

The Great Boulder Proprietary Gold Mines, Limited,—The year ended December 31 last was a prosperous one for this, the best of all Western Australian mines discovered thus far. The net profit on the year's working was £272,805, exclusive of the small balance brought forward. Dividends aggregating 155 per cent. on the paid-up capital have been, or will be, paid out of these profits, and, in addition, £19,000 has been devoted to writing down machinery and plant, development account, and so on. Large reserves appear to exist in the tailings untreated, the value of which is estimated at £221,640. Reserves of ore have also increased during the year, and the latest advice with regard to the opening of the 400-ft. levels point to the reef being as rich there as it has proved to be nearer the surface. No particular difficulty seems to have been experienced with the supply of water, which has been sufficient to keep the 30-stamp battery working without interruption. Altogether it is a satisfactory report, and we can only trust the prosperity may long continue.

Central Bahia Railway Company.—Comment has been made upon the fact that the earnings of this company have risen by leaps and bounds of late, having been £57,685 in 1892; since when they have risen each year until £147,060 was received last year. One little matter, however, was forgotten in mentioning this, and that is that the exchange is taken throughout at the nominal rate of 27d. per milreis. Now in 1892 the milreis stood about 12½d., while last year the rate was about 7d., so that while £57,685 in 1892 represented £26,500 sterling, £147,060 in 1897 represented only about £38,100. It is not, therefore, surprising to find that working expenses have more than kept pace with the receipts, and that, after paying working expenses in Brazil, a profit of only 203,037 milreis was left, or a beggarly £5,963. Even then London charges, to the extent of £3,075, had to be met, so that the company had to depend almost entirely upon the Government guarantee for the funds to provide debenture interest, sinking fund charges, and dividend. The guarantee was duly paid, amounting to £105,783, and out of this fat sum £44,477 was required for debenture interest, £19,616 for sinking fund, and the balance permitted of a "dividend" of 6 per cent. for the year, £10,116 being carried forward, as against £11,518 brought in. In such circumstances it is only natural that the company has done nothing in regard to extensions. To build at the present time would probably be to do so cheaply, but apparently the worst has not yet been seen in Brazil.

Costa Rica Railway Company.—The new board has considerably improved the look of things. Gross receipts for 1897 were $2,894,547, against $2,618,113 in 1896, while the working expenses were only $1,319,707, compared with $1,503,823, the result in sterling being net receipts of £136,994, or £41,293 more than in the previous year. Debenture interest takes a little more owing to the extra charge on the prior mortgage debentures, and £2,000 is appropriated towards their redemption, but there still remains £50,797, from which a dividend of 4s. per share is to be paid, or 2 per cent, requiring only £36,000. The directors could have paid more, but have wisely put £8,000 to reserve and carry forward £6,797. The measure of improvement compared with 1896 will be seen when we say that the available balance then was £2,849, which naturally did not allow of any dividend being paid, or of anything being placed to reserve. Increases in revenue are reported under nearly every head and the saving in working expenses has reduced their ratio to receipts from 57½ to 45½ per cent. The banana traffic is expanding because growers are getting a better price, and there is a prospect of development of mineral resources which should benefit the line. Altogether, the position of the company has undergone a great change for the better, and in view of the hard work and expense borne by Mr. Herbert Allen in bringing this change about, it is proposed to hand him a special sum of £2,000 out of the past year's profits. A resolution to this effect will be brought forward at the meeting next Thursday, and shareholders will show their gratitude by unanimously approving it.

Buenos Ayres and Ensenada Port Railway Company.—An additional reason for the carrying through of the provisional agreement for the absorption of this company by the Buenos Ayres Great Southern Company is furnished by the report just issued. From this it appears that receipts amounted to £191,732, working expenses to £118,781, and net revenue to £72,951. After adding a few small items the balance allowed the payment of debenture interest, rentals, and the dividend upon the first preference stock, so that the income preference and the ordinary stocks received no distribution. The year must have been an exceptionally bad one, partly owing to the destruction by fire of the company's Central Station, but to a much larger extent to the compulsory removal by the Argentine Government of the company's railway between Casa Amarillâ and the Central Station, and the similar removal of the railway connecting this company's system at the Central Station with the Central Argentine, Pacific, and Rosario Railways at the Retiro. Possibly the strong Buenos Ayres Great Southern Company may be able to arrange matters more satisfactorily with the Government, but at any rate holders of Buenos Ayres and Ensenada securities must be rather glad to sink into the bosom of this greater company.

Mason & Barry, Limited.—This company appears to be working down its reserves of ore, for while 177,549 tons were broken and raised last year, the shipments amounted to 267,290 tons. The stock of ore and copper precipitate in Portugal, too, is only reported as worth £136,681, compared with £207,408 in 1896, and £246,854 in 1895. It is, therefore, a wise policy on the part of the board to pay back more of the capital to the shareholders and also write down assets vigorously. In the year £16,358 was deducted from the value of the works, buildings, plant, railways, piers, and other fixed and movable plant of the undertaking, and the total value of the same is now returned at £123,524. The sum of £4,500 was also written off the shares of La Sabina Company, reducing that asset to £31,700. Beyond these items, the assets of the company consist of its stocks, cash, and a large sum in high-class securities. After making the deduction mentioned the net profit for the past year was £43,406, which allows the directors

to declare a dividend of 4s. per share for the year, or about 7 per cent., and carry forward £6,372. Out of the surplus assets it is proposed to repay the shareholders £1 per share, which will require £185,145, and leave the outstanding capital at £370,290.

Orient Steam Navigation Company.—The result of the past year's working is a profit of £77,143, compared with £79,101 made in 1896, but in consequence of the *Garonne* having been sold only £62,213 is carried to reserve for depreciation of steamers against £67,158, so there remains a balance of £14,930 compared with £11,942; and, after paying the same dividend of 5s. per share, the balance carried forward is increased from £282 to £3,269. The fleet stands in the balance-sheet at £1,059,104, against which the reserve for depreciation amounts to £529,023, or just 50 per cent. The outstanding debentures of the company have been reduced from £108,850 to £92,550.

TRADE AND PRODUCE.

There has been nothing seen for many years like the recent excitement in the wheat trade. As soon as war was certain, dealers made haste to raise prices until they attained a height not reached since 1891, when the Russian ukase prohibiting the export of wheat caused a mad rush here for enhanced values until they secured 49s., and even 50s. in some cases, and for a brief day. That excitement was only temporary, and the present turmoil is not likely, we believe, to be of long duration. No doubt wheat has for many weeks been firm, and prices have steadily, though slowly, been going up. They would probably have reached 40s. to 42s. without the incitement of war, but certainly nobody imagined that within a week or ten days the rate for wheat would rise as high as 47s., and even 48s., the figure at which, at least in one or two cases, business was done. Shrewd observers assert that it will yet—and perhaps soon—go up to 50s.; but if it reach that point, it will not long remain there. Evidently, stocks in France and other Continental countries have been allowed to run very low, and exceptional purchases for the Continent have been hardening the market. But now that there is a tolerable certainty that neither of the belligerents in the present war will resort to privateering, and that there will be no interference with grain cargoes in neutral ships, there is no reason why the price should be kept at its present unnatural height. There are ample stocks in the United States and Canada, not to speak of other reserves, and if American vessels cannot bring these over to us, then British and other neutral vessels will. Not that we can look for cheap wheat for the present, nor for some time to come, but we may certainly expect the disappearance of the present inflation. The official New York report shows that exports thence in March last amounted to 15,459,575 bushels, as against 7,901,722 last year, a fact which indicates an exceptionally heavy demand from this side of the Atlantic. If the American exports are continued at anything like the same rate, we can be in no danger of falling short, and the New York figures seem to indicate no diminution in the supplies received there, the total amount for the first two weeks of April having been 7,379,136 bushels, against 3,057,482 last year. This wave of excitement and high pressure in England will probably, therefore, soon run its course, and wheat will settle down to a more rational figure. But as yet the advance goes merrily on. At Mark-lane, on Wednesday, red wheat was quoted at 46s. and white 48s.—the highest it has yet reached in Mark-lane. Provincial sellers in some cases make business impossible by their extravagant demands. The cargo market opened more quietly on Wednesday, but hardened towards the close, and prices were fully maintained, the Continental demand being still good.

At Newcastle yesterday 50s. was asked for white wheat, and even at that figure farmers were holding back.

Otherwise trade has not as yet been seriously disturbed by the war. Birmingham has had inquiries on behalf of America as to the time and price at which 100,000 rifles could be delivered; but no orders followed. There can be none now. In another respect Birmingham will be severely hit by the war. Her trade with Cuba is estimated as worth about £500,000 per annum; but that is now shut off, and in the event of Spain being defeated, it will probably never be recovered. We need not, therefore, be surprised to hear that the war has had an unsettling effect on Birmingham trade. There is little change in the iron trade. Wolverhampton, however, is busy with orders for the Australian and Indian markets. There are plenty of orders in the home trade, and for iron bars the recent advance in price has brought many new orders in the fear that the advance may go further yet. Pig-iron is in great demand, and it seems certain that the price will soon go up. Settlement prices on Monday:—Scotch, 46s. 3d.; Cleveland, 40s. 1½d.; hematite, 50s. In Glasgow, steel and iron manufacturers are busy with old orders, though new ones are not coming in so abundantly as the makers would like. But then the old orders will keep them going for a considerable time yet. There is great firmness in the hematite trade, but somehow, in Barrow-on-Furness at least, the holders of warrant iron are not pushing sales in view of the war and the depression which may follow if long continued. For the present, however, things go well, and prices are firm. Scotch pig-iron advanced at Glasgow on Wednesday to 46s. 7d., but in the afternoon it lost 1½d.; while Cumberland and hematite each gained 1½d. Wednesday's settlement prices—Scotch, 46s. 6d.; Cleveland, 40s. 3d.; hematite, 50s. 6d.

Copper is still on the upward tack, and there is every indication that prices have not yet reached their extreme height. There have been fluctuations, but they are rare, and never violent. At first 'Change on Tuesday about 1,000 tons were sold at £52 10s. to 11s. 3d. for cash and near dates, £52 12s. 6d. and 13s. 9d. for May prompts, £52 15s. to £53 for June dates, and £53 2s. 6d. for three months. These prices were all, however, beaten at second 'Change, when there was nothing below £52 11s. 3d. for cash and near dates, £52 15s. for June 10, £52 17s. 6d. two months, £53 and £53 1s. 3d three months. Settlement price for standard, £52 12s. 6d. net. At Wednesday's market, however, there was a slight fall after a gain of 2s. 6d. at the opening. About 700 tons were sold for three months, realising £53 2s. 6d., 1s. 3d., and £53. Cash was done at £52 10s., and June 9 at 5s. more. The settlement price was £52 10s. The reduction cannot be regarded as likely to last.

Cotton has been quiet but firm throughout the week. Futures have gone rather higher, but spot has not, and it is hardly thought, from the state of stocks in the cloth-making districts, that there will be any serious further increase in consequence of the war. American supplies are still abundant.

There is little to report in regard to wool. The markets have been inactive, with rather a tendency to depression. There have been no marked alterations in values. Still, reports from the manufacturing districts speak hopefully of a speedy improvement in business. The third series of wool sales open on May 3, and Messrs. Jacomb, Son, & Company give the following as the net quantity available for these sales: New South Wales, 54,000 bales; Queensland, 23,000 bales; Victorian, 37,000 bales; Tasmanian, 6,500 bales; South Australian, 9,500 bales; West Australian, 5,000 bales; New Zealand, 59,000 bales: Cape and Natal, 15,000 bales. The total amount is 209,000. The average daily offerings will be about 12,260 bales.

There is practically no change in the coal market. Some of the non-associated collieries in Wales which had been virtually stopped have resumed, and the output has been increased; but, of course, there is no slackening in the demand, and prices remain as high as ever. There is no sign of an arrangement of the strike. The employers remain firm, as the manifesto they have just issued clearly shows; and they still refuse the 10 per cent. advance, or to resume negotiations unless the men's representatives come armed with plenary powers. As coal has not been declared contraband of war, it is not probable that the Hispano-American war will have any pronounced influence on the market here; but the home demand is quite sufficient to well maintain existing prices, if not to enhance them—at least while the Welsh strike lasts.

Sugar has benefited by the war, temporarily at least, though how long the rise in value may continue it would be hazardous to guess. But the value *has* risen, and that there is some confidence in the immediate future is shown by the hopeful feeling expressed by dealers. The prospects of the world's supplies during the next six months having now become more clearly defined, according to Mr. Czarnikow's circular, and prices being still moderate, the trade are buying freely at an advance of about 3¾d. on beet and about 6d. on cane. The tone remains firm, and strong opinions are expressed as to a further improvement; but dealers would do well to exercise considerable caution. In the circumstances we are not surprised to hear that speculation is reviving.

Next Week's Meetings.

Monday, May 2.

Alliance Investment	Winchester House, noon.
City of Santos Improvements ...	Gresham House, noon.
J. & E. Hall & Co.	23, St. Swithin's-lane, 11 a.m.
North British and New Zealand Invest.	Glasgow, 2 p.m.
Northern American Trust	Dundee, noon.

Tuesday, May 3.

Imperial Continental Gas	Cannon-street Hotel, 2.30 p.m.
Imperial Russian Cotton and Jute ...	Winchester House, 2.30 p.m.
Ionian Bank	93, Bishopsgate-street, 1 p.m.
Law Fire Insurance	114, Chancery-lane, 1 p.m.
London General Investment ...	12, Moorgate-street, noon.
Pacific Trust Association	Liverpool, noon.
United States and South American Trust	Winchester House, noon.

Wednesday, May 4.

Buenos Ayres and Ensenada Railway...	Winchester House, 2.30 p.m.
Commercial Union Assurance ...	25, Cornhill, noon.
Doom Dooma Tea	1, Great Winchester-street, 3 p.m.
Scottish Union and National Insurance	Edinburgh, 2 p.m.
Sun Life Assurance	63, Threadneedle-street, 2 p.m.
West Flanders Railway	10, Moorgate-street, 2 p.m.

Thursday, May 5.

Argentine Land and Investment ...	Winchester House, 1 p.m.
Bell's Asbestos	Cannon-street Hotel, 2.30 p.m.
Caledonian Insurance	Edinburgh, 2.30 p.m.
Costa Rica Railway	Winchester House, 3 p.m.
Highgate Hill Tramways	Winchester House, 2.30 p.m.
Industrial and General Trust ...	Winchester House, noon.
London Platino-Brazilian Telegraph	Bloomfield House, 12.30 p.m.
Pelican Life	70, Lombard-street, 1.30 p.m.
William Younger & Co.	Edinburgh, 10 a.m.

Friday, May 6.

Anglo-American Debenture Corporation	Cannon-street Hotel, 12.30 p.m.
Central Bahia Railway	Cannon-street Hotel, 2 p.m.
Scottish Australian Mining	Winchester House, noon.
North British and Mercantile Insurance	Edinburgh, noon.

Diary of the War.

April 21.—We propose giving, in the form of a diary, the leading events of this Spanish-American war from day to day, hoping thereby to give a clearer and more concise view of affairs than would be possible in a general weekly review. To-day we reached what is officially understood to be "a state of war." President McKinley's ultimatum was duly presented to Senor Polo de Bernabe, the Spanish Ambassador at Washington, who seemed to be quite prepared for it, and at once sent a note—which was probably written some days before—asking for his passports. At the same time a telegraphic dispatch was sent off to General Woodford at Madrid, directing him to present the ultimatum to the Spanish Government. But Spanish officials were too quick for the American Ambassador. Senor de Bernabe had probably telegraphed to them from Washington that he had received the ultimatum, and before General Woodford had time to wait upon the Spanish Foreign Minister, that functionary informed him that diplomatic relations had been broken off between the two countries. So he asked for his passports, turned the American Legation over to the British Embassy, and left Madrid at four in the afternoon. The Minister was able to leave the Spanish capital without disturbance, but at Valladolid a large crowd collected at the station and stones were thrown at the train; but the passengers got away without injury, though things looked very bad for a while. The ultimatum gave the Spaniards until Saturday the 23rd to withdraw their government and military forces from Cuba.

April 22.—To-day President McKinley's proclamation of the blockade of Cuba is issued. The blockade is to extend along the north coast of Cuba, including all ports between Cardenas, Bahia Honda, and the port of Cienfuegos on the south coast. Early this morning the American fleet which is to enforce the blockade sailed from Key West. After about an hour's sail a Spanish freight steamer was seen steaming up the Mexican Gulf. She was found to be the Buenaventura, laden with timber; was promptly seized and sent off to Key West, the first prize of the war.

April 23.—The blockade declared to be effective. When the American fleet came within about five miles of Havana, several shots were fired from the forts, but they did not reach the ships, and the fire was not returned. Another prize for the Americans! Nothing having been known at Havana of the sailing of the American fleet, or of the blockade, the Spanish liner *Don Pedro* left Havana as usual for San Juan, Porto Rico, and Cadiz. She made a bold attempt to escape the American warships, and was duly pulled up, when near Matanzas. She was despatched to Key West; and soon after her departure, there was a chase after another vessel which, however, turned out to be a Swedish schooner, and she was allowed to proceed on her voyage. President McKinley, having been empowered by Congress to call for volunteers, to-day issued a proclamation asking for 125,000 of these. At first the number was to be 40,000, then it was raised to 100,000. The going up to 125,000 is significant. But we are forgetting. Other two prizes were taken by the American fleet to-day. A small schooner heading for Havana was run down by a gunboat, and her course was involuntarily changed for Key West. Then came the *Miguel Josef*, of the Periello Line, from New Orleans for Barcelona, *viâ* Havana, which was captured 100 miles from the latter port.

April 24.—A very important decree is published in the Spanish *Official Gazette*. It is, on the part of Spain, a virtual adhesion to the Declaration of Paris. Indeed, it is declared that the only part of that declaration which Spain refused to recognise was the abolition of privateering, and now, in this decree, the Spanish Government announce that, while they do not intend to issue letters of marque, they reserve the right to do so if circumstances seem to them to justify it. At present, however, a force of auxiliary cruisers will be organised from the mercantile marine to co-operate with the navy according to the needs of the war, but they will be commanded by naval officers. It may be as well to give the regulations laid down by Spain for the observance of maritime law. They are as follow:—

(1) Neutral flags cover the enemy's merchandise except contraband of war.
(2) Neutral merchandise except contraband of war is not seizable under the enemy's flag.
(3) A blockade to be obligatory must be effective, *i.e.*, maintained by a sufficient force to prevent access to the enemy's littoral.

As America some time ago announced her adhesion to the Declaration of Paris and expressed her determination not to issue letters of marque, there should be no fear now of privateers, and neutrals may make themselves tolerably easy on the score of trade. The Foreign Enlistment Act was to-day proclaimed at Hong Kong.

April 25.—War has now been officially and formally declared by the American Congress on the recommendation of the President, dating it from the 21st. Some little trouble may arise from a somewhat hasty order from the British authorities at Hong Kong to two vessels of the United States Squadron to leave the port at once. They left; but the Commodore and the American Consul protested on the ground that, as the American Government had not notified a declaration of war, there was no necessity for such a peremptory order. We fear the Hong Kong authorities are wrong. Two more prizes for the American fleet; but very tiny ones—of little importance to any one except the prize crews, and not much to them. There was an exciting chase of an Italian warship which was sailing into Havana on the 23rd. The American Admiral's flagship, the *New York* was close upon the stranger before her nationality was discovered. Salutes were exchanged, and the exciting incident closed. Submarine mines have been placed in position for the protection of New York.

April 26.—The feature of the day has been the neutrality proclamation issued by Great Britain. It strictly follows precedents, except that the regulation as to the coaling and provisioning of belligerent ships in British harbours is made rather more stringent. No definition of contraband of war is attempted, nor is there a hint given as to whether Government consider coal contraband. But no ships of war of either belligerent in the territorial jurisdiction of the Queen shall be permitted to take in any supplies except provisions that may be necessary for the subsistence of the crew, and so much coal as may be necessary to carry the vessel to the nearest port of her own country, or to some nearer destination she may choose. No more coal can be supplied to the same ship at any of our ports until the lapse of three months, without special permission. An American ship at Falmouth has been the first victim of the proclamation. It could not leave without an addition to the crew, and, as recruiting a crew in this country would have been a breach of the Foreign Enlistment Act, the ship has been laid up at Falmouth until after the war. President McKinley issued a proclamation allowing Spanish vessels in United States ports until May 21 to effect their clearance. The Spanish ships already seized are not to be given up, but to be held pending the decision of the prize courts. The Spanish Transatlantic steamer *Panama* has been captured. A circular issued to the Powers by the Spanish Government declares the real motive of the United States to be annexation. In the Cortes Senor Sagasta declared for a war *à outrance*, and a vote of confidence was adopted.

April 27.—The Chamber at Madrid have been providing the "sinews of war." The special navy credit is to be increased to 90,000,000 pesetas. The Government propose to issue Treasury bonds up to 100,000,000 pesetas, guaranteed on the Almaden quicksilver mines; to issue further bonds guaranteed by the "general resources of the nation"; to negotiate advances with the State monopoly companies; to enforce a year's payment in advance of the land and industrial taxes; to double the floating debt; and to convert the bonds of the External Debt into Internal stocks. The Finance Minister declared he saw no reason for pessimism; and certainly, if Spain can float safely with all this load upon her, she must be in a better position than is generally supposed. Lieutenant Rowan, of the United States Infantry, has been able to land on the east coast of Cuba, and has gone to arrange for the co-operation of the insurgents in the event of an American invasion. The United States Squadron has left Hong Kong for Manilla. It is now said that the 125,000 Volunteers asked for by the President will be at his disposal on Monday next. A Spanish gunboat is said to have captured the American ship *Saranac*, with 1,640 tons of coal. There is a rummour of a duel, off Matanzas, between an American torpedo-boat destroyer and a Spanish torpedo boat, in which the American is said to have retired badly injured.

April 28.—The first "great fight" is reported to-day, though its true dimensions are not yet known probably. The American blockading fleet at Cuba, or rather three of the ships belonging to it, bombarded Matanzas on the 26th apparently, and in half-an-hour the forts at the entrance to the harbour were silenced and dismantled. The Spanish fire from the forts is said to have been wretched, the shots mostly falling short of the fleet. There is said to have been great loss of life among the Spaniards; but of this there is no proof; and it is possible that the "bombardment" may turn out to have been rather a small affair.

THE PROPERTY MARKET.

A total of sales for last week at Tokenhouse-yard of £214,791, as contrasted with £22,760 in the corresponding period of 1897, seems to show conclusively that investors are more than ever turning their attention to building investments, more especially freeholds. One of the most considerable events of the week was the sale on Friday of Ridler's Hotel, Holborn, comprising an area of 6,110 ft., with a rental for the next twenty-eight years of £750. It brought £37,500, or fifty years' purchase. It is understood that the Prudential Assurance Company are the purchasers. Another important sale on Friday consisted of two modern shops in Oxford-street, let on repairing lease at £1,250 per annum, also factory premises in rear of the estimated value of £390 per annum, and held on lease direct from the Duke of Portland. The properties were purchased by Messrs. James Jay (Limited), the tenants of part of the property, at £30,400. Among ground rents the most important transaction was in regard to a rent of £800 a year secured on property in the main Pall Mall, which brought 30½ years' purchase.

City freeholds when offered for sale at the Mart are sure to attract considerable attention. Two were disposed of on Tuesday. One was offered by Messrs. St. Quintin & Son. It is the property, 79 and 79A, Leadenhall-street, let on lease at £350 per annum, and was sold at £9,050, or nearly twenty-six years' purchase. The second is at 52, Aldgate, let at £150 a year, and was disposed of by Messrs. Ellis & Son for £3,850, or rather over twenty-five years' purchase. A freehold wharf of two acres in Crook's-road, Stratford, was disposed of by Mr. Millard for £4,450. The total of the day's sales was £20,395.

Freeholds were again uppermost at the Mart on Tuesday, when the total of the day's sales went up to £53,892. The leading event of the day was the sale by Messrs. Debenham, Tewson, & Co., of a freehold residential and building estate of 213 acres, known as Burvale, at Hersham, Surrey, which realised a total of £23,370.

The family residence and grounds, with about 81¾ acres of land, brought £12,000; an adjoining block of land, nearly 88½ acres in extent, went for £6,000; Woodlark Farm, over fourteen acres, realised £1,200, and some smaller properties brought £350. Several other minor freeholds were disposed of by the same firm at good prices. There was another City freehold offered by Messrs. Jones, Lang, & Company; it is situated in Basinghall-street, let at £450 a year, and was sold at £9,000. For another freehold residence known as Dernclough, in Wanstead Park, Messrs. Corkett & Henderson found a buyer previous to auction, at a price not stated. Portions of a building estate at Harold Wood, Essex, containing nearly 27½ acres, were sold by the same firm at £2,900. Some freehold ground rents in Kensington and Hammersmith were well sold by Messrs. C. Rawley, Cross, & Co., the total received being £4,552. Mr. C. W. Davies obtained £2,990 for a freehold at Harcott's-gate, Sussex, The Bungalow, with nearly four acres of land.

There was nothing of much importance done at the mart on Wednesday.

Some of the stocks and shares sold by Messrs. W. G. Stanfield & Co. at Bradford, on Monday, are worth noting. The total amount received was over £34,500, and the following are a few of the details:—£5,000 worth 2¾ per cent. British Government consolidated stock, £110 per cent.; £2,100 North-Eastern Railway Consols, £172 per cent.; £2,352 8s. Midland Railway 2½ per cent. stock, £86 15s. per cent.; £2,000 Midland Railway 2½ per cent. preferred ordinary stock, £82 10s. per cent.; £1,845 worth of similar stock, £82 5s. per cent.; £2,000 Midland Railway 2½ per cent. deferred ordinary stock, £84 10s. per cent.; £1,845 Midland Railway 2½ per cent. deferred stock, £84 5s. per cent.

Mr. Alfred Richards had a sale of freehold and leasehold properties at Tottenham on Wednesday evening. The two leasehold lots were bought in, but the freehold—residence and grounds at 60, Silver-street, Edmonton, let at a rental of £52 10s.—was disposed of for £900.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

Arden.—There is, I am afraid, not much chance in the immediate future of a rise in price. The company suffers from over capitalisation, and has been heavily handicapped by the serious fall in exchange. So far as I can discover, the properties represent more than the value of the debentures. There is no haste to sell, but I think you should do so, if you get a fair opportunity.

Naval.—(1.) This company is small but respectable. Dividends have fluctuated. In 1890, 8 per cent. was paid, in 1894 only 4 per cent., since then they have risen gradually to 7 per cent. I see no reason against an investment to a small extent if you do not object to a share which is not very marketable; the figure you mention seems quite enough, probably you can get them at a lower price. (2.) You are quite right, I will send you a P. C. showing how you stand.

Dividends Announced.

MISCELLANEOUS.

Pacific Steam Navigation Company.—Final dividend for 1897 of 5s. per share, making 25s. per share for the year.

Alaska Treadwell Gold Mining Company.—37½ cents per share declared.

Alaska Mexican Gold Mining Company.—10 cents a share.

Hall Mines, Limited.—Interim dividend of 1s. per share on the ordinary shares.

Argentine Land and Investment Company, Limited.—Dividend of 1¼ per cent (1s. per share).

Porges Randfontein Gold Mining Company, Limited.—Dividend of 10 per cent., equal to 2s. per share for 1897.

House Property and Investment Company, Limited.—Balance dividend of £2 5s. per cent. for the year ended March 31, making with interim already paid £4 per cent. for the year.

Wright & Greig, Limited.—Interim at the rate of 12 per cent. per annum on the ordinary shares.

Lake View Consols, Limited.—Second interim dividend of 10s. per share.

National Safe Deposit Company, Limited.—Interim dividend at the rate of 4 per cent. per annum on the ordinary shares, and the usual half-yearly dividend on the 6 per cent. preference shares.

Brilliant Gold Mining Company, Limited.—6d. per share.

Treasury Gold Mines, Limited.—10 per cent., equal to 8s. per £4 share.

Millars' Karri and Jarrah Forests, Limited.—2s. per share on the ordinary shares.

Queen Cross Reef Gold Mining Company, Limited.—Dividend of 6d. per share.

"Evening News," Limited.—Interim dividend at the rate of 5 per cent. per annum on the preference shares, and at the rate of 12½ per cent. per annum on the ordinary shares.

Eastern Extension Australasia and China Telegraph, Limited.—2s. 6d. per share for the quarter ended December 31, with a bonus of 4s. per share, making a total of 7 per cent. for the year.

Broxburn Oil Company, Limited.—7½ per cent. on the ordinary shares for the past year.

West Indian and Panama Telegraph Company, Limited.—Dividend on the six months ended December 31 of 6d. per share on the ordinary shares.

Ceylon Tea Plantations Company, Limited.—Final dividend of 8 per cent. on the ordinary shares, making 15 per cent. for the year.

Lambeth Waterworks Company.—Dividends at the rate of 10 per cent. and 7½ per cent. per annum respectively on the share capital of the company.

Nobel Dynamite Trust.—A dividend of 12 per cent. for the year ending April 30 is recommended, carrying forward about £13,000.

Liverpool Nitrate.—Dividend of 5 per cent. announced payable May 14.

Shaw Savill & Albion Company.—Dividend on the preferred and ordinary shares at the rate of 5 per cent. per annum, £5,000 carried to a dividend equalisation fund, and £2,255 carried forward.

Employers Liability Assurance Corporation.—Dividend of 4s. per share, being at the rate of 10 per cent. per annum, on the paid-up capital, carrying forward £184,641.

RAILWAYS.

South Indian Company, Limited.—Dividend out of surplus profits of 20s. per cent., which with the guaranteed interest will make a distribution of £2 10s. for the half-year, or at the rate of 5 per cent. per annum, as compared with 4½ per cent. for the corresponding half of the previous year.

Bengal Central, Limited.—15s. per cent., which, in addition to the guaranteed interest, will make a distribution for the current half-year of £2 10s. per cent.

Bengal Central Railway.—Dividend for the half-year ended December, of 15s. per cent., which, in addition to the guaranteed interest will make a distribution of 2½ per cent. for the current half-year.

INSURANCE.

Lancashire Company.—Dividend for the half-year ended December 31 at the rate of 7½ per cent. per annum. £30,000 to fire reserve out of fire profits.

The Postmaster-General has promised to make the experiment of placing a travelling post-office somewhere near Hyde Park Corner for the collection of telegrams and express messenger services during the season. It will be a great convenience, and may probably become a permanent institution.

Among Mr. E. Schenk's suggestions for increasing the popularity of the Crystal Palace to a dividend-paying point are the improvement of the catering and railway facilities, the construction of a huge skating rink, the encouragement of the theatre, and the attracting of big football and cricket matches to the Palace. Education facilities have apparently no present place in the programme.

Among the articles set forth for sale in the London and South Western Railway Company's annual "clearing sale" is an "artificial leg (new)." Of course it is new; how could a second-hand one get there? Wearers of wooden legs do not take them off for the journey, nor are they likely to walk off in a moment of forgetfulness, neglecting to carry the inert leg with them.

APRIL NUMBER NOW READY.

The Investment Index.

A Quarterly Supplement to the "Investors' Review."

Price 2s. net, by Post, 2s 2d.; Subscription, 8s. 6d. per annum, post free,

Payable in advance.

THE INVESTMENT INDEX is an indispensable Supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference, as the reduced sample page below will show. Appended to its tables of figures are criticisms on balance sheets, State Budgets, &c.

The Investment Index

OPINIONS OF THE PRESS

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"Is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."—*Speaker.*

"It forms an admirable book of reference, and is a useful supplement to the well-known 'Review.'"—*Newcastle Daily Chronicle.*

"Contains a mass of information that will be found most valuable by investors."—*Liverpool Post.*

"Should be useful to people with money invested or to invest."—*Dundee Advertiser.*

"A most excellent and useful compilation which should be in the hands of every investor."—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

CLEMENT WILSON, Norfolk House, Norfolk Street, London, W.C.

ESTABLISHED 1824.

CLERICAL, MEDICAL AND GENERAL

LIFE ASSURANCE SOCIETY.

Chief Office:

15, ST. JAMES'S SQUARE, LONDON, S.W.

CHAIRMAN, RIGHT HON. SIR JOHN ROBERT MOWBRAY, BART., D.C.L., M.P

Assets nearly 3½ MILLIONS Sterling.

VALUATION RATE OF INTEREST 2½ PER CENT. ONLY.

The Results of the 1897 Valuation showed—

1. INCREASED RESERVES.
2. INCREASED PROFITS.

THE TOTAL SURPLUS DIVIDED WAS

£515,346.

Which was larger by £86,896 than any previously distributed, and represented the

HIGHEST RATE OF PROFIT EVER DECLARED

by the Society.

The Bonus Report, (1897), *Prospectus, Forms of Proposal, and every information on application.*

W. J. H. WHITTALL,
Actuary and Secretary.

15, ST. JAMES'S SQUARE, LONDON, S.W.

The Speaker,

THE LEADING LIBERAL WEEKLY.

PRICE SIXPENCE.

The Speaker devotes special attention to Literary News and Criticism, great care being taken to keep this department of the journal free from any suspicion of favouritism on the one hand, and of sectarianism or narrow-mindedness on the other.

The Staff of Writers includes many men of established eminence in the World of Letters, as well as specialists, who treat with unquestioned authority the Scientific, Artistic, and Economic Problems of the day.

The Speaker is read in **all quarters of the world,** and is every where recognised as an authority on Political, Social, Literary, and Financial Questions.

Owing to the class amongst which it circulates, **The Speaker**, as an **Advertising Medium**, has a special value. Rates may be obtained on application at the Offices, **115, Fleet Street, London, E.C.**

The Speaker is on sale every Saturday morning at the Railway Bookstalls and principal Newsagents of the United Kingdom. Applications for Copies of **The Speaker,** and subscriptions, should be sent to **The Speaker** Office, **115, Fleet Street, E.C.**

Copies are delivered to Subscribers by post early on Saturday in a parts of the Kingdom.

It is earnestly requested that where any difficulty is experienced in procuring copies, the fact may be communicated to

The Speaker,

115, FLEET STREET, LONDON. E.C.

To Correspondents.

The EDITOR cannot undertake to return rejected communications. Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

Telegraphic Address: "Unveiling, London."

The Investors' Review.

The Week's Money Market.

Floating balances continued to accumulate in the market during the week, with the result that day-to-day loans do not command more than 2 per cent., and loans for a week are quoted 2¼ to 2½ per cent. A good deal of the free credit on offer arises from the keeping in hand of balances in connection with the Chinese loan, the final call upon which is due on May 3, the formal transfer of the proceeds to Japan taking place on the 7th of that month. In connection with this payment, Germany has been sending over money freely, as, although a moderate sum will be transferred to Japan at the Imperial Bank of Germany, the bulk of the £12,000,000 will be handed over at the Bank of England. The sums received from Germany have of course gone to swell market balances, and, combined with other arrivals of gold from abroad, add much to the prevailing ease. It is significant, however, that the India Council has all through been able to obtain 3 per cent. for loans running beyond the date of the transfer of the Japanese indemnity.

Dealers in bills have been loth to reduce their discount quotations in the uncertain condition of affairs, but events have been too strong for them. The great ease in the short money market, and the sending of over £1,000,000 in gold into the Bank, have compelled them to gradually reduce their rate to 3¼ per cent. for two and three months' remitted bills, with a fraction over for longer-dated paper. Compared with the 3⅞ to 4 per cent. quoted all round a week ago, the decline does not appear to be important, but it ought to be recognised that it has taken place in face of a war between two great Powers which threatens, if prolonged, to have wide-reaching results. Indeed, the very manner in which the Bank of England obtained the important accession to its stock of gold must tend to make the market cautious. Not only has it continued to make advances free of interest to importers of the metal, but it has taken the unprecedented step of raising its buying price of gold. Although a little mystery has been imported into its operations in this respect, it is pretty certain that it paid 77s. 9¾d. per ounce for the African gold that came into the market this week, and at the same time yielded ⅛d. per ounce to the brokers for assay, thus giving way on a little point that has long been disputed. The policy of acting with a freer hand in regard to the attraction of gold is certainly an improvement on the old fixed price stereotyped in the Bank Act of 1844; but under present conditions the Money Market is not sure that the energies of the Bank of England may not have been aroused by some knowledge as to future events that is not generally possessed.

A cautious attitude, therefore, is still maintained in the open market, and is distinctly prudent in view of the monetary difficulties in Spain, Portugal, Italy, and Brazil, called forth or accentuated by recent movements in their exchanges. Sharp fluctuations in the international value of their currencies are bound to add seriously to the burdens of those countries, and it would be premature to assume that further unfavourable developments will not take place. Meantime, the American exchange, which has dominated the position, has risen sharply of late, and withdrawals of gold to New York are no longer possible. It is too early yet to assume that the recovery will be sustained for long, and, meanwhile, the important Continental exchanges are running back rapidly to a position adverse to us.

Endeavours were made to obtain 4 to 4¼ per cent. for fortnightly loans to the Stock Exchange at the settlement, but very little was done at the higher figure, and a certain amount had to be lent below 4 per cent. Even then the reduction in the amount of floating stock proved to be so important that large sums of money were paid back to the loaning bank by intermediaries who had no use for the funds upon the terms demanded. There must, therefore, have been a healthy contraction of stock-running that is particularly opportune at the present juncture, when the future appears to be clouded in so many directions.

On the whole, the Bank return issued yesterday sustains the impression that money will now remain easier, with rates tending to slip back until the war demand for gold stirs them up again. Not only did £1,160,000 in coin and bars come in from abroad, but £350,000 returned from active circulation. This was partly balanced by an increase of £161,000 in the note circulation, but even so the reserve of the banking department is now £1,350,000 larger than it was a week ago at £21,038,000, which raises its proportion to the liabilities to 41⅜, notwithstanding a net increase of over £1,000,000 in the deposits. Thanks to this influx of cash and to a decrease of £314,000 in the public deposits, the "other" deposits, which sustain the market balances, have risen to £1,336,000 to £37,957,000, and £304,000 has been paid off on "other" securitities. Their total, however, is still £33,935,000 and shows that by mid-May, perhaps, the Bank will be in a position to reassert its control over the open market. Meanwhile, and apart from upsets to nerves through politics, money should be cheaper; and while it is, a discount will be held up with difficulty.

SILVER.

The market has been decidedly firm this week, not altogether on account of the activity of buyers but rather owing to the reluctance of sellers to part with the metal. The price for immediate delivery has, therefore, risen 5/16d. on the week to 26½d. per oz., and the two months' forward quotation has advanced ⅜d. to 26 5/16d. per oz., the advance in the Singapore exchange affecting the latter quotation. Buying of late on Eastern account has been almost entirely for the Straits, where the disappearance of the Japanese yen, and the impossibility of obtaining Mexican dollars, lead to more and more British dollars being coined. In regard to Mexican dollars it is interesting to note that the coins, together with silver, are being actually imported into Mexico at the moment. Continental buying has also helped the market, but so far we have heard nothing about purchases on behalf of Spain. The cash balances at the Bank of Spain have fallen away considerably, a matter which might easily encourage its officials to do what they did some years back, that is, use a little gold to buy silver and coin it at about 60d. per ounce, thus converting it into money nominally two and a half times the value of the gold employed. But perhaps Spain is too poor to do even this, and the printing machine will alone stand in the gap. Indian exchanges have fallen to 1s. 3 1/16d. as the cash balances of the two important Presidency banks have risen considerably, and the Bank of Bengal has reduced its rate from 12 per cent. to 11.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, April 27, 1898.

The Week's Stock Markets.

"Very little business" has been the daily report from the Stock Exchange, but prices have been marked up pretty considerably, nevertheless, just as they were put down last week. The rise in Consols has been the principal feature, due to the large influx of gold at the Bank; and, although investment business is practically at a standstill, there is a slightly steadier appearance about the list of Home Railway Preference and Debenture stocks. Canadian Railway issues rose sharply on rumours of a settlement of the rate war, but the market for United States securities has been a quiet one. The account was only remarkable for its smallness, and the recovery coming just in time, the making-up prices did not show any serious differences apart from the fall of about fourteen in Spanish 4 per cents.

96⅜	90	92½	Do. 2½ p.c. Stk. red. 1926	92	+1½

Consols show a big rise on the week, due to the easier tendency in the money market, assisted by "bear" closing, the firmness being also shared in by the Indian sterling loans. Colonial Government issues, after a weak opening, recovered, and Home Corporation stocks are firmer, notably London County descriptions. Bank of England stock has risen about 3½.

Home Railway stocks, with one or two exceptions, are higher on balance, but business has again been on the smallest possible scale. The passenger lines have been most in demand, Brighton and South-Eastern deferreds both meeting with a good deal of support; but this does not apply to Chatham first preference, which is quoted lower, and Metropolitan and Great Central preferred have both lost ground. Among the "heavy" lines Great Western advanced slightly, in spite of the poor traffic which was due to the strike, and Midland deferred rose sharply, helped by a good return. South-Western deferred leaves off without much change, but this company's issues were very depressed in the earlier part of the week. Continuation rates ruled lighter, the account disclosing a reduction in the position open. South-Eastern deferred opened at ¼ contango and went to "even"; otherwise rates were inclined to be rather more onerous towards the close, Great Eastern starting "even" and going to ⅜ contango, Brighton A finishing at ¼, and North-Eastern at ⅜ contango, after being ⅛ only in each case at the opening.

There is nothing of startling importance to chronicle in the market for United States railroad shares, which closes rather dull after a short period of activity. A moderate demand on home and provincial account was the principal feature and helped to steady quotations during the first part of the week, but business in Wall-street has gradually dwindled away, operators there being rather afraid that the United States Government's need of money might lead to stringency. Towards the

close quotations hardened a little in sympathy with the further rise in Canadian Pacific, a feature being the strength of Northern Pacific issues on a good traffic return, and prices on the whole are slightly firmer than a week ago. Continuation rates were round about 5 per per cent., which is ½ per cent. below the general rate last time.

Canadian Pacific shares, which closed very flat on Thursday, have since gone ahead, the Continental selling coming to a sudden conclusion, and another rumour to the effect that the rate war is again coming to an end has caused an advance of five or six points. A good deal of buying from Montreal has helped the upward move, and much is being said about the big increases to come, owing to the diversion of traffic from the United States over the Canadian roads. Grand Trunk stocks have risen in sympathy and are among the very few which "make up" higher this time than last.

In the Foreign market Spanish Fours started the week by establishing another "record," the price touching 30½, but on a cessation of sales by Paris speculators a recovery set in, and after fluctuating, at times sharply, within comparatively narrow limits, are finally rather higher than a week ago. Most of the leading inter-Bourse securities have also risen, the closing of accounts open for the fall having imparted a firmer tone all round. Portuguese stock which fell sharply on Saturday, in sympathy with a sudden drop in the Lisbon Exchange, has since partly recovered. Chinese loans are slightly higher. Greek bonds keep very steady, in anticipation of the launching of the new loan, and Russian 4 per cent, and Egyptian Unified are firmer. Among South American stocks Brazilian bonds weakened in sympathy with a falling exchange at Rio, and then advanced to well above last week's closing, and Argentine and Chilian are also firm at the finish, after being very depressed. A slight "bear" squeeze was reported from Paris on Wednesday, the ease of the London money market encouraging buyers. Continuation rates were about 1 per cent. lower than a fortnight ago, Spanish being the exception, the rate in this case being 1 to 3 per cent. against 4 to 5 per cent.

Foreign Railway stocks were sold persistently all the week, and it was not until quite the last thing that any support was forthcoming. A rally then occurred in some of the leading Argentine companies, amounting to as much as seven points in Buenos Ayres Great Southern, the rise in the price of wheat being expected to benefit them, and the traffic returns were generally satisfactory. Western of Havana and Manila bonds were almost unsaleable and leave off considerably lower, and falls of 6 have taken place in Conde d'Eu 5½ per cent., and Cordoba Central first preference. Mexican Railway issues were hardly affected by the announcement of the dividend on the first preference, although it was worse even than the market expected.

The Miscellaneous market has been an idle one, the general decline in prices which took place towards the end of last week being due generally to a few sales in a very narrow market. Allsopp preferred ordinary has fluctuated rather wildly, before closing practically without change on balance; Guinness has fallen 20 and Younger preference 2; Threlfall's ordinary weakened on the new issue of capital. Gas stocks were marked down considerably, and insurance companies' issues have been pressed for sale. Schweppes deferred gave way a little more, the dividend of 2 per cent. being considered very poor. Welsbach ordinary improved somewhat on the granting of an official quotation, but realisations have since caused a set back. Among shipping companies a rise of six was recorded in F. Leyland ordinary shares, but Royal Mail lost last week's rise. Russian Petroleum is about two higher; Coats close firm on influential buying from the North; and Anglo-American Telegraph, Hudson's Bay, Liebig's, and Lyons' shares have all improved their position. Declines have taken place in J. Barker debenture, Vickers and Maxim, and Dumont Coffee debentures, and Trust companies' emissions are generally weaker.

There was very little business during the closing hours of the week, and many were the gloomy forebodings as to to-morrow's settlement in the Western Australian Mining market, and a large batch of failures is expected. Other markets were well supported, Consols closing firm on a good Bank return coupled with the further large influx of gold to the Bank. Among Foreign Government stocks Argentine were in strong demand on a fall in the gold premium at Buenos Ayres. Brazilians advanced still further, and Mexican issues finally almost succeeded in wiping out last week's big declines; but Spanish bonds and Rio Tinto shares closed dull on Paris sales. Foreign Railway stocks finished at about the best, and Canadian Pacific and United States Railroad shares were in renewed request,

but Grank Trunk stocks gave way just a little at the last.

Mining and Finance Companies.

The South African market, after being tolerably steady, finished up quite firm, under the influence of buying orders from Paris. Various rumours were also made use of to raise quotations, one to the effect that President Kruger was disposed to grant certain concessions with regard to the dynamite monopoly, and the latter statement has now apparently been confirmed, a reduction of 10s. per case being announced. Most of the leading favourites, notably Rand Mines and De Beers, are considerably higher on the week, but Chartered shares have hardly moved. The account being again a small one was easily arranged, rates if anything being rather lighter. Trouble has however been brewing in the West Australian section, and the heavy shake out which occurred towards the close of last week has only been followed by a partial recovery, although Lake View Consols, Great Boulder and Hannan's Brown Hill finally reached a slightly higher level than at the close of business on Thursday last. The Bottomley group has been severely handled, Market Trust getting down into the neighbourhood of 5s, while Northern Territories have shed about 2¾ during the account. So far matters have not been definitely arranged. One or two small failures have already been announced, but more are expected. Copper securities have exhibited great strength, as the price of the metal is expected to go still higher during the war, the latest quotations comparing very favourably with last week's closing.

a Loss. *b* Exclusive of yield from Concentrates bought—1,396 oz. in January, 1,320 oz. in February and 2,013 oz. in March.

MINING RETURNS.

Cumberland.—From cyanide works:—Tailings works recovered 252 oz. from 920 tons.

Ivanhoe.—Clean up March 15, 1,500 oz. gold from 993 tons crushed.

Mangana (Tasmania) Gold Reefs.—380 tons crushed, yield 85 oz. retorted gold.

Highland Chief.—Crushed 65 tons, 34 oz.; concentrates 20 oz. in addition.

Lake George.—March return:—6,750 tons of crude sulphide ore furnaced, yielding 267·78 tons of first matte containing 530 oz. of gold, 18,482 oz. of silver, and 87·21 tons of copper; costs—mining 7·62s., smelting 9·87s., development 1·75s., and handling 53s.

Ottos Kopje.—7,518 loads washed during the week ended April 21; 246 carats of diamonds won.

Cuddingwarra.—Crushed during past fortnight, 151 tons, yielding 136 oz. of gold; assay of tailings 19 dwt.

British Broken Hill.—Fortnight ended April 21:—3,007 tons crude ore produced 460 tons concentrates, containing 290 tons lead, and 12,598 oz. silver.

Consolidated Murchison.—Crushed 278 tons; obtained 286 oz. of gold.

Crescent.—500 tons, 108 oz.

Great Boulder Proprietary.—Tons of ore crushed 1,465, yield 3,319 oz. gold.

Aladdin's Lamp.—400 tons of ore crushed, yielding 410 oz.; and two tons of special ore have been shipped, containing 55 oz.

Alaska Treadwell.—Bullion shipment, $38,501; ore milled, 20,414 tons; sulphurets treated, 373 tons; bullion from sulphurets, $13,667.

New Queen.—Result of crushing for past fortnight: 1,220 ft. formation, 420 tons, yielding 310 oz. gold.

St. John del Rey.—Gold produced April 11 to 20, £6,7[illegible]; yield per ton, ·72 of an oz. troy.

New Bultfontein.—Production of diamonds for four weeks ended March 26, 5,900 carats, or an average of 29⅝ carats per 100 loads. For the four weeks ended April 23, 6,700 carats, averaging 30¼ carats per 100 loads.

North-West Australian Goldfields.—Cleaned up April 15, 130 tons. Result, 223 oz. smelted gold.

Bayley's United.—Cyanide plant has treated 894 tons tailings, yielding 808 oz. gold. Treated 179 tons rich ore on hand, yielding 202 oz. of gold.

Frank Smith Diamond.—5,500 loads washed, producing 247 carats.

Middlesex, W. A.—First clean up from 70 tons, 75 oz.

NOTICES.

A sub-branch to the Croydon branch of the Union Bank of London, Limited, will be opened at 76, High-street, South Norwood, on May 2. Permanent premises have been secured at 18, Cromwell-place, South Kensington, and will be opened for business as soon as the necessary alterations are effected.

The directors of the Grand Trunk Railway Company of Canada have decided to give to the holders of the Hamilton and North-Western 6 per cent. first mortgage bonds, maturing on June 1 next, the option until May 10 of accepting £98 of perpetual 4 per cent. consolidated debenture stock for each £100 bond, in addition to the half-year's interest of £3 per cent. payable on June 1. The interest on the 4 per cent. debenture stock is payable quarterly, on January 14, April 14, July 14, and October 14 in each year, by warrants forwarded by post to the holders, and the debenture stock now offered will be entitled to the first quarter's interest, payable on July 14, 1898. The company will allot, at the price of £102 10s. per £100 of debenture stock, any extra amount of that stock required by bondholders to enable them to register even amounts. Forms for effecting the exchange and any further information can be obtained at the office of the company, 203, Dashwood-house, New Broad-street, E.C.

The Canada North-West Land Company announce that the sales of farm lands for the quarter to March 31 show an increase of 4,489 acres and $23,852 over the same period last year.

The Bank of England are prepared to receive the coupons due the 30th inst. on the Demerara Railway Company's scrip.

The Council of Foreign Bondholders is prepared to receive the certificates of deposit issued by it against the New Plymouth Harbour Board 6 per cent. debentures for the purpose of stamping and payment of the coupon due on May 1, 1898.

Messrs. J. Thomson T. Bonar & Co. notify that the coupons due May 1 next, together with the bonds drawn at the final drawing on February 4 last, of the Lehigh and Wilkes-Barre Coal Company's first mortgage 6 per cent. Sterling bonds, will be paid on or after May 2 at their offices, 57½, Old Broad-street, E.C.

The British South Africa Company notifies that forms of application for the 250,000 new shares authorised on the 21st inst. have been posted to shareholders.

On and after April 30 the rate of interest allowed by the Hong Kong and Shanghai Banking Corporation on money placed on deposit for twelve months will be raised to 4 per cent. per annum.

The City Bank, Limited, announces the numbers of the bonds of the Chilian International 6 per cent. loan of 1892, drawn in March last, for payment on July 1.

Railway Traffic Returns.

Burma Railways. — Receipts for week ending March 26, Rs. 2,34,945 ; increase, Rs. 20,880. Aggregate from January 1, Rs. 26,24,472 ; decrease, Rs. 1,70,741.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, April 23 :—Ps. 7,000 ; increase, Ps. 200. Aggregate from January 1, Ps. 146,750 ; increase Ps. 4,080.

West Flanders Railway.—Gross receipts for week ending April 24, £2,100 ; decrease, £367. Total from January 1, £37,311 ; increase, £961.

West of India Portuguese Railway.—Week ending April 2, Rs. 6,016 ; increase, Rs. 2,100. Aggregate from January 1, Rs. 60,060 ; increase, Rs. 18,301.

Quebec Central Railway.—Receipts for first week of April, $7,088 ; decrease, $1,758. Aggregate from July 1, $88,789 ; decrease, $12,461.

Mobile and Birmingham Railroad.—Traffic for first week of April, $5,964 ; increase, $343. Aggregate from July 1, $291,492 ; decrease, $3,186.

Algeciras (Gibraltar) Railway.—Traffic for week ended April 16, Ps. 32,720 ; increase Ps. 5,100. Aggregate from July 1, Ps. 840,252 ; increase, Ps. 29,578.

Assam-Bengal Railway.—Traffic for week ended March 19, Rs. 24,058 ; increase, Rs. 3,543. Aggregate from January 1, Rs. 2,73,119 ; increase, Rs. 23,430.

Puerto Cabello and Valencia Railway.—Traffic receipts for week ending March 18, £986 ; decrease, £355. Aggregate from January 1, £10,661 ; decrease, £4,598.

Delhi Umballa Kalka Railway.—Receipts for week ended April 23, Rs. 30,600 ; increase Rs. 2,600. Aggregate from January 1, Rs, 5,78,100 ; increase, 1,53,900.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending March 26, Rs. 15,160 ; increase, Rs. 5,464. Aggregate from January 1, Rs. 80,318 ; decrease, Rs. 12,980.

Western of Santa Fe Railways.—Gross receipts for week ending April 23, $36,666 ; decrease, $15,110.

Manila Railway.—Receipts for week ending April 23, $19,938 ; increase, $7,780. Aggregate from January 1, $311,961 ; increase, $73,754.

Southern Mahratta Railway.—Receipts for week ended April 2, Rs. 122,575 ; decrease, Rs. 13,692.

Great Western of Brazil Railway.—Traffic for week ending March 19, $28,436 ; increase, $5,530. Aggregate receipts to date $471,407 ; increase, $65,641.

Villa Maria and Rufino Railway.—Traffic for week ending April 23, $5,308 ; increase, $1,683. Aggregate from January 1, $76,988, increase $1,992.

Antofogasta (Chili) and Bolivia Railway.—Traffic receipts for month of March, $447,000 ; decrease, $55,000.

Bolivar Railway.—Receipts for month of March, £5,912 ; increase, £722. Aggregate for nine months, £18,867 ; decrease, £7,262.

Cleator and Workington.—Gross receipts for the week ending April 23 amounted to £1,070, a decrease of £31. Total receipts from January 1, £16,266, a decrease of £720.

Cockermouth and Keswick Railway.—Receipts for the week ending April 23, £828 ; increase, £13. Aggregate from January 1, £13,279 ; increase, £1,261.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 18. New Series. FRIDAY, MAY 6, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

CLEMENT WILSON,
NORFOLK HOUSE NORFOLK STREET, LONDON, W.C.

THE
LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

Unhappy Spain.

The first serious encounter between the forces of Spain and those of the United States has resulted in a defeat more overwhelming to the Spaniard than those even who, like ourselves, had no faith in his power of resistance could have imagined possible beforehand. The Spanish fleet in the Philippines has been destroyed, and Manila, with the whole of the islands dependent upon its government, by the time this appears will have passed out of the hands of Spain for ever. A more sudden blow has never been delivered by one Power against another under such conditions, for the United States squadron had to fight the land fortifications and the Spanish ships at one and the same time, and that it overcame both after a very brief conflict is proof of Spain's unpreparedness and decayed vitality almost as much as of American prowess. No wonder that the United States people are elated. That one battle might very well end the war. Not that the present Government in Spain will be willing to evacuate Cuba, and waive all claim to that and others of its possessions in the West Indies merely because it has lost the Philippines. But how long will the present Government continue in Spain? From the first we have insisted that a revolution is ripe there, and that defeat at any point would bring dangerous forces to the surface at any moment. These forces may now explode

and overturn the Government. Before another week is over, the Royal Family may have to fly for their lives. Martial law has already been proclaimed in Madrid, the Cortes is in wild rebellion, and unless the Atlantic fleet redeems Spanish "honour" by a victory within a very few days there may be no Government at all in the country.

It does not follow, though, that revolution in Spain will end the war. On the contrary, we should not be surprised if the struggle over Cuba became intensified, although should that happen it cannot be a long struggle. The American people, however, should not become elated too soon. Their rejoicings over Admiral Dewey's victory are natural enough and justifiable, but they must not forget that the task they set themselves to has not yet been seriously begun, and that the Spanish people, in a ferment of revolutionary patriotism, might give them more trouble than the sedate, courtly, but utterly bankrupt Government of Queen Maria Christina. That Government, in short, cannot effectively carry on the war because it is too respectable. It is a Government which struggles to keep up appearances and to pay its way. A less scrupulous Government would have defaulted on the Spanish debt years ago, in order to put itself in funds for the purpose of reasserting its hold over Cuba, and might have done many other questionable deeds with a view to obtain ready money; but the Austrian Princess, Queen Regent of Spain in right of her marriage with the late King Alfonso, had other ideas and followed other traditions, with the consequence that, as we have from the first insisted, this war with the United States had to be faced by her Government in a state of bankruptcy. It is very difficult to give people in this country any idea how poor Spain is. Some help towards forming a conception of it may be obtained by the study of a report on Spanish trade for the past year by Mr. H. W. B. Harrison, commercial attaché to the British Embassy in Madrid, issued the other day by the Foreign Office. But even this conveys only a faint picture of the stagnation and decay which has fallen upon this once mighty people. The Spaniard never has been a trader, nor has any Spanish Government ever risen much above that mental attitude towards traders which characterised the robber barons of the Rhine. Therefore the one idea of every Government. in modern days at least, has been that, if trade seemed to be flourishing, the proper course was to tax it to death, This is called "protection," and all Latin countries are adepts in the system, no matter what their form of government may be; but Spain has had less material to work upon than her neighbours, much less than France for instance, and therefore Spanish trade has become blighted with greater rapidity than even that of Italy. Most of the flourishing sections of her export business are in foreign hands; foreign capital has developed her mines and worked them. The cotton industries of Catalonia are, we believe, partly in French hands, and they, too, seem to be perishing, because there is small outlet for Spanish cotton goods abroad, except in her own possessions, now being torn from her, and now unable to buy anything. So the imports of raw cotton, Mr. Harrison tells us, have been falling off because the internal consumption is declining faster than foreign trade, which, however, was last year larger by about £300,000 than in 1896, perhaps on Government account, the total being under £2,400,000. The increasing poverty of the Spanish people is closing more and more the outlet at home for Spanish manufactures. Half the foreign trade of the country is done with England and France, and English and French capital have put what life there is into that trade. We are her great customers for iron ore, mercury, argentiferous lead, and copper. Her own possessions figure to a very small extent in her commerce and will soon disappear. With a population nearly half that of the United Kingdom the total foreign trade of Spain does not amount to the value of one month's trade of the United Kingdom; it is less than one-twelfth of ours, in short. This smallness is really not to be wondered at when we consider how perfectly innocent of any common-sense views regarding commerce the Spanish mind is. Mr. Harrison gives a *résumé* of the customs duties levied on wheat and flour from the beginning of the present century until now. It is itself a remarkable lesson in how not to do it. Up to 1816, the duty on wheat was less than one peseta per 100 kilos, and for a brief period the duty disappeared altogether, or was scarcely perceptible, a mere registration fee of infinitesimal account. That period, however, lasted only from 1867 to 1869; in the latter year a duty of three pesetas was imposed, and gradually additions have since been made to this tax, until now it amounts to 10½ pesetas on the 100 kilos. No wonder, then, that the people complain of hunger. The greatness of their poverty is eloquently expressed by the smallness of the yield of their customs tariff. With heavy duties, not only on wheat, but on sugar, spirits, cod fish, cocoa, coffee, wheat flour, petroleum, and many other articles, including all kinds of cereals, the total yield of the customs was only £5,222,000 in 1894, and it fell to £4,431,000 in 1896.

No wonder, then, that the Government is bankrupt. But were a revolutionary Government to be set up in Spain, it might prolong the war by defaulting on the debt, seizing the gold and silver in the Bank of Spain, issuing an unlimited amount of paper money, and confiscating the still vast property of the Church. A dictatorship, such as that of the bloodthirsty and rapacious General Weyler, would be just such a Government, restrained by neither law nor tradition, and, until better arises, we must beware of its advent. Glad indeed should we be to look upon the war as at an end, but the overthrow of Sagasta and the flight of the Queen Regent cannot be trusted to stop it. Worse might then follow, and the annihilation of the Spanish fleet in the West Indies would alone place Spain hopelessly at the mercy of her foe. Then civil war would probably break out in the Peninsula between Carlist and Republican—between Heaven knows what faction. Truly, the future is black.

The Real "Defeat" of Russia in China.

It seems to us that the worst thing about the recent developments of Russian policy in China is the effect they have produced on the minds of the English people. If there be one thing more than another which we do not like it is to be cheated or outwitted. If the Russian diplomatists had only remembered the lesson of the events which preceded the Crimean War they might have been warned not to treat the English Foreign Office in the way they have done over Port Arthur and

Ta-lien-wan. No immediate danger of a fight between us and Russia exists, but the tortuous diplomacy of the St. Petersburg Foreign Office has unquestionably laid the foundations of a very dangerous quarrel in the future. Lord Salisbury was taken in, as honest men are always liable to be. He believed the assurances given to him by Count Mouravief, given in the name of the Emperor, although, we hope, not with the Emperor's knowledge and sanction, and imagined that the arrival of Russia at Port Arthur might be accepted as a guarantee that North China would be open to British trade—that the *status quo ante* established by treaty would not be broken in upon. He was assured that no intention whatever lurked behind Russian plans to annex and obtain exclusive control over any part of China. Within a fortnight, or little more, these assurances were utterly falsified, and before many weeks had passed it became painfully evident that Russia intended to make Port Arthur and Ta-lien-wan exclusive Russian possessions, with the consequence that the whole Liaou-tong peninsula, with Manchuria behind it, will soon become another Russian province. This is a lamentable fact, and not less so because it has already compelled England to half-abandon her liberal policy towards China and all nations trading with China. We have never hitherto sought any exclusive privileges there. Where we went all nations were welcome to come to barter their goods and enter into every kind of enterprise. This is all changed, and, as we said some time ago, the policy of the "open door" has given place to a policy of "spheres of influence," and the carrying out of this new system is very likely one of these days to provoke a great war over the partition of China.

Such being the position, it is fortunate for us that there should be a drawing together at the present time of the two great halves of the Anglo-Saxon people. Were nothing else to come out of this lamentable strife between the United States and Spain, that alone would be a signal benefit to mankind. In all probability, when the day of settling disputes in China by the sword does come we shall have no European Power to stand by us. Each one of them able to stand up will be anxious to "grab" something for itself, animated by that passion for "exclusive dealing" which is a mark of their more or less benighted economic condition. Our only possible allies in the Far East are the Japanese, whose interests are so far identical with ours that they desire to have China opened up to their commercial enterprise and trade. In proportion to the intensity of this desire they dread the supremacy there of any Power animated by the jealous commercial spirit of Russia, France, or even Germany, and that fear might stand us in good stead. It is possible, of course, that the Germans might think it to their interest also to stand by us, had we to oppose the encroachments of Russia upon the middle kingdom, or on our liberties of trade in the interior of the Chinese Empire. But we cannot count on this friendship, nor in an absolute way on that of Japan. Hence the importance of having the United States at one with us in this quarrel. It is not often that we are in accord with Mr Cecil Rhodes, but if the opinions ascribed to him in Monday's *Daily Chronicle* are indeed his, then he has given expression to a just sentiment that we hope will come to be universal both in the United States and here at home. Were the American people to recognise that their trade interests are really identical with those of the mother country; that their best chance of expanding their foreign business to an extent worthy of their great industrial capacity and incalculable resources is to join cordially with us in free interchange of commodities, so that they would have access to all our markets, and we access to theirs, then commercial unity would arise between the two nations which might make them irresistible, and not in commerce alone. For we may go further and say that the best chance of preventing war between us and European States, whether in the Far East, or the Near East, or at any other point, would be the knowledge possessed by such States that the Americans and ourselves meant to stand shoulder to shoulder in the quarrel. Russia, for instance, would pause, and probably retreat from any attempt to injure our commerce in China, did her diplomatists understand that the American fleet would fight side by side with ours, were we forced to defend ourselves against such designs by an appeal to arms. It would be a great thing for the world, and for the progress of civilisation in the world, if the Anglo-Saxon people were thus to become as one family all over the earth, ready to stand by each other, not to provoke war, not to range the world in search of territory, but to impose peace upon countries now consumed by jealousy of others and the passion for strife.

Perhaps this is a dream too pleasant and fascinating to be treated as coming within the range of practical politics. It is a dream to cherish, however, and we trust that the United States will learn even by their successes, which were never doubtful in this war, to rise to the dignity of their position and obligations as a great nation. They cannot hold themselves apart from the rest of the world. They have pacific imperial interests which grow in importance with the growth of their population and the ramifications of their trade; and the day is not far distant when they must take their part in settling the quarrels of the world or in preventing them from breaking out. And we think the Russians may be sure that in any strife that may arise between them and us, not through our ill-will or desire to injure them or to hold back their development in any way, but through the tortuous duplicity of their diplomacy, the United States will not stand afar off to see the mother country worsted or put upon.

Not that we shall be unable to give good account of ourselves; many a day and year must elapse before Russia dares to encounter us at sea, build ships of war as she may. The hour of conflict is, therefore, probably far off, but these reflections may be valuable as suggesting to Russian statesmen a better way in which to secure the continued goodwill of England and of English-speaking peoples than the way of deceit. Had the Russian Foreign Office, at the outset, frankly laid before Lord Salisbury the plans of the Emperor, there might have been some grumbling here, and we should not have made the mistake of suggesting the opening of Ta-lien-wan as a treaty port, so as to lay ourselves open to the charge of having been bullied out of a perfectly fair position, but we should in the end have acquiesced. Although probably seeking compensation much in the way we have since been obliged to do, there would have been less friction and less soreness than now exists, and Russian statemen may be well assured that it would have been better for them to have paid the whole Chinese indemnity in exchange for the con-

cessions they have now wrung from the Chinese by bullying with the sword drawn, than to have created an impression in the English mind that their only method in diplomacy is that of the deceiver. The English money market might have been opened to them once more to aid them in their railway building and other progressive works. But they have chosen the baser course, and will assuredly find out the mistake they have made when France breaks down again and leaves them alone with their gigantesque schemes and their native poverty.

The "Tips" Lure.

Tips are of many species, and there is a curious fascination about most forms of them. In our young days an unexpected shilling from some open-handed relation rejoiced our hearts and pockets. That species of tip has to come to an end when we are grown up, but some let its place be taken by a desire for "straight tips" about an outsider in a horse race; others prefer a gamble in a speculative stock or share. There is no doubt the Stock Exchange does offer chances sometimes, and many men who would never dream of backing a horse will take a "tip" from some sanguine friend to buy shares in this or that doubtful undertaking. "Must go to £5," says the friend; "you can get them for 15s., so you know your loss." Very tempting, and perhaps the thing does turn out right once in a way, but how many times do such deals result in losses? It would be difficult to say, but the odds must always be largely against the acceptor of such tips. That this is so is proved by any price list of speculative shares. Compare such a list of to-day with one dated two years back and note the changes. Many names have altogether disappeared, or have been re-christened on reconstruction: it is a simple matter of so many "tips" gone wrong, and some must be the losers.

Tipsters are clever folk, though their art is not a difficult one. They vary in style. Some are bold and unblushing and don't stick at trifles; others are more artistic and seek to convince us almost against our better judgment by adopting an analytical style, giving reasons for their "tip." The Investors' Review has a reputation for "crabbing things," to use a City phrase, perhaps deservedly, and any way we hope we shall have it for some time yet, as in our opinion it is not the duty of a newspaper to encourage folk to rush into schemes of any sort. All we can do is to put salient facts before them and let them use their own judgment. At the same time, we are not crusaders against gambling: that will go on as long as the world continues spinning. Let those who can afford to run risks do so; it is no affair of ours. They do not require our caution. It is the man of moderate means who buys speculatively more than he can pay for on the strength of some apparent information published by a tipster that we wish to help. After all, they form the majority, and if more caution were shown by them very few of the wild-cat schemes could be successfully carried through.

We will endeavour to describe one or two methods of the tipster, and take the bold, unblushing style first. From away "at the back of beyond" comes a story of a rich gold "find" where the yellow metal is to be got by the handful. The place is far from everywhere; across, it may be, a sandy desert or through some fever-laden jungle, where a white man's existence is a continual struggle with death. That counts for nothing. A syndicate of wise men, hearing of this new Eldorado, put a little cash together and tempt some mining expert to face the danger and visit this wonderful spot. His instructions as to reports are very clear. They must be glowing as to the quantity of gold, and the difficulties of getting it must be minimised. Next we find a company formed with a capital many times the cost of the mine, as of course the property has to be acquired from some native chief. The expert's reports are embodied in enticing prospectuses, but somehow the public is chary and the applications are small. Nevertheless the directors go to allotment, and the shares are assigned to themselves, their friends, and their nominees. Not much good have they got so far; but wait. Presently more glowing accounts come home; paragraphs appear in the papers, pure undiluted puffs, paid for in meal or malt. Then in the market buyers suddenly spring up, and the shares which lay dormant and unknown are forthwith quoted at a premium.

How a premium does tempt the simple mind! In rushes the public, one on top of the other, to buy, and those behind the scenes generously supply all comers. If the puffs are cleverly worked this market may continue for some time, and every effort will be used to this end in order to allow the public to have as many of the shares as possible. Then comes a pause. Very little is said about the shares; everybody is waiting for the future rise which, alas! cometh not. One morning a tired holder tries to sell and cannot do so at the nominal quotation, and gradually the price begins to droop and sometimes disappears. Final scene of all, the company is wound up and decorously forgotten, or if there seems still to be money in it extractable from open pockets, it is reconstructed and the game commences again. Who could be so foolish, the reader asks, as to join such a concern? Surely none could be taken in by such methods? Really now? Have you no certificate in your safe which at one time represented shares, in apparently a valuable property now naught but dust and ashes? If not, you are a lucky individual. Told briefly, these methods seem crude, but what we have said is the usual skeleton of the image, though the features may vary. Excuses are not difficult to make—failure of water, difficulty of transit, &c., all obvious when the scheme was started, but well hidden then or treated with indifference.

More artistic is the analytical puff, or tip, where a plausible show is made to give facts which are in themselves true, and yet those following the tip lose money. Among the many stocks and shares dealt in on the Stock Exchange there are not a few which are seldom heard of. Intrinsically their value may be moderate, or perhaps almost *nil*, but speculatively they have chances. Let us take an example. In the course of its career some big undertaking has fallen on evil times. Money is hard to borrow; the business is good, we are informed, and likely to recover if only a little timely aid were given. Debentures, let us say, are offered to obtain this money, and to induce public subscription a bonus of stock, which will share in the profits if these expand beyond a certain percentage, is given to subscribers. Time goes on and the debentures become a first-rate security, but the bonus stock never reaches the happy position of receiving a dividend. This matters nothing

to the original subscriber: his actual money is safe enough, and the bonus can be sold at a low price per cent. to any one who fancies a speculative lock up which may turn out well in the dim and distant future. A market is created to a limited extent by such transactions, but the counter is seldom dealt in. Its price may go up to 10 per cent. and down to 3 per cent. or 4 per cent. in the course of years and no one gain or lose much. But one fine morning a happy idea strikes some sharp City man. He gets together one or two friends, and they quietly purchase a fair amount of this neglected security, which a lot of people consider cheap, but very few care to buy, as it is not easily resold. That is of little consequence to this little group, and after they have got all they think necessary, they manage to get a letter into some paper pointing out the cheapness of the stuff they hold; or, better still, prove to a willing editor that the stock is really below its value, and that with the improved condition of trade a dividend is quite possible in five or six years' time. He takes a hand in the game probably, and when all is ready for the *coup* publishes facts and estimates in his column of news. Presto! the trick is done. In comes the simple outsider to buy his modest amount, followed by others of the same kidney; up goes the price (for the amount of free stock in the market is small), and our friends quietly slip out, editor and all. The rush is soon over, no more support is forthcoming, the price droops, leaving the poor unfortunate follower of the "tip" with a certificate that may some day be worth a few pounds more than he gave for it, and also, which is more probable, may not. The mischief of this trickery is obvious enough. A man sees a particular tip, and noticing the moderate immediate rise that follows it, thinks it means a certain profit, if followed. He does not, perhaps, trouble to watch further that particular "tip's" history, but decides to follow the next one himself. Just as likely as not he makes a profit on his first venture, and then tries another and another, until one day he finds he has put money he can scarcely afford into various stocks and shares which he cannot sell except at serious loss. Is it right for the Press to take such a prominent lead in giving "tips" to their readers, as a prominent section of it does? We do not think it is. By all means criticise, and when a concern is honest say so; but it is not a writer's duty to say "buy this," or "buy that, because it is sure to go up." Such tactics are more often than not the outcome of corrupt designs, and at the best are merely the opinions of individuals who can in no way be held responsible for the harm they may do.

Indian Currency Moonrakers.

Indian merchants and bankers will be prudent in not expecting too much from this latest effort to pave the way for putting Indian currency straight. There are too many politicians, officials, ex-officials, hobbyites, in the committee's composition for any satisfactory conclusion to be reached. A few more men of the stamp of Mr. Hambro, Mr. Robert Campbell, or Mr. W. H. Holland, would have inspired greater hope that the investigation and discussion to be entered upon might at least lead to a recognition of what is and what is not possible. We can now have but a slender stock of this hope, but it is well the committee was appointed. It must, at the worst, serve as a means of gathering to a head, or a heap, the diversified "views" and infallible remedies with the multitude of which the world is now grown weary. Perhaps also, this marshalling of nostrums might have the effect of putting an end to the possibility of writing such despatches as that sent by Lord Elgin's Council to the Secretary of State, and published this week in the latest batch of official correspondence. That sort of effusion can please none but our foes. Of all Indian official deliverances on this subject we never saw one more "up in the moon." Its compiler does not, apparently, bestow one single thought upon the true economic state of India. All the reasoning is founded on an imaginary "power" which, it is assumed, the Government possesses to bring about a "stable rate of exchange" or to beget "confidence in the stability of the rupee" by one dodge or another. Yet at one point the language is frank enough. In order to reach the "gold standard" of perfection these officials pray for, a loan of £20,000,000 effective will be wanted by way of foundation stone, and this, it is computed, will add £550,000 per annum to the foreign obligations of the Indian Government. Good: and how is this addition to the annual charge to help towards a fixed exchange value for the rupee? To say that the twenty millions will not all be wanted at once, and, therefore, that the charge it imposes will be small at first, is only to beg the question.

Would it not be much wiser for these officials, and for this committee, to endeavour first of all to discover what the financial position of India—of the Indian people—really is? Currencies never go wrong and give trouble in any country unless there be something very much amiss with its general health in an economic sense. We see Italy, Spain, Brazil, Portugal, the Argentine Republic, and other States, all more or less involved in precisely the same kind of difficulties which beset India. The possession of a "gold standard" has not saved them from a depreciated exchange, and we are all as ready as a well-crammed schoolboy to give abundant reason why it has not. Can it be that the same causes are at work destroying the credit of India? We think they are, and have for many years said so, but the official stuffs his ears and refuses to hear, piles up the spending, borrows profusely, and finding bad becoming worse still wails louder and louder for the perpetration of this currency trick or another in order to make everything right for evermore. Give him this £20,000,000 and he would go on merrily till it was exhausted, which would not be long, and then blandly come with demand for yet more millions. Each dose of the life-sapping stimulant of borrowed money would only increase the danger of collapse in India and add to our troubles there. What of that, if "the present lot" got their rupees home at 16d. instead of 9d. or 6d., as it might be if extravagance without doles went on unchecked? And India is "happy," says Sir Michael Hicks Beach, and requires nothing of us. Really, really now, have our politicians fallen altogether into a state of hypnotised dotage about this dependency? Would that this Departmental Committee could be expected to brush aside all the drivelling proposals and "appeals" and false arithmetic of bureaucrats and doctrinaires, in order to go straight to the root of the matter, and find out how far India is now loaded beyond her capacity by the excessive weight of the "home charge" her poor

and hungry population have to find every day of their lives. What is the average annual surplus of Indian foreign trade, and what proportion does it bear to the annual amount India has to remit to England under all heads, Government, corporate, and private? The answer to this might show that it is retrenchment and economy, not a currency juggling, that India requires to save her Government from insolvency. But we expect this will be the last line of investigation to be entered upon.

But the worst remains to be noticed. Not content with the proposal to foist upon India a gold standard it is in no position to pay for out of its own resources, the Government of Lord Elgin proposes to go a step further and melt down the silver rupees at the rate of 100,000,000 a year and sell the silver bullion in the market. The official theorists foolishly imagine that by confining the sale to India, where they assume the consumption of the metal in an uncoined form averages 60,000,000 rupees' worth per annum, the extra quantity thus thrown on the market can be disposed of at an equivalent price to 1s. 4d. per rupee. It is impossible for us to conceive the attitude of mind this proposal involves, but one thing is plain enough: this Government has no knowledge of the real wants of the Indian people, is absolutely out of touch with the natives, and does not practically know anything about the currency requirements of the country. Such absolute alienation of rulers from ruled is the most melancholy fact of all, and makes us dread the future far more than any actual administrative folly could do. It is perfectly plain to any unprejudiced outsider that if India has to borrow gold to make a standard, that gold is the property of her creditors, and will go back to them as fast as their demands upon it arise. Equally plain is it that if a large quantity of silver rupees is withdrawn from circulation, and melted down and sold, two consequences must follow. The price of silver in the open market will be still further depreciated, to the great loss of the Indian people and Government—a most cruel loss that the people cannot afford—and the trade of India, especially its small retail trade, as we may call it, will soon become hampered to a disastrous extent by the scarcity of coin. What the end of this folly is to be we dare not try to imagine, but it cannot be a good end, and we trust whatever the Departmental Committee may, or may not, sanction, it will stop the execution of this absolutely daft project. If lose India we must, let us do so like men, not as Bedlamites.

Our Trade and War.—IV.

Foreign Competition.

The "made in Germany" scare was absurdly exaggerated by the small remnant of benighted Protectionists still among us, but it contained a serious element of truth. As the French army in 1871 went down before the needle gun and superior strategy, so will our international trade fall, unless we move with the times. Not to speak of our deficient technical education, our children have to waste a year of their time on our chaotic system of weights and measures, compared with what they would have to spend if we had the metric system. Then certainly another year is lost by our method or rather absence of method, in spelling. The first is kept up because people say that John Bull must stick to his pound and could never master a kilogramme. Our spelling is not modernised, because the empty pedants who rule us educationally, decree that chaotic spelling is so important as exhibiting the history of our language. For instance, the useless "u" in honour teaches us that the Latin "honor" reached us *viâ* Norman-French, where the "u" was acquired. Our elementary school children spend so much time in learning to spell that few of them get to the Romans or to the Normans, and those who do never acquire any clear ideas about them at all. Superfluous letters in words thus convey no information to them, while they undoubtedly waste time. Then, as if our weights and our spelling were not sufficient burdens for the weak backs of our children, we have the "religious" difficulty to contend with. People so abound in Christian charity that it is impossible to conceive the Church of England or the Roman Catholic child learning his A B C or his arithmetic side by side with the Congregationalist, the Baptist, or the Wesleyan. That A, B, or C, are what they are called, and that two and two make four, are nevertheless absolutely proved facts; but because the sects differ as to a certain number of dogmas (which very few grown persons ever master, even if they say they do) the bulk of our children have to be educated in separate schools, which are naturally inefficient and costly because they are on a small scale, and this is done because the main effort is directed to cram as much catechism as possible into the infant mind. Nor is the state of secondary or of University education better, but rather worse, from a practical point of view, though the so-called "religious" difficulty is not so harmful.

Modern commerce is largely scientific, and with our inferior education we are falling behind in the race. The German scientists have beaten our cane sugar planters, who had a far superior plant and climate to start with. They have annexed the higher branches of the chemical and dye trades. In electrical science, due as it was to the discoveries of Englishmen, the whole of the practical appliances are left to our American brethren, who have given us the electric light, the telephone, and the trolley tram car. In all practical science our sceptre has passed away and the alien sits on our throne. As to our knowledge of foreign tongues, as has been said, our pride is to speak only one language—our own. If we manufacture by rule of thumb, talk English only, and insist that foreigners should muddle their brains with our pounds and ounces, the next step with a nation of world-carriers ought, at any rate, to be to see that our transport arrangements were supremely good. Instead of this, our railway rates are the highest and the most unscientific of those of any of the great trading nations, and our maritime freights are controlled by shipping rings and corners, to the benefit in both cases of our rivals.

There are many signs that all these things are telling seriously against us in the world's markets. It is difficult to compare the amounts of trade returns, because of the enormous drop in prices of late years, but it is possible to do so properly by taking percentages only. Our trade with the British Empire in 1882 was 26·6 per cent. of our whole trade. In 1896 it had fallen to 24·9 per cent. If our colonial transactions had kept up, it would have meant that they would have been some £14,000,000 more—a loss of, perhaps, a profit of £1,400,000 a year to the Empire. This, however, is

only a prelude to far worse things, unless we set our house in order, and realise the fact that we have no longer a monopoly, but have to fight for our trade in grim earnest by keeping abreast of the times. If at a time when other nations are learning the advantages of that peace from which we have so long benefited, we plunge into needless wars, which must in any case ruin our trade for years, we shall indeed deserve to forfeit our high place among the nations. Less than a year ago we saw in London streets a patriotic pageant unmatched in history, and which no existing power could attempt to rival. As the Jubilee procession moved along in stately order, with our venerable and venerated Queen as the central figure knitting together the vast and mighty empire that was symbolised, it would have appeared incredible that within a few months any section of the public should have given way to the undignified and senseless panics lately witnessed. If England be but true to herself, if she will move with the age, and live and let live, there need be no fear of the result. The growing trade and increasing prosperity of other nations can only be sources of gain to ourselves, if we have the small amount of nerve necessary to enable us to resist narrow jealousies, absolutely unworthy of a great people.

The following tables give a comprehensive view of our trade with foreign countries, the British Empire, the Tropics, &c. :—

Our Trade with Foreign Countries above £20,000,000 a Year.

The Annual Report of the Mutual Life Insurance Company of New York.

We have before us the report of this concern for the year 1897. It is of the usual flaming description, and bears the signature of Mr. D. C. Haldeman, who declares it to be "his privilege" to submit such a statement to British policy holders. We confess we fail to see where the advantage to these individuals comes in; only it is necessary to read a little between the lines in order to see how hollow the pretences of prosperity are which the company, or its agent here, puts forward. For instance, we are told that the number of policies issued and paid for last year was 55,870, insuring £27,879,046, a total "only once" exceeded by the company. This is wonderful, and the drums may be beaten. Unfortunately, Mr. Haldeman goes on to say that the total number of policies in force at the end of the year was 342,642, insuring £192,115,478, an increase of £3,628,638. This opens a new view of the matter, for, on turning to the claims paid item, we find that this amounted to but £3,122,012. How then comes it that, with nearly £28,000,000 in new policies written, the gross addition to the amount insured was little more than £3,500,000? We fear there is only one explanation. Policies to the enormous amount of £21,000,000 or thereby were, in one form or other, shed off during the year. This is a prodigious waste, but, of course, it means money to the officials, commission agents, and so on, who carry this, for them, gloriously profitable business on. The trade is very dirty and shameful, we may be sure, but it pays some people, else it would not

be continued. Surely this is a fair inference from the facts just stated.

Let us look now a moment at the "British branch" business, which does not seem so wonderful after all. By dint of their literature and unscrupulous agents' statements, such as we have exposed on more than one occasion, 3,074 policies were completed in this branch last year, insuring £1,675,387, and yielding £71,011 in new premiums; and it is added that the character of the business is shown by the fact that "the annual discontinuance from all causes, including termination by death, mortality, completion of limited payments and surrenders is only 5 per cent." This is an astounding statement, of which no proof is given. We cannot even guess what it means, and defy anybody to do so on the data supplied.

On comparing, however, the total of the "completed" British business just given with that for the previous year, we are glad to find that it shows a falling off of about £400,000. This does not justify the boast that "the firm hold this office has established in Great Britain is no doubt due to the reputation which the company has always enjoyed, and to its remarkable bonus results, which may be illustrated by reference to some policies still on the books." Indeed; but how about the policies which have become claims and had to be paid? Will Mr. Haldeman produce a few authentic examples from the matured policies of the past year to illustrate the magnificence of these bonuses? We think not; he is more likely to fall back on the "valuable options" which his office professes to give and on the "liberal surrender values" (when there are any) it distributes in circulars with lavish profusion. But why is it that the magnificent "bonuses," stated in general terms as ranging from £1 13s. 6d. per cent. per annum to £5 5s. 1d. per cent., according to the age of the assured, are only to be fingered by holders of small policies up to £1,000, if at all? Where are such bonuses on large policies of £10,000 and upwards? Does money accumulate at a smaller ratio on these large policies than on the small ones? We should be glad to have particulars regarding the return on some of these large policies from an independent source, in order to be able to test the value of Mr. Haldeman's rhetoric.

And what about the "surplus" trotted out at £7,291,210? Is not this a misleading total, seeing that the bulk of the policies in force, all of them in fact up to January, 1898, are valued on a 4 per cent. basis? The company only professes to have earned an average of £4 8s. 6d. per cent. on its investments last year, a falling off of 3s. 1d. per cent. on the return of the year before, and its directors have so far recognised the danger this steadily falling interest creates by resolving to value in future at 3½ per cent. only. They seem afraid, however, to extend this valuation to the whole of their policies, because, if they did so, the above-mentioned actuarial surplus would in a great part disappear. Is it honest or in any way straightforward to parade a fancy figure of this kind arrived at by such questionable arithmetic? We leave the people who run this business to answer, and emphatically warn the public once more to give it a wide berth until a satisfactory answer is forthcoming.

With all their pushing and astounding "liberality," in print, towards the people who find the money to carry this business on, the managers and agents who "run" it are still most of all liberal to themselves, and accordingly the proportion of expenses to premium income was last year as high as ever, namely 25·7. Of course, this includes the expenses of the annuity business, but if we allowed 2½ per cent. off for that, it should still be ample to keep the staff in sleek comfort, not to say pious profusion. The proportion is still large enough also to insure princely incomes to the irresponsible men in New York who have organised this large business and conduct it in a manner wholly and absolutely despotic so far as any policy holder here or in the United States is concerned. There must be an end put to this kind of thing, in England at least, and we shall hammer away at it until public attention is drawn to what will one day prove to be a very shocking scandal should a root-and branch reform fail to take place.

Economic and Financial Notes and Correspondence.

The French Elections and Dear Bread.

It is peculiarly unfortunate for M. Méline and his supporters that the price of wheat should have risen to such an extent in France as to threaten serious disturbances in many parts of the country just on the eve of the General Election. Should the ferment caused by the present state of semi-famine lead to the overthrow of the Protectionist party in France, we, to be sure, should not be sorry, and something better might perhaps take its place. Anything worse than the present *régime* we could hardly imagine, for it is one which makes France a hotbed of revolutionary projects. And the force of the elements of disorder fermenting through the length and breadth of the Republic has been greatly intensified by the refusal of the Government to reduce the enormous import duty on wheat. M. Yves Guyot, in a very striking article entitled "The Feudal Impost," published in last Monday's *Siècle*, calculates that between September 1, 1897, and August 1, 1898, a period of eleven months, the French people will have paid about 150,000,000 francs in wheat duty, an amount which is only 28,000,000 francs under the produce of the stamp duties, and more than 23,000,000 francs larger than the revenue from licences. Again and again in recent weeks M. Méline has been appealed to to issue a decree temporarily reducing, or suspending altogether, the tax of seven francs per quintal on imported wheat, but he has shuffled and hesitated until, though he has at last decided to take the step, it is too late. The stupid obstinacy of the man is just that kind of mental characteristic which does more to nourish discontent with existing institutions than any other kind of administrator would be capable of. M. Méline is feeble all round, and completely in the hands of the agricultural party, or rather in the hands of each band of self-seeking Protectionists in turn, humbly eager to oblige every prescriptive robber at the expense of the dumb community at large. As M. Guyot pertinently observes, this wheat tax enhanced the price of bread to the people by far more than its actual amount, because the flour merchant and baker put a profit on the additional price they have to pay. But it is useless to preach wisdom to M. Méline. He cannot even take warning from the bread riots in Italy, and pours out his wrath on the heads of the bakers with a gusto quite mediæval.

Lord Salisbury in Self-Defence.

The speech of the Prime Minister and Foreign Secretary to the Dames and others of the Primrose League does not strike us as being in his happiest vein, and we regret to see it noted that he looked ill and worn. That he was bold, as usual, in speech, not to say rash in his defence of our recent diplomacy in China, and that

with all his boldness could not get over the fact of our having been driven to seize Wei-Hai-Wei because Russia practically scouted the policy of the "open door." Having taken the place, it may be good policy now to vaunt it at the expense of Port Arthur, and it is unquestionably an excellent spot to control the Gulf of Pechili from in time of war; but it is not, as his Lordship seems to imply, a place to turn into a great fortress. We hope, therefore, that his words do not imply large demands for money for this purpose in the near future.

At other points, we think the language of the speech justified. It was fair retort and more to point out that we have gained our ends at some vital points, such as the retention of British control over the Chinese Maritime Customs, the opening of additional ports, and of all the navigable waterways. Whether three years ago concessions like these would have been unattainable may be open to dispute, but unquestionably when yielding became the fashion with the Chinese Government, we contrived to get a full share of the favours going. And we have China's pledge that no part of the territory of the Yang-tse Valley shall be alienated to any other Power. When the day of dividing up the carcass comes, this pledge may stand us in good stead.

The United States War Bill.

We shall be much interested to know what kind of bond Congress is going to allow Mr. Secretary Gage to issue in order to obtain funds to carry on the war with Spain. If they are to be bonds, interest and principal of which are payable merely in "coin," they will have to be kept for home consumption, but if the Senate can be persuaded to sanction a gold bond, they would be eagerly bought up in this country above par, if bearing 3 per cent. interest. In fact, the United States could sell a ten or fifteen millions sterling 2½ per cent. loan to-morrow in London at, or very near, par, if it were distinctly a gold loan. Perhaps necessity may compel the Senate to give up its silver predilections, if not immediately, then at an early date, and it will be a fortunate thing for American credit should it do so, for the war, and what will follow it, is going to be extremely costly. Mr. Gage told the Finance Committee of the Senate on Tuesday that during the next two months the war would increase the Government's expenditure by about $50,000,000, and that at the end of this time the entire amount of currency in the Treasury would be exhausted, including $30,000,000 of the gold reserve. Mr. Gage further declared that the war would diminish revenue, and hence his demand for an authorisation to issue bonds. Apparently the amount for which sanction is asked at the present time is $150,000,000, the whole of which, no doubt, the people of the States could probably themselves subscribe. They, however, would do so at the expense of sales of some of their other investments, with the result that their unquestionable gold securities would come here while they kept the dubious bonds at home. So the principal immediate interest in these provisions and estimates is the clue they give to the possible gold demands of the United States in the near future. In all probability one-third of the money to be raised there, say, £10,000,000, will have to be imported, and the whole of this demand seems likely to come in the first instance on the London market.

Lord Cromer's Report.

Many important points crop up in the interesting and valuable account of the British stewardship in Egypt which this able administrator has made to the Foreign Office. At present, however, we shall touch on one point only, the cost of the Soudan War. Up to now, we gather, the total outlay on this head has been £1,850,000, of which £750,000 has gone into railways and telegraph works of permanent value. Part of this money has been provided out of the "special reserve," and on this there is a deficit of £571,000. Also Egypt appears to owe England £780,000 on account of the advance made in the early part of 1897, and we do not see how these short comings are to be met except by a new loan. The ordinary income and expenditure of the country just about balance each other. To be sure, Egypt is paying off debt and now owes £98,107,000 in funded obligations against £99,386,000 a year ago. Also, there is a sum of £E3,833,000 at the credit of the "general reserve fund," but happily £2,000,000 odd of this is ear-marked to public works, and the balance is in the control of the Powers, so that we cannot touch it. So it appears probable that before long Egypt will require a loan of several millions to put the finances straight. Will the Debt Commissioners sanction this loan?

The Disturbances in Sierra Leone.

Would it not be well that, when the debate on the Colonial Office vote opens in the House of Commons to-night, the Government should make some definite statement as to the causes of the excitement and turmoil among the revolting natives in Sierra Leone? The latest news about the disturbances at Sherbro is that they have become serious, that a number of Sierra Leoneans have been massacred, that European factories have been plundered, that warehouses have been burned down, and that Bendu is in ruins. Very probably, as Colonial officials say, there is great exaggeration in the accounts received. Bendu may be a very unimportant town, but that is no reason why it should be allowed to be ruined. Whatever exaggeration there may be in the reports, however, fresh troops have to be sent to quell the disturbances. Is there any reason why Government should persist in enforcing the obnoxious hut tax, which is understood to have been the main cause of this extensive and extending revolt, though the mischievous conduct of the native frontier police must also be saddled with a certain amount of responsibility in the matter? It would surely be better to drop the hut tax altogether rather than permit the continuance of a disorder which endangers life and property and completely paralyses such trade as there is in the province. An inquiry into the conduct of the frontier police also would do no harm, and might reveal so much mismanagement, to use a mild term, as to necessitate, if not a disbandment, at least a thorough reorganisation of the force. It is idle to urge that the revolt must be quelled before remedial measures can be taken. Unless the hut tax is abolished, it is not improbable that the quelling of the revolt might be almost equivalent to the extermination of the native population.

United States Tonnage Dues.

It is pleasant to learn that the proposed tax of $2½ per ton on all foreign shipping entering the United States ports has been abandoned by the United States legislature. Mr. McKinley has been peculiarly unfortunate in his Chairman of the Committee of Ways and Means in the House of Representatives. Mr. Dingley's mind is narrow and essentially parochial in its views. He means well, doubtless, according to his lights, but the tariff framed by him and imposed in 1896 upon the country has already produced disastrous results for the revenue, and, what is worse, has caused no small friction and ill-will between merchants and manufacturers here and the American people. In spite of all this, he remains fully convinced that he has done a great deed for his country's good, and was bent on continuing his services in the same direction by clapping a vexatious duty on British ships, for that was really all the proposed tax meant, severe enough to insure immediate success for the Canadian fast line of steamers to be forthwith established. Canada has not been sleeping while recent events have been shaping themselves, and in a few days the public will receive the prospectus of this projected line of steamers, which is to be established with a capital of upwards of £2,000,000. Had Mr. Dingley been a member of the concessionaire company he could not have served its interests better than

by getting this tax established. Canadian railways and steamships and Canadian ports would have flourished immensely, thanks to that tax, and the trade of the port of New York must have decayed. Happily this danger has been averted, and when the war is over the friendly rivalry between the United States and Canada will on the Canadian side be sustained by no such adventitious help as the tonnage tax would have given it.

The Russian Naval Programme.

This is much more lavish than the recently announced extra credit of 90,000,000 roubles would have led people to suppose and is thus summarised in an interesting telegram from the St. Petersburg correspondent of the *Times*, published on Wednesday :—

At present there are building and completing in Russia and abroad altogether six first-class battleships, one of the second-class, one large armoured cruiser, one coast-defence ironclad, four smaller protected cruisers, three gunboats, about seventeen torpedo-boat destroyers, and nine or ten torpedo-boats. The new programme above explained, so far as it goes at present, indicates only six or seven new and large vessels besides the smaller ships. This will hardly exhaust the 90,000,000 roubles, the allotment of which was recently proclaimed with such a flourish of trumpets. The most unusual act of official frankness in publicly announcing this extra credit was not without a purpose, both in Russia and abroad, but it was not noticed at the time that the Imperial ukase referring to the matter described the 90,000,000 roubles as being in addition to the increased credit previously granted, which was never made public. Therefore, it is believed that not 90,000,000, but between 120,000,000 and 130,000,000 roubles are at the disposal of the Admiralty this year for naval construction, including the 6,000,000 roubles for this purpose in the annual Budget. Some of it will, no doubt, be spent on increasing and improving the means and tools for shipbuilding.

The Brazilian Budget.

Except by way of historical memoranda there is little use in putting down the figures of this effort in romance. To the best of our recollection Brazil never published completed accounts for any financial year worth the ink they were printed with, and the Republic has in this respect been slavishly faithful to the traditions of the Empire. However, such as they are, we may mention that the President, at the opening of Congress, stated in his Message that the receipts for 1898 would probably amount to 312,000 contos of reis, against 304,800 contos estimated. But the expenditure is also expected to exceed this enlarged income by about 3,500 contos, and we should be greatly surprised, seeing how the exchange has fallen, if the result does not prove to be very much worse than this. Be that as it may, the President is sanguine still and looks for a revenue of 338,120 contos in the current year, 1898-99. What the expenditure is to be the telegraphic summary does not tell us, and probably enough the President does not know. Nor is it made clear whether the extraordinary credits of 60,000 contos opened last year, because Congress would not pass the Income Tax Bill, are included in the estimated expenditure of that year. In fact, we know nothing for a certainty about Brazilian finance from these junks of totals, but at 6d. for the milreis, which is above its present value, the estimated income for the current year is worth only £8,450,000.

Sleepy Somerset House.

In spite of all the examination of witnesses by the Committee upon Company Law, Somerset House continues to doze, leaving company organisers to pursue their own course in regard to making returns. By the section of the Companies' Acts that governs the filing of share registers at Somerset House, it is enacted that a list of shareholders shall be filed within a month of the holding of the first meeting of the company, which is, of course, the statutory meeting which must be held within four months of registration. But, on application this week to see the list of the West Australian Market Trust, we found that it had not been filed. Yet the West Australian Market Trust was registered in July, 1897, so that nine months have elapsed since its formation, and the list of shareholders ought to have been filed about four months back. The penalty for not complying with the law rises to £5 per day, and "every director and manager who shall knowingly and wilfully authorise or permit such default shall incur the like penalty." Hundreds of companies neglect to fulfill this condition, and with this fine harvest at its feet, Somerset House continues comfortably somnolent, while our legislators in their committee-rooms propose new measures of reform, in spite of the evident fact that the old safeguards are wholly ignored by the recalcitrant company promoter.

A Lesson in German Farming.

We can hardly imagine a better tonic for the British farmer, fagged and morose from long and useless crying for the moon in the shape of the protectionist coddling which he can never again receive, and which would only undermine his constitution if he did receive, than to "read, mark, and inwardly digest" the report on German agriculture just issued from the Foreign Office. It is an eminently wholesome and invigorating story of how German farmers have fared in a prolonged struggle with depression, how they have helped themselves, and in turn have been assisted in a perfectly legitimate manner by the State. The root fact and lesson of this little practical essay are that the modern farmer should have a thorough business training ; that he must have a sound education, abundant knowledge, scientific and technical ; and that he must, to be really successful in the struggle with his home and foreign competitors, be an expert in organisation and administration. In all this the State may be helpful without being demoralising. There is scarcely a University in Germany that has not an agricultural college connected with it. What would Oxford say if it were proposed to add agriculture to its curriculum ? Then there are State experimental stations, where all sorts of experiments useful to the farmer are made, where also fodder, manures, seeds, and so forth are tested at a merely nominal fee. There are dairy schools and model dairies all over the country, as well as other means of giving hints or active aid to the agriculturist. The farmers themselves have set up thousands of co-operative societies for mutual assistance in production and sale, especially in dairy farming. They have many credit unions for advancing loans to members at the minimum current interest. These have been admirably managed and immensely beneficial to the farming community.

Turning to England we find nothing of this sort—neither co-operative union nor State assistance. The old "gentleman farmer" is going, is almost gone ; but his active, energetic, business successor has not yet arrived. The State has done something in supplying instruction in cheese-making and dairy-farming ; but its efforts have been tentative, timid, and somewhat blundering. What a gigantic blunder, for instance, was committed when Parliament two years ago voted something like two millions annually ostensibly to relieve the farmer in some measure from the burden of the rates ! The money has been worse than wasted. It has been of no benefit to agriculture ; it has given no sensible relief to the farmer ; and the landlords alone will reap the ultimate benefit. But suppose such a sum—or half of it—had been devoted to founding agricultural colleges, setting up model dairies, establishing experimental stations, and supplying tests of fodder, manures, seeds, &c., for the benefit of the farmer—why, it must have gone far to revolutionise our agricultural system. With such assistance, added to the natural advantages of soil and climate already his, the English farmer might have been able to struggle successfully against his foreign rival, who is now so steadily encroaching even upon his home markets, especially in the matter of dairy produce, poultry, eggs, cheese, and butter—not to mention the rivalry to which he is being subjected even in beef and mutton. There is surely no insuperable obstacle in the way of the English farmer doing what the German farmer has been able to accomplish—with intelligent assistance.

It is so far satisfactory that the Council of the Central and Associated Chambers of Agriculture, at their meeting on Tuesday, urged that Government should create a central agricultural institution for the purposes of agricultural research, and to act as a centre of union for the whole country. There is here some indication that the farmers are becoming alive to what they really need, while showing a tendency to be less political and more practical. That central institution might become an experimental station, which in time might throw out branches in big agricultural centres, and so bring their benefits to the very doors of the farmers. But will our Government respond favourably? It seems doubtful. They appear to have come to the conclusion that they have done enough for agriculture when they passed that Rating Relief Bill, which can confer no permanent benefit except on the landlords. That seems, at least, the only inference to be drawn from the reception accorded to a deputation that waited on Mr. Chaplin on Tuesday to suggest legislation for checking the importation of adulterated dairy products. There was margarine, for instance; it was often sold for butter, and was invariably coloured like butter. Was it not possible to prohibit this artificial colouring of margarine, so that people might not be deceived into buying it for butter? Mr. Chaplin could see no great use in this. It was true the Government had promised in the Queen's Speech a Food Adulteration Bill, but they had no time to deal with it. The excuse is rather an odd one; for as much time has already been saved on the Irish Local Government Bill as might have almost sufficed for passing the Adulteration Bill. As to the adulteration of foreign milk, Mr. Chaplin is to send a few samples for analysis to Dr. Klein. On the whole, however, his quondam agricultural friends received from him the "cold shoulder." They should take a lesson from Germany, and change their tactics. For the present, they might join with the Chambers of Agriculture in urging the establishment of a Central Institution of Research and Experiment. But they should not stop there. Why should they not insist on the diversion of those two millions going to the landlords for use in the establishment of agricultural colleges, model dairies, and so forth? That way lies fruitful agricultural agitation; only from such reforms can we hope for successful farming.

Lloyd's "Slips" and the Stamp Acts.

A decision of the greatest importance to insurers at Lloyd's was given by Mr. Justice Mathew last week, in the case of The Home Marine Insurance Company *v.* Smith. It was an action brought to recover a sum of money under a contract of reinsurance underwritten by the defendant in the action and other Lloyd's underwriters. The "slip" was in the following form: "Open Cover. 30—6—97. Dawson Brothers. Cash. Steamer or steamers. United Kingdom and Continent and (or) America. Reinsurance. Rates as per indorsement." A list here followed of the amounts taken by each underwriter, and to each of these amounts the initials of the underwriter were placed. The slip then continued: "F. G. A. and York-Antwerp rules. Deviation clause. Old or new bill of lading, including all risks from warehouse lighterage and until delivered. Negligence clause. £4,000." On the back appeared the steamship lines on which the risks were reinsured, the amount which the plaintiffs reserved as their own risk, and the premiums, taking all risks, and f. p. a.

Now, by the Stamp Act, 1891, a policy of insurance includes every writing whereby any contract of insurance is made or agreed to be made, or is evidenced, and a contract for sea insurance shall not be valid unless the same is expressed in a policy of sea insurance, which is not valid unless it specifies the particular risk or adventure, the names of the subscribers or underwriters, and the sums insured, and, further, it must be for a period not exceeding twelve months. There was no doubt that in this case the sum insured was not mentioned, for the cover, the limit of excess taken on each ship, only applied to each particular case, and there was no mention of what the total amount of the reinsurance would be. The plaintiffs contended that this "slip" or cover note was in fact a policy within the meaning of the Act, and could be stamped on payment of a penalty, and in the alternative they said it was good as a contract to issue a policy.

The learned judge has decided this not to be so, as this note clearly was not a policy. The defendant said his reason for taking this stamp objection was that the plaintiffs had not followed the usual course of business in declaring any excess coming forward by a particular vessel, and providing for premiums and stamps, and obtaining a policy, but that having abstained from making their declarations for a long time, he had failed to receive premiums. Be that as it may, we must thoroughly endorse the statement of his Lordship that the taking of this technical objection by an underwriter at Lloyd's was regrettable. He has found that it was a contract of insurance binding in honour only, and the conduct of underwriters at such an institution as Lloyd's in acting in this way cannot fail to leave a deep impression on the minds of insurers in general.

Ceylon Tea Companies.

Subjoined is a letter which holders of Ceylon Tea Company shares will do well to read and think over. And not these alone, for is not over-capitalisation the vice of the age?—

To the Editor.

Sir,—Will you kindly permit a poor but industrious planter to comment a little on your admirable article in the Review of April 22 *re* Ceylon tea companies, and if I do not quite agree with you in all you say, I know you will think none the less of me for that.

You make too much of the "loss on rice," which only occurs when supplied by the Colombo agents of the companies concerned with their commissions added. Estates are not bound to supply rice at a fixed price, and as a matter of fact, where the superintendent is at liberty to buy in the best market, there is usually a small gain to the estate in supplying it to coolies.

The other parrot-cry of "exchange" merely means—at 1d. per rupee—4 per cent. added to estate expenditure; not a ruinous item. I own a small estate of about 200 acres, from which I have an average *net* profit of £1,400. Last year it fell to £1,320, there being an additional estate expenditure of £80, owing to rise in the rupee.

With your limited liability companies, *the leakage occurs in London, not in Ceylon*, or in silver fluctuations.

For twenty-five years I was manager of a group of estates, the *gross* annual returns from which were equal to from £20,000 to £25,000 sterling; the total expenditure about £10,000. These were chiefly in the grand old days when coffee was king and the rupee was worth 2s.

Between the absent proprietor and the manager there was perfect confidence, and all went smoothly till the arrival of leaf blight; then for a few years there was but little margin of profit, though with cinchona, &c., we managed to tide over the time of transition without actual loss.

In five years, after planting tea, the *gross* returns again rose to £15,000 sterling, and as the rupee had fallen, the estate could be worked more cheaply.

Now came the day of company mongering.

At first my kindly employer was loth to listen to the overtures of the swaggering promoter. Albeit, he was getting an old man, and the offer of £80 per acre—which was just double his own and my valuation—settled the matter.

Need I say that this transaction was soon followed up by a prospectus, offering to all lucky enough to apply in time shares in the cream of tea estates at the rate of £95 per acre!

Now there are no gulls like the cockney gull: the rush was immediate, and in a few days the shares stood at a premium! But mark the sequel. By a peculiar manipulation 10 per cent. was paid once in a way, with the certain prospect of a yearly diminishing dividend till reconstruction takes place.

This applies to 90 per cent. of the companies formed within the last three years.

In passing through London the other day, I had the privilege of witnessing a meeting of directors. Being but a cad in poorly fitting togs, I was easily ignored, but took mental notes, and came to the conclusion that I had never seen a more pitiable or palpable farce in my life.

There you had six swaggering City men, or pseudo-City men, in faultless frock-coats and high hats, met to concoct some feasible excuse for low dividends.

God help shareholders who depend upon them; but do not blame Ceylon.—Yours faithfully,

MacG.

Exit the Respectables!

The "respectable" part of the City will be much shocked to learn that Sir W. Lawrence Young and Sir Charles Jessel have felt bound to resign their positions

on the London board of the Johannesburg Consolidated Investment Company. It is understood that the reason dictating this step is their objection to being the mere nominees of the permanent directorate—Messrs. S. B. Joel, J. B. Joel, and H. Barnato—which under the Articles of Association has power to do whatever it likes with the London board. The two young gentlemen who have just retired appear to have had so little weight in the management of the concern that after a stay of two to three years upon the board, during which time a reconstruction was carried through, they have never been able to obtain the rescinding of the objectionable articles in the constitution of the company. To openly slight two baronets, one of whom is related to the Glyns, is, however, a very serious offence, and now "respectable" people in the City will give up the Barnato group as lost to all decency. But what was the London board of the "Johnnies" Company doing in the years 1895 and 1896, when so much bad business was transacted?

Goldfields of Lydenburg.

Now that these two young gentlemen have more time upon their hands, they might do far worse than give a little information about some of the "properties" of the Barnato group. Take Goldfields of Lydenburg as an instance. In the midst of the mad time in 1895, the shares of this mysterious concern were planted upon dealers in the market at about £7 a piece. It was a Barnato affair, and so the poor dealers took the shares. Since then it has issued one report, which we believe told very little, and no one can learn anything about the affair. What is worse, the old sponsors for the concern have turned round upon it and actually refuse to buy back the shares from the market even at par—£1 apiece! This is the depth of degradation from the market point of view, and the dealers are now seeking for light where darkness black as ink reigns supreme.

Debenture Holders and Preferential Payments.

An important decision was given by Mr. Justice Kekewich last week with regard to the effect of the Preferential Payment in Bankruptcy Amendment Act, 1897. By Section 3 of that enactment, in the winding up of any company under the Companies' Acts, certain debts mentioned in Section 1 of the Preferential Payments in Bankruptcy Act, 1888, amongst which is included income-tax, are, so far as the assets available for the payment of general creditors may be insufficient to meet them, to have priority over the claims of debenture holders or holders of debenture stock under any floating charge created by the company. The point in the case in question, Weekes *v.* The Kent, Sussex, and General Land Society, was whether the Commissioners of Inland Revenue were entitled to a preferential claim for income-tax, the debenture holders having commenced an action for the enforcement of their security prior to the Act coming into operation. The learned judge has held that the Act was not retrospective, following the decision of Mr. Justice Wright *in re* The Waverley Typewriter, Limited. These judgments seem to us to be sound, for certainly, *primâ facie*, an Act is not intended to be retrospective. The Legislature has only by express words interfered with debenture holders if they have not taken steps to realise their securities before the beginning of the Act. This Act of 1897 seems really to form part of, and extend the Act of 1888, which in terms only applies where a winding up has commenced after the beginning of the Act. To use the words of Sir George Jessel, "it is a general rule that when the Legislature alters the rights of parties by taking away or conferring any right of action, its enactments, unless in express terms they apply to pending actions, do not affect them."

The Gas Light and Coke Company.

If a Parliamentary inquiry is conducted into the methods of this company it would be well to examine its policy of accumulating a large balance forward. The last time it had its price of gas at 3s. 1d. per 1,000—between June, 1892, and December, 1895—it kept this high price in force so long that it accumulated a balance of over £200,000, which has enabled the board to maintain the dividends at 12¾ per cent. ever since. Having raised the price of gas in order to meet the increased cost of coal and for other reasons, the directors kept the price up longer than was necessary in order to accumulate a big balance forward, and in this way, during the twelve months ended June, 1894, the company charged nearly 3d. per 1,000 feet more than was necessary in order to effect this purpose. By doing this the dividend was ¾ per cent. lower for that year than if a proper price had been charged, which meant a loss to the shareholders of £38,348, but then the higher price of gas brought in £213,000 more, so that the public were the sufferers by this action. To our mind, the policy is a violation of the sliding scale agreement, and it ought to be carefully inquired into by the committee, if one be appointed.

Profit on Realisations.

The trust companies are just now particularly strong in respect of profit on realisations. Some very wisely do not bring it into their revenue accounts; others do, and it may be said to have a strong influence upon revenue in such instances. Take the Anglo-American Debenture Corporation as an example. Its total income last year was put at £54,568, of which £19,750 came from profit on securities sold and commissions. The commissions probably did not represent much, and if the profit from realisations had been eliminated from the profit and loss account the return would not have been a bright one. The revenue would then have consisted of £34,818, of which £23,880 would have been absorbed by working charges and debenture interest, leaving but £11,018 as net profit. This would have been equal to a dividend of a little under 4 per cent., whereas by taking its profit upon realisations into account, the company was able to write off £7,519 of unsatisfactory assets, and then declare a dividend of 6 per cent., and carry about £5,000 more forward. But, as any one knows who follows the markets, profits upon realisation are an extremely fluctuating form of income, so that no one should treat the revenue of the Anglo-American Debenture Corporation last year as at all typical of the future.

Hotel Cecil.

The board of this company quietly announced last week that the preference interest due on April 30 would not be paid. Our analysis of the accounts in the December number of the Investors' Review must have led the public to expect financial difficulties, but we were under the impression that interest upon the preference capital was guaranteed by the vendors up to January 1 last, so that two months of such interest ought to be in hand. The notice, however, is vaguely worded, and perhaps a payment may be made later on. We are not sanguine, however, about the future of this concern, for its capital of £1,300,000 requires a revenue equal to that of a small sovereign State. Where, we wonder, is this capital placed?

The West Australian Market Trust.

In the present tearful condition of this recently created concern it may be interesting to see what the melancholy monster was supposed to own at the start. According to an agreement dated July 7, 1897, the Joint Stock Institute—that faithful handmaiden of the Bottomley group—kindly transferred to the West Australian Market Trust shares to the nominal value of £500,000, taking in payment therefor £500,000 nominal in shares of the West Australian Market Trust. So particular were the parties joining in this romantic "deal" that a schedule was attached to the agreement specifying the actual shares to be transferred. They were as follows:—

150,000 North-Western Associated Gold Mines.
75,000 West Australian Joint Stock and Finance Corporation.

50,000 Associated Southern Gold Mining Company.
100,000 Westralian Joint Stock Founders'.
25,000 Northern Territories Gold Fields of South Australia.
25,000 Burbank's No. 1 West Gold Mining Company.
25,000 Burbank's No. 1 South Extended Gold Mine.
20,000 West Australian Loan and General Finance Company.
10,000 Fraser South Extended Gold Mine.
20,000 Nil Desperandum Gold Mine.

The shares were all of £1 each fully paid, and were taken at their nominal price. Needless to say, they were all Bottomley shares, and we wonder, after the "spouting geyser" sort of career of the West Australian Market Trust, how many shares in this collection are now actually under the control of its board? An ordinary trust is usually a great hand at borrowing. What, then, may we expect of a "Market Trust"? And yet the shares in the portfolio of this thing of flimsy beauty, put it as delicately as one may, were hardly of a nature to encourage advances, so that any operations of the kind must have been conducted under considerable difficulty. Before, then, any reconstruction of the delicate fabric is attempted, it might be well just for once to woo common sense so far as to begin by finding out whether the Trust really owns the shares it is supposed to possess. If they are of the character set forth in the schedule of July last, there would probably be little advantage in paying for them a second time, by dint of redeeming them from the grip of money-lenders. It might be considerably cheaper in the end to wind up right off.

We pause to note with admiration that the shareholders in the Western Australian Market Trust—who be they, we pray?—met yesterday, and swore by all their gods and their Bottomley to support the shares or die in the faith. But they did not, it would seem, just say straight out, "Reconstruct, and take our 5s. a share to pay up differences with." No, they cheered their chairman to the echo, and well he deserved the din they made, for was not his speech in quite his best "boy-stood-on-the-burning-deck" vein. "Most despicable and barefaced conspiracy ever formed within the four walls of the city of London"; "felt it his duty to buy up these non-existent shares to steady the market," "rumours of rigging absolutely false" — "we want a quarter of a million of money," the valiant word-slinger went on, "and I myself will find £150,000 of it." Bravo! who says Mr. Bottomley cannot rise to the occasion? Three cheers for him—and a committee of investigation for the Trust, consisting of Mr. Jones, Mr. Preston, Mr. Cutliffe, and Mr. Joy. We are shocked, especially as we know not these men. This will not pay differences, either, on the 12th inst. Ah! we forgot—there is Mr. Bottomley's £150,000. He never fails to plank down the cash—never—never; no matter what they say about the Hansard Union charity fund.

Critical Index to New Investments.

IDRIS & COMPANY, LIMITED.

The business consists principally of the manufacture of table waters, and was originally commenced as far back as 1875, the present company being formed in 1893. The share capital is £150,000, and the directors now offer £70,000 4 per cent. mortgage debenture stock at par. It is redeemable at 105 after September, 1925, on six months' notice. The stock is secured by a first mortgage on properties valued at £56,235 and a floating charge on the undertaking. Profits for the year ended September last are said to have reached £14,340, but, notwithstanding, the security seems far too slender.

FURNESS, WITHY, & COMPANY, LIMITED.

The directors of this West Hartlepool company offer for subscription, at £1 premium, 30,000 5 per cent. cumulative preference shares of £10 each, so that the return to the investor is a few pence over 4½ per cent. The company was incorporated in 1891 to acquire the business of Christopher Furness, proprietor of the Furness line of steamers, and Edward Withy & Company, shipbuilders and repairers and graving dock proprietors. In July, 1896, £450,000 4½ per cent. debentures were issued at 5 premium, while all the ordinary capital of £700,000 is held by Sir Christopher Furness, his co-directors, and friends. Until the reserve fund equals the amount of the outstanding debentures, the dividend on the ordinary shares is limited to 5 per cent. This reserve now stands at £206,900, and the premium on the present issue is to be added to it. Profits for four years are given, but only up to April, 1897, when for that year they were £140,715, against £99,949 to April, 1896, £85,476 in 1895, and £85,959 in 1894. These, however, are gross profits, and the last profit and loss account shows that after deducting expenses, debenture interest, and transferring £70,000 to reserve for depreciation, underwriting, &c., the balance remaining was only £57,161, while the interest on the preference shares now issued will require £15,000. The balance-sheet shows that steamships, freeholds and leaseholds, machinery, &c., stand at £563,246; investments in steamship companies, engine works, dry docks, &c., at £276,099; other investments, not specified, at £236,393; sundry debtors at £420,957, and cash and bills at £302,217. The reserve, we take it, is amount written off steamers to date, while the investments in steamship companies show that this company will suffer in times of depression not only through its own steamers, but through its investments in other companies, and the item "other investments" may mean just anything. The proceeds of the present issue will be devoted to the new developments now in contemplation, and the company has recently acquired a controlling interest in Irvine's Shipbuilding and Dry Docks Company, but no particulars of its standing are supplied. Assuming, however, that the assets of Furness Withy stand near their real value in the balance-sheet, there should be good security for the shares now offered. though we never think 5 per cent. too much for shares in such a concern to yield.

THE NORTH MOUNT LYELL COPPER COMPANY, LIMITED.

This by no means satisfactorily proved company offers for subscription at par an issue of £200,000 5 per cent. first mortgage debentures, redeemable at 105 on June 30, 1908, or at any previous date on six months' notice at 110. They are a first charge on the undertaking and property, and the trust deed provides for the creation of a sinking fund of £20,000 out of profits each year for redemption of the issue by drawings or purchase commencing July 1, 1900, also that the sum of £20,000 shall be deposited with the trustees to meet the first two years' interest. Debenture holders will have the option, to be exercised before July 1, 1900, of exchanging their debentures for fully-paid shares at the rate of seventeen and a half shares for each £100 of debentures. The value of the ore in sight is put at a very high figure, but what is wanted is actual results. The issued share capital is £465,000: where has all this gone? We never had a great deal of faith in this property, and profits will have to be pretty large to make a fair return upon such a mass of capital.

MELLIN'S FOOD COMPANY FOR AUSTRALIA AND NEW ZEALAND, LIMITED.

Share capital £125,000 in £1 shares, of which 100,000 are 6 per cent. cumulative preference, and 25,000 ordinary, the latter, with £50,000 in cash, being taken by Mellin's Food, Limited, the parent company, as purchase price. The latter guarantees the dividend on the preference shares for twenty years, and all we are told about the parent is that its net profits for two years are sufficient to make good the guarantee several times over. So they may be; but there is a good deal of blind faith necessary.

NEW ITALIAN OPERA SYNDICATE, LIMITED.

Another attempt, it seems, is to be made to turn the old Olympic Theatre, or rather the new one, since its rebuilding, to some purpose. "It has long been realised by the lovers of music that the performance of grand opera should not be limited to the 'London Season,'" and therefore grand opera is to be performed for at least six months of the year, and the rest of the time the theatre is to be let for comic opera, American drama, English opera, &c. The share capital is £30,000 in £1 shares, of which 10,000 are offered for subscription, and there is an issue of £20,000 in 5 per cent. first mortgage debenture bonds of £50 each. These are secured by way of floating charge upon the lease and assets and property of the syndicate, and are redeemable at six months' notice at £55 after 1905. The lease is valued at about £50,000, and the vendor, who takes £30,000, including two-thirds of the ordinary shares, values the assets at £20,000. An estimated profit for six months of grand opera of £25,000 is spoken of, but

this we need not go into. Too much grand opera is not good for anybody, especially such audiences as are likely to be attracted to the Opera House. A floating charge on the fifty-two year lease, at a rent of £2,250 per annum, must be a fine security, while as to the assets we are inclined to look upon the venture as an effort by Colonel Mapleson, the vendor and operatic director, to dispose of his choice collection, which includes scenery never before used, costumes, jewellery and armour and operas which have never been performed. Grand opera is not likely to make fortunes for investors or restore the fallen ones of the old Olympic.

SPEAR BROTHERS & CLARK, LIMITED.

Share capital, £160,000, in 20,000 ordinary and 12,000 5 per cent. cumulative preference shares of £5 each, with an issue of £50,000 4½ per cent. debenture stock, redeemable at 105 on six months' notice after 1904. Debenture stock and preference shares offered for subscription at par. Bacon-curing firms in Bath and Bristol are to be amalgamated, the Bath business dating back to the early part of the century. Debentures are a fixed charge upon freehold and leasehold premises valued at £24,393, and a floating charge upon the other assets, which include stock-in-trade, £52,166, and plant, &c., £950, an inadequate security for the debenture and preference capital. The statement regarding profits is also unsatisfactory, as all we are told is that the average yearly profits of the whole of the businesses for a given time amount to £12,731. Of the purchase price of £112,510, nearly one-third represents goodwill, and, taken altogether, we think the investment may very well be left to the West of England.

THE YORKSHIRE LAUNDRIES, LIMITED.

Washing there is no doing without, and we should imagine it is pretty profitable work. It ought to be if much of a dividend is to be earned on the capital now offered. It seems that the vendor has bought up nine laundries, and is now selling them at a profit to the company for no less than £167,500, presumably in cash, which hardly suggests confidence. Properties are valued at a lump sum of £166,578, but this includes the goodwill of all the businesses, which for aught investors can tell may represent half the valuation. Profits for 1897 are stated at £12,613, but one year's profits are no good for estimating the qualities of a concern of this sort. The capital now offered consists of £60,000 6 per cent. cumulative preference and £60,000 ordinary shares, all of £1 each, with an issue of £55,000 5 per cent. first mortgage debenture stock, offered at 105. Investors, we think, should pass this by.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

The Metropolitan Life Assurance Society.—For the year ended December 31 last, this society issued 188 new policies, insuring £140,940 and yielding £4,404 in new annual, and £2,486 in single, premiums. Claims arose under 155 policies, and took £140,103, both number and amount being well within the estimates. The funds of the society were increased by £9,860 to £2,036,938 at the end of the year, a total which shows a reserve of £37 14s. 11d. against every £100 assured. This society follows the plan of dividing its policies under series, and these series receive abatements on the premiums charged in proportion to their age. At the valuation made for the purpose of fixing the amount of these abatements at the end of last year, the rate of interest was reduced to 3¼ per cent. for all participating, and 3 per cent. for non-participating, policies, instead of 3½ per cent. all round as formerly. The actual cost of this change was £72,230, the whole of which sum was set aside out of the surplus of the years 1892-97. Even then the directors are able to allow abatement of premiums on policies of the first, second, and third series amounting to 71 per cent., 56 per cent., and 41 per cent. respectively, and to reduce those of the fourth series by 30 per cent. when entitled. This left £5,220 to be carried forward unappropriated. The society has never paid any commissions for new business, and the expenses of management, including pensions, amounted for the past year to rather less than 8 per cent. of the premium income. No less than £68,602 was paid in reduction of premiums out of the income of the year. The society's funds are well invested and stand at a price above their book value.

The Gresham Life Assurance Society, Limited.—We are sorry to have to class any British Life Office, which should be trustworthy, alongside the three American offices about which we have had, and shall have, so much to say, but it cannot be helped. This Gresham Life Office is run on much the same lines as they are, and exceedingly careful management will be required in the next ten years to prevent it from coming to their predestined end. Its report for last year does show some improvement upon previous ones, and we therefore indulge in the hope that it is now being managed in a way that may enable it to pull round. Expenses, however, still run very high, and amounted to nearly 22 per cent. of the premium income for the year as against rather more than 24 per cent. for 1896. In such circumstances the funds of the society naturally grow at a slower pace than its liabilities. Its total income last year amounted to £1,200,102, of which £946,703 came from premiums and only £199,291 from dividends, &c. These figures of course apply to the life department. Out of this large income about £395,000 net went to pay claims, a little over £60,000 was absorbed by surrenders, and about £211,000 went in expenses and commissions, the result of the whole being that only £341,000 was added to the life funds, raising them to £5,096,233. This is not a very large addition to the invested resources of a company which increased its liabilities on policies last year by £2,803,437. But if the life department is not in a flourishing condition the annuity branch seems to us to be less so. Last year £130,067 was received as purchase money for annuities, bringing the company under a liability of £14.306 per annum on that account, and this business was obtained at a cost of over 8 per cent. of the cash paid in, which surely was a most unreasonable charge. Worse still, the total of the annuity payments for which the company is liable came to £163,255, and when expenses and income tax were added to the outgoings there remained only about £10,000 to be added to the annuity fund out of the whole £130,000 received during the year for new annuities sold. This cannot be sound business, whatever is. The company as a vendor of annuities is living on its past, or from hand to mouth, and will get into trouble before very long unless it mends its ways.

Texas Land and Mortgage Company.—The income of this company was rather less last year, and after interest and working charges had been met the net revenue was £18,103. This permitted of a dividend of 10 per cent., with £2,000 to reserve, £1,500 to a contingent account, and £2,265 forward. The reserve fund will then stand at £75,000, and is wholly invested in high-class securities. In spite of last year having been considered a good one, the foreclosures account increased by £7,256, and now amounts to £64,891. A few years back it was not more than half this total, and it would be a wise step if the board endeavoured to reduce the item either by sales or writing down out of revenue. Interest on loans accrued and interest in arrear, we are glad to see, is £2,660 less, but its total of £19,398 is still too high and must contain a great deal of interest in arrear—often an asset practically worthless in cases of this kind. We would, therefore, rather see these items reduced than further additions made to reserve, for it is no benefit to the shareholders to add to reserve, if certain assets require writing down.

West Coast of America Telegraph Company.—This reorganised company has not started very grandly. The revenue for the year came to £25,773, and after payment of working charges and debenture interest the sum of £296 was left to be carried forward. The debentures amount to £150,000, bearing interest at 4 per cent., guaranteed by the Brazilian Submarine Company. The latter company, which came to the assistance of the concern when it defaulted, received £37,500 in ordinary shares as a bonus for its guarantees. There are also £20,000 of 4 per cent. income bonds (non-cumulative), which are exchangeable at the option of the holders for ordinary shares. Apparently these bonds received nothing for last year. The balance-sheet is a poor one, but not so bad as the history of the undertaking would lead one to expect.

Consolidated Waterworks Company of Rosario.—This reorganised concern is improving its system, and so its debenture issue has been increased. Revenue, however, did not increase last year, but this is attributed to the depression of trade in Rosario consequent upon the partial failure of the crops for several years in succession. The total revenue was £28,465, and the net profit was £14,570. Of this, £7,215 was absorbed by debenture and loan interest, and the balance permitted of a distribution of 5 per cent. on the 6 per cent. preference shares, and the writing off of £314 from the preliminary expenses account. This last account will then stand at £998, and there is also a doubtful asset in the shape of £3,658 for discount and expenses on issue of debenture stock, which will surely have to be written down out of revenue. Revenue may easily improve this year, but a good deal will have to be done to put the concern upon a sound basis.

Anglo-American Debenture Corporation.—Last year this corporation had a total income of £54,568, and after payment of expenses and debenture interest the net revenue was £23,109. Included in the expenses was £7,579 written off expenses of issue of debenture stock and payments to debenture holders on conversion, both of which accounts were extinguished, and therefore the charge will not recur again. On the other hand, £19,750 was received as profit on securities sold, which is a form of revenue that fluctuates and at times disappears altogether. The profit must therefore be considered above the average, and we are glad to note that the board only paid 6 per cent. in dividend, and thereby increased the balance forward by about £5,000 to a total of £18,921. We should have better liked their policy if they had put the extra £5,000 to reserve, and thus raised that fund to £15,430, as they assert that the depreciation upon the investments is about £13,000. Such a policy would have insured the sum being added to the accumulations of the company, which still need the same as it has £492,000 of debenture capital against only £301,000 of share capital, the latter having a liability of £3 per £5 share. The corporation still pursues its short-sighted policy of issuing no list of investments.

Elmore's German and Austro-Hungarian Metal Company.—After seven years of existence this concern is able to report that

"Elmore's Metall Actiengesellschaft," the German concern working under its tutelage, whose securities constitute the only asset of the English company, barring the extremely delicate item of patents, earned a profit of £3,202. The charges of the English company, however, amounted to £9,293, but these were cleverly arranged for when the capital was written down, and so they are wiped out in a "chartered accountant's" sort of way from the balance-sheet. The needs of the company are shown, however, in the proposal to issue £60,000 of 6 per cent. debenture stock, part of which will be used to redeem the £44,983 of 8 per cent. debenture stock, falling due next July, the balance being used in the business. Of course things are going to be better this year, but we have read something like this some years ago.

Scottish Australian Mining Company.—For the half-year ended December 31 this company was able to declare a dividend at the rate of 2 per cent. per annum, making 2½ per cent. for the whole year. This compares with nil for the two preceding years, but in times gone by the company paid high dividends. The balance forward was also increased by £690 to a total of £2,281. The company must, therefore, have done better, but the report speaks of a further fall in the price of coal in Australia, so that the current year's working may not be so good, although the strike in the South Wales coal trade may yet favourably influence the prices obtained for its coal.

Simmer and Jack Proprietary Mines.—With an issued capital of £4,700,000, this company's accounts show a balance of £435,150 to the credit of profit and loss, £353,120 of it described as profit on sale of investments, and £66,574 as the result of the year's mining, certainly not a very brilliant result. The directors point out that crushing has been seriously interfered with during the year. Early in November, the old 100-stamp mill was shut down, and the new mill with 240 stamps will not be fully completed until next month. Part, however, was at work almost immediately after the old mill was closed. In all, 164,065 tons were treated, and gold to the value of £259,704 was won, or about 31s. 8d. per ton crushed. With ore of such low grade expenses are high, the actual result being a profit of 8s. 1·39d. per ton. Not promising, surely. Turning to other items in the accounts, we find that the debenture debt of £500,000 has been reduced to £308,600, and the directors propose to devote part of the proceeds of the sale of investments to its further redemption. In this they are quite right. Money so earned is greatly a matter of luck, and it is only fair to the shareholders that it should be used to get rid of such an incubus. Other details do not seem quite so satisfactory. Among the assets we notice sundry debtors £331,389, an amount the chairman described as liquid, but there ought to have been some explanation of this large sum. Perhaps it represents cash still to be received from the purchasers of the various investments, but we don't know. To shareholders the most interesting part of the chairman's speech is that dealing with the future. He gave several interesting assays, one yielding forty-eight dwts. per ton, another thirty-eight dwts., and so on down to nine dwts. This last is the average figure of the tonnage crushed during 1897; but assays are proverbially rosy. With the new mill in full swing 40,000 tons are expected to be crushed every month. At 8s. per ton profit this means a net revenue of £192,000 for twelve months. To pay 5 per cent. on the nominal capital requires £235,000, which would mean an increase of nearly 3s. per ton in net profits. It is to be hoped the ore will improve sufficiently to give this increase, or that expenses will decrease, else the mine has a poor chance of justifying its present capitalisation. Even a 5 per cent. dividend is little enough at the present price of £3 for the £5 share: mining shares ought to pay a clear 10 per cent. after the holder has put aside enough for a sinking fund.

Scottish Ceylon Tea Company.—This company seems to have suffered severely from the events that interfered with Ceylon tea planters last year. Its tea sold at an average of ¾d. per lb. less than in 1896, and its crop was 12,000 lb. smaller, so that revenue was £2,302 smaller, while, of course, the higher exchange, and we presume the cost of rice, although it is not mentioned, led to an increase of £2,247 in the working charges. Net profit, therefore, was only £4,429, as against £8,976 in 1896, with the result that the dividend was reduced to 10 per cent, as compared with 15 per cent. for 1896, whilst nothing was set aside for depreciation and reserve, and the amount forward was even reduced. The company, however, is a strong one, as its 10 per cent. dividend for such a year shows, and its capital cost works out at only £27 per acre. Virtually, nothing was added to this account during the year, so that the need of a depreciation allowance was not so apparent. Profits may be better next year, but so long as exchange keeps up, which it may do for some time, they are not likely to return to their old figure.

Charles Baker & Company, Limited.—Supplying cheap clothing appears to have been profitable, for the profits of this company last year, including £1,113 from Jubilee letting, came to £34,930, and after paying £5,104 for interest, and setting aside £1,457 for depreciation, there was a balance of £25,862, which provided the 8 per cent. on the preference capital, and dividends and bonus equal to 15 per cent. upon the ordinary shares. The balance forward was then increased by £2,308 to a total of £2,513. A considerable amount was received in premiums upon new issues during the year, and, after meeting the cost of such issues, the sum of £2,407 was added to the leasehold redemption fund from this source. That fund will then stand at £7,157, and there is also a reserve of £5,000. Nothing, however, was added to these reserves out of the revenue of the year, and we should have preferred to have seen some such allocation before so high a dividend as 15 per cent. was declared. According to its balance-sheet the company was not too flush with ready cash, and further accumulations out of revenue are necessary if the rate of profit is to be kept up.

Nahalma Tea Estate Company.—With a crop 14,700 lb. below the estimate, this company obtained last year about ½d. per lb. less for its tea, while the cost was about ½d. per lb. higher. The profit was therefore only about ¾d. per lb., as compared with 1¾d. per lb. for 1896, with the result that net profits came to £206, as against £1,467 in 1896. Last September an interim dividend of 2 per cent. had been declared, which absorbed £280, and as £195 was brought in, nothing more could be distributed, the year's operations closing with a debit balance of £8. During the twelve months £600 of debentures were redeemed.

Mexican Railway Company.—The report for the second half of last year shows the usual characteristics of better earnings and increased loss on exchange, but considering the stimulating effect the fall in the value of the dollar ought to have on the business of the country the result of the half year's working is not a thing to be proud of. Out of an available balance of £23,958, a dividend on the 8 per cent. first preference stock at the rate of 1⅞ per cent. per annum absorbs £23,944, and this makes the return for the whole year 2⅞ per cent., giving a yield of just 3 per cent. on the present price of the stock. It is satisfactory to know that compared with the second half of 1896, there was an increase in the revenue derived from every source of railway earnings, local goods and passenger traffic giving $84,513 more, and foreign import traffic $44,419 more. Half the increase, however, went in additional expenses, leaving the net revenue greater by $65,741, and this in turn disappeared as the amount realised in sterling, owing to the lower value of the dollar, was £4,920 less of net revenue than in the half-year with which comparison is made. Referring to the regulations for controlling rates on American traffic to competitive points in Mexico, the report says some modifications have been made by the arbitrators, but certain points are still under consideration. No mention, however, is made of the suggested sliding-scale for regulating rates according to the exchange, so we may conclude the Government is not favourable to the proposal. Satisfactory progress is being made with the harbour works, and the sea-wall on the north and north-west are approaching completion. For the first four months of this year earnings, compared with 1897, show an increase of $153,000, which is satisfactory, but there is nothing to show that exchange may not be again lower, and therefore the company's stocks offer no attraction to buyers.

New General Traction Company.—Annual report to March 23, shows an available balance of £15,857, but this is not clear profit, some portion representing balance brought forward and an amount reserved last year in connection with Bills before Parliament. After deducting £2,122, cost of issuing new capital, and paying 6 per cent. on the preference shares, there remains £3,746 to be carried forward. Considering the strides electric traction is making these 6 per cent. preference shares should be a good speculative investment.

Diary of the War.

April 29.—The "great fight" of the 27th at Matanzas is shown by the detailed accounts not to have been so very great after all. It was a nice bit of target practice in which the United States gunners displayed infinitely better marksmanship than the Spaniards. Matanzas harbour is so far protected by a long strip of land, at the outermost point of which the Spaniards were observed to be mounting guns on what is described as a fort, more probably only earthworks, more or less hastily thrown up. The United States ships opened fire at a distance of over two miles, quickly found their mark, and in eighteen minutes—not a second more—the "fort" was in ruins. The Spanish fire was very wild, and not one of the American ships was struck. The Americans ran down a rich prize just off Cardenas—the *Guido*—which was making for Havana with stores for the Spanish army, and a considerable amount of money—believed to be $400,000.

April 30.—Some interesting facts became known to-day. The American liner *Paris*, said to have been chased by Spanish cruisers, and captured, as some supposed, has safely arrived at New York, after an "uneventful voyage." So has one exciting rumour of the early days of the war been disposed of; and another has been as effectually dissipated by the arrival of the *Shenandoah* at Liverpool. This ship was reported captured by the Spaniards. It has a cargo of wheat valued, at present prices, at something like £50,000—a pleasant morsel for Spain if she had secured it. The reports of the "great fight" at Matanzas have been cruelly—we do not say correctly—discounted by the Spanish authorities. The "forts" are declared to have been untouched by the American bombardment; the "great slaughter" of the early telegrams is reduced by Spanish despatches to the killing of one poor mule; and we are gravely assured that at least one funnel of one of the American ships was hit and injured by a Spanish shot. The American authorities now say the bombardment was not ordered from Washington, but that the Admiral's conduct has been approved. The Spanish fleet has at last left Cape de Verd—compelled thereto rather by neutrality contingencies than urgent war policy. But the ships started under "sealed orders."

May 1.—No marked change in the position of the belligerents; but news confirmatory of another bombardment, this time at Cabanas, about thirty or forty miles from Havana. Not a momentous engagement by any means; only undertaken apparently as a test of the strength of the defensive works. A request from Washington representatives of European Powers, as to when Europeans would be notified to leave the island, drew from President McKinley an intimation that, though the bombardment of Havana would not take place at once, it would be advisable that foreigners should leave Cuba before the 4th. It is said the British

Consul at Santiago de Cuba has been mobbed, and an English gunboat has been sent for his protection. The Powers generally have lodged remonstrances at Washington against the tonnage tax clauses of the War Revenue Bill.

May 2.—The sea fight at Manila yesterday (Sunday) morning was evidently a considerable encounter, if not entitled to the epithet of "great." The American squadron reached Manila on Saturday about midnight. They had taken up position by day-break, and soon after commenced the attack on Forts Cavite and Manila. The Spanish ships took an active part in the defence, and suffered greatly; but so did the American ships. After the conflict had lasted some hours there seems to have been a pause. The Spanish telegrams say the Americans "retired." But the battle was soon renewed, and, though the Madrid despatches say the American squadron "took refuge behind the foreign merchant shipping on the east side of the bay," there seems little doubt the Spaniards were defeated. One of their ships was set on fire; another was blown up. The New York merchants are agitating against the tonnage dues of the War Revenue Bill. They fear that, if the Bill passes as it is, it will drive a good deal of the English, French, and German trade to Canadian ports.

May 3.—Details of the great fight at Manila show that the result has been worse for the Spaniards than was supposed from the first accounts. The American Admiral brought his ships in the darkness opposite Cavite and Manila before the Spanish authorities knew where they were. The fort on Corregidor Island at the entrance of the Bay fired some warning shots *after* the American fleet had passed. No mines seem to have been laid. Neither ships nor forts on the Spanish side had any search lights. The fight was therefore forced upon them when unprepared. They had but a poor fleet—apparently all wooden ships, and of course old. These were all destroyed. Two were burned, one was blown up, and three were sunk to prevent their seizure by the Americans. The loss of life is stated at 400. The Spaniards fought well undoubtedly, but the contest seems to have been hopeless from the first. Through the British Consul at Manila, Admiral Dewey demanded the surrender of all torpedoes, guns, and possession of the cable offices. The demand was refused, and the bombardment at once began. According to the latest news to-day, Manila was in flames and Cavite has been destroyed. Washington is elated; Madrid depressed, inclined to censure, but insists on the Philippines defeat being avenged. Americans seem hastening to the conclusion that this battle may end the war. We do not believe it. Spain has not yet got sense thrashed into her.

May 4.—The United States flag now floats over Manila; and one of the questions most discussed among American politicians is, what shall be done with the Philippines? They will of course be retained under military administration until the conclusion of the war; but after? American jingoes would keep them permanently, as giving the United States a base and excuse for action in China, reckless of European jealousy and the expansion this would give to the Monroe doctrine. But sober American politicians and statesmen do not take that view. President McKinley's opinion is said to be that, after the war, the Philippines may be sold to some European Power—Great Britain by preference—in order to provide an indemnity, which Spain will be in no condition to pay. There is no thought of permitting Spain to reoccupy the islands, else the United States might continue in possession until an indemnity was paid. But the settlement of this question is a matter for the future. We are promised exciting news from Cuba before the week is out. The present object is said to be to seize some port—say Matanzas—and land a sufficient military force to co-operate with the fleet in an attack upon Havana. But as to this there is no certainty. It is announced from Washington that the tonnage tax clause in the War Revenue Bill is to be dropped. Probably the most serious news of the day is the announcement that martial law has been proclaimed in Madrid. This was hardly expected so soon. There has been rioting, but not of an alarming kind apparently; and the *Times* correspondent remarks upon the general quiet and order that reign in Madrid. The Government, however, must know of something that occasions them alarm. Not improbably they fear General Weyler, who is becoming the hero of the baser sort of Madrid jingoes. There need be little doubt that he means mischief, and will not lift a finger to assist the Government who dismissed him from Cuba. If revolutionary trouble breaks out there need be little doubt that this general, who was the author of the awful reconcentrado system, will play a leading part.

May 5.—We are still without news from the American side of the Manila battle, although rumour says that a telegram has been received from Admiral Dewey stating that fifty men were killed in the engagement. Excitement is spreading in Spain, and there was a fierce discussion in the Lower Chamber of the Cortes on the 3rd inst., during which Señor Salmeron, a Republican deputy, strongly attacked the Queen Regent, and was called to order. The Premier made a vigorous reply. General Weyler entered the House while the debate was going on, and took his seat between the Republicans and Carlists. In the Senate the leaders of all parties promised their cordial support to the Government. There have been serious riots in several towns. A state of siege has been proclaimed in Valencia, and bread riots occurred in Talavera. The fishermen at Gijon rose against the fish monopolists, and proved so troublesome that "the troops fired on them in self-defence." The coal-miners in Oviedo are on strike, and a state of siege has been proclaimed there also. Very serious riots are reported from Velasco, where the bakers' shops were pillaged. The dangerous revolutionary fever seems spreading steadily. Rear-Admiral Sampson's fleet, having coaled at Key West, has sailed for unknown regions. The general opinion is that Puertorico is his objective point, and that he proposes to capture that port before the Spanish fleet from Cape de Verd reaches it. There is, however, another rumour that the Spanish fleet has held homeward and is now at Cadiz. It seems probable that the military expedition to Cuba will be delayed until, as a *New York Herald* despatch puts it, "Spain's sea power in the Atlantic has been effectually crushed."

TRADE AND PRODUCE.

It did seem for a time this week as if the extraordinary rise in the price of wheat had been effectually checked, and that the turn downwards had even begun. The reports received on Monday from the provincial markets appeared to make it clear that buyers, though they gave in in a rare case or two in Yorkshire to high demands—one being as much as 53s. per quarter—they were not disposed to go beyond 50s. as a rule, and a good deal of business was done at from 48s. to 50s. Still, at Mark-lane on Monday rather a serious view was taken of the position, and many maintained that, with the diminution of English stocks, the continued demand for the Continent, the possible prolongation of the war, and a somewhat pessimistic view of the supplies to be expected from the United States and Canada—not much is expected from Russia—little if any diminution in rates could be looked for. No advance was, however, asked for on Monday, Friday's prices being firmly maintained. On Tuesday, reductions were noted at several provincial centres; and in the cargo market here there was early in the day a tendency to give way, which resulted later in a slight decrease. The news of the Spanish defeat at Manila seemed to suggest to many that the war would be of shorter duration than was anticipated, and the prospects at the close of the day were regarded as rather against sellers, and it was considered not improbable that further reductions would soon be heard of. At the opening at Mark-lane on Wednesday, however, more strength was shown as well as considerable excitement, and soon the price of English wheat rose 2s., English flour also advancing 1s. 6d. per sack. The supply of American was extremely short, and an advance of 2s. was early quoted. Little credence was given to reports that Mr. Leiter, of Chicago, had agents here prepared to unload large quantities of his "cornered" stock. It was not till later in the day that the news arrived of the suspension by the French Government of the duties on cereals until July 1. This had an immediate and we may almost say a remarkable effect upon the markets, more especially the cargo market. There was an advance of 2s., followed not long after by another of 1s. The principal demand was of course for France, the desire being to get as much as possible forwarded there at once. It was stated that some cargoes intended for the English markets had been re-consigned to France. For Californian near at hand 50s. 9d. was bid, but holders asked as much as 53s. Whether right or wrong, the belief for the present is that the wheat supplies all round are shorter than was at one time thought, though it would be difficult to give a sound reason for the belief. In the first three weeks of April the exports from Atlantic coast ports were 8,389,492 bushels, against 3,588,170 bushels last year, and from Pacific ports 2,529,628 bushels against only 712,871 in the same weeks last year. "Shipments of wheat," says *Dun's Review*, "have been stimulated by fear of interruption, but the great demand shows that foreign needs are not to be satisfactorily met even by the considerable United States surplus. Indeed, there is indication that the world's supply may prove too small even after the American supplies have been exhausted." Certainly the probabilities all point to a maintenance of present prices, and perhaps some advance for at least a few weeks to come. Fortunately the reports of this year's crops continue to be favourable.

No change of importance can be reported in the iron market. On the whole, the tone is healthy, and there is an increasing flow of business. There are fears in some markets that the supply of ore for iron-making from Spain may be cut off altogether, though how that should result we cannot conceive, or, at least, be so enhanced in price as to seriously affect the cost of pig-iron. These fears seem exaggerated; but in their last weekly circular, Messrs. William Jacks & Company say very truly: "The continued heavy consumption of iron in all districts, the decrease in stocks, and the probability that the Spanish-American trouble will interfere with the shipment of American pig-iron to the Continent, as well as with the supplies of ore, are making both consumers and speculators more inclined to buy pig-iron." Hematite will be adversely affected should Spain carry out her scheme for placing a duty on shipping. Birmingham is taking a more cheerful view of the loss of trade from Cuba. It is now pointed out that it has been dwindling steadily for the last two or three years. Local trade is generally brisk, and new orders are coming in satisfactorily. Gun and ammunition makers are now benefiting by the war, and have heavy contracts on hand for the American as well as the Spanish Government. Benefiting by the stoppage of works in Wales, Glasgow steel-makers are insisting on very stiff prices. They ask £5 5s. for angles, £6 15s. for ship-plates, and £6 5s. for boiler-plates. Reports from other iron centres are also satisfactory.

Copper has been strangely dull throughout the week, with a steady fall in price, until Wednesday, when a reaction set in, and values quickly improved. Fully 2,000 tons changed hands, cash realising £51 7s. 6d., 6s. 3d., 8s. 9d., 11s. 3d., May dates £51 10s., 11s. 3d., 8s. 9d., 7s. 6d., one month £61 10s., and three months £52, £51 18s. 9d., 17s. 6d., 16s. 3d., £52 1s. 3d. and 2s. 6d. Settlement price, £51 10s. There is still considerable confidence that the upward movement has not by any means exhausted itself. During the first fortnight of April the total visible supplies exhibited an increase of 1,513 tons upon those reported at the end of March, but there has since been a reduction of 645 tons. The stocks in England and France and afloat from Chili and Australia now stand

at 28,891 tons, as compared with 33,793 tons last year, and 38,446 tons at 30th April, 1896. The deliveries last month were 22,943 tons, as against 19,025 tons in April, 1897, and 18,960 tons in the same period of 1896. As the haste to ship as much American copper as possible to Europe before the war broke out greatly reduced stocks, we cannot look for much from that quarter for some time. Refined copper has commanded big prices, high conductivity bars selling up to £59, and cathodes up to £58 delivered at Birmingham.

There is no change in the matter of coal. Wales is still idle, and there is no present prospect of a termination of the strike. There is, indeed, a fear now that the stokers and engine-men may leave work, as they have expressed themselves very much dissatisfied with the increase in wages offered by the employers. Their refusal to work might be serious, as the suspension of pumping would, of course, mean the flooding of the mines; but even if the present engine-men were to leave, it would surely be possible to get others to take their places.

The third series of Colonial wool sales began on Tuesday, when, though the attendance was good and the competition fairly animated, prices of all descriptions of merino wools, according to Messrs. Jacombe, Son & Co, hardly ruled up to the closing rates of last sales, and were occasionally 5 per cent. easier. Fine cross-breds showed no change, but other sorts were on the average 5 per cent. below late auction currency. There is not much stock in the hands of the manufacturers, but trade continues restricted, with little prospect of immediate improvement.

The firmness in the sugar market continues, and with a good trade demand the prices of all kinds of raw sugar have advanced. Yet the direct imports since January 1 are very much larger than at the same period last year, being 29,918 tons against 22,775 tons, and coastwise 9,807 tons, as compared with 3,687. American markets have also advanced, and, as the imports from Cuba have ceased, American refiners may soon have to look to Europe for supplies of beet. According to Messrs. W. Connal & Company's circular a good business has been done in Greenock crushed, and prices have advanced for all qualities 9d. to 1s. In Glasgow on Friday there was a rise of 5s. per ton on sugar, making 15s. for the week. May tenders, and a notion that the American victory in the Philippines may lead to an early termination of the war, has since had a quietening influence on the market. Besides, as Mr. Czarnikow points out in his circular, the trade, having supplied themselves freely during the last fortnight, are less eager purchasers. Still, the general tone remains firm. But the probabilities rather point to further weakening than strengthening. The American market remains firm for spot and near at hand sugars.

THE PROPERTY MARKET.

Last week's sales at the Mart amounted to a total of £157,000—a somewhat diminished but still very satisfactory aggregate. Again freehold and leasehold properties were the mainstay of the market. Very few landed estates have been offered, and these unimportant. Let us hope that such properties are disappearing from the auction room because agriculture is recuperating sufficiently to induce owners to stick to their land. Some important properties were disposed of at the Mart last Friday. Messrs. Protheroe & Morris obtained £8,100 for a block of freehold property, Eltoe House and Church Farm, with about eleven and a half acres, in Church-road, Leyton. Then a number of leasehold houses at Hackney, offered by Messrs. Bunch & Duke, realised £4,500, and the purchaser seemed to have a notion that he might easily dispose of them again at a profit. A block of freehold building land, eleven and a quarter acres in extent, in Hale-lane, Edgware, Middlesex, was disposed of by Messrs. Baker & Sons at £1,260. Mr. T. Westacott also sold a freehold property in Albert-road, Bexhill-on-Sea, rental £100, at £1,500.

On Tuesday the sales totalled only £16,375. Of this sum Mr. J. W. Kennedy contributed £8,030, the price of a block of twenty-four acres of building land at East Ham. That is at the rate of £330 per acre. Messrs. Weatherall & Green obtained £2,750 for half-a-dozen leasehold houses at Clapham, £1,940 for another lot in the same locality, and £1,575 for six plots of building land at Woking, Surrey. A considerable number of lots remained unsold.

To the total amount of £33,230 realised at the Mart on Tuesday, Messrs. Debenham, Tewson, & Company contributed the handsome sum of £27,985. Their lots were all but one freehold and leasehold ground rents, their chief one being a freehold ground rent of £130, at Denmark Hill, Camberwell, reversion in ten and a half years, which went for £15,000. There was a keen competition for the lot. Another was a freehold ground rent of £82 17s., reversion in ninety-four years, at Valmar-road. It realised £2,830. Two freehold houses in Coldharbour-lane fetched £4,760. The leaseholds all sold well. Messrs. Dunn, Homan, & Coverdale also sold some leasehold houses in Compton-road, Canonbury, and Messrs. F Jolly & Company successfully disposed of a freehold residence in Down's-road, Hackney. Several licensed houses were offered at Masons' Hall Tavern on Tuesday, but only one found a purchaser. It was the Earl of Eglinton, at the corner of Eglinton-road and St. Stephen's-road, Old Ford, held for a term of seventy-one years at a rental of £125 per annum, reduced to £95 by sub-letting. Messrs. J. & M. Johnson & Company were the auctioneers, and the house brought £17,500.

Friday's transactions at the Mart only totalled £21,265, but the business done was good. Messrs. Alfred Savill & Son disposed of thirty acres of freehold land at Stanford-le-Hope, Essex, for £3,000. A freehold residence, with four and three quarters acres of land, at Bexley Heath, was sold by Messrs. Baxter, Payne, & Lepper at £2,000. Over £6,500 was realised by Messrs. Douglas, Young, & Company from lots of freeholds at South Lambeth and Balham. It was a day mainly of bricks and mortar.

Messrs. Edwin Fox and Bousfield announce an important sale of stocks and shares, including freehold estates, comprising parts of a King's share in the New River, £3,000 3 per cent. debenture stock in the same company, and 600 £50 new 7 per cent. shares in the Grand Junction Waterworks Company.

Mr. Alfred Richards announces another sale of gas and water stocks and shares at the Mart on Wednesday next.

Answers to Correspondents.

Questions about public securities, and on all points in company law, will be answered week by week, in the REVIEW, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

H. E.—I am very sorry to see your list, as I have very little belief in any of the companies you mention. No. 1 has, perhaps, some value behind it, but it is difficult to have faith in any of this group. No. 3, efforts will be made to re-organise with an "assessment" of 20 per cent. to 25 per cent. if it is not wound up compulsorily. You should certainly not average. It is quite likely every artifice will be used to send prices up again; if so, you should sell slowly, and get rid of your holdings gradually. In the long run I am afraid nearly all will prove worthless, so do not be too patient, but make up your mind to "cut your loss." As I cannot give you a detailed answer about each concern, your remittance is more than sufficient. I am returning the balance.

Next Week's Meetings.

MONDAY, MAY 9.

General Accident Assurance ...	Perth, noon.
Mason & Barry	Cannon-street Hotel, 2 p.m.
Texas Land and Mortgage Company	2, Suffolk House, 2.30 p.m.
Villa Maria and Rufino Railway ...	Winchester House, noon.

TUESDAY, MAY 10.

Equitable Life Assurance	Mansion House-street, 11 a.m.
Felixstowe Dock and Railway ...	99, Lincoln's Inn-fields, 11.30 a.m.
Nohalma Tea Estate	32, Victoria-street, S.W., 1 p.m.
West Coast of America Telegraph...	Winchester House, noon.

WEDNESDAY, MAY 11.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

SUN LIFE
ASSURANCE SOCIETY.
ESTABLISHED 1810.

Funds in hand exceed £3,900,000.
Total Income exceeds £600,000.

The "Perfect Protection" Policy.
LIFE OR ENDOWMENT ASSURANCES
WITH

Relief from payment of Premiums during PERMANENT or temporary illness causing inability to attend to ordinary occupation for at least two consecutive months;

By EDWIN FOX and BOUSFIELD,
At the Auction Mart, on
Wednesday, May 18th,
At 2 o'clock in lots.

THE NEW RIVER.—Unquestionably the choicest Home Investment of this or any other age.—Important FREEHOLD ESTATES, comprising parts of a King's Share in the New River. The dividend for the year ended Christmas last was over £2,700 per share, having risen from £1,178 in a little over 25 years, the revenue of the Company derived from land and water having advanced during that time from £284,203 to £562,996 per annum, and is without limit as to future accretions, occasional bonuses, an important reversion to a large and increasing income, and to a share of the landed and other properties, notably that in Clerkenwell, extending over 50 acres, covered with buildings, the leases of which begin to fall in in 1903, when the rack-rentals come into possession. Also

£30,000 THREE per CENT. DEBENTURE STOCK, with interest payable 1st August and 1st February.

Particulars at the Mart; at Messrs. Edwin Fox & Bousfield's office, 99, Gresham-street, Bank, E.C.; and of the

Vendor's Solicitors,
Messrs. RUSSELL, SON, & CUMMING,
14, Old Jewry-chambers, E.C.

By EDWIN FOX and BOUSFIELD,
At the Auction Mart, on
Wednesday, May 18th,
At 2 o'clock, in lots.

By order of the Court of Directors, and pursuant to the Auction Clauses of the Company's Act of 1878.

GRAND JUNCTION WATERWORKS COMPANY, £30,000 NEW CAPITAL, in 600 £50 New Seven per Cent. Shares, in such lots, as, while enabling the large capitalist readily to acquire a considerable holding, will admit the smaller investor to participate in the advantages of an interest in this well-known London Water Company. The above shares form part of, and have the same powers and privileges as, the existing ordinary capital of the Company, and are entitled to a dividend not exceeding £7 per cent. per annum. The gross rental in 1872 was £106,249, and in 1897 it amounted to £209,825, an increase to nearly cent. per cent. in 25 years. In lots of two shares each. The buyer of one lot will have the right of taking further lots at a like price per share without competition.

Particulars of the Secretary at the chief offices, 65, South Molton-street, Oxford-street, W.; at Messrs. Edwin Fox and Bousfield's office, 99, Gresham-street, Bank, E.C.; and of the

Company's Solicitors,
Messrs. BIRCHAM & CO.,
46, Parliament-street, S.W.

The Investors' Review.

The Week's Money Market.

The short loan market has been full of money during the past seven days, and the chief difficulty has been to find employment for it upon reasonable terms. The rate for day-to-day loans gradually subsided to 1½ to 2 per cent., and no more than 2½ per cent. was demanded upon advances for a week. The position must have been irksome to the "discount houses," which were

granting 2½ and 2¾ per cent. upon deposits, and found their floating balances commanding such unremunerative rates. The India Council did a small business throughout at 3 per cent. for its loans for about a fortnight, so that the present ease does not delude the market into granting long-term advances at current rates. And already the calling in of balances in connection with the Chinese Loan has begun to harden rates, so that 2 per cent. is now the nearest rate for day-to-day loans.

Discount rates at one time gave way in face of the large arrivals of gold, and on Friday last three months' remitted bills were quoted as low as 3½ per cent. Although gold has since continued to go into the Bank of England each day, the tone has hardened, chiefly because the New York exchange has once again fallen. At the present quotation, it is possible to bid 77s. 10d. per ounce for bar gold on American account, and Japanese yen is usually taken for the same quarter in preference to being sent into the Bank. Therefore, in spite of the fact that no less than £2,163,000 in gold was received by the Bank in the week, the feeling grows stronger that we have not come to an end of the monetary pressure. Arrangements are understood to have been made for the export of considerable amounts of gold to New York, which, if not obtained in the open market, will certainly be taken from the Bank of England. A leading cause of the demand is the enhanced price of wheat, which adds to the indebtedness of Europe to the United States. This circumstance may cause further transfers of the metal here from the Continent, but a good deal of the Continental debt, we fancy, is being liquidated by sales of securities from Paris and Berlin, operations which will throw the responsibility of finding the necessary gold upon this market. We have good reason for stating, too, that a fair portion of the funds to be transferred to the Japanese Government on Saturday next will be withdrawn in the form of gold for Yokohama. This movement will probably lead to the remarkable spectacle of gold coming from, and going to, Japan at the same time, but such an experience is not at all unusual when a country has its currency in an unsettled condition. Should these demands prove as important as is feared in some quarters, we may easily see the bulk of the gold that has recently arrived taken away again, and accordingly the market is wise in refusing to work under 3⅝ per cent. for remitted bills of the usual dates. Yesterday, the market closed much harder, and had been driven to the Bank, where it borrowed nearly £300,000 at 4 per cent. by the calling in of the Chinese Loan money. Outside rates for call loans rose to 3 per cent., and there is every appearance of increased tightness next week.

This week's Bank returns is all a matter of gold. Through the influx of £2,163,000 from abroad, the banking reserve has been increased by £1,682,000, and the stock of bullion by £1,932,000, the circulation having increased by £480,000 in notes and coin at the end of the month. "Other" deposits have risen £1,314,000 to £39,270,000, and "other" securities have run down £1,167,000 to £32,768,000, thanks to the gold in, and to the decrease of £822,000 in the public deposits or Treasury and departmental balances. These, however, are still £11,539,000. The decline in the "other" securities shows that the Bank's bill case is emptying, and in the actual condition of the market it cannot be filled again. Thanks to the addition to the reserve its total is now £22,720,000, which is equal to 44½ per cent. of the liabilities, compared with 41¾ a week ago.

SILVER.

Buying on account of a French mint order in a market thoroughly prepared for the operation was sufficient to cause the price of bars for immediate delivery to rise to 20½d. per ounce last Friday. Immediately the order was completed, every one became a seller, and the price gave way rapidly. The downward movement, too, was accentuated by the publication on Tuesday of the despatch sent home by the Indian Government prior to its Budget statement. A very fair digest of this despatch appeared in the *Sunday Special* three weeks previous, but the market would not credit the extravagant policy therein outlined until it received official confirmation, now amply bestowed. Although it is known that the matter must now be left to the Departmental Committee—whose deliberations may easily run over months—the market was upset by the mere suggestion of the Indian Government that it should melt down rupees and sell the metal thus produced. That India should not buy silver for a year or two—it might be three or four years if we only lend it enough gold—might be a light matter to the Indian Government, but it would mean a further smashing blow to the silver market, and dealers in the metal shuddered at the mere proposal. Accordingly sales were pressed, and the price for immediate delivery has fallen ¼d. on the week to 26d. per oz., and the forward quotation is ⅝d. weaker at 25½d. per oz. Chinese exchanges have responded to the movement, and for the time being the whole market is in a state of uncertainty. Meantime, the Indian exchange has dropped because the stimulant urgently needed in the shape of a big sterling loan is now put off until the committee has reported. The India Council, however, has sold its quota at the declining rates, although trade is reported to be disorganised in India by the plague. The Bank of Bombay has reduced its rate from 13 per cent. to 12.

BANK OF ENGLAND.

Stock Market Notes and Comments.

Since we wrote last the Stock Exchange has completed its settlement comfortably enough in all departments excepting the Western Australian. There the troubles of the so-called "Bottomley Group" of wondrous companies still cause much anxiety, and have produced several failures. It was announced at the end of the week that the "difficulties" had been surmounted, and only two more members were declared defaulters when the market opened again on Tuesday. We do not believe in this pretty story, and expect to hear a good deal more of these troubles before they are ended. Much questionable business has been transacted in the shares of these companies, and if everybody had their deserts, a few men, members of the Stock Exchange and outsiders, would soon be cooling their heels in some one or other of her Majesty's prisons. We hope some of them will get there before all is over. Such a patch-up as has now been made is merely a make-believe payment of debts in many cases, for the simple reason that, clever as modern financiers sometimes are, they cannot always make paper perform the functions of gold. Small in some respects though this filthy puddle is, it has shaken the whole Western Australian market, and will make the engineering of advances in the shares dealt in there difficult for some time to come. We therefore think the public should avoid this section of

the Stock Exchange as much as possible, at least until the test of time has been applied to it. Six months hence we shall probably know a good deal more about it than we do now.

In other departments the attitude has been more cheerful, and quite a smart advance occurred in American railroad securities on Tuesday, upon the strength of the news from the Philippines. Short-sighted and sanguine people, here and in the States, jumped to the conclusion that the destruction of the Spanish squadron in the Bay of Manila meant the end of the war. They now begin to see that they were wrong, and the clouds are again gathering over not only this department of the Exchange, but of others also. It was easy to overcome, in the Philippines, a number of old ships and forts badly manned and gunned. The task of subduing Cuba and destroying the Atlantic fleet of Spain has still to be accomplished, and we fear it is going to take both time and a great deal of money. Meanwhile trouble is brewing in Spain itself, and default on her public debt may be looked upon as certain next July. A further fall in Spanish bonds is therefore probable. There will be fluctuations, of course, representing the tug-of-war between "bull" and "bear," but the tendency must be downward, and the further the fall progresses the greater the danger of collapse in other directions. Portugal and Brazil are likely to be involved in the ruin of Spain, because their finances have been propped and patched up by substantially the same class of men. The centre of strength for all these States has been the Paris market, and that is now suffering grievously at many points. How long it can continue able to bear the strain put upon it from many quarters we should not like to guess, but it will be prudent for people here interested in stock markets to keep a watchful eye on France. There are more elements of the kind that work to produce an explosion active there at the present hour than have been stirring since 1848.

Home securities, too, will be again adversely affected by the distress elsewhere, and by the necessities of the two Powers at war. The United States will require a great deal of money, and Spain, under whatever Government, must abstract money from the pockets of her creditors if she is to continue the fight. The displacement or loss of funds thus produced cannot but jar on a sensitive market like ours, and so we still think it prudent to advise caution in buying. People are too apt to imagine when they see a rise of one or two pounds in prices that they have missed the opportunity to buy. They may be assured that they are in no danger of doing this just yet in any division of the stock markets. We have to provide for a great many requirements this year outside those arising from the present war, chief amongst these being the higher price we, and all European countries, are paying for bread. This not only demands more money everywhere, but directly impoverishes large sections of the community. As the year progresses we shall feel the effects of this impoverishment and all the unusual demands for money more and more acutely. The last fortnight has made us happy in witnessing large imports of gold, but we forgot that most of this gold came to us either as payment of the German half of the Chinese Loan, or in transit on its way to the States, principally in payment for wheat bought there by Continental nations to supply their unusual deficiency. In short, we stand to lose this gold again, and probably will lose most of it in the autumn, if not sooner. It is not, in other words, a stable foundation on which to build a renewed and permanent advance in public securities. Probably enough, people who have money really to invest can do no harm in purchasing the best classes of domestic securities on a falling market at any time. They may by and bye see lower prices for what they have bought, but these lower prices could be taken advantage of to increase their investments, so as to obtain a higher average rate of interest, and whatever the interest they obtain may be, it is as safe as anything mundane can ever be. We therefore in no way discourage prudent investment, provided it is confined to non-speculative securities of the best class. What we are always endeavouring to do is to discountenance speculation on mere transitory phases of markets whose condition must, from surrounding circumstances, be slippery and treacherous for many months to come.

In spite of the permanent instructions in the Review people continually write to ask us what mine share or group of shares they had best purchase to "make a bit" on. A little reflection should convince them of the futility of this proceeding. We can no more tell what the quality of ninety-nine mines out of 100 may be than we can predict next year's weather. Good and proved mines are visible to everybody, and their quality is emphatically expressed in the price of their shares. So far as we can judge, looking at the matter coldly and without prejudice, there is not a really cheap mine share in the market. A strong combined attempt is being made to induce the public to believe that Witwatersrand shares are now "worth buying for a good rise." Some few may be, as lottery tickets, but as we cannot foretell the prizes in a lottery, we decline to recommend them, and are very sure that most, if not all, the high-priced shares, deep level and other, are at the present moment well above their intrinsic value. What man in his sober senses would pay £30 for a £1 Rand Mines share? They, with many others similarly inflated, may go higher, because the power of the cliques behind them is great, but they are not an "investment" in any sense where they stand, and there is room for a prodigious fall.

The Week's Stock Markets.

Business has again been very restricted, the holiday in London on Monday being followed by the closing of Wall-street on Wednesday. The differences to be met in the Western Australian market caused considerable anxiety for several days, but matters were at length patched or shored up, and fewer failures occurred than was at one time feared. An almost general rise has since taken place, due to re-purchases by "bears," but Spanish bonds are lower, owing to the alarming rumours from Madrid, and Rio Tinto shares have fallen heavily. Consols were weaker on Saturday, on the revival of the American demand for gold, but there has been a recovery since.

Consols register a further advance, owing to the large influx of gold into the Bank, and the account disclosed a scarcity of stock, judging by the continuation rate which was only 2—2½ per cent. The proposals of the Indian Government to establish a gold currency caused a sharp rise in the Indian sterling loans, but rupee paper has lost most of the advance which took place at the beginning of the week, the exchange being lower. Colonial Government stocks have picked up a good deal, and the premier securities of the leading Home Railway Companies also show a little recovery.

The Home Railway market has been a firm one, and prices are all marked higher. There is practically no account open just now, so a very little buying caused an advance out of all proportion to the amount of business really transacted. Some persistent buying of "Underground" stocks is the feature, exhibition traffic prospects being the only reason assigned for the sharp rise in Metropolitan Ordinary and New Ordinary; but this inquiry on a market bare of stock was accountable for the rise of several points. Satisfactory traffic returns were published by all the companies with the exception of the Great Western, which is still suffering from the

effects of the Welsh coal strike. The passenger lines did especially well last week, and both the Brighton and South-Eastern Companies' deferred stocks have been inquired for, and Great Eastern was also firmer for the same reason.

The market for United States railroad shares displayed a hesitating tendency during the latter part of last week, and business dwindled away almost to nothing at all. Wall-street operators, however, became very excited on Monday over the news of the victory of the United States fleet off Manila, and a wild rush of buying orders sent prices up from one to four dollars. When the London market reopened on Tuesday it was soon found that only a feeble response was forthcoming, which rather discouraged Wall-street, while profit-taking, in view of the holiday in New York on Wednesday, tended to impart a dull tone. Quotations are nevertheless considerably higher than a week ago, but there is still a decided disinclination on the part of home operators to increase their commitments to any great extent. The Baltimore and Ohio Company defaulted on the 1st inst. on its main line sterling loan, and an early reorganisation scheme is looked for. Canadian Pacific shares were firmer in sympathy with the American market, and a good traffic return, coupled with a satisfactory working statement for March, brought in some buying orders; but the report that the meeting of the trans-continental lines, in order to end the rate war, has been postponed, caused a certain amount of profit-taking.

Apart from Spanish bonds the Foreign market has been a firm one, although the Paris Bourse showed some weakness, especially towards the close of last week. The weakness there seems to have been caused by apprehensions of difficulties at the settlement, but rates came out lighter than had been expected, and the account being satisfactorily arranged a firmer tone was soon apparent. Spanish 4 per cents. have of course been depressed, the news of the defeat of the Spanish fleet at Manila, followed by the proclamation of martial law in Madrid, causing a decline down to the lowest point yet touched. Another reason for the weakness is the continued rise in the Madrid exchange, and the proposal to convert the present external into an internal loan was also viewed unfavourably. Although some few of the other inter-Bourse securities have weakened in sympathy, it has not been to any great extent, and the latest quotations are generally higher on balance. Brazilian bonds continue their upward move, the visit of the vice-president to Europe being expected to lead to good results. Argentine and Chilian issues have hardened in sympathy, and Peruvian corporation debentures are higher. Mexican stocks have also been in demand, and now stand about on the level of a few weeks back before the heavy fall occurred.

Foreign Railway stocks have been actively dealt in at considerably higher prices, the leading Argentine companies meeting with most support, notably Buenos Ayres and Pacific Prefs. and Central Argentine. Among changes in the adverse direction, a decline of 12½ in Royal Trans-African 5 per cent. First Mortgage bonds is the principal feature. Mexican Railway issues were firmer, owing to the rise in the price of silver, and the subsequent drop in the price of the metal did not cause much of a set-back. Nitrate shares advaneed slightly in spite of a poor traffic return.

Among Miscellaneous securities, Anglo-American Telegraph stocks have been put up, on the idea that the war will benefit the company; and the debentures of several other kindred concerns have risen for no other reason. Welsbach Gas ordinary rose 6 directly the special settlement was got over; Nobel-Dynamite advanced owing to a satisfactory dividend announcement; Coats and English Sewing Cotton shares have again attracted attention, large buying orders coming

from Glasgow; and City Offices 3 per cent. debentures have risen 7 or 8 points. In the Brewery list Guinness shows a rise of 20, and several of the lower-priced American companies' shares have been inquired for. Hotel Cecil preference and debentures fell sharply, owing to the passing of the dividend on the preference; Dumont Coffee issues show a further decline, and United Alkali debentures have been pressed for sale.

The principal feature just at the last was a sharp fall in Consols caused partly by Lord Salisbury's remarks at the Albert Hall, and partly by a poor Bank return. Indian Government stocks also gave way, and left off weak. Among Foreign Government issues Spanish 4 per cents. closed rather above the worst, but still $3\frac{3}{8}$ down on the week, and Rio Tinto shares hardened a little before the close. Argentine and Brazilian bonds fell considerably, and are finally lower than a week ago. United States Railroad shares were actively dealt in on rumours to the effect that Spain had given way, and the last quotations are about the best of the week. Canadian Pacific and Grand Trunk issues closed firm in sympathy.

Mining and Finance Companies.

The South African market has been steady to firm for the greater part of the week, with a duller tendency towards the close. President Kruger's speech at the opening of the Volksraad was considered encouraging, although no indication was given of the nature of forthcoming measures, but it is rumoured that the loan negotiations are progressing satisfactorily. The Paris settlement passing off smoothly, a little support was then forthcoming from that quarter, deep level companies attracting some attention, and most of the better class shares are marked up a little. Western Australian ventures were adversely affected by the state of uncertainty as to whether the various accounts of those mixed up in the Bottomley collapse would be arranged, and during this state of suspense prices crumbled away. It was a relief to all concerned when matters were to a certain extent smoothed over for the time being, but not before several more small failures had been reported. "Northern Terrors" and Market Trust have shed a little more of their already sadly-diminished prices, but a big rise has taken place in Golden Horse Shoe on rumours of some new developments at the mine, and Kalgurli and Hannan's Brown Hill have also gone ahead. There was a more cheerful tone in the general mining market, but no increase in the volume of business. Indian shares keep very steady, and are not often mentioned, although the crushing returns were again good. Copper shares have shown some rather considerable movements, Rio Tinto, after rising steadily, suddenly giving way on a rumour that the Spanish Government intended levying a tax on the metal, and Paris operators taking fright, the price fell sharply.

THE CRÉDIT FONCIER OF FRANCE.

The Governor of this great establishment, which was founded in 1852, and for thirty years stood in the first rank of the most important of those existing in France, is appointed by the Government. The Crédit Foncier was created in order to aid the agricultural population, but it abandoned its primary benevolent character, and, after having undergone several transformations, has become a real bank. Besides its share capital it has issued a debenture capital amounting at the present time to 3,790 million francs nominal value, or 2,051 millions effective value, and possesses a reserve fund of 165 millions. It received the privilege of issuing *obligations à lots* in France at the time of its foundation. It has often been considered by the French to be as trustworthy as the Bank of France itself. Unhappily, it has not been managed with sufficient ability to enable it to maintain its reputation; and during the past fifteen years it has lost its former high position and has become an establishment with no more credit than a secondary bank; investors do not believe that it will ever be able to regain its once prominent standing, and, as a general rule, it no longer enjoys the confidence of French capitalists after having for so long been regarded as the safest of all banks. Space will not allow us to trace here the history of the Crédit Foncier, but we may remind the English investor that its downfall has been brought about solely by its scandalous speculations; and in this we include the speculations in land at Paris and Nice, as well as those conducted on the property market and the Bourse, which have often assumed gigantic proportions. Until the day of its decline, the Crédit Foncier was the main instrument employed by the Government, both under the Third Empire and the Third Republic, for the purpose of influencing the Bourse; and all of the many different ministers who have administered the Financial Department have not only made use of its services, but have scandalously abused them.

But this state of things could not continue indefinitely, and, in 1895, the day came when M. Christophle, the Governor, found it necessary to resign his office in order to avoid revelations perhaps worse than those which had recently been brought to light in the Panama business. The resignation of M. Christophle, who had held the post of Governor for eighteen years, was the direct result of an inquiry made by the Inspectors of Finances into the state of the Crédit Foncier. The responsibility for the irregularities committed under the preceding administration still remains to be explained, but, while we do not in the least take upon ourselves the defence of M. Christophle, we think the Conseil d'Etat is especially blameworthy for having, after due discussion, approved of the statutes submitted to its consideration: for these statutes included the power of dealing in stocks and shares on the Bourse. This was simply equivalent to giving a moral sanction to the future acts, whatever they might be, of this privileged company. For a quarter of a century, it was consequently like an overflowing of the Pactolus; the Crédit Foncier paid enormous dividends to its shareholders running from 15 to 25 per cent., and its shares, of the nominal amount of 500 francs, then only half-paid up, rose above 1,800 francs, the price at which they were exchanged on the Bourse fifteen years ago. The confidence of the public was at that time absolute.

It was only in 1882, at the time that the Crédit Foncier amalgamated with its young rival the Banque Hypothécaire, that its shares were fully paid-up, a sum of twenty-six million francs having been furnished for this purpose by the shareholders of the Banque Hypothécaire. The situation has since altered greatly, and to-day the shares of the Crédit Foncier are obtainable on the market at the much lower price of 660 or 670 francs, and the dividend to be paid to the shareholders for 1897 has just been fixed at twenty-five francs, being a net yield of 3·65 per cent. The real solidity of the Crédit Foncier, however, cannot be doubted; but the shareholders can only expect to increase the present very modest dividend by allowing a new, prudent, honest, and enlightened administration to operate for their benefit. It is indispensable, first of all, that the Government should strictly keep the Crédit Foncier to its true rôle of intermediate agent, and take especial care that the loans of the future are not negotiated without solid security. The confidence of the general public, moreover, has been so much shaken that it can only be restored if the Crédit Foncier renounces its old methods of trying to earn its dividends by means of speculative campaigns. It is absolutely necessary, too, that the new Governor should publish frank and frequent returns showing the real state of business, instead of imitating his precedessor by keeping the true condition of affairs in darkness by issuing ambiguous or incomplete accounts. M. Labeyrie, on the other hand, must, of course, be afforded the necessary time to improve the position as left by M. Christophle. We must say, however, that he appears to have begun the work of amelioration most unfortunately, for last year he instituted two conversions, which were equivalent to a compulsory diminution of interest for the debenture-holders. This has produced a very bad impression, and if M. Labeyrie does not wish to lose his *clientèle* he will avoid such action in the future. An examination of the present situation shows that the rate of interest of the loans of the Crédit Foncier is still too high, compared with the rate of money on the market; and the result is that for four or five years many borrowers have taken advantage of the clause for reimbursement and repaid their debts. That forces the Crédit Foncier to repurchase on the Bourse debentures of a similar amount, and these latter are usually quoted at par; hence there is a loss, which is sometimes serious. The diminution in the employment of the capital and reserves in loans results in an increase in the figure of the securities possessed by the Crédit Foncier, whether they are its own, or only held as guarantees. In 1897, the loans of

that nature amounted only to sixty-two and a half millions, against sixty-six in 1896, and seventy-four in 1895 and 1894. On December 31, 1897, the amount of the loans made with the debenture capital was 3,116 million francs. It is quite clear that the profits of the Crédit Foncier still continue to decrease, and that it has great difficulty in fighting against recent economical transformations. The 3 per cent. debentures, of the same type as those of the railways, constitute a heavy burden of redemption for the Crédit Foncier, and, judging from what is being whispered by many well-informed people, we fear that the bearers of these certificates will, in the very near future, be compelled to submit to another conversion. That is not the right method to aid the Crédit Foncier to regain its ancient prestige with investors; but must, on the contrary, result in an avalanche of *valeurs à lots* being thrown on the market, where the buyers will be very few, as there is very little demand now for that class of investment.

TWO MINOR ELECTRIC LIGHT COMPANIES.

In dealing with the important London electric companies, we did not enter upon the prospects of the two new companies working in the London area—the County of London and Brush and the South London. Their works have been so recently put up that the revenue earned was no criterion of their future ability to produce dividends for their shareholders; and so we did not care to deal with them in conjunction with the dividend-paying concerns.

Of the two the South London appears to us to be a very poorly conceived undertaking. Although styled the South London, it possesses, we believe, only the right to supply energy in the Parish of Lambeth, which is not a great area, nor a very promising one. Indeed, the London Electric Supply, which has been working in the South of London for years, did not think it worth while applying to light more than the extreme northern part of the parish, as the prospects of revenue were so poor in its other parts. Then, to the east of this parish for the greater part of its extent lies Camberwell, through the principal streets of which two other electric companies—the County of London and Brush and the London Electric Supply—are laying their cables, and the local authorities would doubtless object to another company entering the district. To the west lies Battersea, in which the local authority is preparing to supply its own light, and Clapham and Streatham, which are already supplied by the County of London and Brush.

Therefore the South London Company's area is small and is likely to remain so, yet it has raised capital to the extent of £113,556 and will doubtless raise more. The cost of the provisional order and preliminary expenses came to the extravagant figure of £47,649; and the manner in which some of the shares were issued was not at all to our liking. With a poor and restricted district and heavily capitalised, the prospects appear to be very unsatisfactory, and the quotation of a considerable premium for the shares must be esteemed an aberration of the market, misled by the influence of the excellent results obtained by the older companies.

The County of London and Brush has a great part of London to work upon, but it is not by any means the best from a revenue-earning point of view. The districts of Clerkenwell and St. Luke's, with the Holborn district, contain business quarters that may consume a certain amount of energy, especially as the Gas Light and Coke Company has raised its price for gas. The larger area of the company's operation is, however, in the South of London, and here it has built a great station to supply the Putney, Wandsworth, Streatham, Clapham, and Tooting Graveney districts. In those parishes, we believe, it has no competitor at present, but then, of course, gas is supplied by the gas company at 2s. 3d. per thousand feet. The company is also laying mains in the parishes of Camberwell, St. George the Martyr, St. Olave's, and Horsleydown, but here it finds a competitor in the shape of the London Electric Supply Corporation, which has its works at Deptford and is thus well able to supply energy in the South of London. The price charged will have to be low in this South London area, as the moderate price of gas will necessitate cheapness in order to obtain even a footing.

The company certainly showed a fair profit last year, but this was drawn mainly from financial operations and a large profit obtained from the sale of its interest in the Bournemouth and Poole Electricity Supply Company. It has considerable interest in two other provincial companies, but although these are profitable ventures the expenditure required upon the London part of the business quite dwarfs their importance. Meantime, the revenue from the two London stations at work has so far been very small, and it seems as if revenue in their cases will take time to grow. Capital expenditure on the other districts, however, is going on, and must be provided for, and it is therefore very probable that the premium of 40 per cent. upon the ordinary shares, which have never yet received a dividend, is too high. It may be years yet before a fair dividend is received upon the shares, while the continual expenditure required by the company to protect its districts must lead to fresh issues of capital from time to time.

MINING RETURNS.

Leicester Consolidated.—4,525 loads washed, producing 151 carats.

Weld Hercules.—Crushed 237 tons, produced 198 oz. gold. Tailings 6 dwt. per ton.

Bellevue Proprietary.—196 tons crushed, yielding 417 oz.

Broken Hill Proprietary.—25,019 tons of ore treated, including product from ores purchased, and the output from the refinery was 487,155 oz. silver, 2,390 tons of lead, and 57 tons of antimonial lead (estimated), the copper matte containing 22 tons of copper (estimated) and 22,304 oz. of silver (estimated).

Londonderry.—320 tons crushed for a yield of 582 oz. gold.

Ottos Kopje.—7,786 loads washed, 224 carats of diamonds won.

North Burgess.—Result of last clean up was 232 oz. from 35 tons.

Victoria and Queen.—Partial clean up of 520 tons for 961 oz. gold.

Hauraki.—Crushed 130 tons for 424 oz.

Cuddingwarra.—Crushed during month 334 tons of ore, yielding 288 oz. gold; assay of tailings 20 dwt.

Brilliant.—2,550 tons of stone crushed for a yield of 3,000 oz. gold.

Melbourne Democrat.—Crushed 295 tons of stone for 247 oz. gold, and 115 tons of mullock for 29 oz. of gold.

Pestarena United.—452 tons of ore produced 462 oz. of gold.

Koffyfontein.—Returns for April, 3,151 carats diamonds.

North Boulder.—324 oz. gold from 342 tons crushed.

Lady Shenton.—Crushed 600 tons; yield, 1,760 oz. 14 dwt., including 110 oz. 14 dwt. from plates.

Bonnie Dundee.—Crushed 153 tons of quartz from the Victory Reef (1,090 ft. formation) for 193 oz. of gold, and 184 tons of quartz from the Victory Reef (1,575 ft. formation) for 214 oz. of gold.

Champion Extended and Home Rule.—1,050 tons of ore crushed yielded 821 oz. of gold, including concentrates.
